Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions

Total Borrowings	**$ 1,652,351**	**$ —**	**$ —**	**$ —**	**$ 1,652,351**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

5. RISK FACTORS (continued)

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	**Rate**
First $500 million	0.5000%
Over $500 million up to $1 billion	0.4900
Over $1 billion up to $2.5 billion	0.4725
Over $2.5 billion up to $3.5 billion	0.4650
Over $3.5 billion up to $4.5 billion	0.4525
Over $4.5 billion	0.4400

[(A)] *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	0.80%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 221,562,443	$ 270,516,285

Transamerica BlackRock iShares Dynamic Allocation – Balanced VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 761,172,984	$ 40,000,970	$ (47,200,739)	$ (7,199,769)

Transamerica BlackRock iShares Dynamic Allocation – Balanced VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Dynamic Allocation – Balanced VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and BlackRock Investment Management, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Transamerica BlackRock iShares Dynamic Allocation – Balanced VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its composite benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on November 1, 2021 pursuant to its current investment strategies and benchmarks.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was above the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica BlackRock iShares Dynamic Allocation – Moderate Growth VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Service Class	$ 1,000.00	$ 1,109.20	$ 3.92	$ 1,021.10	$ 3.76	0.75%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio's Prospectus, may differ from the expense ratios disclosed in this report.*

Transamerica BlackRock iShares Dynamic Allocation – Moderate Growth VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Dynamic Allocation – Moderate Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees

1. ORGANIZATION (continued)

and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

3. INVESTMENT VALUATION (continued)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds ("ETF"): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Transamerica BlackRock iShares Dynamic Allocation – Moderate Growth VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Exchange-Traded Funds	$ 2,991,824	$ —	$ —	$ —	$ 2,991,824
Total Borrowings	**$ 2,991,824**	**$ —**	**$ —**	**$ —**	**$ 2,991,824**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

5. RISK FACTORS (continued)

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	Rate
First $500 million	0.5000%
Over $500 million up to $1 billion	0.4900
Over $1 billion up to $2.5 billion	0.4725
Over $2.5 billion up to $3.5 billion	0.4650
Over $3.5 billion up to $4.5 billion	0.4525
Over $4.5 billion	0.4400

(A) *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	0.80%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 57,783,892	$ 82,923,297

Transamerica BlackRock iShares Dynamic Allocation – Moderate Growth VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 325,518,558	$ 25,229,775	$ (8,863,950)	$ 16,365,825

Transamerica BlackRock iShares Dynamic Allocation – Moderate Growth VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Dynamic Allocation – Moderate Growth VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and BlackRock Investment Management, LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Transamerica BlackRock iShares Dynamic Allocation – Moderate Growth VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its composite benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on November 1, 2021 pursuant to its current investment strategies and benchmarks.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were in line with the median for its peer group and below the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica BlackRock iShares Edge 40 VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,042.60	$ 1.57	$ 1,023.30	$ 1.56	0.31%
Service Class	1,000.00	1,040.50	2.83	1,022.00	2.81	0.56

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Edge 40 VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Cash overdraft: The Portfolio may have cash overdraft balances. A fee is incurred on these overdrafts, calculated by multiplying the overdraft by a rate based on the Federal Funds Rate.

Payables, if any, are reflected as Due to custodian within the Statement of Assets and Liabilities. Expenses, if any, from U.S. cash overdrafts are reflected in Custody fees within the Statement of Operations. Expenses, if any, from foreign cash overdrafts are reflected in Other expenses within the Statement of Operations.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds ("ETF"): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Exchange-Traded Funds	$ 1,181,375	$ —	$ —	$ —	$ 1,181,375
Total Borrowings	**$ 1,181,375**	**$ —**	**$ —**	**$ —**	**$ 1,181,375**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

5. RISK FACTORS (continued)

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Underlying exchange-traded funds risk: Because the Portfolio invests its assets in underlying ETFs, its ability to achieve its investment objective depends largely on the performance of the underlying ETFs in which it invests. Investing in underlying ETFs subjects the Portfolio to the risks of investing in the underlying securities or assets held by those ETFs. Each of the underlying ETFs in which the Portfolio may invest has its own investment risks, and those risks can affect the value of the underlying ETFs' shares and therefore the value of the Portfolio's investments. There can be no assurance that the investment objective of any underlying ETF will be achieved. To the extent that the Portfolio invests more of its assets in one underlying ETF than in another, the Portfolio will have greater exposure to the risks of that underlying ETF. In addition, the Portfolio will bear a pro rata portion of the operating expenses of the underlying ETFs in which it invests.

Smart beta investing risk: Smart beta strategies seek to capture broad, consistent drivers of return and to out-perform traditional index strategies. These strategies may not work as intended. An underlying ETF pursuing a smart beta strategy may not achieve its objective and may not perform as well as other funds using other asset management strategies.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	Rate
First $1 billion	0.30%
Over $1 billion	0.28

[(A)] *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.31%	May 1, 2024
Service Class	0.56	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 4,160,835	$ 18,664,593

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 234,552,179	$ 19,283,345	$ (13,711,734)	$ 5,571,611

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Edge 40 VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and BlackRock Investment Management, LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was in line with the median for its peer universe for the past 1- and 5-year periods and below the median for the past 3- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was below its composite benchmark for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on November 1, 2018 pursuant to its current investment objective, investment strategies and benchmark.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was above the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica BlackRock iShares Edge 50 VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [A]		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period [B]**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period [B]**	**Net Annualized Expense Ratio [C]**
Service Class	$ 1,000.00	$ 1,044.70	$ 2.74	$ 1,022.10	$ 2.71	0.54%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Edge 50 VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level

3. INVESTMENT VALUATION (continued)

input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds (“ETF”): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

Transamerica BlackRock iShares Edge 50 VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Exchange-Traded Funds	$ 1,393,375	$ —	$ —	$ —	$ 1,393,375
Total Borrowings	**$ 1,393,375**	**$ —**	**$ —**	**$ —**	**$ 1,393,375**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Underlying exchange-traded funds risk: Because the Portfolio invests its assets in underlying ETFs, its ability to achieve its investment objective depends largely on the performance of the underlying ETFs in which it invests. Investing in underlying ETFs subjects the Portfolio to the risks of investing in the underlying securities or assets held by those ETFs. Each of the underlying ETFs in which the Portfolio may invest has its own investment risks, and those risks can affect the value of the underlying ETFs' shares and therefore the value of the Portfolio's investments. There can be no assurance that the investment objective of any underlying ETF will

5. RISK FACTORS (continued)

be achieved. To the extent that the Portfolio invests more of its assets in one underlying ETF than in another, the Portfolio will have greater exposure to the risks of that underlying ETF. In addition, the Portfolio will bear a pro rata portion of the operating expenses of the underlying ETFs in which it invests.

Smart beta investing risk: Smart beta strategies seek to capture broad, consistent drivers of return and to out-perform traditional index strategies. These strategies may not work as intended. An underlying ETF pursuing a smart beta strategy may not achieve its objective and may not perform as well as other funds using other asset management strategies.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	Rate
First $1 billion	0.30%
Over $1 billion	0.28

(A) *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	0.56%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 9,893,095	$ 23,669,726

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

Transamerica BlackRock iShares Edge 50 VP

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 442,553,239	$ 32,719,627	$ (33,188,660)	$ (469,033)

Transamerica BlackRock iShares Edge 50 VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Edge 50 VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and BlackRock Investment Management, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limit, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-year period, in line with the median for the past 5-year period and below the median for the past 3-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was below its composite benchmark for the past 1-, 3- and 5-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [A]		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Net Annualized Expense Ratio [C]
Service Class	$ 1,000.00	$ 1,056.30	$ 2.80	$ 1,022.10	$ 2.76	0.55%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Edge 75 VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Cash overdraft: The Portfolio may have cash overdraft balances. A fee is incurred on these overdrafts, calculated by multiplying the overdraft by a rate based on the Federal Funds Rate.

Payables, if any, are reflected as Due to custodian within the Statement of Assets and Liabilities. Expenses, if any, from U.S. cash overdrafts are reflected in Custody fees within the Statement of Operations. Expenses, if any, from foreign cash overdrafts are reflected in Other expenses within the Statement of Operations.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

3. INVESTMENT VALUATION (continued)

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds ("ETF"): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Exchange-Traded Funds	$ 4,764,866	$ —	$ —	$ —	$ 4,764,866
Total Borrowings	**$ 4,764,866**	**$ —**	**$ —**	**$ —**	**$ 4,764,866**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Underlying exchange-traded funds risk: Because the Portfolio invests its assets in underlying ETFs, its ability to achieve its investment objective depends largely on the performance of the underlying ETFs in which it invests. Investing in underlying ETFs subjects the Portfolio to the risks of investing in the underlying securities or assets held by those ETFs. Each of the underlying ETFs in which the Portfolio may invest has its own investment risks, and those risks can affect the value of the underlying ETFs' shares and therefore the value of the Portfolio's investments. There can be no assurance that the investment objective of any underlying ETF will

5. RISK FACTORS (continued)

be achieved. To the extent that the Portfolio invests more of its assets in one underlying ETF than in another, the Portfolio will have greater exposure to the risks of that underlying ETF. In addition, the Portfolio will bear a pro rata portion of the operating expenses of the underlying ETFs in which it invests.

Smart beta investing risk: Smart beta strategies seek to capture broad, consistent drivers of return and to out-perform traditional index strategies. These strategies may not work as intended. An underlying ETF pursuing a smart beta strategy may not achieve its objective and may not perform as well as other funds using other asset management strategies.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [A]	Rate
First $1 billion	0.30%
Over $1 billion	0.28

[A] *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	0.56%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 4,750,937	$ 13,717,115

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 152,812,705	$ 15,428,022	$ (6,962,974)	$ 8,465,048

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Edge 75 VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and BlackRock Investment Management, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limit, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-year period, in line with the median for the past 5-year period and below the median for the past 3-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was below its composite benchmark for the past 1-, 3-, and 5-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was above the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica BlackRock iShares Edge 100 VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio (C)**
Service Class	$ 1,000.00	$ 1,069.00	$ 2.87	$ 1,022.00	$ 2.81	0.56%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock iShares Edge 100 VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level

3. INVESTMENT VALUATION (continued)

input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds (“ETF”): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio’s securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio’s securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio’s investments may go down.

5. RISK FACTORS (continued)

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying ETF or other issuer is incorrect. The available underlying ETFs selected by the sub-adviser may underperform the market or similar portfolios.

Underlying exchange-traded funds risk: Because the Portfolio invests its assets in underlying ETFs, its ability to achieve its investment objective depends largely on the performance of the underlying ETFs in which it invests. Investing in underlying ETFs subjects the Portfolio to the risks of investing in the underlying securities or assets held by those ETFs. Each of the underlying ETFs in which the Portfolio may invest has its own investment risks, and those risks can affect the value of the underlying ETFs' shares and therefore the value of the Portfolio's investments. There can be no assurance that the investment objective of any underlying ETF will be achieved. To the extent that the Portfolio invests more of its assets in one underlying ETF than in another, the Portfolio will have greater exposure to the risks of that underlying ETF. In addition, the Portfolio will bear a pro rata portion of the operating expenses of the underlying ETFs in which it invests.

