Transamerica Series Trust Semi-Annual Report

June 30, 2023

1801 California St., Suite 5200

Denver, CO 80202

Distributor: Transamerica Capital, Inc.

Customer Service: 1-800-851-9777

The following pages contain the most recent semi-annual reports for the investment options in which you are invested. In compliance with Securities and Exchange Commission regulations, we present these reports on an annual and semi-annual basis with the hope that they will foster greater understanding of the investment options' holdings, performance, financial data, accounting policies and other issues. This streamlined version provides information only on the investment options in which you are invested.

If you have any questions about these reports, please do not hesitate to contact your financial professional. As always, we thank you for your trust and the opportunity to serve you.

Dear Contract Holder,

On behalf of Transamerica Series Trust, we would like to thank you for your continued support and confidence in our products as we look forward to continuing to serve you and your financial professional in the future. We value the trust you have placed in us.

This semi-annual report provides certain information about the investments of your Portfolio(s) during the period covered by the report. The Securities and Exchange Commission currently requires that annual and semi-annual reports be made available to all shareholders, and we believe this to be an important part of the investment process. This report provides detailed information about your Portfolio(s) for the six-month period ended June 30, 2023.

We believe it is important to understand market conditions over the last six months to provide a context for reading this report. The period began on January 1, 2023, following a calendar year where both stocks and bonds declined. Contributing to the deeply negative investor sentiment at this time were fears of persistently high inflation, uncertainty as to how high the U.S. Federal Reserve ("Fed") would raise interest rates to combat inflation and the threat of a potentially severe recession on the horizon.

Stocks began 2023 with gains through the month of January as the Fed moved to a lower trajectory of rate hikes and inflation rates trended lower. However, in March, the equity and credit markets were blindsided by the failures of Silicon Valley Bank and Signature Bank, which experienced massive depositor withdrawals in a matter of days, as word spread of grave asset-liability mismanagement and deteriorating balance sheets at these two banks. Almost simultaneously in Europe, Credit Suisse was forced to accept a rescue acquisition by UBS, further adding to global volatility.

To address growing concerns in the financial sector and overall economy, the Fed, U.S. Treasury Department and Federal Deposit Insurance Corporation collaborated in an effort to guarantee deposits at the two failed U.S. banks and implement the Bank Term Funding Plan, with the goal of assuring credit and liquidity across the banking industry to help avert further closures. This quick governmental response proved crucial to restoring depositor and investor confidence, and markets quickly stabilized.

Despite what appeared to be a relief rally in stocks throughout the spring months, the yield curve remained solidly inverted in fixed income markets, with short term interest rates higher than long term rates, a widely recognized historical warning signal of pending recession. As the Fed continued to hike rates in March and again in May, longer term interest rates remained rangebound, creating the widest yield curve inversion in more than forty years and sending a large portion of bond investors into certificates of deposits and other cash type vehicles.

As markets approached mid-year, sentiment began to shift materially on a few fronts. First, with rates of inflation continuing to trend lower in response to the Fed's long series of rate hikes, investors seemed to believe peak inflation had passed. Second, markets also began to recognize the Fed was now much closer to ending its rate hike cycle, and when the Fed refrained from increasing the Fed funds rate at its June meeting this appeared to confirm that notion. Third, with monthly job growth showing continued strength and consumer spending trends solid, the overall economic outlook shifted away from higher probabilities of a severe recession and more toward a moderate one, or a soft landing with no recession. Finally, corporate earnings reports filtered in better than expected, further encouraging investors, and the markets finished the period having experienced positive total returns in bonds and strong price appreciation for stocks.

For the six-month period ended June 30, 2023, the S&P 500® Index returned 16.89%, while the MSCI EAFE Index, representing international developed market equities, returned 12.13%. During the same period, the Bloomberg US Aggregate Bond Index returned 2.09%. Please keep in mind that it is important to maintain a diversified portfolio as investment returns have historically been difficult to predict.

In addition to your active involvement in the investment process, we firmly believe that a financial professional is a key resource to help you build a complete picture of your current and future financial needs. Financial professionals are familiar with the market's history, including long-term returns and volatility of various asset classes. With your financial professional, you can develop an investment program that incorporates factors such as your goals, your investment timeline, and your risk tolerance.

Please contact your financial professional if you have any questions about the contents of this report, and thanks again for the confidence you have placed in us.

Sincerely,

Marijn Smit
President & Chief Executive Officer
Transamerica Series Trust

Tom Wald, CFA
Chief Investment Officer
Transamerica Series Trust

Bloomberg US Aggregate Bond Index: Measures investment grade, U.S. dollar denominated, fixed-rate taxable bonds, including Treasuries, government-related and corporate securities, as well as both mortgage- and asset-backed securities.

MSCI EAFE Index: A free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada.

S&P 500® Index: A market-capitalization weighted index of 500 large U.S. companies with common stock listed on the New York Stock Exchange or NASDAQ Stock Market.

The views expressed in this report reflect those of the portfolio managers only and may not necessarily represent the views of Transamerica Series Trust. These views are as of the date of this report and subject to change based upon market conditions. These views should not be relied upon as investment advice and are not indicative of trading intent on behalf of Transamerica Series Trust. Investing involves risk, including potential loss of principal. The performance data presented represents past performance and does not guarantee future results. Indexes are unmanaged and it is not possible to invest directly in an index.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Service Class	$ 1,000.00	$ 1,097.30	$ 2.39	$ 1,022.50	$ 2.31	0.46%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica 60/40 Allocation VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

NOTES TO FINANCIAL STATEMENTS (continued)

(unaudited)

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The Investment Manager's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying portfolios may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the Investment Manager's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying portfolio or other issuer is incorrect. The available underlying portfolios selected by the Investment Manager may underperform the market or similar portfolios.

Underlying portfolios risk: Because the Portfolio invests its assets in various underlying portfolios, its ability to achieve its investment objective depends largely on the performance of the underlying portfolios in which it invests. Investing in underlying portfolios subjects the Portfolio to the risks of investing in the underlying securities or assets held by those underlying portfolios. Each of the underlying portfolios in which the Portfolio may invest has its own investment risks, and those risks can affect the value of the underlying portfolios' shares and therefore the value of the Portfolio's investments. There can be no assurance that the investment objective of any underlying portfolio will be achieved. To the extent that the Portfolio invests more of its assets in one underlying portfolio than in another, the Portfolio will have greater exposure to the risks of that underlying portfolio. In addition, the Portfolio will bear a pro rata portion of the operating expenses of the underlying portfolios in which it invests. The "List and Description of Underlying Portfolios" section of the Portfolio's prospectus identifies certain risks of each underlying portfolio.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	Rate
First $1 billion	0.30%
Over $1 billion	0.28

[(A)] *TAM has contractually agreed to waive 0.18% of the average daily net assets from its management fee through May 1, 2024.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	0.63%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc (“SS&C”). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 9,271,002	$ 1,761,243

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 56,219,663	$ 5,758,093	$ (808,782)	$ 4,949,311

MANAGEMENT AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica 60/40 Allocation VP (the “Portfolio”).

Following its review and consideration, the Board determined that the terms of the Management Agreement were reasonable and that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of the Management Agreement through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Management Agreement, including information they had previously received from TAM as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. The Board also considered reductions to the Portfolio’s expense limit, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of the Management Agreement, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; and TAM’s responsiveness to any questions by the Trustees.

The Board also considered the continuous and regular investment management and other services provided by TAM. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio’s benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM can provide investment and related services that are appropriate in scope and extent in light of the Portfolio’s investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board’s conclusions as to the Portfolio’s performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio’s performance relative to its peer universe, the summary conclusions characterize performance for the relevant period in relation to whether it was “above,” “below” or “in line with” the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as “above” the median if the Portfolio’s performance ranked anywhere in the first or second quintiles, as “below” the median if it ranked anywhere in the fourth or fifth quintiles, or “in line with” the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe and above its composite benchmark, each for the past 1- and 3-year periods.

Management Fee and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board noted that the Portfolio's contractual management fee was in line with the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management fee to be received by TAM under the Management Agreement is reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM may not directly correlate with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM in light of any economies of scale experienced in the future.

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

Benefits to TAM and/or its Affiliates from their Relationships with the Portfolio

The Board considered other benefits derived by TAM and/or its affiliates from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as “soft dollars”) as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Management Agreement.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,026.10	$ 2.61	$ 1,022.20	$ 2.61	0.52%
Service Class	1,000.00	1,024.20	3.86	1,021.00	3.86	0.77

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $742,651,508, representing 35.2% of the Portfolio's net assets.*

(B) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

Transamerica Aegon Bond VP

SCHEDULE OF INVESTMENTS (continued)
At June 30, 2023
(unaudited)

FOOTNOTES TO SCHEDULE OF INVESTMENTS (continued):

(C) *All or a portion of the securities are on loan. The total value of all securities on loan is $21,972,021, collateralized by cash collateral of $21,589,835 and non-cash collateral, such as U.S. government securities and irrevocable letters of credit, of $844,470. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(D) *Perpetual maturity. The date displayed is the next call date.*

(E) *Securities are exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Securities may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At June 30, 2023, the total value of Regulation S securities is $11,731,329, representing 0.6% of the Portfolio's net assets.*

(F) *When-issued, delayed-delivery and/or forward commitment (including TBAs) security. Security to be settled and delivered after June 30, 2023. Security may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*

(G) *Securities are subject to sale-buyback transactions. The average amount of sale-buybacks outstanding during the period ended June 30, 2023 was $0 at a weighted average interest rate of 0.00%.*

(H) *Rates disclosed reflect the yields at June 30, 2023.*

(I) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

STATEMENT OF ASSETS AND LIABILITIES
At June 30, 2023
(unaudited)

Assets:	
Investments, at value (cost $2,143,436,478) (including securities loaned of $21,972,021)	$ 2,129,226,256
Repurchase agreement, at value (cost $24,048,302)	24,048,302
Cash	90,888
Cash collateral pledged at broker for:	
TBA commitments	555,000
Centrally cleared swap agreements	6,000
Receivables and other assets:	
Investments sold	58,645,451
Net income from securities lending	36,916
Shares of beneficial interest sold	105,996
Interest	16,385,586
Variation margin receivable on centrally cleared swap agreements	31
Prepaid expenses	9,154
Total assets	2,229,109,580
Liabilities:	
Cash collateral received upon return of:	
Securities on loan	21,589,835
Payables and other liabilities:	
When-issued, delayed-delivery, forward and TBA commitments purchased	96,412,476
Shares of beneficial interest redeemed	118,468
Investment management fees	849,621
Distribution and service fees	107,000
Transfer agent costs	411
Trustee and CCO fees	898
Audit and tax fees	33,855
Custody fees	112,486
Legal fees	17,572
Printing and shareholder reports fees	16,182
Other accrued expenses	23,761
Total liabilities	119,282,565
Net assets	$ 2,109,827,015
Net assets consist of:	
Capital stock ($0.01 par value)	$ 2,246,003
Additional paid-in capital	2,339,088,037
Total distributable earnings (accumulated losses)	(231,507,025)
Net assets	$ 2,109,827,015
Net assets by class:	
Initial Class	$ 1,592,064,197
Service Class	517,762,818
Shares outstanding:	
Initial Class	169,009,115
Service Class	55,591,188
Net asset value and offering price per share:	
Initial Class	$ 9.42
Service Class	9.31

STATEMENT OF OPERATIONS
For the period ended June 30, 2023
(unaudited)

Investment Income:	
Interest income	$ 46,536,597
Net income from securities lending	126,299
Total investment income	46,662,896
Expenses:	
Investment management fees	4,518,780
Distribution and service fees:	
Service Class	666,145
Transfer agent costs	9,618
Trustee and CCO fees	31,932
Audit and tax fees	35,943

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Aegon Bond VP (formerly, Transamerica PIMCO Total Return VP) (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels.

The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

3. INVESTMENT VALUATION (continued)

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Commercial paper: Commercial paper is valued using amortized cost, which approximates fair value. The values are generally categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Short-term notes: The Portfolio normally values short-term government and U.S. government agency securities using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued by principally using dealer quotations. Short-term government and U.S. government agency securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

4. SECURITIES AND OTHER INVESTMENTS (continued)

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Sale-buyback: The Portfolio may enter into sale-buyback financing transactions. The Portfolio accounts for sale-buyback financing transactions as borrowing transactions and realize gains and losses on these transactions at the end of the roll period. Sale-buyback financing transactions involve sales by the Portfolio of securities and simultaneously contracts to repurchase the same or substantially similar securities at an agreed upon price and date.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The Portfolio forgoes principal and interest paid during the roll period on the securities sold in a sale-buyback financing transaction. The Portfolio is compensated by the difference between the current sales price and the price for the future purchase (often referred to as the "price drop"), as well as by any interest earned on the proceeds of the securities sold. Sale-buyback financing transactions may be renewed with a new sale and a repurchase price and a cash settlement made at each renewal without physical delivery of the securities subject to the contract. Sale-buyback financing transactions expose the Portfolio to risks such as, the buyer under the agreement may file for bankruptcy, become insolvent, or otherwise default on its obligations to the Portfolio, the market value of the securities the Portfolio is obligated to repurchase under the agreement may decline below the repurchase price. The Portfolio's obligations under a sale-buyback typically would be offset by liquid assets equal in value to the amount of the Portfolio's forward commitment to repurchase the subject security. Sale-buyback financing transactions accounted for as borrowing transactions are excluded from the Portfolio's portfolio turnover rates. The Portfolio recognizes price drop fee income on a straight line basis over the period of the roll. For the period ended June 30, 2023, the Portfolio earned price drop fee income of $0. The price drop fee income is included in Interest income within the Statement of Operations.

The outstanding payable for securities to be repurchased, if any, is included in Payable for sale-buyback financing transactions within the Statement of Assets and Liabilities. The interest expense is included within Interest income on the Statement of Operations. In periods of increased demand of the security, the Portfolio may receive a fee for use of the security by the counterparty, which may result in interest income to the Portfolio, and is included in Interest income on the Statement of Operations.

Open sale-buyback financing transactions at June 30, 2023, if any, are identified within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Corporate Debt Securities	$ 20,542,405	$ —	$ —	$ —	$ 20,542,405
U.S. Government Obligations	1,047,430	—	—	—	1,047,430
Total Securities Lending Transactions	$ 21,589,835	$ —	$ —	$ —	$ 21,589,835
Total Borrowings	**$ 21,589,835**	**$ —**	**$ —**	**$ —**	**$ 21,589,835**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Swap agreements: Swap agreements are bilaterally negotiated agreements between the Portfolio and a counterparty to exchange or swap investments, cash flows, assets, foreign currencies, or market-linked returns at specified, future intervals. Swap agreements can be executed in a bilateral privately negotiated arrangement with a dealer in an OTC transaction or executed on a regular market. Certain swaps regardless of the venue of execution are required to be cleared through a clearinghouse ("centrally cleared swap agreements"). Centrally cleared swap agreements listed or traded on a multilateral platform, are valued at the daily settlement price determined by the corresponding exchange. For centrally cleared credit default swap agreements the clearing exchange requires all members to provide applicable levels across complete term levels. Centrally cleared interest rate swap agreements are valued using a pricing model that references the underlying rates including but not limited to the overnight index swap rate and London Interbank Offered Rate ("LIBOR") forward rate to calculate the daily settlement price. The Portfolio may enter into credit default, cross-currency, interest rate, total return, including contracts for difference ("CFD"), and other forms of swap agreements to manage exposure to credit, currency, interest rate, and commodity risks. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Centrally cleared swap agreements are marked-to-market daily based upon values from third party vendors, which may include a registered exchange, or quotations from market makers to the extent available and the change in value, if any, is recorded as Variation margin receivable (payable) on centrally cleared swap agreements within the Statement of Assets and Liabilities.

For OTC swap agreements, payments received or made at the beginning of the measurement period are reflected in OTC swap agreements, at value within the Statement of Assets and Liabilities and represent payments made or received upon entering into the swap agreements to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Additionally, these upfront payments as well as any periodic payments received or paid by the Portfolio, including any liquidation payment received or made at the termination of the swap are recorded as part of Net realized gain (loss) on swap agreements within the Statement of Operations.

Credit default swap agreements: The Portfolio is subject to credit risk in the normal course of pursuing its investment objective. The Portfolio enters into credit default swap agreements to manage its exposure to the market or certain sectors of the market to reduce its

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

risk exposure to defaults of corporate and sovereign issuers, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. Credit default swap agreements involve the exchange of a fixed rate premium for protection against the loss in value of an underlying security in the event of a defined credit event, such as payment default or bankruptcy (buy protection).

Under a credit default swap agreement, one party acts as a guarantor by receiving the fixed periodic payment in exchange for the commitment to purchase the underlying security at par if the defined credit event occurs (sell protection). The Portfolio's maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the notional amount of the contract. This risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty, and by the posting of collateral.

The Portfolio sells credit default swap agreements, which exposes it to risk of loss from credit risk related events specified in the contracts. Although contract-specific, credit events are generally defined as bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. If a defined credit event had occurred during the period, the swap agreements' credit-risk-related contingent features would have been triggered, and the Portfolio would have been required to pay the notional amounts for the credit default swap agreements with a sell protection less the value of the contracts' related reference obligations.

Open centrally cleared swap agreements and open OTC swap agreements at June 30, 2023, if any, are listed within the Schedule of Investments.

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

Transamerica Aegon Bond VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. RISK FACTORS (continued)

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Credit risk: If an issuer or other obligor (such as a party providing insurance or other credit enhancement) of a security held by the Portfolio or a counterparty to a financial contract with the Portfolio is unable or unwilling to meet its financial obligations, or is downgraded or perceived to be less creditworthy (whether by market participants or otherwise), or if the value of any underlying assets declines, the value of your investment will typically decline. A decline may be rapid and/or significant, particularly in certain market environments. In addition, the Portfolio may incur costs and may be hindered or delayed in enforcing its rights against an issuer, obligor or counterparty.

Fixed-income securities risk: Risks of fixed-income securities include credit risk, interest rate risk, counterparty risk, prepayment risk, extension risk, valuation risk, and liquidity risk. The value of fixed-income securities may go up or down, sometimes rapidly and unpredictably, due to general market conditions, such as real or perceived adverse economic or political conditions, tariffs and trade disruptions, inflation, changes in interest rates, lack of liquidity in the bond markets or adverse investor sentiment. In addition, the value of a fixed-income security may decline if the issuer or other obligor of the security fails to pay principal and/or interest, otherwise defaults or has its credit rating downgraded or is perceived to be less creditworthy, or the credit quality or value of any underlying assets declines. If the value of fixed-income securities owned by the Portfolio falls, the value of your investment will go down. The Portfolio may lose its entire investment in the fixed-income securities of an issuer.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.5100%
Over $500 million up to $1 billion	0.4900
Over $1 billion up to $1.5 billion	0.4800
Over $1.5 billion	0.4750

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.72%	May 1, 2024
Service Class	0.97	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 696,379,987	$ 920,812,490	$ 155,193,779	$ 689,205,304

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 2,167,484,780	$ 16,979,671	$ (31,189,893)	$ (14,210,222)

11. NEW ACCOUNTING PRONOUNCEMENT

In December 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-06 ("ASU 2022-06"), "Reference Rate Reform (Topic 848)". ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio's financial statements.

MANAGEMENT AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Aegon Bond VP (formerly, Transamerica PIMCO Total Return VP) (the "Portfolio").

Following its review and consideration, the Board determined that the terms of the Management Agreement were reasonable and that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of the Management Agreement through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Management Agreement, including information they had previously received from TAM as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Management Agreement. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of the Management Agreement, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; and TAM's responsiveness to any questions by the Trustees. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on November 1, 2022 pursuant to its current investment strategies. The Trustees also noted recent changes in the portfolio management team. The Trustees noted that TAM intends to monitor and report to the Board on the portfolio manager transition and performance going forward.

