TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

NOTES TO FINANCIAL STATEMENTS (continued)

(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $1,761.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

3. INVESTMENT VALUATION (continued)

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Common Stocks	$ 3,761,411	$ —	$ —	$ —	$ 3,761,411
Total Borrowings	**$ 3,761,411**	**$ —**	**$ —**	**$ —**	**$ 3,761,411**

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Option contracts: The Portfolio is subject to equity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio may enter into option contracts to manage exposure to various market fluctuations. The Portfolio may purchase or write call and put options on securities and derivative instruments in which the Portfolio owns or may invest. Options are valued at the average of the bid and ask price established each day at the close of the board of trade or exchange on which they are traded. Options are marked-to-market daily to reflect the current value of the option. The primary risks associated with options are an imperfect correlation between the change in value of the securities held and the prices of the option contracts, the possibility of an illiquid market, and an inability of the counterparty to meet the contract terms. Options can be traded through an exchange or through privately negotiated arrangements with a dealer in an OTC transaction. Options traded on an exchange are generally cleared through a clearinghouse such as the Options Clearing Corp.

Purchased options: Purchasing call options tends to increase exposure to the underlying instrument. Purchasing put options tends to decrease exposure to the underlying instrument. The Portfolio pays premiums, which are included within the Statement of Assets and Liabilities as an investment and subsequently marked-to-market to reflect the current value of the option. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid from options which expire are treated as realized losses. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying instrument to determine the realized gain or loss.

Options on foreign currency: The Portfolio may purchase or write foreign currency options. Purchasing or writing options on foreign currency gives the Portfolio the right, but not the obligation to buy or sell the currency and will specify the amount of currency and a rate of exchange that may be exercised by a specified date.

Open option contracts at June 30, 2023, if any, are included within the Schedule of Investments.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Purchased options and swaptions:						
Investments, at value (A)	$ —	$ 1,240,698	$ —	$ —	$ —	$ 1,240,698
Total	**$ —**	**$ 1,240,698**	**$ —**	**$ —**	**$ —**	**$ 1,240,698**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Purchased options and swaptions (A)	$ —	$ (829,002)	$ —	$ —	$ —	$ (829,002)
Total	**$ —**	**$ (829,002)**	**$ —**	**$ —**	**$ —**	**$ (829,002)**

(A) *Included within Net change in unrealized appreciation (depreciation) on Investments in the Statement of Operations.*

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Options:	
Average value of option contracts purchased	$ 1,077,376

The Portfolio typically enters into International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") or similar master agreements (collectively, "Master Agreements") with its contract counterparties for certain OTC derivatives in order to, among other things, reduce credit risk to counterparties.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Portfolio typically may offset with the counterparty certain OTC derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default, termination and/or potential deterioration in the credit quality of the counterparty.

Various Master Agreements govern the terms of certain transactions with counterparties and typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Portfolio and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party and may be a feature in certain Master Agreements. In the event the Portfolio exercises its right to terminate a Master Agreement after a counterparty experiences a termination event as defined in the Master Agreement, the return of collateral with market value in excess of the Portfolio's net liability may be delayed or denied.

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

The following is a summary of the Portfolio OTC derivative assets and liabilities by counterparty net of amounts available for offset under a master netting agreement and net of the related collateral received/pledged by the Portfolio as of June 30, 2023. For financial reporting purposes, the Portfolio does not offset assets and liabilities that are subject to a master netting agreement or similar arrangement on the Statement of Assets and Liabilities. See the Repurchase agreement section within the notes for offsetting and collateral information pertaining to repurchase agreements that are subject to master netting agreements.