Smart beta investing risk: Smart beta strategies seek to capture broad, consistent drivers of return and to out-perform traditional index strategies. These strategies may not work as intended. An underlying ETF pursuing a smart beta strategy may not achieve its objective and may not perform as well as other funds using other asset management strategies.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints [(A)]	Rate
First $1 billion	0.30%
Over $1 billion	0.28

(A) *TAM has contractually agreed, through May 1, 2024, to waive from its management fees an amount equal to the sub-advisory fee waiver by the Portfolio's sub-adviser. These amounts are not subject to recapture by TAM.*

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	0.56%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

For the 36-month period ended June 30, 2023, the balances available for recapture by TAM for the Portfolio are as follows:

	Amounts Available				
	2020 [(A)]	2021	2022	2023	Total
Service Class	$ —	$ —	$ —	$ 8,847	$ 8,847

[(A)] *For the six-month period of July 1, 2020 through December 31, 2020.*

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

Transamerica BlackRock iShares Edge 100 VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 2,485,187	$ 4,656,380

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 55,243,434	$ 7,296,968	$ (719,898)	$ 6,577,070

Transamerica BlackRock iShares Edge 100 VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica BlackRock iShares Edge 100 VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and BlackRock Investment Management, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limit, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-year period and below the median for the past 3- and 5-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was below its composite benchmark for the past 1-, 3- and 5-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the median for its peer group and in line with the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica BlackRock Real Estate Securities VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,028.50	$ 4.38	$ 1,020.50	$ 4.36	0.87%
Service Class	1,000.00	1,028.70	5.63	1,019.20	5.61	1.12

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Non-income producing securities.*

(B) *All or a portion of the securities are on loan. The total value of all securities on loan is $15,844,547, collateralized by cash collateral of $7,076,979 and non-cash collateral, such as U.S. government securities and irrevocable letters of credit, of $9,525,533. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(C) *Security is exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Security may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the value of the 144A security is $3,310,242, representing 0.9% of the Portfolio's net assets.*

(D) *Rates disclosed reflect the yields at June 30, 2023.*

The Notes to Financial Statements are an integral part of this report.

FOOTNOTES TO SCHEDULE OF INVESTMENTS (continued):

(E) *The Portfolio receives or pays the total return on a portfolio of long positions underlying the total return swap. In addition, the Portfolio pays or receives a variable rate of interest, based on a specific benchmark, with a spread of 20-30 basis points. The benchmark and spread are determined based upon the country and/or currency of the individual underlying positions. The specified benchmarks used in determining the variable rate of interest is the AUD-OIS-RBA and Federal Funds Rate.*

(F) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

(G) *Derivative instruments are valued at unrealized appreciation (depreciation).*

Transamerica BlackRock Real Estate Securities VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock Real Estate Securities VP (formerly, Transamerica BlackRock Global Real Estate Securities VP) (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

3. INVESTMENT VALUATION (continued)

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Common Stocks	$ 7,076,979	$ —	$ —	$ —	$ 7,076,979
Total Borrowings	**$ 7,076,979**	**$ —**	**$ —**	**$ —**	**$ 7,076,979**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Swap agreements: Swap agreements are bilaterally negotiated agreements between the Portfolio and a counterparty to exchange or swap investments, cash flows, assets, foreign currencies, or market-linked returns at specified, future intervals. Swap agreements can be executed in a bilateral privately negotiated arrangement with a dealer in an OTC transaction or executed on a regular market. Certain swaps regardless of the venue of execution are required to be cleared through a clearinghouse ("centrally cleared swap agreements"). Centrally cleared swap agreements listed or traded on a multilateral platform, are valued at the daily settlement price determined by the corresponding exchange. For centrally cleared credit default swap agreements the clearing exchange requires all members to provide applicable levels across complete term levels. Centrally cleared interest rate swap agreements are valued using a pricing model that references the underlying rates including but not limited to the overnight index swap rate and London Interbank Offered Rate ("LIBOR") forward rate to calculate the daily settlement price. The Portfolio may enter into credit default, cross-currency, interest rate, total return, including contracts for difference ("CFD"), and other forms of swap agreements to manage exposure to credit, currency, interest rate, and commodity risks. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Centrally cleared swap agreements are marked-to-market daily based upon values from third party vendors, which may include a registered exchange, or quotations from market makers to the extent available and the change in value, if any, is recorded as Variation margin receivable (payable) on centrally cleared swap agreements within the Statement of Assets and Liabilities.

For OTC swap agreements, payments received or made at the beginning of the measurement period are reflected in OTC swap agreements, at value within the Statement of Assets and Liabilities and represent payments made or received upon entering into the swap agreements to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Additionally, these upfront payments as well as any periodic payments received or paid by the Portfolio, including any liquidation payment received or made at the termination of the swap are recorded as part of Net realized gain (loss) on swap agreements within the Statement of Operations.

Total return swap agreements: The Portfolio is subject to commodity risk, equity risk, and other risks related to the underlying investments of the swap agreement, including CFDs, in the normal course of pursuing its investment objective. The value of the commodity-linked investments held by a Portfolio can be affected by a variety of factors, including, but not limited to, overall market movements and other factors affecting the value of particular industries or commodities, such as weather, disease, embargoes, acts of war or terrorism, or political and regulatory developments. Commodity-linked derivatives are available from a relatively small number of issuers, subjecting the Portfolio's investments in commodity-linked derivatives to counterparty risk, which is the risk that the issuer of the commodity-linked derivative will not fulfill its contractual obligations. Total return swap agreements on commodities involve commitments whereby cash flows are exchanged based on the price of a commodity in exchange for either a fixed or floating price or rate. One party would receive payments based on the market value of the commodity involved and pay a fixed amount. Total return swap agreements on indices involve commitments to pay interest in exchange for a market-linked return. One counterparty pays out the total return of a specific reference entity, which may be an equity, index, or bond, and in return receives a regular stream of payments.

Open centrally cleared swap agreements and open OTC swap agreements at June 30, 2023, if any, are listed within the Schedule of Investments.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Forward foreign currency contracts: The Portfolio is subject to foreign exchange rate risk exposure in the normal course of pursuing its investment objective. The Portfolio may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Forward foreign currency contracts are marked-to-market daily, with the change in value recorded as an unrealized gain or loss and is shown in Unrealized appreciation (depreciation) on forward foreign currency contracts within the Statement of Assets and Liabilities. When the contracts are settled, a realized gain or loss is incurred and is shown in Net realized gain (loss) on forward foreign currency contracts within the Statement of Operations. Risks may arise from changes in market value of the underlying currencies and from the possible inability of counterparties to meet the terms of their contracts. Forward foreign currency contracts are traded in the OTC inter-bank currency dealer market.

Open forward foreign currency contracts at June 30, 2023, if any, are listed within the Schedule of Investments.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Forward foreign currency contracts:						
Unrealized appreciation on forward foreign currency contracts	$ —	$ 744,912	$ —	$ —	$ —	$ 744,912
Total	**$ —**	**$ 744,912**	**$ —**	**$ —**	**$ —**	**$ 744,912**

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
OTC swaps:						
Unrealized depreciation on OTC swap agreements - CFD	$ —	$ —	$ (28,268)	$ —	$ —	$ (28,268)
Forward foreign currency contracts:						
Unrealized appreciation on forward foreign currency contracts	—	(1,192,073)	—	—	—	(1,192,073)
Total	**$ —**	**$ (1,192,073)**	**$ (28,268)**	**$ —**	**$ —**	**$ (1,220,341)**

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Swap agreements	$ —	$ —	$ 232,140	$ —	$ —	$ 232,140
Forward foreign currency contracts	—	(462,182)	—	—	—	(462,182)
Total	**$ —**	**$ (462,182)**	**$ 232,140**	**$ —**	**$ —**	**$ (230,042)**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Swap agreements	$ —	$ —	$ (28,268)	$ —	$ —	$ (28,268)
Forward foreign currency contracts	—	137,418	—	—	—	137,418
Total	**$ —**	**$ 137,418**	**$ (28,268)**	**$ —**	**$ —**	**$ 109,150**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Total return swaps:	
Average notional value – long	$ 956,504
Forward foreign currency exchange contracts:	
Average contract amounts purchased – in USD	39,975,377
Average contract amounts sold – in USD	38,913,385

The Portfolio typically enters into International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") or similar master agreements (collectively, "Master Agreements") with its contract counterparties for certain OTC derivatives in order to, among other things, reduce credit risk to counterparties.

ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Portfolio typically may offset with the counterparty certain OTC derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default, termination and/or potential deterioration in the credit quality of the counterparty.

Various Master Agreements govern the terms of certain transactions with counterparties and typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Portfolio and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party and may be a feature in certain Master Agreements. In the event the Portfolio exercises its right to terminate a Master Agreement after a counterparty experiences a termination event as defined in the Master Agreement, the return of collateral with market value in excess of the Portfolio's net liability may be delayed or denied.

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the Portfolio OTC derivative assets and liabilities by counterparty net of amounts available for offset under a master netting agreement and net of the related collateral received/pledged by the Portfolio as of June 30, 2023. For financial reporting purposes, the Portfolio does not offset assets and liabilities that are subject to a master netting agreement or similar arrangement on the Statement of Assets and Liabilities. See the Repurchase agreement section within the notes for offsetting and collateral information pertaining to repurchase agreements that are subject to master netting agreements.

	Assets				Liabilities			
Counterparty	Gross Amounts of Assets Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Received (B)	Net Receivable	Gross Amounts of Liabilities Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Pledged (B)	Net Payable
Bank of America, N.A.	$ 17,593	$ (17,593)	$ —	$ —	$ 81,102	$ (17,593)	$ (10,000)	$ 53,509
BNP Paribas	28,688	(28,688)	—	—	72,778	(28,688)	—	44,090
Citibank, N.A.	3,797	(3,797)	—	—	61,633	(3,797)	(30,000)	27,836
Goldman Sachs International	1,804	(1,804)	—	—	30,153	(1,804)	(28,349)	—
HSBC Bank USA	48,459	(48,459)	—	—	586,408	(48,459)	(30,000)	507,949
JPMorgan Chase Bank, N.A.	419,998	(27,945)	—	392,053	27,945	(27,945)	—	—
Nomura International PLC	48,119	(48,119)	—	—	60,736	(48,119)	—	12,617
State Street Bank & Trust Co.	116,926	(116,926)	—	—	212,202	(116,926)	—	95,276
UBS AG	59,528	(59,528)	—	—	87,384	(59,528)	—	27,856
Total	**$ 744,912**	**$ (352,859)**	**$ —**	**$ 392,053**	**$ 1,220,341**	**$ (352,859)**	**$ (98,349)**	**$ 769,133**

(A) *Absent an event of default or early termination, OTC derivative assets and liabilities are presented gross and not offset within the Statements of Assets and Liabilities.*
(B) *In some instances, the actual collateral received and/or pledged may be more than the amount shown due to overcollateralization.*

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of

7. RISK FACTORS (continued)

highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

Real estate securities risk: Investments in the real estate industry are subject to risks associated with direct investment in real estate. These risks include declines in the value of real estate, adverse general and local economic conditions, increased competition, overbuilding and changes in laws and regulations affecting real estate, operating expenses, property taxes and interest rates. If the Portfolio's real estate-related investments are concentrated in one geographic area or one property type, the Portfolio will also be subject to the risks associated with that one area or property type. The value of the Portfolio's real estate-related securities will not necessarily track the value of the underlying investments of the issuers of such securities.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $250 million	0.77%
Over $250 million up to $500 million	0.75
Over $500 million up to $750 million	0.70
Over $750 million	0.68

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.90%	May 1, 2024
Service Class	1.15	May 1, 2024

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 114,342,417	$ —	$ 142,480,157	$ —

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 426,442,780	$ 6,430,567	$ (54,238,483)	$ (47,807,916)

11. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

MANAGEMENT, SUB-ADVISORY AND SUB-SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica BlackRock Real Estate Securities VP (formerly, Transamerica BlackRock Global Real Estate Securities VP) (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement") for the Portfolio between TAM and BlackRock Investment Management, LLC (the "Sub-Adviser") and the renewal of the investment sub-sub-advisory agreements (the "Sub-Sub-Advisory Agreements" and together with the Management Agreement and the Sub-Advisory Agreement, the "Agreements") with respect to the Portfolio between BlackRock and each of BlackRock International Limited and BlackRock (Singapore) Limited (each a "Sub-Sub-Adviser" and collectively the "Sub-Sub-Advisers").