Management Fee and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Portfolio's sub-adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was above the median for its peer group and in line with the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management fee to be received by TAM under the Management Agreement is reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM may not directly correlate with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM in light of any economies of scale experienced in the future.

Benefits to TAM and its Affiliates from their Relationships with the Portfolio

The Board considered other benefits derived by TAM and/or its affiliates from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Portfolio's sub-adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Management Agreement.

Transamerica Aegon Core Bond VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,023.50	$ 2.36	$ 1,022.50	$ 2.36	0.47%
Service Class	1,000.00	1,022.60	3.61	1,021.20	3.61	0.72

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Current and future portfolio holdings are subject to change and risk.

§ *Average Maturity is computed by weighting the maturity of each security in the Portfolio by the market value of the security, then averaging these weighted figures.*

† *Duration is a time measure of a bond's interest rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.*

‡ *Credit quality represents a percentage of net assets at the end of the reporting period. Ratings BBB or higher are considered investment grade. Not rated securities do not necessarily indicate low credit quality, and may or may not be equivalent of investment grade. The table reflects Standard and Poor's ("S&P") ratings; percentages may include investments not rated by S&P but rated by Moody's, or if unrated by Moody's, by Fitch ratings, and then included in the closest equivalent S&P rating. Credit ratings are subject to change. The Portfolio itself has not been rated by an independent agency.*

SCHEDULE OF INVESTMENTS (continued)
At June 30, 2023
(unaudited)

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $99,715,819, representing 20.4% of the Portfolio's net assets.*

(B) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

(C) *Perpetual maturity. The date displayed is the next call date.*

(D) *All or a portion of the securities are on loan. The total value of all securities on loan is $713,063, collateralized by cash collateral of $728,003. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(E) *Percentage rounds to less than 0.1% or (0.1)%.*

(F) *Fair valued as determined in good faith in accordance with procedures established by the Board. At June 30, 2023, the value of the security is $147, representing less than 0.1% of the Portfolio's net assets.*

(G) *Rounds to less than $1 or $(1).*

(H) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*

(I) *Rates disclosed reflect the yields at June 30, 2023.*

(J) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Aegon Core Bond VP (formerly, Transamerica JPMorgan Core Bond VP) (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Cash overdraft: The Portfolio may have cash overdraft balances. A fee is incurred on these overdrafts, calculated by multiplying the overdraft by a rate based on the Federal Funds Rate.

Payables, if any, are reflected as Due to custodian within the Statement of Assets and Liabilities. Expenses, if any, from U.S. cash overdrafts are reflected in Custody fees within the Statement of Operations. Expenses, if any, from foreign cash overdrafts are reflected in Other expenses within the Statement of Operations.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

3. INVESTMENT VALUATION (continued)

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

3. INVESTMENT VALUATION (continued)

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

Commercial paper: Commercial paper is valued using amortized cost, which approximates fair value. The values are generally categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Short-term notes: The Portfolio normally values short-term government and U.S. government agency securities using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued by principally using dealer quotations. Short-term government and U.S. government agency securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

Treasury inflation-protected securities ("TIPS"): The Portfolio may invest in TIPS, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds and notes. For bonds and notes that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2023, if any, are included within the Schedule of Investments. The adjustments, if any, to principal due to inflation/deflation are reflected as increases/decreases to Interest income within the Statement of Operations, with a corresponding adjustment to Investments, at cost within the Statement of Assets and Liabilities.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding,

4. SECURITIES AND OTHER INVESTMENTS (continued)

the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Corporate Debt Securities	$ 728,003	$ —	$ —	$ —	$ 728,003
Total Borrowings	**$ 728,003**	**$ —**	**$ —**	**$ —**	**$ 728,003**

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. RISK FACTORS (continued)

Fixed-income securities risk: Risks of fixed-income securities include credit risk, interest rate risk, counterparty risk, prepayment risk, extension risk, valuation risk, and liquidity risk. The value of fixed-income securities may go up or down, sometimes rapidly and unpredictably, due to general market conditions, such as real or perceived adverse economic or political conditions, tariffs and trade disruptions, inflation, changes in interest rates, lack of liquidity in the bond markets or adverse investor sentiment. In addition, the value of a fixed-income security may decline if the issuer or other obligor of the security fails to pay principal and/or interest, otherwise defaults or has its credit rating downgraded or is perceived to be less creditworthy, or the credit quality or value of any underlying assets declines. If the value of fixed-income securities owned by the Portfolio falls, the value of your investment will go down. The Portfolio may lose its entire investment in the fixed-income securities of an issuer.

Interest rate risk: The value of fixed-income securities generally goes down when interest rates rise. A rise in rates tends to have a greater impact on the prices of longer term or duration securities. Changes in interest rates also may affect the liquidity of the Portfolio's investments. A general rise in interest rates may cause investors to sell fixed-income securities on a large scale, which could adversely affect the price and liquidity of fixed-income securities generally and could also result in increased redemptions from the Portfolio. Increased redemptions could cause the Portfolio to sell securities at inopportune times or depressed prices and result in further losses.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $1 billion	0.420%
Over $1 billion up to $2 billion	0.380
Over $2 billion up to $3.5 billion	0.365
Over $3.5 billion up to $5 billion	0.360
Over $5 billion	0.355

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.57%	May 1, 2024
Service Class	0.83	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 119,901,738	$ 154,180,262	$ 61,761,944	$ 135,762,207

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 548,931,363	$ 3,480,792	$ (10,106,786)	$ (6,625,994)

10. NEW ACCOUNTING PRONOUNCEMENTS

In June 2022, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

In December 2022, FASB issued Accounting Standards Update No. 2022-06 ("ASU 2022-06"), "Reference Rate Reform (Topic 848)". ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for

10. NEW ACCOUNTING PRONOUNCEMENTS (continued)

a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio's financial statements.

MANAGEMENT AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Aegon Core Bond VP (formerly, Transamerica JPMorgan Core Bond VP) (the "Portfolio").

Following its review and consideration, the Board determined that the terms of the Management Agreement were reasonable and that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of the Management Agreement through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Management Agreement, including information they had previously received from TAM as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Management Agreement. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of the Management Agreement, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; and TAM's responsiveness to any questions by the Trustees. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-year period, in line with the median for the past 3- and 5-year periods and below median for the past 10-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was above its benchmark for the past 1-year period and below its benchmark for the past 3-, 5- and 10-year periods. The Trustees noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on November 1, 2022 pursuant to its current investment objective and investment strategies.

Management Fee and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Portfolio's sub-adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the median for its peer group and in line with the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management fee to be received by TAM under the Management Agreement is reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM may not directly correlate with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM in light of any economies of scale experienced in the future.

Benefits to TAM and its Affiliates from their Relationships with the Portfolio

The Board considered other benefits derived by TAM and/or its affiliates from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Portfolio's sub-adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Management Agreement.

Transamerica Aegon High Yield Bond VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,041.90	$ 3.24	$ 1,021.60	$ 3.21	0.64%
Service Class	1,000.00	1,041.00	4.50	1,020.40	4.46	0.89

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *All or a portion of the securities are on loan. The total value of all securities on loan is $18,163,364, collateralized by cash collateral of $18,445,435 and non-cash collateral, such as U.S. government securities and irrevocable letters of credit, of $100,103. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(B) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $129,244,335, representing 69.4% of the Portfolio's net assets.*

(C) *Perpetual maturity. The date displayed is the next call date.*

(D) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

(E) *Fair valued as determined in good faith in accordance with procedures established by the Board. At June 30, 2023, the total value of securities is $572,647, representing 0.3% of the Portfolio's net assets.*

(F) *Securities deemed worthless.*

(G) *Securities are Level 3 of the fair value hierarchy.*

(H) *Payment in-kind. Securities pay interest or dividends in the form of additional bonds or preferred stock. If the securities make a cash payment in addition to in-kind, the cash rate is disclosed separately.*

(I) *Restricted securities. At June 30, 2023, the value of such securities held by the Portfolio are as follows:*

Investments	Description	Acquisition Date	Acquisition Cost	Value	Value as Percentage of Net Assets
Corporate Debt Securities	Tenet Healthcare Corp. 6.13%, 06/15/2030	06/01/2022	$ 451,000	$ 444,370	0.2%
Corporate Debt Securities	Constellium SE 5.88%, 02/15/2026	10/28/2020 - 12/13/2021	1,690,791	1,622,414	0.9
Loan Assignments	Anchor Glass Container Corp. Term Loan, 12/07/2023	05/18/2023	695,625	665,000	0.4
Total			**$ 2,837,416**	**$ 2,731,784**	**1.5%**

(J) *Step bond. Coupon rate changes in increments to maturity. The rate disclosed is as of June 30, 2023; the maturity date disclosed is the ultimate maturity date.*

(K) *All or a portion of the security represents unsettled loan commitments at June 30, 2023 where the rate will be determined at time of settlement.*

(L) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*

(M) *Percentage rounds to less than 0.1% or (0.1)%.*

(N) *Non-income producing securities.*

(O) *Rates disclosed reflect the yields at June 30, 2023.*

(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Aegon High Yield Bond VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Loan assignments: Loan assignments are normally valued using an income approach, which projects future cash flows and converts those future cash flows to a present value using a discount rate. The resulting present value reflects the likely fair value of the loan. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise are categorized in Level 3.

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not

3. INVESTMENT VALUATION (continued)

applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Warrants: Warrants may be priced intrinsically using a model that incorporates the subscription or strike price, the daily market price for the underlying security, and a subscription ratio. If the inputs are unavailable, or if the subscription or strike price is higher than the market price, then the warrants are priced at zero. Warrants are generally categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Restricted securities: Restricted securities for which quotations are not readily available are valued at fair value. Restricted securities issued by publicly traded companies are generally valued at a discount to similar publicly traded securities. Restricted securities issued by nonpublic entities may be valued by reference to comparable public entities and/or fundamental data relating to the issuer. Depending on the relative significance of observable valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Loan participations and assignments: The Portfolio may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers, either in the form of participations at the time the loan is originated (“Participations”) or buying an interest in the loan in the secondary market from a financial institution or institutional investor (“Assignments”). Participations and Assignments in commercial loans may be secured or unsecured. These investments may include standby financing commitments, including revolving credit facilities that obligate the Portfolio to supply additional cash to the borrowers on demand. Loan Participations and Assignments involve risks of insolvency of the lending banks or other financial intermediaries. As such, the Portfolio assumes the credit risks associated with the corporate borrowers and may assume the credit risks associated with the interposed banks or other financial intermediaries.

The Portfolio, based on its ability to invest in Loan Participations and Assignments, may be contractually obligated to receive approval from the agent banks and/or borrowers prior to the sale of these investments. The Portfolio that participates in such syndications, or that can buy a portion of the loans, become part lenders. Loans are often administered by agent banks acting as agents for all holders.

The agent banks administer the terms of the loans, as specified in the loan agreements. In addition, the agent banks are normally responsible for the collection of principal and interest payments from the corporate borrowers and the apportionment of these payments to the credit of all institutions that are parties to the loan agreements. Unless the Portfolio has direct recourse against the corporate borrowers under the terms of the loans or other indebtedness, the Portfolio may have to rely on the agent banks or other financial intermediaries to apply appropriate credit remedies against corporate borrowers.

The Portfolio held no unfunded loan participations at June 30, 2023. Open funded loan participations and assignments at June 30, 2023, if any, are included within the Schedule of Investments.

Payment in-kind (“PIK”) securities: PIKs give the issuer the option of making interest payments in either cash or additional debt securities at each interest payment date. Those additional debt securities usually have the same terms, including maturity dates and interest rates, and associated risks as the original bonds. The daily market quotations of the original bonds may include the accrued interest (referred to as a “dirty price”) and require a pro-rata adjustment from Total distributable earnings (loss) to Interest within the Statement of Assets and Liabilities.

4. SECURITIES AND OTHER INVESTMENTS (continued)

PIKs held at June 30, 2023, if any, are identified within the Schedule of Investments.

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

Restricted securities: The Portfolio may invest in unregulated restricted securities. Restricted securities are subject to legal or contractual restrictions on resale. Restricted securities generally may be resold in transactions exempt from registration under the Securities Act of 1933.

Restricted securities held at June 30, 2023, if any, are identified within the Schedule of Investments.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Corporate Debt Securities	$ 18,443,268	$ —	$ —	$ —	$ 18,443,268
Warrants	2,167	—	—	—	2,167
Total Securities Lending Transactions	$ 18,445,435	$ —	$ —	$ —	$ 18,445,435
Total Borrowings	**$ 18,445,435**	**$ —**	**$ —**	**$ —**	**$ 18,445,435**

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Credit risk: If an issuer or other obligor (such as a party providing insurance or other credit enhancement) of a security held by the Portfolio or a counterparty to a financial contract with the Portfolio is unable or unwilling to meet its financial obligations, or is downgraded or perceived to be less creditworthy (whether by market participants or otherwise), or if the value of any underlying assets declines, the value of your investment will typically decline. A decline may be rapid and/or significant, particularly in certain market environments. In addition, the Portfolio may incur costs and may be hindered or delayed in enforcing its rights against an issuer, obligor or counterparty.

High-yield debt securities risk: High-yield debt securities, commonly referred to as "junk" bonds, are securities that are rated below "investment grade" or are of comparable quality. Changes in interest rates, the market's perception of the issuers, the creditworthiness of the issuers and negative perceptions of the junk bond market generally may significantly affect the value of these bonds. Junk bonds are considered speculative, tend to be volatile, typically have a higher risk of default, tend to be less liquid and more difficult to value than higher grade securities, and may result in losses for the Portfolio.

Interest rate risk: The value of fixed-income securities generally goes down when interest rates rise. A rise in rates tends to have a greater impact on the prices of longer term or duration securities. Changes in interest rates also may affect the liquidity of the Portfolio's investments. A general rise in interest rates may cause investors to sell fixed-income securities on a large scale, which could adversely affect the price and liquidity of fixed-income securities generally and could also result in increased redemptions from the Portfolio. Increased redemptions could cause the Portfolio to sell securities at inopportune times or depressed prices and result in further losses.

6. RISK FACTORS (continued)

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

TAM has entered into a sub-advisory agreement with Aegon USA Investment Management, LLC ("AUIM"), an affiliate of TAM. AUIM provides day-to-day portfolio management services to the Portfolio, subject to the supervision of TAM. TAM is responsible for compensating the sub-adviser for its services.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, AUIM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First \$1.25 billion	0.554%
Over \$1.25 billion up to \$2 billion	0.544
Over \$2 billion	0.520

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.70%	May 1, 2024
Service Class	0.95	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 19,250,426	$ —	$ 22,136,996	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 225,361,383	$ 1,443,545	$ (24,298,890)	$ (22,855,345)

10. NEW ACCOUNTING PRONOUNCEMENTS

In June 2022, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

In December 2022, FASB issued Accounting Standards Update No. 2022-06 ("ASU 2022-06"), "Reference Rate Reform (Topic 848)". ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio's financial statements.

Transamerica Aegon High Yield Bond VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Aegon High Yield Bond VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Aegon USA Investment Management, LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was in line with the median for its peer universe for the past 10-year period and below the median for the past 1-, 3- and 5-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was below its benchmark for the past 1-, 3-, 5- and 10-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

With respect to the Sub-Adviser, the Board noted that information about the Sub-Adviser's revenues and expenses was incorporated into the profitability analysis for TAM and its affiliates with respect to the Portfolio. As a result, the Board focused on profitability information for TAM and its affiliates and the Sub-Adviser in the aggregate.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Aegon Sustainable Equity Income VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,014.20	$ 3.55	$ 1,021.30	$ 3.56	0.71%
Service Class	1,000.00	1,013.10	4.79	1,020.00	4.81	0.96

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Transamerica Aegon Sustainable Equity Income VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Aegon Sustainable Equity Income VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Transamerica Aegon Sustainable Equity Income VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

3. INVESTMENT VALUATION (continued)

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**

Common Stocks	$ 1,357,020	$ —	$ —	$ —	$ 1,357,020
Total Borrowings	**$ 1,357,020**	**$ —**	**$ —**	**$ —**	**$ 1,357,020**

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Dividend paying stock risk: There can be no assurance that the issuers of the stocks held by the Portfolio will pay dividends in the future or that, if dividends are paid, they will not decrease. The Portfolio's emphasis on dividend paying stocks could cause the Portfolio's share price and total return to fluctuate more than, or cause the Portfolio to underperform, similar portfolios that invest without

6. RISK FACTORS (continued)

consideration of an issuer's track record of paying dividends or ability to pay dividends in the future. Dividend-paying stocks tend to go through cycles of over- or under-performing the stock market in general.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

Sustainability investing risk: Applying sustainability criteria to the sub-adviser's investment analysis for the Portfolio may impact the sub-adviser's investment decisions as to securities of certain issuers and, therefore, the Portfolio may forgo some investment opportunities available to funds that do not apply sustainability investing principals or that apply different sustainability criteria. Applying sustainability criteria may impact the Portfolio's exposure to risks associated with certain issuers, asset classes, industries and sectors, which may impact the Portfolio's investment performance. The relevance and weightings of sustainability criteria to the sub-adviser's investment process may vary significantly across issuers, asset classes, industries and sectors. Securities of companies meeting the sub-adviser's sustainability criteria at the time of investment may shift into and out of favor depending on market and economic conditions, and a company's sustainability practices, or the sub-adviser's assessment of such practices, may change over time. The Portfolio's performance may at times be better or worse than the performance of similar funds that do not utilize sustainability investing principals or that apply different sustainability criteria. "Sustainability" is not a uniformly defined characteristic and applying sustainability criteria involves subjective assessments. There may be significant differences in views in what constitutes positive or negative sustainability characteristics of a company. The sub-adviser's sustainability assessment of a company may differ from that of other funds or investors. The Portfolio's investments may include securities of issuers that derive revenue from non-sustainable activities. Sustainability ratings and assessments of issuers can vary across third party data providers, and sustainability data may be incomplete, delayed, inaccurate or unavailable, which could lead to an incorrect assessment of a company's sustainability characteristics. Data inputs may include information self-reported by companies or from third party data providers. Regulation of sustainability investing in the U.S. and abroad is evolving. Regulatory change regarding the definition and/or use of sustainability criteria could have a material adverse effect on the Portfolio's ability to invest in accordance with its sustainability strategy.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

With respect to the Portfolio TAM has entered into a sub-advisory agreement with Aegon Asset Management UK plc ("AAM UK"), a wholly-owned subsidiary of Aegon NV. AAM UK provides day-to-day portfolio management services to the Portfolio, subject to the supervision of TAM. TAM is responsible for compensating the sub-adviser for its services.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.663%
Over $500 million up to $1 billion	0.580
Over $1 billion up to $1.5 billion	0.550
Over $1.5 billion	0.530

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.73%	May 1, 2024
Service Class	0.98	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 23,395,217	$ —	$ 60,491,570	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 480,299,203	$ 64,388,525	$ (36,565,489)	$ 27,823,036

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica Aegon Sustainable Equity Income VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Aegon Asset Management UK plc (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on December 1, 2020 pursuant to its current investment strategies. The Trustees observed that the performance of the Portfolio had improved during the first quarter of 2023.

Management Fee and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that information about the Sub-Adviser's revenues and expenses was incorporated into the profitability analysis for TAM and its affiliates with respect to the Portfolio. As a result, the Board focused on profitability information for TAM and its affiliates and the Sub-Adviser in the aggregate.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM and its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Aegon U.S. Government Securities VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,014.60	$ 3.00	$ 1,021.80	$ 3.01	0.60%
Service Class	1,000.00	1,014.00	4.24	1,020.60	4.26	0.85

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Current and future portfolio holdings are subject to change and risk.