	Assets				Liabilities			
Counterparty	Gross Amounts of Assets Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Received (B)	Net Receivable	Gross Amounts of Liabilities Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Pledged (B)	Net Payable
Goldman Sachs International	$ 830	$ —	$ (830)	$ —	$ —	$ —	$ —	$ —
JPMorgan Chase Bank, N.A.	1,075,377	—	(1,040,000)	35,377	—	—	—	—

Total	**$ 1,240,698**	**$ —**	**$ (1,160,830)**	**$ 79,868**	**$ —**	**$ —**	**$ —**	**$ —**

(A) *Absent an event of default or early termination, OTC derivative assets and liabilities are presented gross and not offset within the Statements of Assets and Liabilities.*

(B) *In some instances, the actual collateral received and/or pledged may be more than the amount shown due to overcollateralization.*

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Foreign investments risk: Investing in securities of foreign issuers or issuers with significant exposure to foreign markets involves additional risks. Foreign markets can be less liquid, less regulated, less transparent and more volatile than U.S. markets. The value of the Portfolio's foreign investments may decline, sometimes rapidly or unpredictably, because of factors affecting the particular issuer as well as foreign markets and issuers generally, such as unfavorable government actions, including nationalization, expropriation or confiscatory taxation, reduction of government or central bank support, tariffs and trade disruptions, sanctions, political or financial instability, social unrest or other adverse economic or political developments. Foreign investments may also be subject to different accounting practices and different regulatory, legal, auditing, financial reporting and recordkeeping standards and practices, and may be more difficult to value than investments in U.S. issuers. Certain foreign clearance and settlement procedures may result in an inability to execute transactions or delays in settlement.

Growth stocks risk: Returns on growth stocks may not move in tandem with returns on other categories of stocks or the market as a whole. Growth stocks typically are particularly sensitive to market movements and may involve larger price swings because their market prices tend to reflect future expectations. When it appears those expectations may not be met, the prices of growth stocks typically fall. Growth stocks may also be more volatile because they often do not pay dividends. The values of growth stocks tend to go down when interest rates rise because the rise in interest rates reduces the current value of future cash flows. Growth stocks as a group may be out of favor and underperform the overall equity market for a long period of time, for example, while the market favors "value" stocks.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoint	Rate
First $750 million	0.755%
Over $750 million up to $1.5 billion	0.715
Over $1.5 billion up to $3 billion	0.645
Over $3 billion up to $5 billion	0.630
Over $5 billion up to $7 billion	0.570
Over $7 billion	0.550

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.76%	May 1, 2024
Service Class	1.01	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

For the 36-month period ended June 30, 2023, the balances available for recapture by TAM for the Portfolio are as follows:

	Amounts Available				
Class	2020 [(A)]	2021	2022	2023	Total
Initial Class	$ —	$ —	$ —	$ 88,886	$ 88,886
Service Class	—	—	8,319	81,428	89,747

[(A)] *For the six-month period of July 1, 2020 through December 31, 2020.*

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc (“SS&C”). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 68,393,724	$ —	$ 751,434,076	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 138,584,038	$ 17,261,239	$ (24,106,670)	$ (6,845,431)

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Morgan Stanley Capital Growth VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Morgan Stanley Investment Management, Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was in line with the median for its peer universe for the past 10-year period and below the median for the past 1-, 3- and 5- year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was below its benchmark for the past 1-, 3-, 5- and 10-year periods. The Trustees discussed the reasons for the underperformance with TAM, and TAM agreed to continue to closely monitor and report to the Board on the performance of the Portfolio.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Morgan Stanley Global Allocation Managed Risk – Balanced VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [A]		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Net Annualized Expense Ratio [C]
Service Class	$ 1,000.00	$ 1,036.60	$ 2.37	$ 1,022.50	$ 2.36	0.47%

[A] *5% return per year before expenses.*

[B] *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

[C] *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Morgan Stanley Global Allocation Managed Risk – Balanced VP (the "Portfolio") is a series of TST and is classified as non-diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office

1. ORGANIZATION (continued)

space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

3. INVESTMENT VALUATION (continued)

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Futures contracts:	
Average notional value of contracts – short	$ (55,821,935)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

6. RISK FACTORS (continued)

Asset class allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset class allocation and reallocation from time to time. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy or other issuer is incorrect.