Following its review and consideration, the Board determined that the terms of the Management Agreement, the Sub-Advisory Agreement and each Sub-Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM, the Sub-Adviser and each Sub-Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM, the Sub-Adviser and each Sub-Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM, the Sub-Adviser and each Sub-Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser and each Sub-Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM, the Sub-Adviser or the Sub-Sub-Advisers present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM, the Sub-Adviser and each Sub-Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's, the Sub-Adviser's and each Sub-Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management teams of the Sub-Adviser and each Sub-Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of

MANAGEMENT, SUB-ADVISORY AND SUB-SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL (continued)

the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM, the Sub-Adviser and each Sub-Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was in line with the median for its peer universe for the past 3-year period and below the median for the past 1-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its benchmark for the past 3- and 5-year periods and below its benchmark for the past 1- and 10-year periods. The Board noted that the Sub-Adviser and the Sub-Sub-Advisers had commenced sub-advising the Portfolio on November 1, 2018 pursuant to its current investment objective, investment strategies and benchmark.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services and the Sub-Sub-Advisers for sub-sub-advisory services, noting that TAM pays sub-advisory fees to the Sub-Adviser and that the sub-sub-advisory fees payable to the Sub-Sub-Advisers are paid by the Sub-Adviser and not the Portfolio or TAM. The Board also considered the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management, sub-advisory and sub-sub-advisory fees to be received by TAM, the Sub-Adviser and the Sub-Sub-Advisers under the Management Agreement, the Sub-Advisory Agreement and each Sub-Sub-Advisory Agreement are reasonable in light of the services provided.

MANAGEMENT, SUB-ADVISORY AND SUB-SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL (continued)

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM, the Sub-Adviser or a Sub-Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and each Sub-Sub-Adviser's sub-sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fees paid to the Sub-Adviser and the Sub-Sub-Advisers in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates, the Sub-Adviser and/or the Sub-Sub-Advisers from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, the Sub-Adviser and/or the Sub-Sub-Advisers from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser and the Sub-Sub-Advisers. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement, the Sub-Advisory Agreement and each Sub-Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio (C)**
Initial Class	$ 1,000.00	$ 1,088.20	$ 0.83	$ 1,024.00	$ 0.80	0.16%
Service Class	1,000.00	1,085.90	2.12	1,022.80	2.06	0.41

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio's Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica BlackRock Tactical Allocation VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

3. INVESTMENT VALUATION (continued)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds ("ETF"): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Restricted securities: Restricted securities for which quotations are not readily available are valued at fair value. Restricted securities issued by publicly traded companies are generally valued at a discount to similar publicly traded securities. Restricted securities issued by nonpublic entities may be valued by reference to comparable public entities and/or fundamental data relating to the issuer. Depending on the relative significance of observable valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Restricted securities: The Portfolio may invest in unregulated restricted securities. Restricted securities are subject to legal or contractual restrictions on resale. Restricted securities generally may be resold in transactions exempt from registration under the Securities Act of 1933.

Restricted securities held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

6. RISK FACTORS (continued)

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying portfolios may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying portfolio or other issuer is incorrect. The available underlying portfolios selected by the sub-adviser may underperform the market or similar portfolios.

Model and data risk: If quantitative models, algorithms or calculations (whether proprietary and developed by the sub-adviser or supplied by third parties) ("Models") or information or data supplied by third parties ("Data") prove to be incorrect or incomplete, any decisions made, in whole or part, in reliance thereon expose the Portfolio to additional risks. Models can be predictive in nature. The use of predictive Models has inherent risks. The success of relying on or otherwise using Models depends on a number of factors, including the validity, accuracy and completeness of the Model's development, implementation and maintenance, the Model's assumptions, factors, algorithms and methodologies, and the accuracy and reliability of the supplied historical or other Data. Models rely on, among other things, correct and complete Data inputs. If incorrect Data is entered into even a well-founded Model, the resulting information will be incorrect. However, even if Data is input correctly, Model prices may differ substantially from market prices, especially for securities with complex characteristics. Investments selected with the use of Models may perform differently than expected as a result of the design of the Model, inputs into the Model or other factors. There also can be no assurance that the use of Models will result in effective investment decisions for the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $1 billion	0.130%
Over $1 billion up to $2 billion	0.110
Over $2 billion up to $3 billion	0.105
Over $3 billion	0.100

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.21%	May 1, 2024
Service Class	0.46	May 1, 2024
Prior to May 1, 2023		
Initial Class	0.25	
Service Class	0.50	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 450,793,387	$ 514,287,646

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 941,108,863	$ 36,142,430	$ (27,218,038)	$ 8,924,392

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica BlackRock Tactical Allocation VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and BlackRock Investment Management, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe for the past 1-, 3-, 5- and 10- year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its primary benchmark for the past 1-year period and below its primary benchmark for the past 3-, 5- and 10-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the median for its peer group and above the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Goldman Sachs 70/30 Allocation VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [A]		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Net Annualized Expense Ratio [C]
Service Class	$ 1,000.00	$ 1,100.20	$ 2.76	$ 1,022.20	$ 2.66	0.53%

[A] *5% return per year before expenses.*

[B] *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

[C] *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

(A) *Commenced operations on May 1, 2020.*
(B) *Calculated based on average number of shares outstanding.*
(C) *Not annualized.*
(D) *Total return includes the contribution from investment manager. If the investment manager had not made the contribution, total return would have decreased by 0.24%.*
(E) *Does not include expenses of the underlying investments in which the Portfolio invests.*
(F) *Annualized.*
(G) *Ratio excludes acquired fund fees and expenses, which are indirect expenses incurred by the Portfolio through its investments in Underlying Funds. If the expenses incurred by the Underlying Funds were included in these ratios they would have increased by 0.62% (annualized), 0.64% and 0.65%, for the period ended June 30, 2023, and the years ended December 31, 2022 and December 31, 2021, respectively.*

The Notes to Financial Statements are an integral part of this report.

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Goldman Sachs 70/30 Allocation VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels.

The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

3. INVESTMENT VALUATION (continued)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Transamerica Goldman Sachs 70/30 Allocation VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK FACTORS (continued)

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying portfolios may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying portfolio or other issuer is incorrect. The available underlying portfolios selected by the sub-adviser may underperform the market or similar portfolios.

Asset class variation risk: The underlying portfolios invest principally in the securities constituting their asset class (i.e., equity or fixed-income) or underlying index components. However, an underlying portfolio may vary the percentage of its assets in these securities (subject to any applicable regulatory requirements). Depending upon the percentage of securities in a particular asset class held by the underlying portfolios at any given time, and the percentage of the Portfolio's assets invested in various underlying portfolios, the Portfolio's actual exposure to the securities in a particular asset class may vary substantially from its target allocation for that asset class, and this in turn may adversely affect the Portfolio's performance.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $1 billion	0.1040%
Over $1 billion up to $3 billion	0.0975
Over $3 billion up to $5 billion	0.0925
Over $5 billion up to $7 billion	0.0850
Over $7 billion up to $9 billion	0.0800
Over $9 billion	0.0725

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

Transamerica Goldman Sachs 70/30 Allocation VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	1.15%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

For the 36-month period ended June 30, 2023. the balances available for recapture by TAM for the Portfolio are as follows:

	Amounts Available				
Class	**2020 [(A)]**	**2021**	**2022**	**2023**	**Total**
Service Class	$ 29,435	$ 37,766	$ 45,282	$ 21,350	$ 133,833

(A) *For the six-month period of July 1, 2020 through December 31, 2020.*

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 511,660	$ 119,000

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 5,010,352	$ 51,318	$ (328,667)	$ (277,349)

Transamerica Goldman Sachs 70/30 Allocation VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica Goldman Sachs 70/30 Allocation VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Goldman Sachs Asset Management, L.P. (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limit, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio’s benchmarks, in each case for the period ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant period in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its composite benchmark, each for the past 1-year period. The Trustees discussed the reasons for the underperformance with TAM, and TAM agreed to continue to closely monitor and report to the Board on the performance of the Portfolio.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Goldman Sachs Managed Risk – Balanced ETF VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,077.30	$ 1.70	$ 1,023.20	$ 1.66	0.33%
Service Class	1,000.00	1,075.70	2.99	1,021.90	2.91	0.58

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

The Notes to Financial Statements are an integral part of this report.

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Goldman Sachs Managed Risk – Balanced ETF VP (formerly, Transamerica Managed Risk – Balanced ETF VP) (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office

1. ORGANIZATION (continued)

space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per

3. INVESTMENT VALUATION (continued)

share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds (“ETF”): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the

Transamerica Goldman Sachs Managed Risk – Balanced ETF VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Exchange-Traded Funds	$ 101,515,904	$ —	$ —	$ —	$ 101,515,904
Total Borrowings	**$ 101,515,904**	**$ —**	**$ —**	**$ —**	**$ 101,515,904**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

5. RISK FACTORS (continued)

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Managed risk strategy risk: The Portfolio employs a managed risk strategy. The strategy attempts to stabilize the volatility of the Portfolio around a target volatility level and manage downside exposure during periods of significant market declines but may not work as intended. Because market conditions change, sometimes rapidly and unpredictably, the success of the strategy also will be subject to the sub-adviser's ability to implement the strategy in a timely and efficient manner. The strategy may result in periods of underperformance and may fail to protect against market declines. The strategy may limit the Portfolio's ability to participate in up markets, may cause the Portfolio to underperform its benchmark in up markets, may increase transaction costs at the Portfolio and/or underlying ETF level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio's equity exposure, causing the Portfolio to forgo gains from the market rebound. Managing the Portfolio pursuant to the strategy may result in the Portfolio not achieving its stated asset mix goal due to unforeseen or unanticipated market conditions. The strategy also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The strategy also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a managed risk strategy.

Model and data risk: If quantitative models, algorithms or calculations (whether proprietary and developed by the sub-adviser or supplied by third parties) ("Models") or information or data supplied by third parties ("Data") prove to be incorrect or incomplete, any decisions made, in whole or part, in reliance thereon expose the Portfolio to additional risks. Models can be predictive in nature. The use of predictive Models has inherent risks. The success of relying on or otherwise using Models depends on a number of factors, including the validity, accuracy and completeness of the Model's development, implementation and maintenance, the Model's assumptions, factors, algorithms and methodologies, and the accuracy and reliability of the supplied historical or other Data. Models rely on, among other things, correct and complete Data inputs. If incorrect Data is entered into even a well-founded Model, the resulting information will be incorrect. However, even if Data is input correctly, Model prices may differ substantially from market prices, especially for securities with complex characteristics. Investments selected with the use of Models may perform differently than expected as a result of the design of the Model, inputs into the Model or other factors. There also can be no assurance that the use of Models will result in effective investment decisions for the Portfolio.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $50 million	0.3400%
Over $50 million up to $250 million	0.3200
Over $250 million up to $5 billion	0.3000
Over $5 billion up to $7 billion	0.2900
Over $7 billion up to $9 billion	0.2875
Over $9 billion	0.2800

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.37%	May 1, 2024
Service Class	0.62	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 1,037,612,580	$ 1,261,974,462

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 4,300,956,017	$ 224,070,369	$ (236,066,437)	$ (11,996,068)

MANAGEMENT AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Goldman Sachs Managed Risk – Balanced ETF VP (formerly, Transamerica Managed Risk – Balanced ETF VP) (the "Portfolio").