^ *The Net Other Assets (Liabilities) category may include, but is not limited to, reverse repurchase agreements, forward foreign currency contracts, futures contracts, swap agreements, written options and swaptions, and cash collateral.*

§ *Average Maturity is computed by weighting the maturity of each security in the Portfolio by the market value of the security, then averaging these weighted figures.*

† *Duration is a time measure of a bond's interest rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.*

‡ *Credit quality represents a percentage of net assets at the end of the reporting period. Ratings BBB or higher are considered investment grade. Not rated securities do not necessarily indicate low credit quality, and may or may not be equivalent of investment grade. The table reflects Standard and Poor's ("S&P") ratings; percentages may include investments not rated by S&P but rated by Moody's, or if unrated by Moody's, by Fitch ratings, and then included in the closest equivalent S&P rating. Credit ratings are subject to change. The Portfolio itself has not been rated by an independent agency.*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

(B) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $10,201,286, representing 2.9% of the Portfolio's net assets.*

(C) *All or a portion of the securities are on loan. The total value of all securities on loan is $14,373,619, collateralized by cash collateral of $14,666,304. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(D) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*

(E) *Rates disclosed reflect the yields at June 30, 2023.*

(F) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

(G) *Derivative instruments are valued at unrealized appreciation (depreciation).*

Transamerica Aegon U.S. Government Securities VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Aegon U.S. Government Securities VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

3. INVESTMENT VALUATION (continued)

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

Municipal government obligations: The fair value of municipal government obligations and variable rate notes is estimated based on models that consider, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the liquidity of the bond, state of issuance, benchmark yield curves, and bond or note insurance. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced (“TBA”) securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

3. INVESTMENT VALUATION (continued)

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
U.S. Government Agency Obligations	$ 14,666,304	$ —	$ —	$ —	$ 14,666,304
Total Borrowings	**$ 14,666,304**	**$ —**	**$ —**	**$ —**	**$ 14,666,304**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ 122,568	$ —	$ —	$ —	$ —	$ 122,568
Total	**$ 122,568**	**$ —**	**$ —**	**$ —**	**$ —**	**$ 122,568**

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ (617,280)	$ —	$ —	$ —	$ —	$ (617,280)
Total	**$ (617,280)**	**$ —**	**$ —**	**$ —**	**$ —**	**$ (617,280)**

[(A)] *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
[(B)] *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (313,921)	$ —	$ —	$ —	$ —	$ (313,921)
Total	**$ (313,921)**	**$ —**	**$ —**	**$ —**	**$ —**	**$ (313,921)**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (278,935)	$ —	$ —	$ —	$ —	$ (278,935)
Total	**$ (278,935)**	**$ —**	**$ —**	**$ —**	**$ —**	**$ (278,935)**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts — long	$ 40,659,769
Average notional value of contracts — short	(9,364,953)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio’s securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio’s securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio’s investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio’s investments, impair the Portfolio’s ability to satisfy redemption requests, and negatively impact the Portfolio’s performance.

Interest rate risk: The value of fixed-income securities generally goes down when interest rates rise. A rise in rates tends to have a greater impact on the prices of longer term or duration securities. Changes in interest rates also may affect the liquidity of the Portfolio’s investments. A general rise in interest rates may cause investors to sell fixed-income securities on a large scale, which could adversely affect the price and liquidity of fixed-income securities generally and could also result in increased redemptions from the Portfolio. Increased redemptions could cause the Portfolio to sell securities at inopportune times or depressed prices and result in further losses.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate (“LIBOR”). The UK Financial Conduct Authority and LIBOR’s administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a “synthetic” basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio’s investments cannot yet be determined.

7. RISK FACTORS (continued)

U.S. government and agency obligations risk: Government agency obligations have different levels of credit support and, therefore, different degrees of credit risk. Securities issued by agencies and instrumentalities of the U.S. government that are supported by the full faith and credit of the U.S. government generally present a lesser degree of credit risk than securities issued by agencies and instrumentalities sponsored by the U.S. government that are supported only by the issuer's right to borrow from the U.S. Treasury and securities issued by agencies and instrumentalities sponsored by the U.S. government that are supported only by the credit of the issuing agencies. A security backed by the "full faith and credit" of the U.S. government is guaranteed only as to its stated interest rate and face value at maturity, not its current market price.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

TAM has entered into a sub-advisory agreement with Aegon USA Investment Management, LLC ("AUIM"), an affiliate of TAM. AUIM provides day-to-day portfolio management services to the Portfolio, subject to the supervision of TAM. TAM is responsible for compensating the sub-adviser for its services.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, AUIM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.55%
Over $500 million up to $1.5 billion	0.51
Over $1.5 billion	0.50

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.63%	May 1, 2024
Service Class	0.88	May 1, 2024

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ —	$ 29,990,721	$ 9,334,048	$ 67,385,752

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 412,883,717	$ 211,390	$ (31,150,912)	$ (30,939,522)

11. NEW ACCOUNTING PRONOUNCEMENT

In December 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-06 (“ASU 2022-06”), “Reference Rate Reform (Topic 848)”. ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Aegon U.S. Government Securities VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Aegon USA Investment Management, LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Trustees observed that the performance of the Portfolio had improved during the first quarter of 2023.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees and TAM agreed upon a reduction to the Portfolio's management fee schedule. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that information about the Sub-Adviser's revenues and expenses was incorporated into the profitability analysis for TAM and its affiliates with respect to the Portfolio. As a result, the Board focused on profitability information for TAM and its affiliates and the Sub-Adviser in the aggregate.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica American Funds Managed Risk VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Service Class	$ 1,000.00	$ 1,045.80	$ 4.11	$ 1,020.80	$ 4.06	0.81%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica American Funds Managed Risk VP (the "Portfolio") is a series of TST and is classified as non-diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

3. INVESTMENT VALUATION (continued)

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter (“OTC”) derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties’ creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total

Futures contracts:	
Average notional value of contracts – short	$ (115,283,058)

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio’s securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio’s securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio’s investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio’s investments, impair the Portfolio’s ability to satisfy redemption requests, and negatively impact the Portfolio’s performance.

Managed risk strategy risk: The Portfolio employs a managed risk strategy. The strategy attempts to stabilize the volatility of the Portfolio around a target volatility level and manage downside exposure during periods of significant market declines but may not work as intended. Because market conditions change, sometimes rapidly and unpredictably, the success of the strategy also will be subject to the sub-adviser’s ability to implement the strategy in a timely and efficient manner. The strategy may result in periods of underperformance and may fail to protect against market declines. The strategy may limit the Portfolio’s ability to participate in up markets, may cause the Portfolio to underperform its benchmark in up markets, may increase transaction costs at the Portfolio and/or underlying ETF level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio’s equity exposure, causing the Portfolio to forgo gains from the market rebound. Managing the Portfolio pursuant to the strategy may result in the Portfolio not achieving its stated asset mix goal due to unforeseen or unanticipated market conditions. The strategy also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits

6. RISK FACTORS (continued)

under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The strategy also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a managed risk strategy.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Underlying Portfolio's asset allocation and reallocation from time to time. These actions may be unsuccessful in maximizing return and/or avoiding investment losses.

Non-diversification risk: As a "non-diversified" Portfolio, the Portfolio may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund. Investing in a smaller number of issuers will make the Portfolio more susceptible to negative events affecting those issuers.

7. INVESTMENT CONCENTRATION

Throughout the period, the Portfolio can have investments that account for a significant percentage of the Portfolio's total assets. As of June 30, 2023, the most recent financial statements are included within this report for the following investments:

Investment	Percentage of Total Assets
American Funds Insurance Series – Asset Allocation Fund	97.95%

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $2 billion	0.53%
Over $2 billion up to $4 billion	0.52
Over $4 billion up to $6 billion	0.50
Over $6 billion up to $8 billion	0.49
Over $8 billion up to $10 billion	0.48
Over $10 billion	0.46

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	0.85%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding in-kind transactions and short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ —	$ 22,019,297

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 911,566,808	$ 1,227	$ (11,763,824)	$ (11,762,597)

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica American Funds Managed Risk VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Milliman Financial Risk Management LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limit, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-year period and in line with the median for the past 3- and 5-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 1-year period and below its composite benchmark for the past 3- and 5-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

American Funds
Insurance Series®

Semi-annual report
for the six months ended
June 30, 2023

CAPITAL GROUP® | AMERICAN FUNDS®

Investing in global companies for the long term

American Funds Insurance Series, by Capital Group, is the underlying investment vehicle for many variable annuities and insurance products. For over 90 years, Capital Group has invested with a long-term focus based on thorough research and attention to risk.

Investing for short periods makes losses more likely. For current information and month-end results, refer to capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries. Investing in small-capitalization stocks can involve greater risk than is customarily associated with investing in stocks of larger, more established companies. The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. High-yield bonds are subject to greater fluctuations in value and risk of loss of income and principal than investment-grade bonds. Bond ratings, which typically range from AAA/Aaa (highest) to D (lowest), are assigned by credit rating agencies such as Standard & Poor's, Moody's and/or Fitch as an indication of an issuer's creditworthiness. Hedge instruments, including exchange-traded futures contracts and exchange-traded put options, may not provide an effective hedge of the underlying securities because changes in the prices of such instruments may not track those of the securities they are intended to hedge. In addition, the managed risk strategy may not effectively protect the funds from market declines and will limit the funds' participation in market gains. The use of the managed risk strategy could cause the funds' returns to lag those of the underlying funds in certain market conditions. Refer to the funds' prospectuses and the Risk Factors section of this report for more information on these and other risks associated with investing in the funds.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Fellow investors:

Results for the American Funds Insurance Series for the periods ended June 30, 2023, are shown on the following pages, as well as results of the funds' benchmarks.

For additional information about the series, its investment results, holdings and portfolio managers, refer to **capitalgroup.com/afis**. [3]Sources: MSCI and Bloomberg Index Services Ltd. The 70%/30% MSCI ACWI/Bloomberg U.S. Aggregate Index blends the MSCI ACWI (All Country World Index) with the Bloomberg U.S. Aggregate Index by weighting their total returns at 70% and 30%, respectively. Its result assumes the blend is rebalanced monthly.

[4]Source: Bloomberg Index Services Ltd. Bloomberg U.S. Aggregate Index represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market. Bloomberg Global Aggregate Index represents the global investment-grade fixed income markets. Bloomberg U.S. Mortgage Backed Securities Index is a market-value-weighted index that covers the mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). Bloomberg U.S. Corporate High Yield 2% Issuer Capped Index covers the universe of fixed-rate, non-investment-grade debt. The index limits the maximum exposure of any one issuer to 2%. Bloomberg U.S. Government/Mortgage-Backed Securities Index covers obligations issued by the U.S. Treasury and U.S. government agencies. Bloomberg Short-Term Government/Corporate Index consists of investment-grade, fixed rate, publicly placed, dollar-denominated and non-convertible securities with remaining maturity from one up to (but not including) 12 months within either the government or corporate sector.

[5]Sources: Bloomberg Index Services Ltd. and S&P Dow Jones Indices LLC. Blends the S&P 500 with the Bloomberg U.S. Aggregate Index by weighting their total returns at 60% and 40%, respectively. Results assume the blend is rebalanced monthly.

[6]Sources: MSCI and Bloomberg Index Services Ltd. The 60%/40% MSCI ACWI/Bloomberg Global Aggregate Index blends the MSCI ACWI (All Country World Index) with the Bloomberg Global Aggregate Index by weighting their cumulative total returns at 60% and 40%, respectively. Its result assumes the blend is rebalanced monthly.

[7]Source: S&P Dow Jones Indices LLC. Standard & Poor's Managed Risk Index Series is designed to simulate a dynamic protective portfolio that allocates between the underlying equity index and cash, based on realized volatilities of the underlying equity and bond indexes, while maintaining a fixed allocation to the underlying bond index.

About the series

Unless otherwise indicated, American Funds Insurance Series investment results are for Class 1 shares (Class P1 shares for managed risk funds). Class 1A shares began operations on January 6, 2017. Class 2 shares began operations on April 30, 1997. Class 3 shares began operations on January 16, 2004. Class 4 shares began operations on December 14, 2012. Results encompassing periods prior to those dates assume a hypothetical investment in Class 1 shares and include the deduction of additional annual expenses (0.25% for Class 1A shares, 0.25% for Class 2 shares, 0.18% for Class 3 shares and 0.50% for Class 4 shares).

The variable annuities and life insurance contracts that use the series' funds contain certain fees and expenses not reflected in this report. Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Refer to capitalgroup.com/afis for more information.

The investment adviser is currently waiving a portion of its management fee for Global Growth Fund, Global Small Capitalization Fund, New World Fund, Washington Mutual Investors Fund, Capital World Growth and Income Fund, Capital Income Builder, American Funds Global Balanced Fund, The Bond Fund of America, American High-Income Trust, American Funds Mortgage Fund and U.S. Government Securities Fund. The waivers will be in effect through at least May 1, 2024. The waivers may only be modified or terminated with the approval of the series' board. Applicable fund results shown reflect the waivers, without which results would have been lower. Refer to the Financial Highlights tables in this report for details.

For the managed risk funds, the investment adviser is currently waiving a portion of its management fee equal to 0.05% of each fund's net assets. In addition, the investment adviser is currently reimbursing a portion of other expenses for Managed Risk International Fund. The waivers and reimbursement will be in effect through at least May 1, 2024, unless modified or terminated by the series' board. After that time, the investment adviser may elect to extend, modify or terminate the reimbursement. The waivers may only be modified or terminated with the approval of the series' board. Applicable fund results shown reflect the waivers and reimbursement, without which results would have been lower. Refer to the Financial Highlights tables in this report for details.

The Managed Risk Growth Fund pursues its objective by investing in shares of American Funds Insurance Series – Growth Fund and American Funds Insurance Series – The Bond Fund of America. The Managed Risk International Fund pursues its objective by investing in shares of American Funds Insurance Series – International Fund and American Funds Insurance Series – The Bond Fund of America. The Managed Risk Washington Mutual Investors Fund pursues its objective by investing in shares of American Funds Insurance Series – Washington Mutual Investors Fund and American Funds Insurance Series – U.S. Government Securities Fund. The Managed Risk Growth-Income Fund pursues its objective by investing in shares of American Funds Insurance Series – Growth-Income Fund and American Funds Insurance Series – The Bond Fund of America. The Managed Risk Asset Allocation Fund pursues its objective by investing in shares of American Funds Insurance Series – Asset Allocation Fund. The funds seek to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded futures. The benefit of the funds' managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the funds' results can be expected to lag those of the underlying fund.

Funds are listed in the report as follows: equity, balanced, fixed income and managed risk.

Global Growth Fund

Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, refer to capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Total returns based on a $1,000 investment

For periods ended June 30, 2023*

	6 months	1 year	5 years	10 years	Lifetime (since May 1, 1990)	Expense ratio
Class 1	12.49%	15.34%	1.59%	5.06%	7.34%	0.53%
Class 1A	12.38	15.09	1.34	4.80	7.07	0.78
Class 2	12.38	15.06	1.33	4.79	7.07	0.78
Class 3	12.42	15.15	1.40	4.86	7.15	0.71
Class 4	12.27	14.83	1.08	4.53	6.81	1.03

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Refer to capitalgroup.com/afis for more information. Expense ratios are restated to reflect current fees and are as of the fund's prospectus dated May 1, 2023. Refer to the Financial Highlights table in this report for details.

*Periods greater than one year are annualized.

Total returns based on a $1,000 investment

For periods ended June 30, 2023*

	6 months	1 year	5 years	10 years	Lifetime (since May 1,2013)	Gross expense ratio	Net expense ratio
Class P1	14.20%	10.63%	8.33%	9.18%	9.11%	0.74%	0.69%
Class P2	14.06	10.31	8.03	8.87	8.80	0.99	0.94

The investment adviser is currently waiving a portion of its management fee. This waiver will be in effect through at least May 1, 2024. The waiver may only be modified or terminated with the approval of the fund's board. Net expense ratios shown reflect the waiver, without which they would have been higher. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Refer to capitalgroup.com/afis for more information. Expense ratios are as of the fund's prospectus dated May 1, 2023.

*Periods greater than one year are annualized.

Managed Risk International Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, refer to capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Total returns based on a $1,000 investment

For periods ended June 30, 2023*

	6 months	1 year	5 years	10 years	Lifetime (since May 1,2013)	Gross expense ratio	Net expense ratio
Class P1	4.83%	5.34%	–1.28%	1.52%	1.29%	0.93%	0.86%
Class P2	4.81	5.18	–1.53	1.17	0.95	1.18	1.11

The investment adviser is currently waiving a portion of its management fee. In addition, the investment adviser is currently reimbursing a portion of other expenses. This waiver and reimbursement will be in effect through at least May 1, 2024. The adviser may elect at its discretion to extend, modify or terminate the reimbursement at that time. The waiver may only be modified or terminated with the approval of the fund's board. Net expense ratios shown reflect the waiver and reimbursement, without which they would have been higher. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Refer to capitalgroup.com/afis for more information. Expense ratios are as of the fund's prospectus dated May 1, 2023.

*Periods greater than one year are annualized.

Managed Risk Washington Mutual Investors Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, refer to capitalgroup.com/afis. [1]Security did not produce income during the last 12 months.
[2]All or a portion of this security was on loan. The total value of all such securities was $61,683,000, which represented 1.96% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[3]Affiliate of the fund or part of the same "group of investment companies" as the fund, as defined under the Investment Company Act of 1940, as amended.
[4]Value determined using significant unobservable inputs.
[5]Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was $69,352,000, which represented 2.21% of the net assets of the fund.
[6]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $11,970,000, which represented .38% of the net assets of the fund.
[7]Rate represents the seven-day yield at 6/30/2023.
[8]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
[9]Represents net activity. Refer to Note 5 for more information on securities lending.
[10]Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.
[11]Amount less than .01%.

Key to abbreviations
ADR = American Depositary Receipts
REIT = Real Estate Investment Trust
SDR = Swedish Depositary Receipts

Refer to the notes to financial statements.

[1]Security did not produce income during the last 12 months.
[2]All or a portion of this security was on loan. The total value of all such securities was $27,798,000, which represented .08% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[3]Value determined using significant unobservable inputs.
[4]Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was $145,620,000, which represented .40% of the net assets of the fund.
[5]Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.
[6]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $17,793,000, which represented .05% of the net assets of the fund.
[7]Rate represents the seven-day yield at 6/30/2023.
[8]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[9]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
[10]Represents net activity. Refer to Note 5 for more information on securities lending.
[11]Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.
[12]Amount less than .01%.

[1]Security did not produce income during the last 12 months.
[2]Value determined using significant unobservable inputs.
[3]Amount less than one thousand.
[4]All or a portion of this security was on loan. The total value of all such securities was $11,128,000, which represented .33% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[5]Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was $10,728,000, which represented .32% of the net assets of the fund.
[6]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $12,104,000, which represented .36% of the net assets of the fund.
[7]Step bond; coupon rate may change at a later date.
[8]Index-linked bond whose principal amount moves with a government price index.
[9]Scheduled interest and/or principal payment was not received.
[10]All or a portion of this security was pledged as collateral. The total value of pledged collateral was $207,000, which represented .01% of the net assets of the fund.
[11]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.
[12]Rate represents the seven-day yield at 6/30/2023.
[13]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[14]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
[15]Represents net activity. Refer to Note 5 for more information on securities lending.
[16]Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.
[17]Amount less than .01%.

[1]Security did not produce income during the last 12 months.
[2]All or a portion of this security was on loan. The total value of all such securities was $3,429,000, which represented .03% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[3]Rate represents the seven-day yield at 6/30/2023.
[4]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[5]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
[6]Represents net activity. Refer to Note 5 for more information on securities lending.
[7]Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

Key to abbreviations
ADR = American Depositary Receipts
REIT = Real Estate Investment Trust

Refer to the notes to financial statements.

[1]Security did not produce income during the last 12 months.
[2]All or a portion of this security was on loan. The total value of all such securities was $6,023,000, which represented .33% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[3]Value determined using significant unobservable inputs.
[4]Amount less than one thousand.
[5]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $1,150,000, which represented .06% of the net assets of the fund.
[6]Step bond; coupon rate may change at a later date.
[7]Rate represents the seven-day yield at 6/30/2023.
[8]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[9]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
[10]Represents net activity. Refer to Note 5 for more information on securities lending.
[11]Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

Key to abbreviations
ADR = American Depositary Receipts
BRL = Brazilian reais
CAD = Canadian dollars
CDI = CREST Depository Interest
GBP = British pounds
MXN = Mexican pesos
REIT = Real Estate Investment Trust
SDR = Swedish Depositary Receipts
USD = U.S. dollars

Refer to the notes to financial statements.