Managed risk strategy risk: The Portfolio employs a managed risk strategy. The strategy attempts to stabilize the volatility of the Portfolio around a target volatility level and manage downside exposure during periods of significant market declines but may not work as intended. Because market conditions change, sometimes rapidly and unpredictably, the success of the strategy also will be subject to the sub-adviser's ability to implement the strategy in a timely and efficient manner. The strategy may result in periods of underperformance and may fail to protect against market declines. The strategy may limit the Portfolio's ability to participate in up markets, may cause the Portfolio to underperform its benchmark in up markets, may increase transaction costs at the Portfolio and/or underlying portfolio level and may result in substantial losses if it does not work as intended. For example, if the Portfolio has reduced its equity exposure to avoid losses in certain market conditions, and the market rises sharply and quickly, there may be a delay in increasing the Portfolio's equity exposure, causing the Portfolio to forgo gains from the market rebound. Managing the Portfolio pursuant to the strategy may result in the Portfolio not achieving its stated asset mix goal due to unforeseen or unanticipated market conditions. The strategy also serves to reduce the risk to the Transamerica insurance companies that provide guaranteed benefits under certain variable contracts from equity market volatility and to facilitate their provision of those guaranteed benefits. The strategy also may have the effect of limiting the amount of guaranteed benefits. The Portfolio's performance may be lower than similar portfolios that are not subject to a managed risk strategy.

Non-diversification risk: As a "non-diversified" Portfolio, the Portfolio may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund. Investing in a smaller number of issuers will make the Portfolio more susceptible to negative events affecting those issuers.

7. INVESTMENT CONCENTRATION

Throughout the period, the Portfolio can have investments that account for a significant percentage of the Portfolio's total assets. As of June 30, 2023, the most recent financial statements are included within this report for the following investments:

Investment	Percentage of Total Assets
Transamerica Morgan Stanley Global Allocation VP	97.23%

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $2 billion	0.20%
Over $2 billion up to $4 billion	0.19
Over $4 billion up to $6 billion	0.18
Over $6 billion up to $8 billion	0.17
Over $8 billion up to $10 billion	0.16
Over $10 billion	0.15

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	0.47%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

For the 36-month period ended June 30, 2023, the balances available for recapture by TAM for the Portfolio are as follows:

	Amounts Available				
Class	2020 [(A)]	2021	2022	2023	Total
Service Class	$ 46,511	$ 50,381	$ 85,960	$ 45,110	$ 227,962

[(A)] *For the six-month period of July 1, 2020 through December 31, 2020.*

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities	Sales of Securities
$ —	$ 3,015,438

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 297,419,076	$ 26,002	$ (76,895,592)	$ (76,869,590)

Transamerica Morgan Stanley Global Allocation Managed Risk – Balanced VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica Morgan Stanley Global Allocation Managed Risk – Balanced VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Milliman Financial Risk Management LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe for the past 1-, 3- and 5-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its composite benchmark for the past 1-year period and below its composite benchmark for the past 3- and 5-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on May 1, 2020 pursuant to its current investment objective, investment strategies and benchmark.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Morgan Stanley Global Allocation VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [A]		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Ending Account Value June 30, 2023	Expenses Paid During Period [B]	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,070.50	$ 4.88	$ 1,020.10	$ 4.76	0.95%
Service Class	1,000.00	1,070.60	6.16	1,018.80	6.01	1.20

[A] *5% return per year before expenses.*

[B] *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Non-income producing securities.*

(B) *Restricted security. At June 30, 2023, the value of such security held by the Portfolio is as follows:*

Investments	Description	Acquisition Date	Acquisition Cost	Value	Value as Percentage of Net Assets
Common Stocks	Quintis Australia Pty Ltd.	10/25/2018	$ 1,059,498	$ 1	0.0%[F]