Following its review and consideration, the Board determined that the terms of the Management Agreement were reasonable and that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of the Management Agreement through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Management Agreement, including information they had previously received from TAM as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Management Agreement. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of the Management Agreement, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; and TAM's responsiveness to any questions by the Trustees. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM can provide investment and related services that are appropriate in scope and extent in light of the

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-year period and below the median for the past 3-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 1-year period and below its composite benchmark for the past 3-, 5- and 10-year periods. The Board noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on November 1, 2022 pursuant to its current investment strategies.

Management Fee and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Portfolio's sub-adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management fee to be received by TAM under the Management Agreement is reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM may not directly correlate with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM in light of any economies of scale experienced in the future.

Benefits to TAM and its Affiliates from their Relationships with the Portfolio

The Board considered other benefits derived by TAM and/or its affiliates from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Portfolio's sub-adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Management Agreement.

Transamerica Goldman Sachs Managed Risk – Conservative ETF VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [A]		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Net Annualized Expense Ratio [C]
Initial Class	$ 1,000.00	$ 1,061.00	$ 1.79	$ 1,023.10	$ 1.76	0.35%
Service Class	1,000.00	1,058.80	3.06	1,021.80	3.01	0.60

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio's Prospectus, may differ from the expense ratios disclosed in this report.*

Transamerica Goldman Sachs Managed Risk – Conservative ETF VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Goldman Sachs Managed Risk – Conservative ETF VP (formerly, Transamerica Managed Risk – Conservative ETF VP) (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office

1. ORGANIZATION (continued)

space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per

3. INVESTMENT VALUATION (continued)

share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds ("ETF"): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions

Total Borrowings	**$ 383,396**	**$ —**	**$ —**	**$ —**	**$ 383,396**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

5. RISK FACTORS (continued)

Managed risk strategy risk: The Portfolio employs a managed risk strategy. The strategy attempts to stabilize the volatility of the Portfolio around a target volatility level and manage downside exposure during periods of significant market declines but may not work as intended. Because market conditions change, sometimes rapidly and unpredictably, the success of the strategy also will be subject to the sub-adviser's ability to implement the strategy in a timely and efficient manner. The strategy may result in periods of underperformance and may fail to protect against market declines. The strategy may limit the Portfolio's ability to participate in up markets, may cause the Portfolio to underperform its benchmark in up markets, may increase transaction costs at the Portfolio and/or underlying ETF level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio's equity exposure, causing the Portfolio to forgo gains from the market rebound. Managing the Portfolio pursuant to the strategy may result in the Portfolio not achieving its stated asset mix goal due to unforeseen or unanticipated market conditions. The strategy also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The strategy also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a managed risk strategy.

Model and data risk: If quantitative models, algorithms or calculations (whether proprietary and developed by the sub-adviser or supplied by third parties) ("Models") or information or data supplied by third parties ("Data") prove to be incorrect or incomplete, any decisions made, in whole or part, in reliance thereon expose the Portfolio to additional risks. Models can be predictive in nature. The use of predictive Models has inherent risks. The success of relying on or otherwise using Models depends on a number of factors, including the validity, accuracy and completeness of the Model's development, implementation and maintenance, the Model's assumptions, factors, algorithms and methodologies, and the accuracy and reliability of the supplied historical or other Data. Models rely on, among other things, correct and complete Data inputs. If incorrect Data is entered into even a well-founded Model, the resulting information will be incorrect. However, even if Data is input correctly, Model prices may differ substantially from market prices, especially for securities with complex characteristics. Investments selected with the use of Models may perform differently than expected as a result of the design of the Model, inputs into the Model or other factors. There also can be no assurance that the use of Models will result in effective investment decisions for the Portfolio.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

Transamerica Goldman Sachs Managed Risk – Conservative ETF VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $50 million	0.3400%
Over $50 million up to $250 million	0.3200
Over $250 million up to $5 billion	0.3000
Over $5 billion up to $7 billion	0.2900
Over $7 billion up to $9 billion	0.2875
Over $9 billion	0.2800

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.37%	May 1, 2024
Service Class	0.62	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 449,270,798	$ 406,381,458

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 508,485,053	$ 13,051,685	$ (39,365,969)	$ (26,314,284)

MANAGEMENT AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Goldman Sachs Managed Risk – Conservative ETF VP (formerly, Transamerica Managed Risk – Conservative ETF VP) (the "Portfolio").

Following its review and consideration, the Board determined that the terms of the Management Agreement were reasonable and that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of the Management Agreement through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Management Agreement, including information they had previously received from TAM as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Management Agreement. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of the Management Agreement, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM \to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; and TAM's responsiveness to any questions by the Trustees. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM can provide investment and related services that are appropriate in scope and extent in light of the

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-year period and below the median for the past 3-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 1-year period and below its composite benchmark for the past 3-, 5- and 10-year periods. The Board noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on November 1, 2022 pursuant to its current investment strategies.

Management Fee and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Portfolio's sub-adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was above the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management fee to be received by TAM under the Management Agreement is reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM may not directly correlate with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM in light of any economies of scale experienced in the future.

Benefits to TAM and its Affiliates from their Relationships with the Portfolio

The Board considered other benefits derived by TAM and/or its affiliates from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Portfolio's sub-adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Management Agreement.

Transamerica Goldman Sachs Managed Risk – Growth ETF VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,111.20	$ 1.73	$ 1,023.20	$ 1.66	0.33%
Service Class	1,000.00	1,109.10	3.03	1,021.90	2.91	0.58

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Goldman Sachs Managed Risk – Growth ETF VP (formerly, Transamerica Managed Risk—Growth ETF VP) (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio’s financial statements in accordance with Generally Accepted Accounting Principles in the United States of America (“GAAP”), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio’s valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio’s Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange (“NYSE”) each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels (“Levels”) of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM’s own assumptions used in determining the fair value of the Portfolio’s investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

3. INVESTMENT VALUATION (continued)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Exchange-traded funds ("ETF"): ETFs are stated at the last reported sale price or closing price on the day of valuation taken from the primary exchange where the ETF is principally traded. ETFs are generally categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Exchange-Traded Funds	$ 87,815,357	$ —	$ —	$ —	$ 87,815,357
Total Borrowings	**$ 87,815,357**	**$ —**	**$ —**	**$ —**	**$ 87,815,357**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

5. RISK FACTORS (continued)

Managed risk strategy risk: The Portfolio employs a managed risk strategy. The strategy attempts to stabilize the volatility of the Portfolio around a target volatility level and manage downside exposure during periods of significant market declines but may not work as intended. Because market conditions change, sometimes rapidly and unpredictably, the success of the strategy also will be subject to the sub-adviser's ability to implement the strategy in a timely and efficient manner. The strategy may result in periods of underperformance and may fail to protect against market declines. The strategy may limit the Portfolio's ability to participate in up markets, may cause the Portfolio to underperform its benchmark in up markets, may increase transaction costs at the Portfolio and/or underlying ETF level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio's equity exposure, causing the Portfolio to forgo gains from the market rebound. Managing the Portfolio pursuant to the strategy may result in the Portfolio not achieving its stated asset mix goal due to unforeseen or unanticipated market conditions. The strategy also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The strategy also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a managed risk strategy.

Model and data risk: If quantitative models, algorithms or calculations (whether proprietary and developed by the sub-adviser or supplied by third parties) ("Models") or information or data supplied by third parties ("Data") prove to be incorrect or incomplete, any decisions made, in whole or part, in reliance thereon expose the Portfolio to additional risks. Models can be predictive in nature. The use of predictive Models has inherent risks. The success of relying on or otherwise using Models depends on a number of factors, including the validity, accuracy and completeness of the Model's development, implementation and maintenance, the Model's assumptions, factors, algorithms and methodologies, and the accuracy and reliability of the supplied historical or other Data. Models rely on, among other things, correct and complete Data inputs. If incorrect Data is entered into even a well-founded Model, the resulting information will be incorrect. However, even if Data is input correctly, Model prices may differ substantially from market prices, especially for securities with complex characteristics. Investments selected with the use of Models may perform differently than expected as a result of the design of the Model, inputs into the Model or other factors. There also can be no assurance that the use of Models will result in effective investment decisions for the Portfolio.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $50 million	0.3400%
Over $50 million up to $250 million	0.3200
Over $250 million up to $5 billion	0.3000
Over $5 billion up to $7 billion	0.2900
Over $7 billion up to $9 billion	0.2875
Over $9 billion	0.2800

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.37%	May 1, 2024
Service Class	0.62	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ 28,167,343	$ 145,739,644

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 1,946,703,789	$ 161,866,326	$ (47,431,101)	$ 114,435,225

MANAGEMENT AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Goldman Sachs Managed Risk – Growth ETF VP (formerly, Transamerica Managed Risk – Growth ETF VP) (the "Portfolio").

Following its review and consideration, the Board determined that the terms of the Management Agreement were reasonable and that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of the Management Agreement through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Management Agreement, including information they had previously received from TAM as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Management Agreement. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of the Management Agreement, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; and TAM's responsiveness to any questions by the Trustees. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-year period and below the median for the past 3-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 1-year period and below its composite benchmark for the past 3-, 5- and 10-year periods. The Board noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on November 1, 2022 pursuant to its current investment strategies.

Management Fee and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Portfolio's sub-adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management fee to be received by TAM under the Management Agreement is reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

MANAGEMENT AGREEMENT — CONTRACT RENEWAL (continued)

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM may not directly correlate with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM in light of any economies of scale experienced in the future.

Benefits to TAM and its Affiliates from their Relationships with the Portfolio

The Board considered other benefits derived by TAM and/or its affiliates from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Portfolio's sub-adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Management Agreement.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [A]		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Net Annualized Expense Ratio
Service Class	$ 1,000.00	$ 1,052.60	$ 4.89	$ 1,020.00	$ 4.81	0.96%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Transamerica Great Lakes Advisors Large Cap Value VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Great Lakes Advisors Large Cap Value VP (formerly, Transamerica Rothschild & Co Large Cap Value VP) (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $279.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level

3. INVESTMENT VALUATION (continued)

input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

Large capitalization companies risk: The Portfolio's investments in larger, more established companies may underperform other segments of the market because they may be less responsive to competitive challenges and opportunities and unable to attain high growth rates during periods of economic expansion.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $1 billion	0.594%
Over $1 billion up to $2 billion	0.580
Over $2 billion up to $3 billion	0.560
Over $3 billion	0.540

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Service Class	1.04%	May 1, 2024
Prior to May 1, 2023		
Service Class	1.10	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc (“SS&C”). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 8,937,057	$ —	$ 9,102,148	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 53,792,469	$ 6,024,039	$ (3,269,567)	$ 2,754,472

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

Transamerica Great Lakes Advisors Large Cap Value VP

(formerly, Transamerica Rothschild & Co Large Cap Value VP)

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica Great Lakes Advisors Large Cap Value VP (formerly, Transamerica Rothschild & Co Large Cap Value VP) (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Great Lakes Advisors, LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe for the past 1-, 3- and 5-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its benchmark for the past 1- and 3-year periods and below its benchmark for the past 5-year period. The Board noted that Rothschild & Co Asset Management US Inc. ("Rothschild") had sub-advised the Portfolio since December 1, 2020. The Board noted that, effective April 3, 2023, the Sub-Adviser acquired Rothschild, and TAM entered into a new investment sub-advisory agreement with the Sub-Adviser with respect to the Portfolio, which had previously been approved by the Board. The Board noted that the Portfolio's investment strategies and portfolio management team did not change as a result of the acquisition.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,077.60	$ 4.38	$ 1,020.60	$ 4.26	0.85%
Service Class	1,000.00	1,076.90	5.66	1,019.30	5.51	1.10

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *All or a portion of the securities are on loan. The total value of all securities on loan is $15,912,938, collateralized by cash collateral of $7,210,560 and non-cash collateral, such as U.S. government securities and irrevocable letters of credit, of $9,356,918. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(B) *Security is exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Security may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the value of the 144A security is $4,234,465, representing 1.2% of the Portfolio's net assets.*

(C) *Non-income producing securities.*

(D) *Rates disclosed reflect the yields at June 30, 2023.*

(E) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica International Focus VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

3. INVESTMENT VALUATION (continued)

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Common Stocks	$ 7,210,560	$ —	$ —	$ —	$ 7,210,560
Total Borrowings	**$ 7,210,560**	**$ —**	**$ —**	**$ —**	**$ 7,210,560**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Growth stocks risk: Returns on growth stocks may not move in tandem with returns on other categories of stocks or the market as a whole. Growth stocks typically are particularly sensitive to market movements and may involve larger price swings because their market prices tend to reflect future expectations. When it appears those expectations may not be met, the prices of growth stocks typically fall. Growth stocks may also be more volatile because they often do not pay dividends. The values of growth stocks tend to go down when interest rates rise because the rise in interest rates reduces the current value of future cash flows. Growth stocks as a group may be out of favor and underperform the overall equity market for a long period of time, for example, while the market favors "value" stocks.