[1]Security did not produce income during the last 12 months.
[2]Value determined using significant unobservable inputs.
[3]Amount less than one thousand.
[4]All or a portion of this security was on loan. The total value of all such securities was $2,761,000, which represented .86% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[5]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $101,000, which represented .03% of the net assets of the fund.
[6]Rate represents the seven-day yield at 6/30/2023.
[7]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[8]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

Key to abbreviations
ADR = American Depositary Receipts
BRL = Brazilian reais
CAD = Canadian dollars
REIT = Real Estate Investment Trust

Refer to the notes to financial statements.

[1]All or a portion of this security was on loan. The total value of all such securities was $6,985,000, which represented .59% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[2]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $23,411,000, which represented 1.97% of the net assets of the fund.
[3]Value determined using significant unobservable inputs.
[4]Amount less than one thousand.
[5]Security did not produce income during the last 12 months.
[6]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[7]Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
[8]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.
[9]Purchased on a TBA basis.
[10]Step bond; coupon rate may change at a later date.
[11]All or a portion of this security was pledged as collateral. The total value of pledged collateral was $2,385,000, which represented .20% of the net assets of the fund.
[12]Index-linked bond whose principal amount moves with a government price index.
[13]Scheduled interest and/or principal payment was not received.
[14]Rate represents the seven-day yield at 6/30/2023.
[15]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
[16]The maximum potential amount the fund may pay as a protection seller should a credit event occur.
[17]The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.
[18]Represents net activity. Refer to Note 5 for more information on securities lending.
[19]Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

Key to abbreviations

ADR = American Depositary Receipts
Assn. = Association

Total		$57,914	$70,994	.28%

[1]Security did not produce income during the last 12 months.
[2]Value determined using significant unobservable inputs.
[3]Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was $70,994,000, which represented .28% of the net assets of the fund.
[4]All or a portion of this security was on loan. The total value of all such securities was $16,802,000, which represented .07% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[5]Amount less than one thousand.
[6]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $1,183,530,000, which represented 4.68% of the net assets of the fund.
[7]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[8]Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
[9]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.
[10]Purchased on a TBA basis.
[11]Step bond; coupon rate may change at a later date.
[12]Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was $29,734,000, which represented .12% of the net assets of the fund.
[13]Scheduled interest and/or principal payment was not received.
[14]Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.
[15]All or a portion of this security was pledged as collateral. The total value of pledged collateral was $27,347,000, which represented .11% of the net assets of the fund.
[16]Index-linked bond whose principal amount moves with a government price index.
[17]Rate represents the seven-day yield at 6/30/2023.
[18]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
[19]The maximum potential amount the fund may pay as a protection seller should a credit event occur.
[20]The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.
[21]Represents net activity. Refer to Note 5 for more information on securities lending.
[22]Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.
[23]Amount less than .01%.

Total		$444	$384	.10%

[1]Security did not produce income during the last 12 months.
[2]All or a portion of this security was on loan. The total value of all such securities was $697,000, which represented .18% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
[3]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[4]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $6,084,000, which represented 1.59% of the net assets of the fund.
[5]Index-linked bond whose principal amount moves with a government price index.
[6]Scheduled interest and/or principal payment was not received.
[7]Value determined using significant unobservable inputs.
[8]Step bond; coupon rate may change at a later date.
[9]Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was $384,000, which represented .10% of the net assets of the fund.
[10]All or a portion of this security was pledged as collateral. The total value of pledged collateral was $593,000, which represented .16% of the net assets of the fund.
[11]Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
[12]Purchased on a TBA basis.
[13]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.
[14]Rate represents the seven-day yield at 6/30/2023.
[15]Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
[16]Amount less than one thousand.
[17]The maximum potential amount the fund may pay as a protection seller should a credit event occur.
[18]The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.

Total		$1,156	$1,153	.01%

[1]Step bond; coupon rate may change at a later date.
[2]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $1,439,489,000, which represented 13.66% of the net assets of the fund.
[3]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.
[4]Scheduled interest and/or principal payment was not received.
[5]Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
[6]Amount less than one thousand.
[7]Purchased on a TBA basis.
[8]Value determined using significant unobservable inputs.
[9]All or a portion of this security was pledged as collateral. The total value of pledged collateral was $74,570,000, which represented .71% of the net assets of the fund.
[10]Index-linked bond whose principal amount moves with a government price index.
[11]Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was $1,153,000, which represented .01% of the net assets of the fund.
[12]Security did not produce income during the last 12 months.
[13]Rate represents the seven-day yield at 6/30/2023.
[14]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[15]Amount less than .01%.

Total		$19,832	$17,501	1.20%

[1]Step bond; coupon rate may change at a later date.
[2]Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was $17,501,000, which represented 1.20% of the net assets of the fund.
[3]Scheduled interest and/or principal payment was not received.
[4]Index-linked bond whose principal amount moves with a government price index.
[5]Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
[6]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $106,174,000, which represented 7.28% of the net assets of the fund.
[7]Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was $2,165,000, which represented .15% of the net assets of the fund.
[8]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.
[9]Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.
[10]Value determined using significant unobservable inputs.
[11]All or a portion of this security was pledged as collateral. The total value of pledged collateral was $12,003,000, which represented .82% of the net assets of the fund.
[12]Purchased on a TBA basis.
[13]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
[14]Security did not produce income during the last 12 months.
[15]Amount less than one thousand.
[16]Rate represents the seven-day yield at 6/30/2023.
[17]The maximum potential amount the fund may pay as a protection seller should a credit event occur.
[18]The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.

Key to abbreviations

Assn. = Association

[1]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $545,350,000, which represented 64.89% of the net assets of the fund.
[2]Scheduled interest and/or principal payment was not received.
[3]Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.
[4]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.
[5]Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was $35,108,000, which represented 4.18% of the net assets of the fund.
[6]Value determined using significant unobservable inputs.
[7]Step bond; coupon rate may change at a later date.
[8]Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was $25,686,000, which represented 3.06% of the net assets of the fund.
[9]Security did not produce income during the last 12 months.
[10]Amount less than one thousand.
[11]Rate represents the seven-day yield at 6/30/2023.
[12]Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

[1]Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
[2]Amount less than one thousand.
[3]All or a portion of this security was pledged as collateral. The total value of pledged collateral was $935,000, which represented .89% of the net assets of the fund.
[4]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available. For short-term securities, the date of the next scheduled coupon rate change is considered to be the maturity date.
[5]Purchased on a TBA basis.
[6]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $16,852,000, which represented 16.10% of the net assets of the fund.
[7]Index-linked bond whose principal amount moves with a government price index.
[8]Step bond; coupon rate may change at a later date.

Key to abbreviations
Assn. = Association
CLO = Collateralized Loan Obligations
CME = CME Group
EFFR = Effective Federal Funds Rate
LIBOR = London Interbank Offered Rate
SOFR = Secured Overnight Financing Rate
TBA = To be announced
USD = U.S. dollars

[1]Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
[2]Amount less than one thousand.
[3]Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available. For short-term securities, the date of the next scheduled coupon rate change is considered to be the maturity date.
[4]Purchased on a TBA basis.
[5]All or a portion of this security was pledged as collateral. The total value of pledged collateral was $14,752,000, which represented .98% of the net assets of the fund.
[6]Index-linked bond whose principal amount moves with a government price index.
[7]Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was $128,294,000, which represented 8.53% of the net assets of the fund.

Key to abbreviations
Assn. = Association
EFFR = Effective Federal Funds Rate
LIBOR = London Interbank Offered Rate
SOFR = Secured Overnight Financing Rate
TBA = To be announced
USD = U.S. dollars

Notes to financial statements

1. Organization

American Funds Insurance Series (the “series”) is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end, diversified management investment company with 40 different funds ("the funds"), including 23 funds in the series covered in this report. The other 17 funds in the series are covered in separate reports. Twelve funds in the series are covered in the American Funds Insurance Series - Target Date Series report and five funds in the series are covered in the American Funds Insurance Series - Portfolio Series report. The assets of each fund are segregated, with each fund accounted for separately. Capital Research and Management Company (“CRMC”) is the series’ investment adviser. Milliman Financial Risk Management LLC (“Milliman FRM”) is the subadviser for the risk management strategy for eight of the funds (the “managed risk funds”), five of which are covered in this report.

The managed risk funds covered in this report are Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Washington Mutual Investors Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund. The managed risk funds invest in other funds within the series (the “underlying funds”) and employ Milliman FRM to implement the risk management strategy, which consists of using hedging instruments — primarily exchange-traded options and futures contracts — to attempt to stabilize the volatility of the funds around target volatility levels and reduce the downside exposure of the funds during periods of significant market declines.

Shareholders approved a proposal to reorganize the series from a Massachusetts business trust to a Delaware statutory trust. The series reserved the right to delay implementing the reorganization and has elected to do so.

The investment objective(s) for each fund covered in this report are as follows:

Global Growth Fund — To provide long-term growth of capital.

Global Small Capitalization Fund — To provide long-term growth of capital.

Growth Fund — To provide growth of capital.

International Fund — To provide long-term growth of capital.

New World Fund — To provide long-term capital appreciation.

Washington Mutual Investors Fund — To produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing.

Capital World Growth and Income Fund — To provide long-term growth of capital while providing current income.

Growth-Income Fund — To achieve long-term growth of capital and income.

International Growth and Income Fund — To provide long-term growth of capital while providing current income.

Capital Income Builder — The two primary objectives are (1) to provide a level of current income that exceeds the average yield on U.S. stocks generally and (2) to provide a growing stream of income over the years. The secondary objective is to provide growth of capital.

Asset Allocation Fund — To provide high total return (including income and capital gains) consistent with preservation of capital over the long term.

American Funds Global Balanced Fund — Seeks the balanced accomplishment of three objectives: long-term growth of capital, conservation of principal and current income.

The Bond Fund of America— To provide as high a level of current income as is consistent with the preservation of capital.

Capital World Bond Fund — To provide, over the long term, a high level of total return consistent with prudent investment management.

American High-Income Trust — The primary objective is to provide a high level of current income. The secondary objective is capital appreciation.

American Funds Mortgage Fund – To provide current income and preservation of capital.

Ultra-Short Bond Fund – To provide current income, consistent with the maturity and quality standards applicable to the fund, and preservation of capital and liquidity.

U.S. Government Securities Fund– To provide a high level of current income consistent with prudent investment risk and preservation of capital.

Managed Risk Growth Fund – To provide growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk International Fund – To provide long-term growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk Washington Mutual Investors Fund– To produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing, in each case while seeking to manage volatility and provide downside protection.

Managed Risk Growth-Income Fund – To achieve long-term growth of capital and income while seeking to manage volatility and provide downside protection.

Managed Risk Asset Allocation Fund – To provide high total return (including income and capital gains) consistent with preservation of capital over the long term while seeking to manage volatility and provide downside protection.

Each fund in the series, except the managed risk funds, offers either four or five share classes (Classes 1, 1A, 2, 3 or 4); the managed risk funds offer two share classes (Classes P1 and P2). Holders of all share classes of each fund have equal pro rata rights to assets, dividends and liquidation proceeds of each fund held. Each share class of each fund hasidentical voting rights, except for the exclusive right to vote on matters affecting only its class. Share classes have different fees and expenses ("class-specific fees and expenses"), primarily due to different arrangements for certain distribution expenses. Differences in class-specific fees and expenses will result in differences in net investment income and, therefore, the payment of different per-share dividends by each class of each fund.

2. Significant accounting policies

Each fund is an investment company that applies the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board. Each fund's financial statements have been prepared to comply with U.S. generally accepted accounting principles ("U.S. GAAP"). These principles require the series' investment adviser to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates. Subsequent events, if any, have been evaluated through the date of issuance in the preparation of the financial statements. The funds follow the significant accounting policies described in this section, as well as the valuation policies described in the next section on valuation.

Cash – Cash may include amounts held in an interest bearing deposit facility.

Security transactions and related investment income – Security transactions are recorded by each fund as of the date the trades are executed with brokers. Realized gains and losses from security transactions are determined based on the specific identified cost of the securities. In the event a security is purchased with a delayed payment date, each fund will segregate liquid assets sufficient to meet their payment obligations. Dividend income is recognized on the ex-dividend date and interest income is recognized on an accrual basis. Market discounts, premiums and original issue discounts on fixed-income securities are amortized daily over the expected life of the security.

Fees and expenses – The fees and expenses of the underlying funds held by the managed risk funds are not included in the fees and expenses reported for each of the managed risk funds; however, they are indirectly reflected in the valuation of each of the underlying funds. These fees are included in the unaudited net effective expense ratios that are provided as additional information in the financial highlights tables.

Class allocations — Income, fees and expenses (other than class-specific fees and expenses), realized gains and losses and unrealized appreciation and depreciation are allocated daily among the various share classes of each fund based on their relative net assets. Class-specific fees and expenses, such as distribution expenses, are accrued daily and charged directly to the respective share class of each fund.

Distributions paid to shareholders — Income dividends and capital gain distributions are recorded on each fund's ex-dividend date.

Currency translation — Assets and liabilities, including investment securities, denominated in currencies other than U.S. dollars are translated into U.S. dollars at the exchange rates supplied by one or more pricing vendors on the valuation date. Purchases and sales of investment securities and income and expenses are translated into U.S. dollars at the exchange rates on the dates of such transactions. The effects of changes in exchange rates on investment securities are included with the net realized gain or loss and net unrealized appreciation or depreciation on investments in the funds' statements of operations. The realized gain or loss and unrealized appreciation or depreciation resulting from all other transactions denominated in currencies other than U.S. dollars are disclosed separately.

3. Valuation

CRMC, the series' investment adviser, values the funds' investments at fair value as defined by U.S. GAAP. The net asset value per share is calculated once daily as of the close of regular trading on the New York Stock Exchange, normally 4 p.m. New York time, each day the New York Stock Exchange is open.

Methods and inputs — The series' investment adviser uses the following methods and inputs to establish the fair value of each fund's assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Equity securities, including depositary receipts, are generally valued at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price. Prices for each security are taken from the principal exchange or market on which the security trades. The value of an underlying fund is based on its reported net asset value.

Fixed-income securities, including short-term securities, are generally valued at evaluated prices obtained from third-party pricing vendors. Vendors value such securities based on one or more of the inputs described in the following table. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed-income securities in which the funds are authorized to invest. However, these classifications are not exclusive and any of the inputs may be used to value any other class of fixed-income security.

Fixed-income class	Examples of standard inputs
All	Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data (collectively referred to as "standard inputs")
Corporate bonds, notes & loans; convertible securities	Standard inputs and underlying equity of the issuer
Bonds & notes of governments & government agencies	Standard inputs and interest rate volatilities
Mortgage-backed; asset-backed obligations	Standard inputs and cash flows, prepayment information, default rates, delinquency and loss assumptions, collateral characteristics, credit enhancements and specific deal information
Municipal securities	Standard inputs and, for certain distressed securities, cash flows or liquidation values using a net present value calculation based on inputs that include, but are not limited to, financial statements and debt contracts

Securities with both fixed-income and equity characteristics, or equity securities traded principally among fixed-income dealers, are generally valued in the manner described for either equity or fixed-income securities, depending on which method is deemed most appropriate by the series' investment adviser. The Capital Group Central Corporate Bond Fund ("CCBF"), a fund within the Capital Group Central Fund Series II, and Capital Group Central Cash Fund ("CCF"), a fund within the Capital Group Central Fund Series (collectively the "Central Funds"), are each valued based upon a floating net asset value, which fluctuates with changes in the value of each fund's portfolio securities. The underlying securities are valued based on the policies and procedures in the Central Funds' statements of additional information. The State Street Institutional U.S. Government Money Market Fund held by the managed risk funds is managed to maintain a $1.00 net asset value per share. The net asset value of each share class of each managed risk fund is calculated based on the reported net asset values of the underlying funds in which each fund invests.

Exchange-traded options and futures are generally valued at the official closing price for options and official settlement price for futures of the exchange or market on which such instruments are traded, as of the close of business on the day such instruments are being valued. Forward currency contracts are valued based on the spot and forward exchange rates obtained from a third-party pricing vendor. Swaps are generally valued using evaluated prices obtained from third-party pricing vendors who calculate these values based on market inputs that may include the yields of the indices referenced in the instrument and the relevant curve, dealer quotes, default probabilities and recovery rates, other reference data, and terms of the contract.

Securities and other assets for which representative market quotations are not readily available or are considered unreliable by the series' investment adviser are fair valued as determined in good faith under fair value guidelines adopted by the series' investment adviser and approved by the board of trustees as further described. The investment adviser follows fair valuation guidelines, consistent with U.S. Securities and Exchange Commission rules and guidance, to consider relevant principles and factors when making fair value determinations. The investment adviser considers relevant indications of value that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security, contractual or legal restrictions on resale of the security, relevant financial or business developments of the issuer, actively traded similar or related securities, dealer or broker quotes, conversion or exchange rights on the security, related corporate actions, significant events occurring after the close of trading in the security, and changes in overall market conditions. In addition, the closing prices of equity securities and futures that trade in markets outside U.S. time zones may be adjusted to reflect significant events that occur after the close of local trading but before the net asset value of each share class of each fund is determined. Fair valuations of investments that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred.

Processes and structure — The series' board of trustees has designated the series' investment adviser to make fair value determinations, subject to board oversight. The investment adviser has established a Joint Fair Valuation Committee (the "Committee") to administer, implement and oversee the fair valuation process, and to make fair value decisions. The Committee regularly reviews its own fair value decisions, as well as decisions made under its standing instructions to the investment adviser's valuation team. The Committee reviews changes in fair value measurements from period to period, pricing vendor information and market data, and may, as deemed appropriate, update the fair valuation guidelines to better reflect the results of back testing and address new or evolving issues. Pricing decisions, processes and controls over security valuation are also subject to additional internal reviews facilitated by the investment adviser's global risk management group. The Committee reports changes to the fair valuation guidelines to the board of trustees. The series' board and audit committee also regularly review reports that describe fair value determinations and methods.

Classifications — The series' investment adviser classifies the funds' assets and liabilities into three levels based on the inputs used to value the assets or liabilities. Level 1 values are based on quoted prices in active markets for identical securities. Level 2 values are based on significant observable market inputs, such as quoted prices for similar securities and quoted prices in inactive markets. Certain securities trading outside the U.S. may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading. Level 3 values are based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities.

The valuation levels are not necessarily an indication of the risk or liquidity associated with the underlying investment. For example, U.S. government securities are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market. The tables on the following pages present the funds' valuation levels as of June 30, 2023 (dollars in thousands):

Global Growth Fund

Total	$1,528,354	$1,577,387	$69,352	$3,175,093

The following table reconciles the valuation of the fund's Level 3 investment securities and related transactions for the six months ended June 30, 2023 (dollars in thousands):

	Beginning value at 1/1/2023	Transfers into Level 3*	Purchases	Sales	Net realized gain	Unrealized appreciation†	Transfers out of Level 3*	Ending value at 6/30/2023
Investment securities	$44,712	$–	$–	$–	$–	$24,640	$–	$69,352
Net unrealized appreciation during the period on Level 3 investment securities held at June 30, 2023								$24,640

*Transfers into or out of Level 3 are based on the beginning market value of the quarter in which they occurred. These transfers are the result of changes in the availability of pricing sources and/or in the observability of significant inputs used in valuing the securities.
†Net unrealized appreciation is included in the related amounts on investments in the fund's statement of operations.