(C) *Fair valued as determined in good faith in accordance with procedures established by the Board. At June 30, 2023, the total value of securities is $1,638,578, representing 0.2% of the Portfolio's net assets.*

(D) *Securities are Level 3 of the fair value hierarchy.*

(E) *All or a portion of the securities are on loan. The total value of all securities on loan is $6,202,340, collateralized by cash collateral of $5,607,653 and non-cash collateral, such as U.S. government securities and irrevocable letters of credit, of $989,387. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(F) *Percentage rounds to less than 0.1% or (0.1)%.*

(G) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $44,866,650, representing 4.2% of the Portfolio's net assets.*

(H) *Transferred from Level 2 to 3 due to utilizing significant unobservable inputs. As of prior reporting period, the security utilized significant observable inputs.*

(I) *Securities deemed worthless.*

(J) *Rates disclosed reflect the yields at June 30, 2023.*

(K) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

(L) *Securities in default; no interest payments received and/or dividends declared during the last 12 months. At June 30, 2023, the total value of such securities is $190,780, representing less than 0.1% of the Portfolio's net assets.*

(M) *Securities are exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Securities may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At June 30, 2023, the total value of Regulation S securities is $135,429,770, representing 12.7% of the Portfolio's net assets.*

(N) *Payment in-kind. Securities pay interest or dividends in the form of additional bonds or preferred stock. If the securities make a cash payment in addition to in-kind, the cash rate is disclosed separately.*

(O) *Perpetual maturity. The date displayed is the next call date.*

CONSOLIDATED SCHEDULE OF INVESTMENTS (continued)
At June 30, 2023
(unaudited)

FOOTNOTES TO SCHEDULE OF INVESTMENTS (continued):

(P) *All or a portion of investments is owned by Transamerica Cayman Morgan Stanley Global Allocation Ltd., a wholly-owned subsidiary of the Portfolio.*
(Q) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*
(R) *All or a portion of the security has been segregated by the custodian as collateral to cover margin requirements for open futures contracts. The value of the security is $787,574.*
(S) *At the termination date, a net cash flow is exchanged where the total return is equivalent to the return of the reference entity less a financing rate, if any. As a receiver, the Portfolio would receive payments based on any positive total return and would owe payments in the event of a negative total return. As the payer, the Portfolio would owe payments on any net positive total return and would receive payment in the event of a negative total return.*
(T) *The Portfolio recognized transfers in and out of Level 3 as of June 30, 2023. Please reference the Investment Valuation section of the Notes to Consolidated Schedule of Investments for more information regarding investment valuation and pricing inputs.*
(U) *Level 3 securities were not considered significant to the Portfolio.*
(V) *Derivative instruments are valued at unrealized appreciation (depreciation).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Morgan Stanley Global Allocation VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

Transamerica Cayman Morgan Stanley Global Allocation, Ltd. is a wholly-owned subsidiary which acts as an investment vehicle for the Portfolio. Please reference the Basis for Consolidation section of the Notes to Financial Statements for more information. The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees

1. ORGANIZATION (continued)

and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Consolidated Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Consolidated Statement of Assets and Liabilities.

2. BASIS FOR CONSOLIDATION

Transamerica Cayman Morgan Stanley Global Allocation, Ltd. (the “Subsidiary”) is organized under the laws of the Cayman Islands and is a wholly-owned subsidiary which acts as an investment vehicle for the Portfolio. The principal purpose of investment in the Subsidiary is to allow the Portfolio noted above to gain exposure to the commodity markets within the limitations of the federal tax law requirements applicable to regulated investment companies.

At June 30, 2023, the net assets of the Subsidiary as a percentage of the Portfolio’s net assets is as follows:

Subsidiary Net Assets	Percentage of Net Assets
$ 124,533,813	11.69%

3. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio’s consolidated financial statements in accordance with Generally Accepted Accounting Principles in the United States of America (“GAAP”), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Cash overdraft: The Portfolio may have cash overdraft balances. A fee is incurred on these overdrafts, calculated by multiplying the overdraft by a rate based on the Federal Funds Rate.