Foreign investments risk: Investing in securities of foreign issuers or issuers with significant exposure to foreign markets involves additional risks. Foreign markets can be less liquid, less regulated, less transparent and more volatile than U.S. markets. The value of the Portfolio's foreign investments may decline, sometimes rapidly or unpredictably, because of factors affecting the particular issuer as well as foreign markets and issuers generally, such as unfavorable government actions, including nationalization, expropriation or confiscatory taxation, reduction of government or central bank support, tariffs and trade disruptions, sanctions, political or financial instability, social unrest or other adverse economic or political developments. Foreign investments may also be subject to different accounting practices and different regulatory, legal, auditing, financial reporting and recordkeeping standards and practices, and may be more difficult to value than investments in U.S. issuers. Certain foreign clearance and settlement procedures may result in an inability to execute transactions or delays in settlement.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.770%
Over $500 million up to $1 billion	0.760
Over $1 billion up to $2 billion	0.710
Over $2 billion up to $3 billion	0.695
Over $3 billion	0.680

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.88%	May 1, 2024
Service Class	1.13	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 66,085,022	$ —	$ 82,652,459	$ —

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 331,423,637	$ 51,008,276	$ (14,152,059)	$ 36,856,217

9. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica International Focus VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Epoch Investment Partners, Inc. (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 3-, 5- and 10-year periods and below the median for the past 1-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was above its benchmark for the past 3- and 5-year periods and below its benchmark for the past 1- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on May 1, 2018 pursuant to its current investment objective and investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,090.40	$ 3.78	$ 1,021.20	$ 3.66	0.73%
Service Class	1,000.00	1,089.50	5.08	1,019.90	4.91	0.98

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Non-income producing securities.*
(B) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $102,438,114, representing 10.6% of the Portfolio's net assets.*
(C) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*
(D) *Perpetual maturity. The date displayed is the next call date.*
(E) *Percentage rounds to less than 0.1% or (0.1)%.*
(F) *All or a portion of the securities are on loan. The total value of all securities on loan is $811,754, collateralized by cash collateral of $828,270. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*
(G) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*
(H) *Rates disclosed reflect the yields at June 30, 2023.*
(I) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Janus Balanced VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio’s financial statements in accordance with Generally Accepted Accounting Principles in the United States of America (“GAAP”), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures.

The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Cash overdraft: The Portfolio may have cash overdraft balances. A fee is incurred on these overdrafts, calculated by multiplying the overdraft by a rate based on the Federal Funds Rate.

Payables, if any, are reflected as Due to custodian within the Statement of Assets and Liabilities. Expenses, if any, from U.S. cash overdrafts are reflected in Custody fees within the Statement of Operations. Expenses, if any, from foreign cash overdrafts are reflected in Other expenses within the Statement of Operations.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $104.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio’s valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio’s Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange (“NYSE”) each day the NYSE is open for business.

Transamerica Janus Balanced VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

3. INVESTMENT VALUATION (continued)

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels (“Levels”) of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM’s own assumptions used in determining the fair value of the Portfolio’s investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

Foreign equity securities: Securities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

3. INVESTMENT VALUATION (continued)

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

The Portfolio held no unfunded loan participations at June 30, 2023.

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

4. SECURITIES AND OTHER INVESTMENTS (continued)

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or

Transamerica Janus Balanced VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**

Total Borrowings	**$ 828,270**	**$ —**	**$ —**	**$ —**	**$ 828,270**

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset class allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset class allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying portfolios may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may

6. RISK FACTORS (continued)

decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class is incorrect. The Portfolio's balance between equity and debt securities limits its potential for capital appreciation relative to an all-stock fund and contributes to greater volatility relative to an all-bond fund.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $250 million	0.735%
Over $250 million up to $500 million	0.705
Over $500 million up to $1 billion	0.650
Over $1 billion	0.630

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.81%	May 1, 2024
Service Class	1.05	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 148,969,074	$ 264,850,478	$ 151,165,182	$ 298,421,143

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 826,378,660	$ 182,361,833	$ (22,976,086)	$ 159,385,747

10. NEW ACCOUNTING PRONOUNCEMENTS

In June 2022, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

In December 2022, FASB issued Accounting Standards Update No. 2022-06 ("ASU 2022-06"), "Reference Rate Reform (Topic 848)". ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for

10. NEW ACCOUNTING PRONOUNCEMENTS (continued)

a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Janus Balanced VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Janus Henderson Investors US LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 3-, 5- and 10-year periods and below the median for the past 1-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 5- and 10-year periods and below its composite benchmark for the past 1- and 3-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [(A)]		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period [(B)]**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period [(B)]**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,125.90	$ 4.59	$ 1,020.50	$ 4.36	0.87%
Service Class	1,000.00	1,124.90	5.90	1,019.20	5.61	1.12

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Transamerica Janus Mid-Cap Growth VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Janus Mid-Cap Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio’s financial statements in accordance with Generally Accepted Accounting Principles in the United States of America (“GAAP”), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country’s balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $1,656.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

3. INVESTMENT VALUATION (continued)

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Common Stocks	$ 5,964,617	$ —	$ —	$ —	$ 5,964,617
Total Borrowings	**$ 5,964,617**	**$ —**	**$ —**	**$ —**	**$ 5,964,617**

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

6. RISK FACTORS (continued)

Growth stocks risk: Returns on growth stocks may not move in tandem with returns on other categories of stocks or the market as a whole. Growth stocks typically are particularly sensitive to market movements and may involve larger price swings because their market prices tend to reflect future expectations. When it appears those expectations may not be met, the prices of growth stocks typically fall. Growth stocks may also be more volatile because they often do not pay dividends. The values of growth stocks tend to go down when interest rates rise because the rise in interest rates reduces the current value of future cash flows. Growth stocks as a group may be out of favor and underperform the overall equity market for a long period of time, for example, while the market favors “value” stocks.

Medium capitalization companies risk: The Portfolio will be exposed to additional risks as a result of its investments in the securities of medium capitalization companies. Investing in medium capitalization companies involves greater risk than is customarily associated with more established companies. The prices of securities of medium capitalization companies generally are more volatile and are more likely to be adversely affected by changes in earnings results and investor expectations or poor economic or market conditions. Securities of medium capitalization companies may underperform larger capitalization companies, may be harder to sell at times and at prices the Portfolio managers believe appropriate and may offer greater potential for losses.

Real estate investment trusts (“REITs”) risk: Investing in real estate investment trusts (“REITs”) involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT’s performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT’s failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company (“TLIC”), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio’s investment manager, is directly owned by TLIC and AUSA Holding, LLC (“AUSA”), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation (“Commonwealth”). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. (“TFS”) is the Portfolio’s transfer agent. Transamerica Capital, Inc. (“TCI”) is the Portfolio’s distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio’s investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.805%
Over $500 million up to $1 billion	0.770
Over $1 billion	0.750

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.88%	May 1, 2024
Service Class	1.13	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Transamerica Janus Mid-Cap Growth VP

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 67,806,453	$ —	$ 79,887,666	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 865,451,513	$ 211,996,398	$ (62,948,482)	$ 149,047,916

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica Janus Mid-Cap Growth VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Janus Henderson Investors US LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-, 3- and 5-year periods and below the median for the past 10-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was above its benchmark for the past 1-, 3- and 5-year periods and below its benchmark for the past 10-year period. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on May 1, 2016 pursuant to its current investment objective and investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were in line with the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica JPMorgan Asset Allocation – Conservative VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,030.30	$ 0.76	$ 1,024.10	$ 0.75	0.15%
Service Class	1,000.00	1,030.80	2.01	1,022.80	2.01	0.40

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica JPMorgan Asset Allocation – Conservative VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

3. INVESTMENT VALUATION (continued)

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total

Total	**$ (4,390,062)**	**$ 59,889**	**$ (5,907,435)**	**$ —**	**$ —**	**$ (10,237,608)**

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts – long	$ 239,791,545
Average notional value of contracts – short	(294,699,815)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio’s securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio’s securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio’s investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio’s investments, impair the Portfolio’s ability to satisfy redemption requests, and negatively impact the Portfolio’s performance.

Asset allocation risk: The Portfolio’s investment performance is significantly impacted by the Portfolio’s asset allocation and reallocation from time to time. The sub-adviser’s decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying ETFs may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser’s judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying portfolio or other issuer is incorrect. The available underlying portfolios selected by the sub-adviser may underperform the market or similar portfolios.

(unaudited)

6. RISK FACTORS (continued)

Fixed-income securities risk: Risks of fixed-income securities include credit risk, interest rate risk, counterparty risk, prepayment risk, extension risk, valuation risk, and liquidity risk. The value of fixed-income securities may go up or down, sometimes rapidly and unpredictably, due to general market conditions, such as real or perceived adverse economic or political conditions, tariffs and trade disruptions, inflation, changes in interest rates, lack of liquidity in the bond markets or adverse investor sentiment. In addition, the value of a fixed-income security may decline if the issuer or other obligor of the security fails to pay principal and/or interest, otherwise defaults or has its credit rating downgraded or is perceived to be less creditworthy, or the credit quality or value of any underlying assets declines. If the value of fixed-income securities owned by the Portfolio falls, the value of your investment will go down. The Portfolio may lose its entire investment in the fixed-income securities of an issuer.