Unobservable inputs – Valuation of the fund's Level 3 securities is based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities. The following table provides additional information used by the fund's investment adviser to fair value the fund's Level 3 securities (dollars in thousands):

	Value at 6/30/2023	Valuation techniques	Unobservable inputs	Range (if applicable)	Weighted average*	Impact to valuation from an increase in input†
Common stocks	$48,472	Expected proceeds	Discount rate	6%	6%	Decrease
			Expected proceeds	Not applicable	Not applicable	Not applicable
		Market comparable companies	EV/Sales multiple	8.0x	8.0x	Increase
			DLOM	30%	30%	Decrease
Preferred securities	20,880	Transaction	Transaction price	Not applicable	Not applicable	Not applicable
		Market comparable companies	EV/Sales multiple	8.0x - 13.4x	12.1x	Increase
			Net adjustment (decrease) based on movement of market comparables	42%	42%	Decrease
			DLOM	15% - 30%	23%	Decrease
Total	$69,352					

*Weighted average is by relative fair value.
†This column represents the directional change in fair value of the Level 3 securities that would result in an increase from the corresponding input. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

Key to abbreviations
DLOM = Discount for lack of marketability
EV = Enterprise value

[1]Futures contracts and credit default swaps are not included in the investment portfolio.

The following table reconciles the valuation of the fund's Level 3 investment securities and related transactions for the six months ended June 30, 2023 (dollars in thousands):

	Beginning value at 1/1/2023	Transfers into Level 3[2]	Purchases	Sales	Net realized gain[3]	Unrealized depreciation[3]	Transfers out of Level 3[2]	Ending value at 6/30/2023
Investment securities	$34,480	$2,087	$6,039	$(5,671)	$1,232	$(2,573)	$(2,201)	$33,393
Net unrealized depreciation during the period on Level 3 investment securities held at June 30, 2023								$ (2,757)

[2]Transfers into or out of Level 3 are based on the beginning market value of the quarter in which they occurred. These transfers are the result of changes in the availability of pricing sources and/or in the observability of significant inputs used in valuing the securities.
[3]Net realized gain and unrealized depreciation are included in the related amounts on investments in the fund's statement of operations.

Unobservable inputs — Valuation of the fund's Level 3 securities is based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities. The following table provides additional information used by the fund's investment adviser to fair value the fund's Level 3 securities (dollars in thousands):

	Value at 6/30/2023	Valuation techniques	Unobservable inputs	Range (if applicable)	Weighted average*	Impact to valuation from an increase in input†
Bonds, notes & other debt instruments	$ 4,705	Estimated recovery value	Expected proceeds	Not applicable	Not applicable	Not applicable
		Transaction	Transaction price	Not applicable	Not applicable	Not applicable
			Net adjustment (decrease) based on movement of market comparables	10%	10%	Decrease
Convertible bonds & notes	79	Transaction	Transaction price	Not applicable	Not applicable	Not applicable
Common stocks	25,789	Estimated recovery value	Expected proceeds	Not applicable	Not applicable	Not applicable
			EV/EBITDA multiple	7.5x	7.5x	Increase
			DLOM	15%	15%	Decrease
			Vendor price	Not applicable	Not applicable	Not applicable
			Risk discount	90%	90%	Decrease
			Net adjustment (decrease) based on movement of market comparables	20%	20%	Decrease
		Indicative market quotation	Broker quote	Not applicable	Not applicable	Not applicable
		Market comparable companies	EV/EBITDA multiple	5.8x	5.8x	Increase
			EV/EBITDA less CapEx multiple	10.4x	10.4x	Increase
			DLOM	17%	17%	Decrease
Preferred securities	2,441	Indicative market quotation	Broker quote	Not applicable	Not applicable	Not applicable
		Market comparable companies	EV/EBITDA multiple	3.3x	3.3x	Increase
			DLOM	15%	15%	Decrease
Rights & warrants	379	Black-Scholes	Broker quote	Not applicable	Not applicable	Not applicable
			Implied volatility	30%	30%	Increase
		Indicative market quotation	Broker quote	Not applicable	Not applicable	Not applicable
Total	$33,393					

*Weighted average is by relative fair value.
†This column represents the directional change in fair value of the Level 3 securities that would result in an increase from the corresponding input. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

Key to abbreviations
CapEx = Capital expenditures
DLOM = Discount for lack of marketability
EBITDA = Earnings before income taxes, depreciation and amortization
EV = Enterprise value

*Futures contracts are not included in the fund's investment portfolio.

Managed Risk Washington Mutual Investors Fund

As of June 30, 2023, all of the fund's investments were classified as Level 1.

Managed Risk Growth-Income Fund

As of June 30, 2023, all of the fund's investments were classified as Level 1.

Managed Risk Asset Allocation Fund

As of June 30, 2023, all of the fund's investments were classified as Level 1.

4. Risk factors

Investing in the funds may involve certain risks including, but not limited to, those described below.

Market conditions – The prices of, and the income generated by, the common stocks, bonds and other securities held by a fund may decline – sometimes rapidly or unpredictably – due to various factors, including events or conditions affecting the general economy or particular industries or companies; overall market changes; local, regional or global political, social or economic instability; governmental, governmental agency or central bank responses to economic conditions; and currency exchange rate, interest rate and commodity price fluctuations. These risks may be heightened in the case of smaller capitalization stocks.

Economies and financial markets throughout the world are highly interconnected. Economic, financial or political events, trading and tariff arrangements, wars, terrorism, cybersecurity events, natural disasters, public health emergencies (such as the spread of infectious disease) and other circumstances in one country or region, including actions taken by governmental or quasi-governmental authorities in response to any of the foregoing, could have impacts on global economies or markets. As a result, whether or not a fund invests in securities of issuers located in or with significant exposure to the countries affected, the value and liquidity of a fund's investments may be negatively affected by developments in other countries and regions.

Issuer risks – The prices of, and the income generated by, securities held by a fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer's goods or services, poor management performance, major litigation, investigations or other controversies related to the issuer, changes in the issuer's financial condition or credit rating, changes in government regulations affecting the issuer or its competitive environment and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives.

Investing in income-oriented stocks – The value of a fund's securities and income provided by a fund may be reduced by changes in the dividend policies of, and the capital resources available for dividend payments at, the companies in which the fund invests.

Investing in growth-oriented stocks — Growth-oriented common stocks and other equity-type securities (such as preferred stocks, convertible preferred stocks and convertible bonds) may involve larger price swings and greater potential for loss than other types of investments. These risks may be even greater in the case of smaller capitalization stocks.

Investing in small companies — Investing in smaller companies may pose additional risks. For example, it is often more difficult to value or dispose of small company stocks and more difficult to obtain information about smaller companies than about larger companies. Furthermore, smaller companies often have limited product lines, operating histories, markets and/or financial resources, may be dependent on one or a few key persons for management, and can be more susceptible to losses. Moreover, the prices of their stocks may be more volatile than stocks of larger, more established companies, particularly during times of market turmoil.

Investing outside the U.S. — Securities of issuers domiciled outside the U.S., or with significant operations or revenues outside the U.S., may lose value because of adverse political, social, economic or market developments (including social instability, regional conflicts, terrorism and war) in the countries or regions in which the issuers operate or generate revenue. These securities may also lose value due to changes in foreign currency exchange rates against the U.S. dollar and/or currencies of other countries. Issuers of these securities may be more susceptible to actions of foreign governments, such as nationalization, currency blockage or the imposition of price controls, sanctions, or punitive taxes, each of which could adversely impact the value of these securities. Securities markets in certain countries may be more volatile and/or less liquid than those in the U.S. Investments outside the U.S. may also be subject to different regulatory, legal, accounting, auditing, financial reporting and recordkeeping requirements, and may be more difficult to value, than those in the U.S. In addition, the value of investments outside the U.S. may be reduced by foreign taxes, including foreign withholding taxes on interest and dividends. Further, there may be increased risks of delayed settlement of securities purchased or sold by the fund, which could impact the liquidity of the fund's portfolio. The risks of investing outside the U.S. may be heightened in connection with investments in emerging markets.

Investing in developing countries — Investing in countries with developing economies and/or markets may involve risks in addition to and greater than those generally associated with investing in developed countries. For instance, developing countries tend to have less developed political, economic and legal systems than those in developed countries. Accordingly, the governments of these countries may be less stable and more likely to intervene in the market economy, for example, by imposing capital controls, nationalizing a company or industry, placing restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or imposing punitive taxes that could adversely affect the prices of securities. Information regarding issuers in developing countries may be limited, incomplete or inaccurate, and such issuers may not be subject to regulatory, accounting, auditing, and financial reporting and recordkeeping standards comparable to those to which issuers in developed countries are subject. A fund's rights with respect to its investments in developing countries, if any, will generally be governed by local law, which may make it difficult or impossible for the fund to pursue legal remedies or to obtain and enforce judgments in local courts. In addition, the economies of these countries may be dependent on relatively few industries, may have limited access to capital and may be more susceptible to changes in local and global trade conditions and downturns in the world economy. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating a fund's net asset value. Additionally, developing countries are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in emerging markets – Investing in emerging markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, emerging market countries tend to have less developed political, economic and legal systems than those in developed countries. Accordingly, the governments of these countries may be less stable and more likely to intervene in the market economy, for example, by imposing capital controls, nationalizing a company or industry, placing restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or imposing punitive taxes that could adversely affect the prices of securities. Information regarding issuers in emerging markets may be limited, incomplete or inaccurate, and such issuers may not be subject to regulatory, accounting, auditing, and financial reporting and recordkeeping standards comparable to those to which issuers in more developed markets are subject. A fund's rights with respect to its investments in emerging markets, if any, will generally be governed by local law, which may make it difficult or impossible for the fund to pursue legal remedies or to obtain and enforce judgments in local courts. In addition, the economies of these countries may be dependent on relatively few industries, may have limited access to capital and may be more susceptible to changes in local and global trade conditions and downturns in the world economy. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating a fund's net asset value. Additionally, emerging markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in debt instruments – The prices of, and the income generated by, bonds and other debt securities held by a fund may be affected by factors such as the interest rates, maturities and credit quality of these securities.

Rising interest rates will generally cause the prices of bonds and other debt securities to fall. Also, when interest rates rise, issuers are less likely to refinance existing debt securities, causing the average life of such securities to extend. A general rise in interest rates may cause investors to sell debt securities on a large scale, which could also adversely affect the price and liquidity of debt securities and could also result in increased redemptions from a fund. Falling interest rates may cause an issuer to redeem, call or refinance a debt security before its stated maturity, which may result in a fund failing to recoup the full amount of its initial investment and having to reinvest the proceeds in lower yielding securities. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities.

Bonds and other debt securities are also subject to credit risk, which is the possibility that the credit strength of an issuer or guarantor will weaken or be perceived to be weaker, and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default. Changes in actual or perceived creditworthiness may occur quickly. A downgrade or default affecting any of a fund's securities could cause the value of a fund's shares to decrease. Lower quality debt securities generally have higher rates of interest and may be subject to greater price fluctuations than higher quality debt securities. Credit risk is gauged, in part, by the credit ratings of the debt securities in which a fund invests. However, ratings are only the opinions of the rating agencies issuing them and are not guarantees as to credit quality or an evaluation of market risk. The fund's investment adviser relies on its own credit analysts to research issuers and issues in assessing credit and default risks.

Investing in lower rated debt instruments – Lower rated bonds and other lower rated debt securities generally have higher rates of interest and involve greater risk of default or price declines due to changes in the issuer's creditworthiness than those of higher quality debt securities. The market prices of these securities may fluctuate more than the prices of higher quality debt securities and may decline significantly in periods of general economic difficulty. These risks may be increased with respect to investments in junk bonds.

Investing in derivatives – The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds. Changes in the value of a derivative may not correlate perfectly with, and may be more sensitive to market events than, the underlying asset, rate or index, and a derivative instrument may cause a fund to lose significantly more than its initial investment. Derivatives may be difficult to value, difficult for a fund to buy or sell at an opportune time or price and difficult, or even impossible, to terminate or otherwise offset. A fund's use of derivatives may result in losses to the fund, and investing in derivatives may reduce a fund's returns and increase a fund's price volatility. A fund's counterparty to a derivative transaction (including, if applicable, the fund's clearing broker, the derivatives exchange or the clearinghouse) may be unable or unwilling to honor its financial obligations in respect of the transaction. In certain cases, the fund may be hindered or delayed in exercising remedies against or closing out derivative instruments with a counterparty, which may result in additional losses. Derivatives are also subject to operational risk (such as documentation issues, settlement issues and systems failures) and legal risk (such as insufficient documentation, insufficient capacity or authority of a counterparty, and issues with the legality or enforceability of a contract).

Currency – The prices of, and the income generated by, many debt securities held by a fund may also be affected by changes in relative currency values. If the U.S. dollar appreciates against foreign currencies, the value in U.S. dollars of a fund's securities denominated in such currencies would generally fall and vice versa.

Investing in mortgage-related and other asset-backed securities – Mortgage-related securities, such as mortgage-backed securities, and other asset-backed securities, include debt obligations that represent interests in pools of mortgages or other income-bearing assets, such as residential mortgage loans, home equity loans, mortgages on commercial buildings, consumer loans and equipment leases. While such securities are subject to the risks associated with investments in debt instruments generally (for example, credit, extension and interest rate risks), they are also subject to other and different risks. Mortgage-backed and other asset-backed securities are subject to changes in the payment patterns of borrowers of the underlying debt, potentially increasing the volatility of the securities and a fund's net asset value. When interest rates fall, borrowers are more likely to refinance or prepay their debt before its stated maturity. This may result in a fund having to reinvest the proceeds in lower yielding securities, effectively reducing a fund's income. Conversely, if interest rates rise and borrowers repay their debt more slowly than expected, the time in which the mortgage-backed and other asset-backed securities are paid off could be extended, reducing a fund's cash available for reinvestment in higher yielding securities. Mortgage-backed securities are also subject to the risk that underlying borrowers will be unable to meet their obligations and the value of property that secures the mortgages may decline in value and be insufficient, upon foreclosure, to repay the associated loans. Investments in asset-backed securities are subject to similar risks.

Investing in future delivery contracts – A fund may enter into contracts, such as to-be-announced contracts and mortgage dollar rolls, that involve a fund selling mortgage-related securities and simultaneously contracting to repurchase similar securities for delivery at a future date at a predetermined price. This can increase a fund's market exposure, and the market price of the securities that the fund contracts to repurchase could drop below their purchase price. While a fund can preserve and generate capital through the use of such contracts by, for example, realizing the difference between the sale price and the future purchase price, the income generated by the fund may be reduced by engaging in such transactions. In addition, these transactions increase the turnover rate of a fund.

Investing in inflation-linked bonds – The values of inflation-linked bonds generally fluctuate in response to changes in real interest rates – i.e., rates of interest after factoring in inflation. A rise in real interest rates may cause the prices of inflation-linked securities to fall, while a decline in real interest rates may cause the prices to increase. Inflation-linked bonds may experience greater losses than other debt securities with similar durations when real interest rates rise faster than nominal interest rates. There can be no assurance that the value of an inflation-linked security will be directly correlated to changes in interest rates; for example, if interest rates rise for reasons other than inflation, the increase may not be reflected in the security's inflation measure.

Investing in inflation-linked bonds may also reduce a fund's distributable income during periods of deflation. If prices for goods and services decline throughout the economy, the principal and income on inflation-linked securities may decline and result in losses to a fund.

Investing in securities backed by the U.S. government – Securities backed by the U.S. Treasury or the full faith and credit of the U.S. government are guaranteed only as to the timely payment of interest and principal when held to maturity. Accordingly, the current market values for these securities will fluctuate with changes in interest rates and the credit rating of the U.S. government. Securities issued by U.S. government-sponsored entities and federal agencies and instrumentalities that are not backed by the full faith and credit of the U.S. government are neither issued nor guaranteed by the U.S. government. U.S. government securities are subject to market risk, interest rate risk and credit risk.

Investing in repurchase agreements – Upon entering into a repurchase agreement, a fund purchases a security from a bank or broker-dealer, which simultaneously commits to repurchase the security within a specified time at the fund's cost with interest. The security purchased by the fund constitutes collateral for the seller's repurchase obligation. If the party agreeing to repurchase should default, the fund may seek to sell the security it holds as collateral. The fund may incur a loss if the value of the collateral securing the repurchase obligation falls below the repurchase price. The fund may also incur disposition costs and encounter procedural delays in connection with liquidating the collateral.

Interest rate risk — The values and liquidity of the securities held by a fund may be affected by changing interest rates. For example, the values of these securities may decline when interest rates rise and increase when interest rates fall. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities. A fund may invest in variable and floating rate securities. When a fund holds variable or floating rate securities, a decrease in market interest rates will adversely affect the income received from such securities and the net asset value of a fund's shares. Although the values of such securities are generally less sensitive to interest rate changes than those of other debt securities, the value of variable and floating rate securities may decline if their interest rates do not rise as quickly, or as much, as market interest rates. Conversely, floating rate securities will not generally increase in value if interest rates decline. During periods of extremely low short-term interest rates, a fund may not be able to maintain a positive yield and, in relatively low interest rate environments, there are heightened risks associated with rising interest rates.

Credit and liquidity support — Changes in the credit quality of banks and financial institutions providing credit and liquidity support features with respect to securities held by a fund could cause the values of these securities to decline.

Asset allocation — A fund's percentage allocation to equity securities, debt securities and money market instruments could cause the fund to underperform relative to relevant benchmarks and other funds with similar investment objectives.

Liquidity risk — Certain fund holdings may be or may become difficult or impossible to sell, particularly during times of market turmoil. Liquidity may be impacted by the lack of an active market for a holding, legal or contractual restrictions on resale, or the reduced number and capacity of market participants to make a market in such holding. Market prices for less liquid or illiquid holdings may be volatile or difficult to determine, and reduced liquidity may have an adverse impact on the market price of such holdings. Additionally, the sale of less liquid or illiquid holdings may involve substantial delays (including delays in settlement) and additional costs and the fund may be unable to sell such holdings when necessary to meet its liquidity needs, or to try to limit losses, or may be forced to sell at a loss.

Management — The investment adviser to the funds actively manages the funds' investments. Consequently, the funds are subject to the risk that the methods and analyses, including models, tools and data, employed by the investment adviser in this process may be flawed or incorrect and may not produce the desired results. This could cause the funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Investing in the managed risk funds may involve additional risks including, but not limited to, those described below.

Fund structure — The managed risk funds invest in underlying funds and incur expenses related to those underlying funds. In addition, investors in the managed risk funds will incur fees to pay for certain expenses related to the operations of the managed risk funds. An investor holding the underlying fund directly would incur lower overall expenses but would not receive the benefit of the managed risk strategy. Additionally, in accordance with an exemption under the Investment Company Act of 1940, as amended, the investment adviser considers only proprietary funds when selecting underlying investment options and allocations. This means that the fund's investment adviser did not, nor does it expect to, consider any unaffiliated funds as underlying investment options for the fund. This strategy could raise certain conflicts of interest when choosing underlying investments for the fund, including the selection of funds that result in greater compensation to the adviser or funds with relatively lower historical investment results. The investment adviser has policies and procedures designed to mitigate material conflicts of interest that may arise in connection with its management of the fund.

Management — The managed risk funds are subject to the risk that the managed risk strategy or the methods employed by the subadviser in implementing the managed risk strategy may not produce the desired results. This could cause the managed risk funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Underlying fund risks — Because the managed risk funds' investments consist of investments in underlying funds, the managed risk funds' risks are directly related to the risks of the respective underlying fund in which each managed risk fund invests. For this reason, it is important to understand the risks associated with investing both in the managed risk fund and in each of the underlying funds.

Investing in options and futures contracts — In addition to the risks generally associated with investing in derivative instruments, options and futures contracts are subject to the creditworthiness of the clearing organizations, exchanges and, in the case of futures, futures commission merchants with which a fund transacts. While both options and futures contracts are generally liquid instruments, under certain market conditions, options and futures may be deemed to be illiquid. For example, a fund may be temporarily prohibited from closing out its position in an options or futures contract if intraday price change limits or limits on trading volume imposed by the applicable exchange are triggered. If a fund is unable to close out a position on an options or futures contract, the fund would remain subject to the risk of adverse price movements until the fund is able to close out the position in question. The ability of a fund to successfully utilize options and futures contracts may depend in part upon the ability of the fund's investment adviser or subadviser to accurately forecast interest rates and other economic factors and to assess and predict the impact of such economic factors on the options and futures in which the fund invests. If the investment adviser or subadviser incorrectly forecasts economic developments or incorrectly predicts the impact of such developments on the options and futures in which it invests, a fund could suffer losses. Whereas the risk of loss on a put option purchased by the fund is limited to the initial cost of the option, the amount of a potential loss on a futures contract could greatly exceed the relatively small initial amount invested in entering the futures position.

Hedging — There may be imperfect or even negative correlation between the prices of the options and futures contracts in which a fund invests and the prices of the underlying securities or indexes which the fund seeks to hedge. For example, options and futures contracts may not provide an effective hedge because changes in options and futures contract prices may not track those of the underlying securities or indexes they are intended to hedge. In addition, there are significant differences between the securities market, on the one hand, and the options and futures markets, on the other, that could result in an imperfect correlation between the markets, causing a given hedge not to achieve its objectives. The degree of imperfection of correlation depends on circumstances such as variations in speculative market demand for options and futures, including technical influences in options and futures trading, and differences between the financial instruments being hedged and the instruments underlying the standard contracts available for trading. A decision as to whether, when and how to hedge involves the exercise of skill and judgment, and even a well-conceived hedge may be unsuccessful to some degree because of market behavior or unexpected interest rate trends. In addition, the fund's investment in exchange-traded options and futures and their resulting costs could limit the fund's gains in rising markets relative to those of the underlying funds, or to those of unhedged funds in general.

Short positions — The fund may suffer losses from short positions in futures contracts. Losses from short positions in futures contracts occur when the underlying index increases in value. As the underlying index increases in value, the holder of the short position in the corresponding futures contract is required to pay the difference in value of the futures contract resulting from the increase in the index on a daily basis. Losses from a short position in an index futures contract could potentially be very large if the value of the underlying index rises dramatically in a short period of time.

Nondiversification risk — As nondiversified funds, the managed risk funds have the ability to invest a larger percentage of their assets in the securities of a smaller number of issuers than diversified funds. To the extent that a managed risk fund invests a larger percentage of its assets in securities of one or more issuers, poor performance by these securities could have a greater adverse impact on the fund's investment results.

5. Certain investment techniques

Securities lending — Some of the funds have entered into securities lending transactions in which the funds earn income by lending investment securities to brokers, dealers or other institutions. Each transaction involves three parties: the fund, acting as the lender of the securities, a borrower, and a lending agent that acts as an intermediary.

Securities lending transactions are entered into by the fund under the securities lending agreement with the lending agent. The lending agent facilitates the exchange of securities between the lender and the borrower, generally provides protection from borrower default, marks to market the value of collateral daily, secures additional collateral from the borrower if it falls below preset terms, and may reinvest the collateral on behalf of the fund according to agreed parameters. The lending agent has indemnified the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a potential loss of income or value if the borrower fails to return the securities, collateral investments decline in value or the lending agent fails to perform.

The borrower is required to post highly liquid assets, such as cash or U.S. government securities, as collateral for the loan in an amount at least equal to the value of the securities loaned. Investments made with cash collateral are recognized as assets in the fund's investment portfolio. The same amount is recorded as a liability in the fund's statement of assets and liabilities. While securities are on loan, the fund will continue to receive the equivalent of the interest, dividends or other distributions paid by the issuer, as well as a portion of the interest on the investment of the collateral. Additionally, although the fund does not have the right to vote on securities while they are on loan, the fund has a right to consent on corporate actions and a right to recall loaned securities to vote on proposals affecting them. The borrower is obligated to return the loaned security at the conclusion of the loan or, during the pendency of the loan, on demand from the fund.

The following table presents the value of the securities on loan, the type and value of collateral received and the value of the investment securities purchased, if any, from the cash collateral received by each fund (dollars in thousands):

		Collateral received		
Funds	**Value of investment securities on loan**	**Cash**	**U.S. government securities**	**Value of investment securities purchased**
Global Growth Fund	$11,345	$ 9,612	$ 2,325	$ 8,651
Global Small Capitalization Fund	61,683	42,375	22,569	38,137
Growth Fund	27,798	28,625	–	25,763
International Fund	22,230	2,552	20,728	2,297
New World Fund	11,128	3,859	7,838	3,473
Washington Mutual Investors Fund	3,429	3,540	–	3,186
Capital World Growth and Income Fund	6,023	952	5,403	857
Growth-Income Fund	61,497	64,632	–	58,169
International Growth and Income Fund	2,761	1,722	1,197	1,550
Capital Income Builder	6,985	6,105	1,259	5,494
Asset Allocation Fund	16,802	17,261	–	15,535
American Funds Global Balanced Fund	697	712	–	641

Investment securities purchased from cash collateral are disclosed in the investment portfolio as short-term securities. Securities received as collateral, if any, are not recognized as fund assets. The contractual maturity of collateral received under the securities lending agreement is classified as overnight and continuous.

Index-linked bonds – Some of the funds have invested in index-linked bonds, which are fixed-income securities whose principal value is periodically adjusted to a government price index. Over the life of an index-linked bond, interest is paid on the adjusted principal value. Increases or decreases in the principal value of index-linked bonds are recorded as interest income in the fund's statement of operations.

Mortgage dollar rolls – Some of the funds have entered into mortgage dollar roll transactions in which the fund sells a mortgage-backed security to a counterparty and simultaneously enters into an agreement with the same counterparty to buy back a similar security on a specific future date at a predetermined price. Mortgage dollar rolls are accounted for as purchase and sale transactions, which may increase the funds' portfolio turnover rates.

Loan transactions – Some of the funds have entered into loan transactions in which the fund acquires a loan either through an agent, by assignment from another holder, or as a participation interest in another holder's portion of a loan. The loan is often administered by a financial institution that acts as agent for the holders of the loan, and the fund may be required to receive approval from the agent and/or borrower prior to the sale of the investment. The loan's interest rate and maturity date may change based on the terms of the loan, including potential early payments of principal.

Short-term securities – The managed risk funds hold shares of State Street Institutional U.S. Government Money Market Fund, a cash management vehicle offered and managed by State Street Bank and Trust Company.

Unfunded commitments — Asset Allocation Fund, Capital World Bond Fund and American High-Income Trust have participated in transactions that involve unfunded commitments, which may obligate each fund to purchase new or additional bonds and/or purchase additional shares of the applicable issuer if certain contingencies are met. As of June 30, 2023, the maximum exposure from these unfunded commitments for Asset Allocation Fund, Capital World Bond Fund and American High-Income Trust was $1,289,000, $51,000 and $815,000, respectively, which would represent less than 0.01% for Asset Allocation Fund and Capital World Bond Fund and 0.10% for American High-Income Trust, respectively, of the net assets of each fund should such commitments become due. Unrealized depreciation on these unfunded commitments for Asset Allocation Fund, Capital World Bond Fund and American High-Income Trust of $7,000, $1,000 and $2,000, respectively, is disclosed as unrealized depreciation on unfunded commitments in each fund's statement of assets and liabilities. Unrealized depreciation is included in net unrealized appreciation (depreciation) on investments in unaffiliated issuers in each fund's statement of operations.

Options contracts — The managed risk funds have entered into options contracts, which give the holder of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option, the security underlying the option (or the cash value of the index underlying the option) at a specified price. As part of their managed risk strategy, the funds will at times purchase put options on equity indexes in standardized contracts traded on foreign or domestic securities exchanges, boards of trade, or similar entities. By purchasing a put option on an equity index, the funds obtain the right (but not the obligation) to sell the cash value of the index underlying the option at a specified exercise price, and in return for this right, the funds pay the current market price, or the option premium, for the option.

The funds may terminate their position in a put option by allowing the option to expire or by exercising the option. If the option is allowed to expire, the funds will lose the entire premium. If the option is exercised, the funds complete the sale of the underlying instrument (or delivers the cash value of the index underlying the option) at the exercise price. The funds may also terminate a put option position by entering into opposing close-out transactions in advance of the option expiration date.

Premiums paid on options purchased, as well as the daily fluctuation in market value, are included in investment securities from unaffiliated issuers in each fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the option contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from options contracts are recorded in investments in unaffiliated issuers in each fund's statement of operations.

Futures contracts — Some of the funds have entered into futures contracts, which provide for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument for a specified price, date, time and place designated at the time the contract is made. Futures contracts are used to strategically manage the fund's interest rate sensitivity by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. For the managed risk funds, futures contracts are used to strategically manage portfolio volatility and downside equity risk.

Upon entering into futures contracts, and to maintain the fund's open positions in futures contracts, the fund is required to deposit with a futures broker, known as a futures commission merchant ("FCM"), in a segregated account in the name of the FCM an amount of cash, U.S. government securities or other liquid securities, known as initial margin. The margin required for a particular futures contract is set by the exchange on which the contract is traded to serve as collateral, and may be significantly modified from time to time by the exchange during the term of the contract.

On a daily basis, each fund pays or receives variation margin based on the increase or decrease in the value of the futures contracts and records variation margin on futures contracts in each fund's statement of assets and liabilities. Futures contracts may involve a risk of loss in excess of the variation margin shown on each fund's statement of assets and liabilities. Each fund records realized gains or losses at the time the futures contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from futures contracts are recorded in each fund's statement of operations.

Forward currency contracts — Some of the funds have entered into forward currency contracts, which represent agreements to exchange currencies on specific future dates at predetermined rates. The series' investment adviser uses forward currency contracts to manage the fund's exposure to changes in exchange rates. Upon entering into these contracts, risks may arise from the potential inability of counterparties to meet the terms of their contracts and from possible movements in exchange rates.

On a daily basis, the series' investment adviser values forward currency contracts based on the applicable exchange rates and records unrealized appreciation or depreciation for open forward currency contracts in each fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the forward contract is closed or offset by another contract with the same broker for the same settlement date and currency. Closed forward currency contracts that have not reached their settlement date are included in the respective receivables or payables for closed forward currency contracts in each fund's statement of assets and liabilities. Net realized gains or losses from closed forward currency contracts and net unrealized appreciation or depreciation from open forward currency contracts are recorded in each fund's statement of operations.

Swap contracts — Some of the funds have entered into swap agreements, which are two-party contracts entered into primarily by institutional investors for a specified time period. In a typical swap transaction, two parties agree to exchange the returns earned or realized from one or more underlying assets or rates of return. Swap agreements can be traded on a swap execution facility (SEF) and cleared through a central clearinghouse (cleared), traded over-the-counter (OTC) and cleared, or traded bilaterally and not cleared. Because clearing interposes a central clearinghouse as the ultimate counterparty to each participant's swap, and margin is required to be exchanged under the rules of the clearinghouse, central clearing is intended to decrease (but not eliminate) counterparty risk relative to uncleared bilateral swaps. To the extent the funds enter into bilaterally negotiated swap transactions, the funds will enter into swap agreements only with counterparties that meet certain credit standards and subject to agreed collateralized procedures. The term of a swap can be days, months or years and certain swaps may be less liquid than others.

Upon entering into a centrally cleared swap contract, the funds are required to deposit cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract.

On a daily basis, interest accruals related to the exchange of future payments are recorded as a receivable and payable in the funds' statement of assets and liabilities for centrally cleared swaps and as unrealized appreciation or depreciation in the funds' statement of assets and liabilities for bilateral swaps. For centrally cleared swaps, the fund also pays or receives a variation margin based on the increase or decrease in the value of the swaps, including accrued interest as applicable, and records variation margin in the statement of assets and liabilities. The funds record realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from swaps are recorded in the funds' statement of operations.

Swap agreements can take different forms. Some of the funds have entered into the following types of swap agreements:

Interest rate swaps — Some of the funds have entered into interest rate swaps, which seek to manage the interest rate sensitivity of the fund by increasing or decreasing the duration of the funds or a portion of the funds' portfolio. An interest rate swap is an agreement between two parties to exchange or swap payments based on changes in an interest rate or rates. Typically, one interest rate is fixed and the other is variable based on a designated short-term interest rate such as the Secured Overnight Financing Rate (SOFR), prime rate or other benchmark. In other types of interest rate swaps, known as basis swaps, the parties agree to swap variable interest rates based on different designated short-term interest rates. Interest rate swaps generally do not involve the delivery of securities or other principal amounts. Rather, cash payments are exchanged by the parties based on the application of the designated interest rates to a notional amount, which is the predetermined dollar principal of the trade upon which payment obligations are computed. Accordingly, the funds' current obligation or right under the swap agreement is generally equal to the net amount to be paid or received under the swap agreement based on the relative value of the position held by each party.

Credit default swap indices — Some of the funds have entered into centrally cleared credit default swap indices, including CDX and iTraxx indices (collectively referred to as "CDSIs"), in order to assume exposure to a diversified portfolio of credits or to hedge against existing credit risks. A CDSI is based on a portfolio of credit default swaps with similar characteristics, such as credit default swaps on high-yield bonds. In a typical CDSI transaction, one party (the protection buyer) is obligated to pay the other party (the protection seller) a stream of periodic payments over the term of the contract. If a credit event, such as a default or restructuring, occurs with respect to any of the underlying reference obligations, the protection seller must pay the protection buyer the loss on those credits.

The funds may enter into a CDSI transaction as either protection buyer or protection seller. If the funds are protection buyers, they would pay the counterparty a periodic stream of payments over the term of the contract and would not recover any of those payments if no credit events were to occur with respect to any of the underlying reference obligations. However, if a credit event did occur, the funds, as protection buyers, would have the right to deliver the referenced debt obligations or a specified amount of cash, depending on the terms of the applicable agreement, and to receive the par value of such debt obligations from the counterparty protection seller. As protection sellers, the funds would receive fixed payments throughout the term of the contract if no credit events were to occur with respect to any of the underlying reference obligations. If a credit event were to occur, however, the value of any deliverable obligation received by the funds, coupled with the periodic payments previously received by the funds, may be less than the full notional value that the funds, as a protection seller, pays to the counterparty protection buyer, effectively resulting in a loss of value to the funds. Furthermore, as protection sellers, the funds would effectively add leverage to their portfolio because it would have investment exposure to the notional amount of the swap transaction.

The following table presents the average month-end notional amounts of options contracts purchased, futures contracts, forward currency contracts, interest rate swaps and credit default swaps while held for each fund (dollars in thousands):

	Options contracts purchased	Futures contracts	Forward currency contracts	Interest rate swaps	Credit default swaps

[1]Includes cumulative appreciation/depreciation on futures contracts, centrally cleared interest rate swaps and/or centrally cleared credit default swaps as reported in the applicable table following each fund's investment portfolio. Only current day's variation margin is reported within each fund's statement of assets and liabilities.
[2]Amount less than one thousand.
[3]Includes options purchased as reported in each fund's investment portfolio.

Collateral — Some funds either receive or pledge highly liquid assets, such as cash or U.S. government securities, as collateral due to securities lending and/or their use of futures contracts, forward currency contracts, interest rate swaps, credit default swaps and/or future delivery contracts. For securities lending, each participating fund receives collateral in exchange for lending investment securities. The lending agent may reinvest collateral from securities lending transactions according to agreed parameters. For futures contracts, centrally cleared interest rate swaps and centrally cleared credit default swaps, the program calls for each participating fund to pledge collateral for initial and variation margin by contract. For forward currency contracts, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled contracts by counterparty. For future delivery contracts, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled contracts by certain counterparties. The purpose of the collateral is to cover potential losses that could occur in the event that either party cannot meet its contractual obligation. Non-cash collateral pledged by each participating fund, if any, is disclosed in each fund's investment portfolio, and cash collateral pledged by each participating fund, if any, is held in a segregated account with the fund's custodian, which is reflected as pledged cash collateral in each fund's statement of assets and liabilities.

Rights of offset — Funds that hold forward currency contracts have enforceable master netting agreements with certain counterparties, where amounts payable by each party to the other in the same currency (with the same settlement date and with the same counter-party) are settled net of each party's payment obligation. If an early termination date occurs under these agreements following an event of default or termination event, all obligations of each party to its counterparty are settled net through a single payment in a single currency ("close-out netting"). For financial reporting purposes, the funds do not offset financial assets and financial liabilities that are subject to these master netting arrangements in the statements of assets and liabilities.

The following tables present each fund's forward currency contracts by counterparty that are subject to master netting agreements but that are not offset in the funds' statements of assets and liabilities. The net amount column shows the impact of offsetting on the funds' statement of assets and liabilities as of June 30, 2023, if close-out netting was exercised (dollars in thousands):

New World Fund

6. Taxation and distributions

Federal income taxation — Each fund complies with the requirements under Subchapter M of the Internal Revenue Code applicable to regulated investment companies and intends to distribute substantially all of its net taxable income and net capital gains each year. The funds are not subject to income taxes to the extent such distributions are made. Therefore, no federal income tax provision is required.

As of and during the period ended June 30, 2023, none of the funds had a liability for any unrecognized tax benefits. Each fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in their respective statements of operations. During the period, none of the funds incurred any significant interest or penalties.

Each fund's tax returns are generally not subject to examination by federal, state and, if applicable, non-U.S. tax authorities after the expiration of each jurisdiction's statute of limitations, which is typically three years after the date of filing but can be extended in certain jurisdictions.

Non-U.S. taxation — Dividend and interest income, if any, are recorded net of non-U.S. taxes paid. The funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. As a result of rulings from European courts, the funds filed for additional reclaims related to prior years. These reclaims are recorded when the amount is known and there are no significant uncertainties on collectability. During the six months ended June 30, 2023, some of the funds recognized reclaims (net of fees and the effect of realized gain or loss from currency translations) and interest related to European court rulings as follows (dollars in thousands):

Fund	Reclaims	Fees	Interest
Global Growth Fund	$ 220	$21	$ –
Growth Fund	352	2	–
International Fund	1,233	22	47
New World Fund	270	3	–
Growth-Income Fund	187	13	9

The reclaims and interest are included in dividend income and interest income, respectively, in each fund's statements of operations. Gains realized by the funds on the sale of securities in certain countries, if any, may be subject to non-U.S. taxes. The funds generally record an estimated deferred tax liability based on unrealized gains to provide for potential non-U.S. taxes payable upon the sale of these securities.

Distributions – Distributions determined on a tax basis may differ from net investment income and net realized gains for financial reporting purposes. These differences are due primarily to different treatment for items such as currency gains and losses; short-term capital gains and losses; capital losses related to sales of certain securities within 30 days of purchase; unrealized appreciation of certain investments in securities outside the U.S.; deferred expenses; cost of investments sold; paydowns on fixed-income securities; net capital losses; net operating losses; non-U.S. taxes on capital gains; amortization of premiums and discounts and income on certain investments. The fiscal year in which amounts are distributed may differ from the year in which the net investment income and net realized gains are recorded by the funds for financial reporting purposes.

Additional tax basis disclosures for each fund are as follows (dollars in thousands):

7. Fees and transactions

CRMC, the series' investment adviser, is the parent company of American Funds Distributors®, Inc. ("AFD"), the distributor of the series' shares, and American Funds Service Company® ("AFS"), the series' transfer agent. CRMC, AFD and AFS are considered related parties to the series.

Investment advisory services – The series has an investment advisory and service agreement with CRMC that provides for monthly fees accrued daily. These fees are based on annual rates that generally decrease as net asset levels increase. CRMC receives investment advisory fees from the underlying funds held by the managed risk funds, which are included in the unaudited net effective expense ratios that are provided as additional information in the financial highlights tables. Subadvisory fees for the managed risk funds are paid by CRMC to Milliman FRM. The managed risk funds are not responsible for paying any subadvisory fees.

Investment advisory services waivers – CRMC is waiving a portion of its investment advisory services fees for some of the funds. For the six months ended June 30, 2023, total investment advisory services fees waived by CRMC were $27,063,000. CRMC does not intend to recoup these waivers. Investment advisory fees in each fund's statement of operations are presented gross of any waivers from CRMC.