Risk management framework risk: The Portfolio is subject to a multi-factor risk management framework that is intended to reduce equity exposure under certain market conditions. This framework may impose a maximum equity exposure limit for the Portfolio in response to individual asset class momentum signals and a portfolio level volatility signal. The framework is intended to improve the Portfolio's absolute and risk-adjusted returns but may not work as intended. The framework may result in the Portfolio not achieving its stated asset mix goal or may cause the Portfolio to underperform, possibly significantly. Because market conditions change, sometimes rapidly and unpredictably, the success of the framework also will be subject to the sub-adviser's ability to implement the framework in a timely and efficient manner. The framework may result in periods of underperformance, may fail to protect against market declines, may limit the Portfolio's ability to participate in up markets, may cause the Portfolio to underperform its benchmark in rising markets, may increase transaction costs at the Portfolio and/or underlying portfolio level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio's equity exposure, causing the Portfolio to forgo gains from the market rebound. The framework incorporates quantitative models and signals. If those models or signals prove to be flawed or for other reasons do not produce the desired results, any decisions made in reliance thereon may expose the Portfolio to additional risks and losses. The use of models has inherent risks, and the success of relying on or otherwise using a model depends, among other things, on the accuracy and completeness of the model's development, implementation and maintenance; on the model's assumptions and methodologies; and on the accuracy and reliability of the inputs and output of the model. The framework also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The framework also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a risk management framework. The use of derivatives in connection with the framework may expose the Portfolio to different and potentially greater risks than if it had only invested in underlying portfolios.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $10 billion	0.1225%
Over $10 billion	0.1025

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.20%	May 1, 2024
Service Class	0.45	May 1, 2024
Prior to May 1, 2023		
Initial Class	0.25	
Service Class	0.50	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 191,397,086	$ 20,102,218	$ 171,009,032	$ 19,604,694

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 963,286,763	$ 9,562,672	$ (80,307,354)	$ (70,744,682)

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica JPMorgan Asset Allocation – Conservative VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and J.P. Morgan Investment Management, Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was in line with the median for its peer universe for the past 3- and 10-year periods and below the median for the past 1- and 5-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its primary benchmark for the past 3-, 5- and 10-year periods and below its primary benchmark for the past 1-year period. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on July 1, 2016 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica JPMorgan Asset Allocation – Growth VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,117.10	$ 0.89	$ 1,024.00	$ 0.85	0.17%
Service Class	1,000.00	1,115.60	2.20	1,022.70	2.11	0.42

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica JPMorgan Asset Allocation – Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

3. INVESTMENT VALUATION (continued)

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels (“Levels”) of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM’s own assumptions used in determining the fair value of the Portfolio’s investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter (“OTC”) derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties’ creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A) (B)]	$ —	$ 197,310	$ 5,202,308	$ —	$ —	$ 5,399,618
Total	**$ —**	**$ 197,310**	**$ 5,202,308**	**$ —**	**$ —**	**$ 5,399,618**

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A) (B)]	$ —	$ —	$ (1,520,553)	$ —	$ —	$ (1,520,553)
Total	**$ —**	**$ —**	**$ (1,520,553)**	**$ —**	**$ —**	**$ (1,520,553)**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ (3,110,440)	$ (2,285,129)	$ —	$ —	$ (5,395,569)
Total	**$ —**	**$ (3,110,440)**	**$ (2,285,129)**	**$ —**	**$ —**	**$ (5,395,569)**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ 175,672	$ 1,325,177	$ —	$ —	$ 1,500,849
Total	**$ —**	**$ 175,672**	**$ 1,325,177**	**$ —**	**$ —**	**$ 1,500,849**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts – long	$ 195,938,602
Average notional value of contracts – short	(63,947,352)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health

6. RISK FACTORS (continued)

events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying portfolios may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying portfolio or other issuer is incorrect. The available underlying portfolios selected by the sub-adviser may underperform the market or similar portfolios.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, AUIM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $10 billion	0.1225%
Over $10 billion	0.1025

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.20%	May 1, 2024
Service Class	0.45	May 1, 2024
Prior to May 1, 2023		
Initial Class	0.25	
Service Class	0.50	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

For the 36-month period ended June 30, 2023, the balances available for recapture by TAM for the Portfolio are as follows:

	Amounts Available				
Class	**2020 [A]**	**2021**	**2022**	**2023**	**Total**
Initial Class	$ —	$ —	$ —	$ 107	$ 107
Service Class	—	—	—	26	26

[A] *For the six-month period of July 1, 2020 through December 31, 2020.*

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 229,469,935	$ 8,799,012	$ 243,439,734	$ 21,613,694

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 976,875,085	$ 16,067,544	$ (47,682,280)	$ (31,614,736)

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica JPMorgan Asset Allocation – Growth VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and J.P. Morgan Investment Management, Inc. (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 3- and 5-year periods, in line with the median for the past 10-year period and below the median for the past 1-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was below its benchmark for the past 1-, 3-, 5- and 10-year periods. The Trustees observed that the performance of the Portfolio had improved during the first quarter of 2023. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on July 1, 2016 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica JPMorgan Asset Allocation – Moderate Growth VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,068.80	$ 0.77	$ 1,024.10	$ 0.75	0.15%
Service Class	1,000.00	1,067.10	2.05	1,022.80	2.01	0.40

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio's Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica JPMorgan Asset Allocation – Moderate Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

Transamerica JPMorgan Asset Allocation – Moderate Growth VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

3. INVESTMENT VALUATION (continued)

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Restricted securities: Restricted securities for which quotations are not readily available are valued at fair value. Restricted securities issued by publicly traded companies are generally valued at a discount to similar publicly traded securities. Restricted securities issued by nonpublic entities may be valued by reference to comparable public entities and/or fundamental data relating to the issuer. Depending on the relative significance of observable valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

(unaudited)

4. SECURITIES AND OTHER INVESTMENTS

Restricted securities: The Portfolio may invest in unregulated restricted securities. Restricted securities are subject to legal or contractual restrictions on resale. Restricted securities generally may be resold in transactions exempt from registration under the Securities Act of 1933.

Restricted securities held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A) (B)]	$ 1,185,139	$ 549,037	$ 14,312,328	$ —	$ —	$ 16,046,504
Total	**$ 1,185,139**	**$ 549,037**	**$ 14,312,328**	**$ —**	**$ —**	**$ 16,046,504**

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A) (B)]	$ (8,738,578)	$ —	$ (3,000,524)	$ —	$ —	$ (11,739,102)
Total	**$ (8,738,578)**	**$ —**	**$ (3,000,524)**	**$ —**	**$ —**	**$ (11,739,102)**

[(A)] *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
[(B)] *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (13,241,844)	$ (10,619,935)	$ (14,347,877)	$ —	$ —	$ (38,209,656)
Total	**$ (13,241,844)**	**$ (10,619,935)**	**$ (14,347,877)**	**$ —**	**$ —**	**$ (38,209,656)**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (11,485,480)	$ 490,119	$ (30,213,526)	$ —	$ —	$ (41,208,887)
Total	**$ (11,485,480)**	**$ 490,119**	**$ (30,213,526)**	**$ —**	**$ —**	**$ (41,208,887)**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts – long	$ 931,040,535
Average notional value of contracts – short	(1,104,696,162)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

7. RISK FACTORS (continued)

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying portfolios may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying portfolio or other issuer is incorrect. The available underlying portfolios selected by the sub-adviser may underperform the market or similar portfolios.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

Risk management framework risk: The Portfolio is subject to a multi-factor risk management framework that is intended to reduce equity exposure under certain market conditions. This framework may impose a maximum equity exposure limit for the Portfolio in response to individual asset class momentum signals and a portfolio level volatility signal. The framework is intended to improve the Portfolio's absolute and risk-adjusted returns but may not work as intended. The framework may result in the Portfolio not achieving its stated asset mix goal or may cause the Portfolio to underperform, possibly significantly. Because market conditions change, sometimes rapidly and unpredictably, the success of the framework also will be subject to the sub-adviser's ability to implement the framework in a timely and efficient manner. The framework may result in periods of underperformance, may fail to protect against market declines, may limit the Portfolio's ability to participate in up markets, may cause the Portfolio to underperform its benchmark in rising markets, may increase transaction costs at the Portfolio and/or underlying portfolio level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio's equity exposure, causing the Portfolio to forgo gains from the market rebound. The framework incorporates quantitative models and signals. If those models or signals prove to be flawed or for other reasons do not produce the desired results, any decisions made in reliance thereon may expose the Portfolio to additional risks and losses. The use of models has inherent risks, and the success of relying on or otherwise using a model depends, among other things, on the accuracy and completeness of the model's development, implementation and maintenance; on the model's assumptions and methodologies; and on the accuracy and reliability of the inputs and output of the model. The framework also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The framework also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a risk management framework. The use of derivatives in connection with the framework may expose the Portfolio to different and potentially greater risks than if it had only invested in underlying portfolios.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth

Transamerica JPMorgan Asset Allocation – Moderate Growth VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $10 billion	0.1225%
Over $10 billion	0.1025

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.20%	May 1, 2024
Service Class	0.45	May 1, 2024
Prior to May 1, 2023		
Initial Class	0.25	
Service Class	0.50	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 698,108,302	$ 81,662,268	$ 732,844,119	$ 85,906,715

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 3,750,918,981	$ 68,414,545	$ (248,478,053)	$ (180,063,508)

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica JPMorgan Asset Allocation – Moderate Growth VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and J.P. Morgan Investment Management, Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was in line with the median for its peer universe for the past 3- and 5-year periods and below the median for the past 1- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its primary benchmark for the past 1-year period and below its primary benchmark for the past 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on July 1, 2016 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica JPMorgan Asset Allocation – Moderate VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,046.50	$ 0.76	$ 1,024.10	$ 0.75	0.15%
Service Class	1,000.00	1,045.30	2.03	1,022.80	2.01	0.40

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio's Prospectus, may differ from the expense ratios disclosed in this report.*

Transamerica JPMorgan Asset Allocation – Moderate VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica JPMorgan Asset Allocation – Moderate VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

3. INVESTMENT VALUATION (continued)

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Restricted securities: Restricted securities for which quotations are not readily available are valued at fair value. Restricted securities issued by publicly traded companies are generally valued at a discount to similar publicly traded securities. Restricted securities issued by nonpublic entities may be valued by reference to comparable public entities and/or fundamental data relating to the issuer. Depending on the relative significance of observable valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Restricted securities: The Portfolio may invest in unregulated restricted securities. Restricted securities are subject to legal or contractual restrictions on resale. Restricted securities generally may be resold in transactions exempt from registration under the Securities Act of 1933.

Restricted securities held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio’s investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio’s investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ 1,741,094	$ 569,055	$ 19,998,105	$ —	$ —	$ 22,308,254
Total	**$ 1,741,094**	**$ 569,055**	**$ 19,998,105**	**$ —**	**$ —**	**$ 22,308,254**

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ (18,367,166)	$ —	$ (1,474,374)	$ —	$ —	$ (19,841,540)
Total	**$ (18,367,166)**	**$ —**	**$ (1,474,374)**	**$ —**	**$ —**	**$ (19,841,540)**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (17,620,891)	$ (16,205,097)	$ (29,912,575)	$ —	$ —	$ (63,738,563)
Total	**$ (17,620,891)**	**$ (16,205,097)**	**$ (29,912,575)**	**$ —**	**$ —**	**$ (63,738,563)**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (21,647,802)	$ 506,190	$ (46,662,427)	$ —	$ —	$ (67,804,039)
Total	**$ (21,647,802)**	**$ 506,190**	**$ (46,662,427)**	**$ —**	**$ —**	**$ (67,804,039)**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts – long	$ 1,362,044,305
Average notional value of contracts – short	(1,669,813,053)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio’s securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio’s securities and assets fall, the value of your investment in the Portfolio could go down.