The range of rates, net asset levels and the current annualized rates of average daily net assets for each fund before and after any investment advisory services waivers, if applicable, are as follows:

Fund	Rates: Beginning with	Rates: Ending with	Net asset level (in billions): Up to	Net asset level (in billions): In excess of	For the six months ended June 30, 2023, before waiver	For the six months ended June 30, 2023, after waiver

Class-specific fees and expenses — Expenses that are specific to individual share classes are accrued directly to the respective share class. The principal class-specific fees and expenses are further described below:

Distribution services — The series has plans of distribution for all share classes except Class 1. Under the plans, the board of trustees approves certain categories of expenses that are used to finance activities primarily intended to sell fund shares. The plans provide for payments to pay service fees to firms that have entered into agreements with the series. These payments, based on an annualized percentage of average daily net assets, range from 0.18% to 0.50% as noted in the table below. In some cases, the board of trustees has limited the amounts that may be paid to less than the maximum allowed by the plans.

Share class	Currently approved limits	Plan limits
Class 1A	0.00%	0.25%
Class 2	0.25	0.25
Class 3	0.18	0.18
Class 4	0.25	0.25
Class P1	0.00	0.25
Class P2	0.25	0.50

Insurance administrative services – The series has an insurance administrative services plan for Class 1A, 4, P1 and P2 shares. Under the plan, these share classes pay 0.25% of each insurance company's respective average daily net assets in each share class to compensate the insurance companies for services provided to their separate accounts and contractholders for which the shares of the fund are beneficially owned as underlying investments of such contractholders' annuities. These services include, but are not limited to, maintenance, shareholder communications and transactional services. The insurance companies are not related parties to the series.

Transfer agent services – The series has a shareholder services agreement with AFS under which the funds compensate AFS for providing transfer agent services to all of the funds' share classes. These services include recordkeeping, shareholder communications and transaction processing. In addition, the managed risk funds reimburse AFS for amounts paid to third parties for performing transfer agent services on behalf of fund shareholders.

Administrative services – The series has an administrative services agreement with CRMC under which each fund compensates CRMC for providing administrative services to all of the funds' share classes except Class P1 and P2 shares. Administrative services are provided by CRMC and its affiliates to help assist third parties providing non-distribution services to fund shareholders. These services include providing in-depth information on each fund and market developments that impact fund investments. Administrative services also include, but are not limited to, coordinating, monitoring and overseeing third parties that provide services to fund shareholders. The agreement provides each fund, other than the managed risk funds, the ability to charge an administrative services fee at the annual rate of 0.05% of average daily net assets attributable to each share class. Currently each fund, other than the managed-risk funds, pays CRMC an administrative services fee at the annual rate of 0.03% of average daily net assets of each share class for CRMC's provision of administrative services. For the managed risk funds, CRMC receives administrative services fees at an annual rate of 0.03% of average daily net assets from Class 1 shares of the underlying funds for administrative services provided to the series.

Accounting and administrative services – The managed risk funds have a subadministration agreement with Bank of New York Mellon ("BNY Mellon") under which the fund compensates BNY Mellon for providing accounting and administrative services to each of the managed risk funds' share classes. These services include, but are not limited to, fund accounting (including calculation of net asset value), financial reporting and tax services. BNY Mellon is not a related party to the managed risk funds.

Class-specific expenses under the agreements described above were as follows (dollars in thousands):

Miscellaneous fee reimbursements — CRMC reimbursed a portion of miscellaneous fees and expenses for Managed Risk International Fund. This reimbursement may be adjusted or discontinued by CRMC, subject to any restrictions in the series' prospectus. For the six months ended June 30, 2023, total fees and expenses reimbursed by CRMC were $5,000. CRMC may recoup all or a portion of these reimbursements during the current fiscal year. Fees and expenses in each fund's statement of operations are presented gross of any reimbursements from CRMC.

Trustees' deferred compensation — Trustees who are unaffiliated with CRMC may elect to defer the cash payment of part or all of their compensation. These deferred amounts, which remain as liabilities of the funds, are treated as if invested in one or more of the American Funds. These amounts represent general, unsecured liabilities of the funds and vary according to the total returns of the selected funds. Trustees' compensation, shown on the accompanying financial statements, reflects current fees (either paid in cash or deferred) and a net increase in the value of the deferred amounts as follows (dollars in thousands):

Fund	Current fees	Increase in value of deferred amounts	Total trustees' compensation

Affiliated officers and trustees – Officers and certain trustees of the series are or may be considered to be affiliated with CRMC, AFD and AFS. No affiliated officers or trustees received any compensation directly from any fund in the series.

Investments in CCBF and CCF – Some of the funds hold shares of CCBF, a corporate bond fund, and/or CCF, an institutional prime money market fund ,which are both managed by CRMC. CCBF seeks to provide maximum total return consistent with capital preservation and prudent risk management by investing primarily in corporate debt instruments. CCBF is used as an investment vehicle for some of the funds' corporate bond investments. CCF invests in high-quality, short-term money market instruments. CCF is used as the primary investment vehicle for some of the funds' short-term investments. Both CCBF and CCF shares are only available for purchase by CRMC, its affiliates, and other funds managed by CRMC or its affiliates, and are not available to the public. CRMC does not receive an investment advisory services fee from either CCBF or CCF.

Security transactions with related funds – The funds may purchase from, or sell securities to, other CRMC-managed funds (or funds managed by certain affiliates of CRMC) under procedures adopted by the fund's board of trustees. The funds involved in such transactions are considered related by virtue of having a common investment adviser (or affiliated investment advisers), common trustees and/or common officers. When such transactions occur, each transaction is executed at the current market price of the security and no brokerage commissions or fees are paid in accordance with Rule 17a-7 of the 1940 Act.

The following table presents purchase and sale transactions between each fund and related funds, and net realized gain or loss from such sales, if any, as of June 30, 2023 (dollars in thousands):

Fund	Purchases	Sales	Net realized gain (loss)
Global Growth Fund	$ 59,214	$ 69,707	$16,429
Global Small Capitalization Fund	1,236	3,834	1,924

Capital Income Builder	4,548	5,851	440
Asset Allocation Fund	20,013	159,237	11,432
American Funds Global Balanced Fund	2,492	167	(11)
American High-Income Trust	–	398	270

8. Indemnifications

The series' organizational documents provide board members and officers with indemnification against certain liabilities or expenses in connection with the performance of their duties to the series. In the normal course of business, the series may also enter into contracts that provide general indemnifications. Each fund's maximum exposure under these arrangements is unknown since it is dependent on future claims that may be made against the series. The risk of material loss from such claims is considered remote. Insurance policies are also available to the series' board members and officers.

9. Committed line of credit

Global Small Capitalization Fund, New World Fund and American High-Income Trust participate with other funds managed by CRMC in a $1.5 billion credit facility (the "line of credit") to be utilized for temporary purposes to fund shareholder redemptions. Each fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which are reflected in other expenses in each fund's statement of operations. None of the funds borrowed on this line of credit at any time during the six months ended June 30, 2023.

10. Capital share transactions

Capital share transactions in each fund were as follows (dollars and shares in thousands):

Global Growth Fund

Share class	Sales*		Reinvestments of distributions		Repurchases*		Net (decrease) increase

[1]Based on average shares outstanding.
[2]This column reflects the impact of certain waivers/reimbursements from CRMC. During some of the years shown, CRMC waived a portion of investment advisory services fees on some funds, including each of the managed risk funds. In addition, during some of the years shown, CRMC reimbursed a portion of miscellaneous fees and expenses for some of the managed risk funds.
[3]Ratios do not include expenses of any Central Funds. The fund indirectly bears its proportionate share of the expenses of any Central Funds, if applicable.
[4]Based on operations for a period that is less than a full year.
[5]Unaudited.
[6]Not annualized.
[7]Annualized.
[8]Amount less than $.01.
[9]Amount less than .01%.
[10]Amount less than $1 million.
[11]This column does not include expenses of the underlying funds in which each fund invests.
[12]This column reflects the net effective expense ratios for each fund and class, which include each class's expense ratio combined with the weighted average net expense ratio of the underlying funds for the periods presented. Refer to the expense example for further information regarding fees and expenses.
[13]All or a significant portion of assets in this class consisted of seed capital invested by CRMC and/or its affiliates. Certain fees (including, where applicable, fees for distribution services) are not charged or accrued on these seed capital assets. If such fees were paid by the fund on seed capital assets, fund expenses would have been higher and net income and total return would have been lower.
[14]Refer to Note 5 for further information on mortgage dollar rolls.
[15]Rates do not include the fund's portfolio activity with respect to any Central Funds, if applicable.
[16]Amount is either less than 1% or there is no turnover.

Refer to the notes to financial statements.

Expense example

unaudited

The funds in American Funds Insurance Series serve as the underlying investment vehicle for various insurance products. As an owner of an insurance contract that invests in one of the funds in the series, you incur two types of costs: (1) transaction costs, such as initial sales charges on purchase payments and contingent deferred sales charges on redemptions (loads), and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other expenses. Additional fees are charged by the insurance companies related to the various benefits they provide. This example is intended to help you understand your ongoing costs (in dollars) of investing in the underlying funds so you can compare these costs with the ongoing costs of investing in other mutual funds that serve a similar function in other annuity products. The example is based on an investment of $1,000 invested at the beginning of the period and held for the entire six-month period (January 1, 2023, through June 30, 2023).

Actual expenses:

The first line of each share class in the tables on the following pages provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = 8.6), then multiply the result by the number in the first line under the heading titled “Expenses paid during period” to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes:

The second line of each share class in the tables on the following pages provides information about hypothetical account values and hypothetical expenses based on the actual expense ratio for the share class and an assumed rate of return of 5.00% per year before expenses, which is not the actual return of the share class. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the fund and other funds. To do so, compare this 5.00% hypothetical example with the 5.00% hypothetical examples that appear in the shareholder reports of the other funds.

Notes:

Additional fees are charged by the insurance companies related to the various benefits they provide. You can estimate the impact of these fees by adding the amount of the fees to the total estimated expenses you paid on your account during the period as calculated above. In addition, your ending account value would be lower by the amount of these fees.

Note that the expenses shown in the tables on the following pages are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of each share class in the tables is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

[1]The “expenses paid during period” are equal to the “annualized expense ratio,” multiplied by the average account value over the period, multiplied by the number of days in the period, and divided by 365 (to reflect the one-half year period).
[2]The “expenses paid during period” and “annualized expense ratio” do not include the expenses of the underlying funds in which each fund invests.
[3]The “effective expenses paid during period” are equal to the “effective annualized expense ratio,” multiplied by the average account value over the period, multiplied by the number of days in the period, and divided by 365 (to reflect the period).
[4]The “effective annualized expense ratio” reflects the net annualized expense ratio of the class plus the class’s pro-rata share of the weighted average expense ratio of the underlying funds in which it invests.

Approval of Investment Advisory and Service Agreement – American Funds Insurance Series

The series' board has approved the continuation of the series' Investment Advisory and Service Agreement (the "agreement") with Capital Research and Management Company ("CRMC") for an additional one-year term through April 30, 2024. The board approved the agreement following the recommendation of the series' Contracts Committee (the "committee"), which is composed of all the series' independent board members. The board and the committee determined in the exercise of their business judgment that the advisory fee structure for each fund within the series was fair and reasonable in relation to the services provided, and that approving the agreement was in the best interests of each fund and its shareholders.

In reaching this decision, the board and the committee took into account their interactions with CRMC as well as information furnished to them throughout the year and otherwise provided to them, as well as information prepared specifically in connection with their review of the agreement, and were advised by their independent counsel with respect to the matters considered. They considered the following factors, among others, but did not identify any single issue or particular piece of information that, in isolation, was the controlling factor, and each board and committee member did not necessarily attribute the same weight to each factor.

1. Nature, extent and quality of services

The board and the committee considered the depth and quality of CRMC's investment management process, including its global research capabilities; the experience, capability and integrity of its senior management and other personnel; the low turnover rates of its key personnel; the overall financial strength and stability of CRMC and the Capital Group organization; the resources and systems CRMC devotes to investment management (the manner in which each fund's assets are managed, including liquidity management), financial, investment operations, compliance, trading, proxy voting, shareholder communications, and other services; and the ongoing evolution of CRMC's organizational structure designed to maintain and strengthen these qualities. The board and the committee also considered the nature, extent and quality of administrative and shareholder services provided by CRMC to the funds under the agreement and other agreements, as well as the benefits to each fund's shareholders from investing in a fund that is part of a large family of funds. The board and the committee considered the risks assumed by CRMC in providing services to the funds, including operational, business, financial, reputational, regulatory and litigation risks. The board and the committee concluded that the nature, extent and quality of the services provided by CRMC have benefited and should continue to benefit each fund and its shareholders.

2. Investment results

The board and the committee considered the investment results of each fund in light of its objectives. They compared each fund's investment results with those of other funds (including funds that currently form the basis of the Lipper index for the category in which each fund is included), and data such as relevant market and fund indexes over various periods (including each fund's lifetime) through September 30, 2022. They generally placed greater emphasis on investment results over longer term periods. On the basis of this evaluation and the board's and the committee's ongoing review of investment results, and considering the relative market conditions during certain reporting periods, the board and the committee concluded that each fund's investment results have been satisfactory for renewal of the agreement, and that CRMC's record in managing the funds indicated that its continued management should benefit each fund and its shareholders.

3. Advisory fees and total expenses

The board and the committee compared the advisory fees and total expense levels of each fund to those of other relevant funds. They observed that the advisory fees and total expenses of each fund generally compared favorably to those of other similar funds included in the comparable Lipper category. The board and the committee also considered the breakpoint discounts in each fund's advisory fee structure that reduce the level of fees charged by CRMC to the fund as fund assets increase. The board also considered and approved the amended fee schedule to the agreement that lowered the current fee schedule and resulted in an overall lower advisory fee. The board noted that there would be no diminution in services provided as a result of the lower advisory fee for certain funds.

In addition, the board and committee reviewed information regarding the effective advisory fees charged to non-mutual fund clients by CRMC and its affiliates. They noted that, to the extent there were differences between the advisory fees paid by each fund and the advisory fees paid by those clients, the differences appropriately reflected the investment, operational, regulatory and market differences between advising the funds and the other clients. The board and the committee concluded that each fund's cost structure was fair and reasonable in relation to the services provided, as well as in relation to the risks assumed by the adviser in sponsoring and managing each fund, and that each fund's shareholders receive reasonable value in return for the advisory fees and other amounts paid to CRMC by the funds.

4. Ancillary benefits

The board and the committee considered a variety of other benefits that CRMC and its affiliates receive as a result of CRMC's relationship with the series and other American Funds, including fees for administrative services provided to certain share classes; fees paid to CRMC's affiliated transfer agent; sales charges and distribution fees received and retained by the series' principal underwriter, an affiliate of CRMC; and possible ancillary benefits to CRMC and its institutional management affiliates in managing other investment vehicles. The board and the committee reviewed CRMC's portfolio trading practices, noting that CRMC bears the cost of third-party research. The board and committee also noted that CRMC benefited from the use of commissions from portfolio transactions made on behalf of each fund to facilitate payment to certain broker-dealers for research to comply with regulatory requirements applicable to these firms, with all such amounts reimbursed by CRMC. The board and the committee took these ancillary benefits into account in evaluating the reasonableness of the other amounts paid to CRMC by the funds.

5. Adviser financial information

The board and the committee reviewed information regarding CRMC's costs of providing services to the American Funds, including personnel, systems and resources of investment, compliance, trading, accounting and other administrative operations. They considered CRMC's costs and related cost allocation methodology as well as its track record of investing in technology, infrastructure and staff to maintain and expand services and capabilities, respond to industry and regulatory developments, and attract and retain qualified personnel. They noted information regarding the compensation structure for CRMC's investment professionals. They reviewed information on the profitability of the investment adviser and its affiliates. The board and the committee also compared CRMC's profitability and compensation data to the reported results and data of a number of large, publicly held investment management companies. The board and the committee noted the competitiveness and cyclicality of both the mutual fund industry and the capital markets, and the importance in that environment of CRMC's long-term profitability for maintaining its independence, company culture and management continuity. They further considered the breakpoint discounts in the funds' advisory fee structure and CRMC's sharing of potential economies of scale, or efficiencies, through breakpoints and other fee reductions and costs voluntarily absorbed. The board and the committee concluded that each fund's advisory fee structure reflected a reasonable sharing of benefits between CRMC and the funds' shareholders.

Approval of Investment Advisory and Service Agreement and Subadvisory Agreement — American Funds Insurance Series Managed Risk Funds

The series' board has approved the continuation of the series' Investment Advisory and Service Agreement (the "advisory agreement") with Capital Research and Management Company ("CRMC") with respect to the Managed Risk Funds for an additional one-year term through April 30, 2024. The board has also approved the series' Subadvisory Agreement (the "subadvisory agreement") with CRMC and Milliman Financial Risk Management LLC ("Milliman FRM") with respect to these funds for the same term. The advisory and subadvisory agreements are jointly referred to below as the "agreements." The board approved the agreements following the recommendation of the series' Contracts Committee (the "committee"), which is composed of all the series' independent board members. The board and the committee determined in the exercise of their business judgment that the advisory fee structure for each fund within the series was fair and reasonable in relation to the services provided, and that approving the agreements was in the best interests of each fund and its shareholders.

In reaching this decision, the board and the committee took into account their interactions with CRMC and Milliman FRM as well as information furnished to them throughout the year and otherwise provided to them, as well as information prepared specifically in connection with their review of the agreements, and were advised by their independent counsel with respect to the matters considered. They considered the following factors, among others, but did not identify any single issue or particular piece of information that, in isolation, was the controlling factor, and each board and committee member did not necessarily attribute the same weight to each factor.

1. Nature, extent and quality of services

The board and the committee considered the depth and quality of CRMC's investment management process, including its global research capabilities; the experience, capability and integrity of its senior management and other personnel; the low turnover rates of its key personnel; the overall financial strength and stability of CRMC and the Capital Group organization; the resources and systems CRMC devotes to investment management (the manner in which each fund's assets are managed, including liquidity management), financial, investment operations, compliance, trading, proxy voting, shareholder communications, and other services; and the ongoing evolution of CRMC's organizational structure designed to maintain and strengthen these qualities. The board and the committee also considered the nature, extent and quality of the oversight of Milliman FRM's services provided by CRMC, administrative and shareholder services provided by CRMC to the funds under the advisory agreement and other agreements, as well as the benefits to each fund's shareholders from investing in a fund that is part of a large family of funds. The board and the committee considered the risks assumed by CRMC in providing services to the funds, including operational, business, financial, reputational, regulatory and litigation risks. The board and the committee concluded that the nature, extent and quality of the services provided by CRMC have benefited and should continue to benefit each fund and its shareholders.

The board and the committee also considered the depth and quality of Milliman FRM's investment management process, including its experience in applying the Milliman Managed Risk Strategy to other funds in the series and risk management services for other clients; the experience, capability and integrity of its senior management and other personnel; and the services provided to each fund under the subadvisory agreement. The board and the committee concluded that the nature, extent and quality of the services provided by Milliman FRM have benefited and should continue to benefit each fund and its shareholders.

2. Investment results

The board and the committee considered the investment results of each fund in light of its objectives. They compared each fund's investment results with those of other funds (including funds that currently form the basis of the Lipper index for the category in which each fund is included), and data such as relevant market and fund indexes over various periods (including each fund's lifetime) through September 30, 2022. They generally placed greater emphasis on investment results over longer term periods. The board and the committee also considered the volatility of the funds compared with the S&P 500 Managed Risk indexes and those of a group of funds with volatility management strategies identified by management over various periods (including each fund's lifetime) through September 30, 2022. On the basis of this evaluation and the board's and the committee's ongoing review of investment results, and considering the relative market conditions during certain reporting periods, the board and the committee concluded that each fund's investment results and the results of the services provided by CRMC and Milliman FRM have been satisfactory for renewal of the agreements, and that CRMC's and Milliman FRM's record in managing the funds indicated that their continued management should benefit each fund and its shareholders.