7. RISK FACTORS (continued)

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying portfolios may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying portfolio or other issuer is incorrect. The available underlying portfolios selected by the sub-adviser may underperform the market or similar portfolios.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

Risk management framework risk: The Portfolio is subject to a multi-factor risk management framework that is intended to reduce equity exposure under certain market conditions. This framework may impose a maximum equity exposure limit for the Portfolio in response to individual asset class momentum signals and a portfolio level volatility signal. The framework is intended to improve the Portfolio's absolute and risk-adjusted returns but may not work as intended. The framework may result in the Portfolio not achieving its stated asset mix goal or may cause the Portfolio to underperform, possibly significantly. Because market conditions change, sometimes rapidly and unpredictably, the success of the framework also will be subject to the sub-adviser's ability to implement the framework in a timely and efficient manner. The framework may result in periods of underperformance, may fail to protect against market declines, may limit the Portfolio's ability to participate in up markets, may cause the Portfolio to underperform its benchmark in rising markets, may increase transaction costs at the Portfolio and/or underlying portfolio level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio's equity exposure, causing the Portfolio to forgo gains from the market rebound. The framework incorporates quantitative models and signals. If those models or signals prove to be flawed or for other reasons do not produce the desired results, any decisions made in reliance thereon may expose the Portfolio to additional risks and losses. The use of models has inherent risks, and the success of relying on or otherwise using a model depends, among other things, on the accuracy and completeness of the model's development, implementation and maintenance; on the model's assumptions and methodologies; and on the accuracy and reliability of the inputs and output of the model. The framework also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The framework also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a risk management framework. The use of derivatives in connection with the framework may expose the Portfolio to different and potentially greater risks than if it had only invested in underlying portfolios.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $10 billion	0.1225%
Over $10 billion	0.1025

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.20%	May 1, 2024
Service Class	0.45	May 1, 2024
Prior to May 1, 2023		
Initial Class	0.25	
Service Class	0.50	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 916,021,719	$ 125,743,459	$ 809,530,749	$ 125,055,368

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 5,525,519,512	$ 137,423,808	$ (422,773,202)	$ (285,349,394)

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica JPMorgan Asset Allocation – Moderate VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and J.P. Morgan Investment Management, Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe for the past 1-, 3-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its primary benchmark for the past 1-year period and below its primary benchmark for the past 3-, 5- and 10-year periods. The Board noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on July 1, 2016 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,178.00	$ 3.35	$ 1,021.70	$ 3.11	0.62%
Service Class	1,000.00	1,176.60	4.70	1,020.50	4.36	0.87

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica JPMorgan Enhanced Index VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

Transamerica JPMorgan Enhanced Index VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $11,094.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

3. INVESTMENT VALUATION (continued)

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels (“Levels”) of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM’s own assumptions used in determining the fair value of the Portfolio’s investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter (“OTC”) derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties’ creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ —	$ —	$ 2,123,785	$ —	$ —	$ 2,123,785
Total	**$ —**	**$ —**	**$ 2,123,785**	**$ —**	**$ —**	**$ 2,123,785**

[(A)] *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
[(B)] *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ 4,207,340	$ —	$ —	$ 4,207,340
Total	**$ —**	**$ —**	**$ 4,207,340**	**$ —**	**$ —**	**$ 4,207,340**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ 2,823,734	$ —	$ —	$ 2,823,734
Total	**$ —**	**$ —**	**$ 2,823,734**	**$ —**	**$ —**	**$ 2,823,734**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts — long	$ 49,065,436

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

Large capitalization companies risk: The Portfolio's investments in larger, more established companies may underperform other segments of the market because they may be less responsive to competitive challenges and opportunities and unable to attain high growth rates during periods of economic expansion.

7. RISK FACTORS (continued)

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $1 billion	0.60%
Over $1 billion up to $2 billion	0.59
Over $2 billion up to $3 billion	0.56
Over $3 billion up to $4 billion	0.52
Over $4 billion	0.46

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.67%	May 1, 2024
Service Class	0.92	May 1, 2024
Prior to May 1, 2023		
Service Class	0.96	

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 343,465,832	$ —	$ 262,597,740	$ —

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 1,885,337,976	$ 561,543,344	$ (49,217,858)	$ 512,325,486

11. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica JPMorgan Enhanced Index VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and J.P. Morgan Investment Management, Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 3-, 5- and 10-year periods and in line with the median for the 1-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was above its benchmark for the past 3-year period and below its benchmark for the past 1-, 5- and 10-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the median for its peer group and in line with the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,051.60	$ 0.86	$ 1,024.00	$ 0.85	0.17%
Service Class	1,000.00	1,049.80	2.13	1,022.70	2.11	0.42

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio's Prospectus, may differ from the expense ratios disclosed in this report.*

(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica JPMorgan International Moderate Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ 148,660	$ 298,825	$ 1,460,438	$ —	$ —	$ 1,907,923
Total	**$ 148,660**	**$ 298,825**	**$ 1,460,438**	**$ —**	**$ —**	**$ 1,907,923**

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ (1,172,223)	$ —	$ (687,340)	$ —	$ —	$ (1,859,563)
Total	**$ (1,172,223)**	**$ —**	**$ (687,340)**	**$ —**	**$ —**	**$ (1,859,563)**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (1,306,146)	$ (805,921)	$ (2,528,655)	$ —	$ —	$ (4,640,722)
Total	**$ (1,306,146)**	**$ (805,921)**	**$ (2,528,655)**	**$ —**	**$ —**	**$ (4,640,722)**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (1,461,827)	$ 263,738	$ (3,018,132)	$ —	$ —	$ (4,216,221)
Total	**$ (1,461,827)**	**$ 263,738**	**$ (3,018,132)**	**$ —**	**$ —**	**$ (4,216,221)**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts – long	$ 168,984,172
Average notional value of contracts – short	(137,762,289)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

6. RISK FACTORS (continued)

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking and select a mix of underlying portfolios may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy, underlying portfolio or other issuer is incorrect. The available underlying portfolios selected by the sub-adviser may underperform the market or similar portfolios.

Foreign investments risk: Investing in securities of foreign issuers or issuers with significant exposure to foreign markets involves additional risks. Foreign markets can be less liquid, less regulated, less transparent and more volatile than U.S. markets. The value of the Portfolio's foreign investments may decline, sometimes rapidly or unpredictably, because of factors affecting the particular issuer as well as foreign markets and issuers generally, such as unfavorable government actions, including nationalization, expropriation or confiscatory taxation, reduction of government or central bank support, tariffs and trade disruptions, sanctions, political or financial instability, social unrest or other adverse economic or political developments. Foreign investments may also be subject to different accounting practices and different regulatory, legal, auditing, financial reporting and recordkeeping standards and practices, and may be more difficult to value than investments in U.S. issuers. Certain foreign clearance and settlement procedures may result in an inability to execute transactions or delays in settlement.

Risk management framework risk: The Portfolio is subject to a multi-factor risk management framework that is intended to reduce equity exposure under certain market conditions. This framework may impose a maximum equity exposure limit for the Portfolio in response to individual asset class momentum signals and a portfolio level volatility signal. The framework is intended to improve the Portfolio's absolute and risk-adjusted returns but may not work as intended. The framework may result in the Portfolio not achieving its stated asset mix goal or may cause the Portfolio to underperform, possibly significantly. Because market conditions change, sometimes rapidly and unpredictably, the success of the framework also will be subject to the sub-adviser's ability to implement the framework in a timely and efficient manner. The framework may result in periods of underperformance, may fail to protect against market declines, may limit the Portfolio's ability to participate in up markets, may cause the Portfolio to underperform its benchmark in rising markets, may increase transaction costs at the Portfolio and/or underlying portfolio level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio's equity exposure, causing the Portfolio to forgo gains from the market rebound. The framework incorporates quantitative models and signals. If those models or signals prove to be flawed or for other reasons do not produce the desired results, any decisions made in reliance thereon may expose the Portfolio to additional risks and losses. The use of models has inherent risks, and the success of relying on or otherwise using a model depends, among other things, on the accuracy and completeness of the model's development, implementation and maintenance; on the model's assumptions and methodologies; and on the accuracy and reliability of the inputs and output of the model. The framework also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The framework also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a risk management framework. The use of derivatives in connection with the framework may expose the Portfolio to different and potentially greater risks than if it had only invested in underlying portfolios.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $10 billion	0.1225%
Over $10 billion	0.1025

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.21%	May 1, 2024
Service Class	0.46	May 1, 2024
Prior to May 1, 2023		
Initial Class	0.25	
Service Class	0.50	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 86,694,732	$ 10,063,640	$ 89,216,515	$ 12,392,609

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 418,110,453	$ 24,855,336	$ (17,473,063)	$ 7,382,273

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica JPMorgan International Moderate Growth VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and J.P. Morgan Investment Management, Inc. (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and its primary benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on July 1, 2016 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,036.90	$ 4.49	$ 1,020.40	$ 4.46	0.89%
Service Class	1,000.00	1,035.80	5.75	1,019.10	5.71	1.14

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Transamerica JPMorgan Mid Cap Value VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica JPMorgan Mid Cap Value VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $4,113.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

3. INVESTMENT VALUATION (continued)

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

6. RISK FACTORS (continued)

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

Medium capitalization companies risk: The Portfolio will be exposed to additional risks as a result of its investments in the securities of medium capitalization companies. Investing in medium capitalization companies involves greater risk than is customarily associated with more established companies. The prices of securities of medium capitalization companies generally are more volatile and are more likely to be adversely affected by changes in earnings results and investor expectations or poor economic or market conditions. Securities of medium capitalization companies may underperform larger capitalization companies, may be harder to sell at times and at prices the Portfolio managers believe appropriate and may offer greater potential for losses.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $100 million	0.88%
Over $100 million up to $550 million	0.83
Over $550 million up to $750 million	0.79
Over $750 million up to $1 billion	0.77
Over $1 billion	0.76

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.93%	May 1, 2024
Service Class	1.17	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 40,807,708	$ —	$ 172,646,337	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 324,874,725	$ 55,661,486	$ (16,610,390)	$ 39,051,096

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica JPMorgan Mid Cap Value VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and J.P. Morgan Investment Management, Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe for the past 1-, 3-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its benchmark for the past 1- and 3-year periods and below its benchmark for the past 5- and 10-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,036.50	$ 3.84	$ 1,021.00	$ 3.81	0.76%
Service Class	1,000.00	1,034.90	5.10	1,019.80	5.06	1.01

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio's Prospectus, may differ from the expense ratios disclosed in this report.*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

(B) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $62,882,752, representing 5.9% of the Portfolio's net assets.*

(C) *Fair valued as determined in good faith in accordance with procedures established by the Board. At June 30, 2023, the total value of securities is $155,060, representing less than 0.1% of the Portfolio's net assets.*

(D) *Percentage rounds to less than 0.1% or (0.1)%.*

(E) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*

(F) *All or a portion of the securities are on loan. The total value of all securities on loan is $2,299,366, collateralized by cash collateral of $2,372,715 and non-cash collateral, such as U.S. government securities and irrevocable letters of credit, of $12,870. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(G) *Rounds to less than $1 or $(1).*

(H) *All or a portion of these securities have been segregated by the custodian as collateral to cover margin requirements for open futures contracts. The total value of such securities is $12,864,641.*

(I) *Non-income producing securities.*

(J) *Security exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Security may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At June 30, 2023, the value of the Regulation S security is $838,530, representing 0.1% of the Portfolio's net assets.*

(K) *Rates disclosed reflect the yields at June 30, 2023.*

(L) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

(M) *Derivative instruments are valued at unrealized appreciation (depreciation).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica JPMorgan Tactical Allocation VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

3. INVESTMENT VALUATION (continued)

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

Short-term notes: The Portfolio normally values short-term government and U.S. government agency securities using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued by principally using dealer quotations. Short-term government and U.S. government agency securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

Treasury inflation-protected securities ("TIPS"): The Portfolio may invest in TIPS, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds and notes. For bonds and notes that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2023, if any, are included within the Schedule of Investments. The adjustments, if any, to principal due to inflation/deflation are reflected as increases/decreases to Interest income within the Statement of Operations, with a corresponding adjustment to Investments, at cost within the Statement of Assets and Liabilities.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

4. SECURITIES AND OTHER INVESTMENTS (continued)

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Corporate Debt Securities	$ 1,020,678	$ —	$ —	$ —	$ 1,020,678
Common Stocks	1,352,037	—	—	—	1,352,037
Total Securities Lending Transactions	$ 2,372,715	$ —	$ —	$ —	$ 2,372,715
Total Borrowings	**$ 2,372,715**	**$ —**	**$ —**	**$ —**	**$ 2,372,715**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments.

Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ 1,110,633	$ 287,751	$ 155,327	$ —	$ —	$ 1,553,711
Total	**$ 1,110,633**	**$ 287,751**	**$ 155,327**	**$ —**	**$ —**	**$ 1,553,711**

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ (5,175,153)	$ (758,554)	$ (927,812)	$ —	$ —	$ (6,861,519)
Total	**$ (5,175,153)**	**$ (758,554)**	**$ (927,812)**	**$ —**	**$ —**	**$ (6,861,519)**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (1,794,255)	$ (827,338)	$ (5,394,152)	$ —	$ —	$ (8,015,745)
Total	**$ (1,794,255)**	**$ (827,338)**	**$ (5,394,152)**	**$ —**	**$ —**	**$ (8,015,745)**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ (6,228,999)	$ (470,803)	$ (2,600,791)	$ —	$ —	$ (9,300,593)
Total	**$ (6,228,999)**	**$ (470,803)**	**$ (2,600,791)**	**$ —**	**$ —**	**$ (9,300,593)**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts — long	$ 365,783,151
Average notional value of contracts — short	(172,823,737)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Fixed-income securities risk: Risks of fixed-income securities include credit risk, interest rate risk, counterparty risk, prepayment risk, extension risk, valuation risk, and liquidity risk. The value of fixed-income securities may go up or down, sometimes rapidly and unpredictably, due to general market conditions, such as real or perceived adverse economic or political conditions, tariffs and trade disruptions, inflation, changes in interest rates, lack of liquidity in the bond markets or adverse investor sentiment. In addition, the value of a fixed-income security may decline if the issuer or other obligor of the security fails to pay principal and/or interest, otherwise defaults or has its credit rating downgraded or is perceived to be less creditworthy, or the credit quality or value of any underlying assets

7. RISK FACTORS (continued)

declines. If the value of fixed-income securities owned by the Portfolio falls, the value of your investment will go down. The Portfolio may lose its entire investment in the fixed-income securities of an issuer.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.730%
Over $500 million up to $750 million	0.705
Over $750 million up to $1.5 billion	0.680
Over $1.5 billion up to $2.5 billion	0.670
Over $2.5 billion	0.650

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.82%	May 1, 2024
Service Class	1.07	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 266,405,725	$ 108,924,389	$ 313,251,961	$ 122,471,816

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 1,111,553,787	$ 30,788,112	$ (75,109,012)	$ (44,320,900)

11. NEW ACCOUNTING PRONOUNCEMENTS

In June 2022, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

In December 2022, FASB issued Accounting Standards Update No. 2022-06 ("ASU 2022-06"), "Reference Rate Reform (Topic 848)". ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for

11. NEW ACCOUNTING PRONOUNCEMENTS (continued)

a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica JPMorgan Tactical Allocation VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and J.P. Morgan Investment Management, Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was in line with the median for its peer universe for the past 3-year period and below the median for the past 1-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 3-year period and below its composite benchmark for the past 1-, 5- and 10-year periods. The Trustees observed that the performance of the Portfolio had improved during the first quarter of 2023.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Madison Diversified Income VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Service Class	$ 1,000.00	$ 1,002.70	$ 5.31	$ 1,019.50	$ 5.36	1.07%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(unaudited)

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $10,210,917, representing 7.5% of the Portfolio's net assets.*

(B) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

(C) *All or a portion of the securities are on loan. The total value of all securities on loan is $490,891, collateralized by cash collateral of $501,570. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(D) *Percentage rounds to less than 0.1% or (0.1)%.*

(E) *Rates disclosed reflect the yields at June 30, 2023.*

(F) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Madison Diversified Income VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $3,952.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level

3. INVESTMENT VALUATION (continued)

input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels.

The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

Municipal government obligations: The fair value of municipal government obligations and variable rate notes is estimated based on models that consider, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the liquidity of the bond, state of issuance, benchmark yield curves, and bond or note insurance. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced (“TBA”) securities and mortgage pass-through certificates. Generally,

3. INVESTMENT VALUATION (continued)

TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan

(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Corporate Debt Securities	$ 501,570	$ —	$ —	$ —	$ 501,570
Total Borrowings	**$ 501,570**	**$ —**	**$ —**	**$ —**	**$ 501,570**

5. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

Transamerica Madison Diversified Income VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. RISK FACTORS (continued)

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

Fixed-income securities risk: Risks of fixed-income securities include credit risk, interest rate risk, counterparty risk, prepayment risk, extension risk, valuation risk, and liquidity risk. The value of fixed-income securities may go up or down, sometimes rapidly and unpredictably, due to general market conditions, such as real or perceived adverse economic or political conditions, tariffs and trade disruptions, inflation, changes in interest rates, lack of liquidity in the bond markets or adverse investor sentiment. In addition, the value of a fixed-income security may decline if the issuer or other obligor of the security fails to pay principal and/or interest, otherwise defaults or has its credit rating downgraded or is perceived to be less creditworthy, or the credit quality or value of any underlying assets declines. If the value of fixed-income securities owned by the Portfolio falls, the value of your investment will go down. The Portfolio may lose its entire investment in the fixed-income securities of an issuer.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

Transamerica Madison Diversified Income VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily Average Net Assets ("ANA") at the following rates:

Breakpoints	Rate
First $500 million	0.73%
Over $500 million up to $1 billion	0.70
Over $1 billion	0.68

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	1.09%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 17,068,855	$ 10,197,476	$ 19,693,064	$ 12,397,474

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 140,374,499	$ 7,151,954	$ (12,187,322)	$ (5,035,368)

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Madison Diversified Income VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Madison Asset Management, LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1-, 3-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 1-year period and below its composite benchmark for the past 3-, 5- and 10-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the median for its peer group and above the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were in line with the median for its peer group and above the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Market Participation Strategy VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Service Class	$ 1,000.00	$ 1,066.70	$ 5.02	$ 1,019.90	$ 4.91	0.98%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Transamerica Market Participation Strategy VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Market Participation Strategy VP (the "Portfolio") is a series of TST and is classified as non-diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level

3. INVESTMENT VALUATION (continued)

input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced (“TBA”) securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Short-term notes: The Portfolio normally values short-term government and U.S. government agency securities using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued by principally using dealer quotations. Short-term government and U.S. government agency securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter (“OTC”) derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties’ creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Foreign Government Obligations	$ 6,130,124	$ —	$ —	$ —	$ 6,130,124
U.S. Government Agency Obligations	24,594,832	—	—	—	24,594,832
Total Securities Lending Transactions	$ 30,724,956	$ —	$ —	$ —	$ 30,724,956
Total Borrowings	**$ 30,724,956**	**$ —**	**$ —**	**$ —**	**$ 30,724,956**

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Option contracts: The Portfolio is subject to equity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio may enter into option contracts to manage exposure to various market fluctuations. The Portfolio may purchase or write call and put options on securities and derivative instruments in which the Portfolio owns or may invest. Options are valued at the average of the bid and ask price established each day at the close of the board of trade or exchange on which they are traded. Options are marked-to-market daily to reflect the current value of the option. The primary risks associated with options are an imperfect correlation between the change in value of the securities held and the prices of the option contracts, the possibility of an illiquid market, and an inability of the counterparty to meet the contract terms. Options can be traded through an exchange or through privately negotiated arrangements with a dealer in an OTC transaction. Options traded on an exchange are generally cleared through a clearinghouse such as the Options Clearing Corp.

Options on indices: The Portfolio may purchase or write options on indices. Purchasing or writing an option on indices gives the Portfolio the right, but not the obligation to buy or sell the cash from the underlying index. The exercise of the option will result in a cash transfer and gain or loss depends on the change in the underlying index.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Purchased options: Purchasing call options tends to increase exposure to the underlying instrument. Purchasing put options tends to decrease exposure to the underlying instrument. The Portfolio pays premiums, which are included within the Statement of Assets and Liabilities as an investment and subsequently marked-to-market to reflect the current value of the option. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid from options which expire are treated as realized losses. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying instrument to determine the realized gain or loss.

Open option contracts at June 30, 2023, if any, are included within the Schedule of Investments. The value of purchased option contracts, as applicable, is shown in Investments, at value within the Statement of Assets and Liabilities. The value of written option contracts, as applicable, is shown in Written options and swaptions, at value within the Statement of Assets and Liabilities.

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Options:	
Average value of option contracts purchased	$ 35,937,024
Futures contracts:	
Average notional value of contracts — long	85,668,878

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio’s securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or

6. RISK FACTORS (continued)

interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset class allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset class allocation and reallocation from time to time. The sub-adviser's decisions whether and when to tactically overweight or underweight asset classes, create and apply formulas for de-risking or ending de-risking may not produce the desired results. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy or other issuer is incorrect.

Tactical asset allocation risk: Tactical asset allocation is an investment strategy that actively adjusts a portfolio's asset allocation. The Portfolio's tactical asset management discipline may not work as intended. The Portfolio may not achieve its objective and may not perform as well as other funds using other asset management styles, including those based on fundamental analysis (a method of evaluating a security that entails attempting to measure its intrinsic value by examining related economic, financial and other factors) or strategic asset allocation (a strategy that involves periodically rebalancing the Portfolio in order to maintain a long-term goal for asset allocation). The sub-adviser's evaluations and assumptions in selecting underlying portfolios, underlying ETFs or individual securities may be incorrect in view of actual market conditions, and may result in owning securities that underperform other securities.

Non-diversification risk: As a "non-diversified" Portfolio, the Portfolio may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund. Investing in a smaller number of issuers will make the Portfolio more susceptible to negative events affecting those issuers.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.68%
Over $500 million up to $1 billion	0.65
Over $1 billion up to $1.5 billion	0.62
Over $1.5 billion	0.60

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	1.07%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 15,989,840	$ —	$ —	$ 40,669,060

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 379,442,935	$ 5,614,184	$ (17,048,925)	$ (11,434,741)

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Market Participation Strategy VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and PGIM Quantitative Solutions LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 3-, 5- and 10-year periods and in line with the median for the past 1-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 3- and 5-year periods and below its composite benchmark for the past 1- and 10-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [(A)]		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period [(B)]**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period [(B)]**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,324.50	$ 4.32	$ 1,021.10	$ 3.76	0.75%
Service Class	1,000.00	1,205.10	5.47	1,019.80	5.01	1.00

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *All or a portion of the securities are on loan. The total value of all securities on loan is $6,134,809, collateralized by cash collateral of $3,761,411 and non-cash collateral, such as U.S. government securities and irrevocable letters of credit, of $2,543,049. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(B) *Non-income producing securities.*

(C) *Security is exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Security may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the value of the 144A security is $5,215,784, representing 4.2% of the Portfolio's net assets.*

(D) *Rates disclosed reflect the yields at June 30, 2023.*

(E) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

Transamerica Morgan Stanley Capital Growth VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Morgan Stanley Capital Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class. Effective on or about September 22, 2023, Service Class shares will no longer be offered by the Portfolio.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.