3. Advisory fees and total expenses

The board and the committee compared the advisory fees and total expense levels of each fund to those of other relevant funds. The board and the committee noted CRMC's waiver of a portion of the advisory fee payable by each fund under the advisory agreement, CRMC's commitment not to remove the waiver without board approval and CRMC's agreement to pay the fees due to Milliman FRM under the subadvisory agreement. They observed that each fund's advisory fees and total expenses generally compared favorably to those of other similar funds included in the comparable Lipper category.

The board and the committee also considered the breakpoint discounts in each underlying fund's advisory fee structure that reduce the level of fees charged by CRMC to the underlying fund as its assets increase. In addition, they reviewed information regarding the effective advisory fees charged to non-mutual fund clients by CRMC and its affiliates. They noted that, to the extent there were differences between the advisory fees paid by each fund and the advisory fees paid by those clients, the differences appropriately reflected the investment, operational, regulatory and market differences between advising the funds and the other clients. They also reviewed the fees paid to Milliman FRM by other funds which it advised or subadvised. The board and the committee concluded that each fund's cost structure was fair and reasonable in relation to the services that CRMC provided, directly and through Milliman FRM, as well as in relation to the risks assumed by the adviser in sponsoring and managing each fund, and that each fund's shareholders receive reasonable value in return for the advisory fees and other amounts paid to CRMC (and indirectly to Milliman FRM) by the funds.

4. Ancillary benefits

The board and the committee considered a variety of other benefits that CRMC and its affiliates receive as a result of CRMC's relationship with the series and the other American Funds, including fees for administrative services provided to certain share classes; fees paid to CRMC's affiliated transfer agent; sales charges and distribution fees received and retained by the series' principal underwriter, an affiliate of CRMC; and possible ancillary benefits to CRMC and its institutional management affiliates in managing other investment vehicles. The board and the committee reviewed CRMC's portfolio trading practices, noting that CRMC bears the cost of third-party research. The board and committee also noted that CRMC benefited from the use of commissions from portfolio transactions made on behalf of each fund to facilitate payment to certain broker-dealers for research to comply with regulatory requirements applicable to these firms, with all such amounts reimbursed by CRMC. The board and the committee also reviewed similar ancillary benefits received by Milliman FRM as a result of its relationship with the series. The board and the committee took these ancillary benefits into account in evaluating the reasonableness of the advisory fees and other amounts paid to CRMC (and indirectly to Milliman FRM) by each fund.

5. Adviser financial information

The board and the committee reviewed information regarding CRMC's costs of providing services to the American Funds, including personnel, systems and resources of investment, compliance, trading, accounting and other administrative operations. They considered CRMC's costs and related cost allocation methodology as well as its track record of investing in technology, infrastructure and staff to maintain and expand services and capabilities, respond to industry and regulatory developments, and attract and retain qualified personnel. They noted information regarding the compensation structure for CRMC's investment professionals. They reviewed information on the profitability of the investment adviser and its affiliates. The board and the committee also compared CRMC's profitability and compensation data to the reported results and data of a number of large, publicly held investment management companies. The board and the committee noted the competitiveness and cyclicality of both the mutual fund industry and the capital markets, and the importance in that environment of CRMC's long-term profitability for maintaining its independence, company culture and management continuity. They further considered the breakpoint discounts in the funds' advisory fee structure and CRMC's sharing of potential economies of scale, or efficiencies, through breakpoints and other fee reductions and costs voluntarily absorbed. The board and the committee concluded that each fund's advisory fee structure reflected a reasonable sharing of benefits between CRMC and the funds' shareholders.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the series prospectuses and summary prospectuses, which can be obtained from your financial professional and should be read carefully before investing. You may also call American Funds Service Company (AFS) at (800) 421-4225 or refer to the Capital Group website at capitalgroup.com/afis.

"American Funds Proxy Voting Procedures and Principles" — which describes how we vote proxies relating to portfolio securities — is available on the Capital Group website or upon request by calling AFS. The series files its proxy voting record with the U.S. Securities and Exchange Commission (SEC) for the 12 months ended June 30 by August 31. The proxy voting record is available free of charge on the SEC website at sec.gov and on the Capital Group website.

American Funds Insurance Series files a complete list of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form NPORT-P. This filing is available free of charge on the SEC website and on our website.

This report is for the information of American Funds Insurance Series investors, but it also may be used as sales literature when preceded or accompanied by the current prospectuses or summary prospectuses for American Funds Insurance Series and the prospectus for the applicable insurance contract, which give details about charges, expenses, investment objectives and operating policies of the series. If used as sales material after September 30, 2023, this report must be accompanied by a statistical update for the most recently completed calendar quarter.

Fund attribution data was produced using FactSet, a third-party software system, based on daily portfolios. Securities in their initial period of acquisition may not be included in this analysis. The analysis includes equity investments only and excludes forward contracts and fixed income investments, if applicable. It does not account for buy-and-sell transactions that might have occurred intraday. As a result, average portfolio weight percentages are approximate, and the actual average portfolio weight percentages might be higher or lower. Data elements, such as pricing, income, market cap, etc., were provided by FactSet. The indexes provided for attribution are based on FactSet's methodology. The indexes are broad-based market benchmarks and may not be used by Capital Group® as the sole comparative index for the funds. Capital Group believes the software and information from FactSet to be reliable. However, Capital Group cannot be responsible for inaccuracies, incomplete information or updating of information by FactSet.

Hedge instruments, including exchange-traded futures contracts and exchange-traded put options, may not provide an effective hedge of the underlying securities because changes in the prices of such instruments may not track those of the securities they are intended to hedge. In addition, the managed risk strategy may not effectively protect the funds from market declines and will limit the funds' participation in market gains. The use of the managed risk strategy could cause the funds' returns to lag those of the underlying funds in certain market conditions.

American Funds Distributors, Inc.

The Capital Advantage®

Since 1931, Capital Group, home of American Funds, has helped investors pursue long-term investment success. Our consistent approach — in combination with The Capital System™ — has resulted in superior outcomes.

Aligned with investor success

We base our decisions on a long-term perspective, which we believe aligns our goals with the interests of our clients. American Funds Insurance Series portfolio managers average 28 years of investment industry experience, including 23 years at our company, reflecting a career commitment to our long-term approach.[1]

The Capital System

The Capital System combines individual accountability with teamwork. Funds using The Capital System are divided into portions that are managed independently by investment professionals with diverse backgrounds, ages and investment approaches. An extensive global research effort is the backbone of our system.

American Funds Insurance Series' superior outcomes

American Funds Insurance Series equity-focused funds have beaten their comparable Lipper indexes in 88% of 10-year periods and 100% of 20-year periods.[2] Our fixed income funds have helped investors achieve diversification through attention to correlation between bonds and equities.[3] We strive to keep management fees competitive. Over the past 20 years, most funds' fees have been below industry averages.[4]

[1] Portfolio manager experience as of the American Funds Insurance Series prospectus dated May 1, 2023.

[2] Based on Class 1 share results for rolling calendar-year periods starting the first full calendar year after each fund's inception through December 31, 2022. Periods covered are the shorter of the fund's lifetime or since the inception date of the comparable Lipper index or average. The comparable Lipper indexes are: Global Funds Index (Global Growth Fund, Capital World Growth and Income Fund), Growth Funds Index (Growth Fund), International Funds Index (International Fund), Emerging Markets Funds Index (New World Fund), Growth & Income Funds Index (Washington Mutual Investors Fund, Growth and Income Fund) and Balanced Funds Index (Asset Allocation Fund). The Lipper Global Small-/Mid-Cap Funds Average was used for Global Small Capitalization Fund. Lipper source: Refinitiv Lipper. There have been periods when the fund has lagged the index.

[3] Based on Class 1 share results as of December 31, 2022. Four of our five fixed income American Funds that have been in existence for the three year period showed a three-year correlation lower than their respective Morningstar peer group averages. S&P 500 Index was used as an equity market proxy. Correlation based on monthly total returns. Correlation is a statistical measure of how two securities move in relation to each other. A correlation ranges from –1 to 1. A positive correlation close to 1 implies that as one security moves, either up or down, the other security will move in "lockstep," in the same direction. A negative correlation close to –1 indicates that the securities have moved in the opposite direction.

[4] Based on management fees for the 20-year period ended December 31, 2022, versus comparable Lipper categories, excluding funds of funds.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,022.20	$ 1.40	$ 1,023.40	$ 1.40	0.28%
Service Class	1,000.00	1,021.60	2.06	1,022.80	2.06	0.41

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Transamerica BlackRock Government Money Market VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock Government Money Market VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

3. INVESTMENT VALUATION (continued)

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced (“TBA”) securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Short-term notes: The Portfolio values all security positions using amortized cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Transamerica BlackRock Government Money Market VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: General market conditions, overall economic trends or events, such as real or perceived adverse economic, political or regulatory conditions, recessions, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, lack of liquidity or other disruptions in the bond markets, or other adverse market events and conditions could cause the value of your investment in the Portfolio, or its yield, to decline. While the Portfolio seeks to maintain a $1.00 share price, when market prices fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Government money market fund risk: The Portfolio operates as a "government" money market portfolio under applicable federal regulations. The Portfolio continues to use the special pricing and valuation conventions that currently facilitate a stable share price of $1.00, although there is no guarantee that the Portfolio will be able to maintain a $1.00 share price. The Portfolio does not currently intend to avail itself of the ability to impose "liquidity fees" and/or "redemption gates" on fund redemptions, as permitted under the applicable regulations. However, the Board reserves the right, with notice to shareholders, to change this policy, thereby permitting the Portfolio to impose such fees and gates in the future.

Repurchase agreements risk: In a repurchase agreement, the Portfolio purchases securities from a broker-dealer or a bank, called the counterparty, upon the agreement of the counterparty to repurchase the securities from the Portfolio at a later date, and at a specified price. The securities purchased serve as the Portfolio's collateral for the obligation of the counterparty to repurchase the securities. If the counterparty does not repurchase the securities, the Portfolio is entitled to sell the securities, but the Portfolio may not be able to sell them for the price at which they were purchased, thus causing a loss. If the counterparty becomes insolvent, there is some risk that the Portfolio will not have a right to the securities, or the immediate right to sell the securities.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $1 billion	0.24%
Over $1 billion up to $3 billion	0.22
Over $3 billion	0.21

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.38%	May 1, 2024
Service Class	0.63	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

Additionally, TAM or any of its affiliates may voluntarily waive fees and/or reimburse expenses of one or more classes of the Portfolio to such level(s) as the Trust's officers may reasonably determine from time to time in an effort to prevent the Portfolio's yield from falling below zero. Any such voluntary waiver or expense reimbursement is in addition to any contractual expense limitation arrangements in effect from time to time and may be discontinued by TAM or its affiliates at any time. TAM is entitled to reimbursement by the applicable class(es) of the Portfolio of amounts voluntarily waived and/or reimbursed during the previous 36 months so long as the reimbursement does not result in the class's effective daily yield being negative. Any such reimbursement may result in the class's expenses exceeding

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

the contractual expense cap for the class. TAM or its affiliates may request that financial intermediaries reduce or waive amounts payable to those intermediaries with respect to services rendered to the Portfolio or its shareholders, and those reductions or waivers may reduce the amounts waived and/or reimbursed by TAM under the contractual and/or voluntary waiver arrangements with respect to the Portfolio. There can be no assurance that the Portfolio will be able to prevent a negative yield.

Voluntarily waived and/or reimbursed expenses related to the maintenance of the yield are included in Expenses waived and/or reimbursed, and amounts recaptured by TAM under the voluntary yield waiver are included in Recapture of previously waived and/or reimbursed fees, in each case included in the Statement of Operations included in this shareholder report. The actual expense ratio of each class of the Portfolio, including any amounts waived and/or reimbursed and any amounts recaptured under the voluntary yield waiver, are shown in the “Ratio and supplemental data” section in the Portfolio’s Financial Highlights in this shareholder report.

For the 36-month period ended June 30, 2023, the amounts waived by TAM due to the maintenance of the yield are as follows:

	Amounts Waived				
	2020	**2021**	**2022**	**2023**	**Total**
Initial Class	$ 245,822	$ 489,368	$ 76,738	$ —	$ 811,928
Service Class	743,940	1,356,271	221,781	—	2,321,992

As of June 30, 2023, the balances available for recapture by TAM due to the maintenance of the yield are as follows:

	Amounts Available				
	2020	**2021**	**2022**	**2023**	**Total**
Initial Class	$ 244,584	$ 489,318	$ 76,738	$ —	$ 810,640
Service Class	740,950	1,356,261	221,781	—	2,318,992

For the 36-month period ended June 30, 2023, the amounts waived from financial intermediaries are as follows:

	Amounts Waived				
	2020 (A)	**2021 (A)**	**2022 (A)**	**2023 (A)**	**Total**
Service Class	$ 1,338,997	$ 1,549,979	$ 1,574,004	$ 411,092	$ 4,874,072

(A) *Not subject to recapture.*

For the 36-month period ended June 30, 2023, the amounts waived by TAM due to the operating expense limitation are as follows:

	Amounts Waived				
	2020	**2021**	**2022**	**2023**	**Total**
Initial Class	$ 15,993	$ —	$ —	$ —	$ 15,993
Service Class	48,814	—	—	—	48,814

As of June 30, 2023, there are no amounts available for recapture by TAM due to the operating expense limitation.

Distribution and service fees: TST has a distribution plan (“Distribution Plan”) pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio’s distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio’s shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc (“SS&C”). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 879,325,445	$ —	$ —	$ —

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica BlackRock Government Money Market VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and BlackRock Investment Management, LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against a peer universe of comparable mutual funds, as prepared by Broadridge, for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds, and further noted the relatively close spread in performance among the money market funds in the peer universe over certain periods.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-, 3- and 10-year periods and below the median for the past 5-year period. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on November 1, 2018 pursuant to its current investment strategies. The Trustees noted that the Portfolio transitioned from a "prime" money market portfolio to a "government" money market portfolio on May 1, 2016.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica BlackRock iShares Active Asset Allocation – Conservative VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio (C)**
Initial Class	$ 1,000.00	$ 1,060.00	$ 2.50	$ 1,022.40	$ 2.46	0.49%
Service Class	1,000.00	1,058.00	3.78	1,021.10	3.71	0.74

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

Transamerica BlackRock iShares Active Asset Allocation – Conservative VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Active Asset Allocation – Conservative VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per

3. INVESTMENT VALUATION (continued)

share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds (“ETF”): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions

Total Borrowings	**$ 13,263,612**	**$ —**	**$ —**	**$ —**	**$ 13,263,612**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK FACTORS (continued)

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Fixed-income securities risk: Risks of fixed-income securities include credit risk, interest rate risk, counterparty risk, prepayment risk, extension risk, valuation risk, and liquidity risk. The value of fixed-income securities may go up or down, sometimes rapidly and unpredictably, due to general market conditions, such as real or perceived adverse economic or political conditions, tariffs and trade disruptions, inflation, changes in interest rates, lack of liquidity in the bond markets or adverse investor sentiment. In addition, the value of a fixed-income security may decline if the issuer or other obligor of the security fails to pay principal and/or interest, otherwise defaults or has its credit rating downgraded or is perceived to be less creditworthy, or the credit quality or value of any underlying assets declines. If the value of fixed-income securities owned by the Portfolio falls, the value of your investment will go down. The Portfolio may lose its entire investment in the fixed-income securities of an issuer.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	**Rate**
First $500 million	0.5000%
Over $500 million up to $1 billion	0.4900
Over $1 billion up to $2.5 billion	0.4725
Over $2.5 billion up to $3.5 billion	0.4650
Over $3.5 billion up to $4.5 billion	0.4525
Over $4.5 billion	0.4400

(A) *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on

Transamerica BlackRock iShares Active Asset Allocation – Conservative VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.55%	May 1, 2024
Service Class	0.80	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Transamerica BlackRock iShares Active Asset Allocation – Conservative VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 92,720,952	$ 103,792,782

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 266,094,571	$ 6,727,805	$ (20,728,970)	$ (14,001,165)

Transamerica BlackRock iShares Active Asset Allocation – Conservative VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Active Asset Allocation – Conservative VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and BlackRock Investment Management, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its composite benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on November 1, 2021 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was above the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica BlackRock iShares Active Asset Allocation – Moderate Growth VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,110.90	$ 2.72	$ 1,022.20	$ 2.61	0.52%
Service Class	1,000.00	1,109.40	4.03	1,021.00	3.86	0.77

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

Transamerica BlackRock iShares Active Asset Allocation – Moderate Growth VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Active Asset Allocation – Moderate Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office

1. ORGANIZATION (continued)

space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per

3. INVESTMENT VALUATION (continued)

share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds ("ETF"): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Exchange-Traded Funds	$ 29,527,025	$ —	$ —	$ —	$ 29,527,025
Total Borrowings	**$ 29,527,025**	**$ —**	**$ —**	**$ —**	**$ 29,527,025**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK FACTORS (continued)

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	**Rate**
First $500 million	0.5000%
Over $500 million up to $1 billion	0.4900
Over $1 billion up to $2.5 billion	0.4725
Over $2.5 billion up to $3.5 billion	0.4650
Over $3.5 billion up to $4.5 billion	0.4525
Over $4.5 billion	0.4400

(A) *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.55%	May 1, 2024
Service Class	0.80	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

Transamerica BlackRock iShares Active Asset Allocation – Moderate Growth VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 95,123,660	$ 96,375,556

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 375,287,571	$ 27,227,982	$ (7,775,327)	$ 19,452,655

Transamerica BlackRock iShares Active Asset Allocation – Moderate Growth VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Active Asset Allocation – Moderate Growth VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and BlackRock Investment Management, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Transamerica BlackRock iShares Active Asset Allocation – Moderate Growth VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its composite benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on November 1, 2021 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the median for its peer group and below the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the

Transamerica BlackRock iShares Active Asset Allocation – Moderate Growth VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio (C)**
Initial Class	$ 1,000.00	$ 1,079.80	$ 2.42	$ 1,022.50	$ 2.36	0.47%
Service Class	1,000.00	1,078.30	3.71	1,021.20	3.61	0.72

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

(F) *TAM contractually agreed, through May 1, 2023, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

The Notes to Financial Statements are an integral part of this report.

Transamerica BlackRock iShares Active Asset Allocation – Moderate VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Active Asset Allocation – Moderate VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office

1. ORGANIZATION (continued)

space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per

3. INVESTMENT VALUATION (continued)

share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds (“ETF”): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Exchange-Traded Funds	$ 47,550,488	$ —	$ —	$ —	$ 47,550,488
Total Borrowings	**$ 47,550,488**	**$ —**	**$ —**	**$ —**	**$ 47,550,488**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

5. RISK FACTORS (continued)

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	**Rate**
First $500 million	0.5000%
Over $500 million up to $1 billion	0.4900
Over $1 billion up to $2.5 billion	0.4725
Over $2.5 billion up to $3.5 billion	0.4650
Over $3.5 billion up to $4.5 billion	0.4525
Over $4.5 billion	0.4400

(A) *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the

Transamerica BlackRock iShares Active Asset Allocation – Moderate VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.55%	May 1, 2024
Service Class	0.80	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 336,752,784	$ 380,382,153

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 983,520,860	$ 44,225,848	$ (51,880,331)	$ (7,654,483)

Transamerica BlackRock iShares Active Asset Allocation – Moderate VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Active Asset Allocation – Moderate VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and BlackRock Investment Management, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its composite benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on November 1, 2021 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio (C)**
Service Class	$ 1,000.00	$ 1,077.10	$ 3.76	$ 1,021.20	$ 3.66	0.73%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

Transamerica BlackRock iShares Dynamic Allocation – Balanced VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Dynamic Allocation – Balanced VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees

1. ORGANIZATION (continued)

and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

3. INVESTMENT VALUATION (continued)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds ("ETF"): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.