Payables, if any, are reflected as Due to custodian within the Consolidated Statement of Assets and Liabilities. Expenses, if any, from U.S. cash overdrafts are reflected in Custody fees within the Consolidated Statement of Operations. Expenses, if any, from foreign cash overdrafts are reflected in Other expenses within the Consolidated Statement of Operations.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

4. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Consolidated Schedule of Investments.

4. INVESTMENT VALUATION (continued)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

Foreign equity securities: Securities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Convertible bonds: The fair value of convertible bonds is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, broker price quotations (where observable), and models incorporating benchmark curves, underlying stock data, and foreign exchange rates. While most convertible bonds are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

Municipal government obligations: The fair value of municipal government obligations and variable rate notes is estimated based on models that consider, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the liquidity of the bond, state of issuance, benchmark yield curves, and bond or note insurance. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

4. INVESTMENT VALUATION (continued)

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Short-term notes: The Portfolio normally values short-term government and U.S. government agency securities using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued by principally using dealer quotations. Short-term government and U.S. government agency securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Restricted securities: Restricted securities for which quotations are not readily available are valued at fair value. Restricted securities issued by publicly traded companies are generally valued at a discount to similar publicly traded securities. Restricted securities issued by nonpublic entities may be valued by reference to comparable public entities and/or fundamental data relating to the issuer. Depending on the relative significance of observable valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

5. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Consolidated Schedule of Investments.

Restricted securities: The Portfolio may invest in unregulated restricted securities. Restricted securities are subject to legal or contractual restrictions on resale. Restricted securities generally may be resold in transactions exempt from registration under the Securities Act of 1933.

5. SECURITIES AND OTHER INVESTMENTS (continued)

Restricted securities held at June 30, 2023, if any, are identified within the Consolidated Schedule of Investments.

Treasury inflation-protected securities ("TIPS"): The Portfolio may invest in TIPS, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds and notes. For bonds and notes that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2023, if any, are included within the Consolidated Schedule of Investments. The adjustments, if any, to principal due to inflation/deflation are reflected as increases/decreases to Interest income within the Consolidated Statement of Operations, with a corresponding adjustment to Investments, at cost within the Consolidated Statement of Assets and Liabilities.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Consolidated Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Consolidated Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Consolidated Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Consolidated Statement of Assets and Liabilities.

6. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of

6. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Consolidated Schedule of Investments, and as part of Repurchase agreements, at value within the Consolidated Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Consolidated Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Consolidated Schedule of Investments and Consolidated Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Consolidated Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Consolidated Schedule of Investments.

6. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Common Stocks	$ 3,251,737	$ —	$ —	$ —	$ 3,251,737
Corporate Debt Securities	1,039,667	—	—	—	1,039,667
Foreign Government Obligations	1,316,249	—	—	—	1,316,249
Total Securities Lending Transactions	$ 5,607,653	$ —	$ —	$ —	$ 5,607,653
Total Borrowings	**$ 5,607,653**	**$ —**	**$ —**	**$ —**	**$ 5,607,653**

7. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Swap agreements: Swap agreements are bilaterally negotiated agreements between the Portfolio and a counterparty to exchange or swap investments, cash flows, assets, foreign currencies, or market-linked returns at specified, future intervals. Swap agreements can be executed in a bilateral privately negotiated arrangement with a dealer in an OTC transaction or executed on a regular market. Certain swaps regardless of the venue of execution are required to be cleared through a clearinghouse ("centrally cleared swap agreements"). Centrally cleared swap agreements listed or traded on a multilateral platform, are valued at the daily settlement price determined by the corresponding exchange. For centrally cleared credit default swap agreements the clearing exchange requires all members to provide applicable levels across complete term levels. Centrally cleared interest rate swap agreements are valued using a pricing model that references the underlying rates including but not limited to the overnight index swap rate and London Interbank Offered Rate ("LIBOR") forward rate to calculate the daily settlement price. The Portfolio may enter into credit default, cross-currency, interest rate, total return, including contracts for difference ("CFD"), and other forms of swap agreements to manage exposure to credit, currency, interest rate, and commodity risks. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

7. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Centrally cleared swap agreements are marked-to-market daily based upon values from third party vendors, which may include a registered exchange, or quotations from market makers to the extent available and the change in value, if any, is recorded as Variation margin receivable (payable) on centrally cleared swap agreements within the Consolidated Statement of Assets and Liabilities.

For OTC swap agreements, payments received or made at the beginning of the measurement period are reflected in OTC swap agreements, at value within the Consolidated Statement of Assets and Liabilities and represent payments made or received upon entering into the swap agreements to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Additionally, these upfront payments as well as any periodic payments received or paid by the Portfolio, including any liquidation payment received or made at the termination of the swap are recorded as part of Net realized gain (loss) on swap agreements within the Consolidated Statement of Operations.

Interest rate swap agreements: The Portfolio is subject to interest rate risk exposure in the normal course of pursuing its investment objective. Because the Portfolio holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk, the Portfolio enters into interest rate swap agreements. Under an interest rate swap agreement, two parties will exchange cash flows based on a notional principal amount. A Portfolio with interest rate agreements can elect to pay a fixed rate and receive a floating rate, or receive a fixed rate and pay a floating rate, on a notional principal amount. The risks of interest rate swap agreements include changes in market conditions which will affect the value of the contract or the cash flows, and the possible inability of the counterparty to fulfill its obligations under the agreement. The Portfolio’s maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparties over the contracts’ remaining lives, to the extent that amount is positive. This risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty, and by the posting of collateral.

Total return swap agreements: The Portfolio is subject to commodity risk, equity risk, and other risks related to the underlying investments of the swap agreement, including CFDs, in the normal course of pursuing its investment objective. The value of the commodity-linked investments held by a Portfolio can be affected by a variety of factors, including, but not limited to, overall market movements and other factors affecting the value of particular industries or commodities, such as weather, disease, embargoes, acts of war or terrorism, or political and regulatory developments. Commodity-linked derivatives are available from a relatively small number of issuers, subjecting the Portfolio’s investments in commodity-linked derivatives to counterparty risk, which is the risk that the issuer of the commodity-linked derivative will not fulfill its contractual obligations. Total return swap agreements on commodities involve commitments whereby cash flows are exchanged based on the price of a commodity in exchange for either a fixed or floating price or rate. One party would receive payments based on the market value of the commodity involved and pay a fixed amount. Total return swap agreements on indices involve commitments to pay interest in exchange for a market-linked return. One counterparty pays out the total return of a specific reference entity, which may be an equity, index, or bond, and in return receives a regular stream of payments.

Equity basket total return swap agreements: The Portfolio may enter into equity basket total return swap agreements to obtain exposure to a portfolio of long and/or short securities. Under the terms of the agreements, the swaps are designed to function as a portfolio of direct investments in long and/or short equity or fixed income positions. An equity basket total return swap is an agreement between two parties to exchange, for a specified period and based on the notional amount, the total return on an underlying basket of equity securities for typically fixed or floating interest payments. Equity basket total return swap agreements typically reset on a monthly basis and are privately negotiated in the OTC market. The swaps are entered into as bilateral swap agreements and are traded between counterparties, and as such, subject to counterparty risk.

Open centrally cleared swap agreements and open OTC swap agreements at June 30, 2023, if any, are listed within the Consolidated Schedule of Investments.

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange’s clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

7. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Open futures contracts at June 30, 2023, if any, are listed within the Consolidated Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Consolidated Statement of Assets and Liabilities.

Forward foreign currency contracts: The Portfolio is subject to foreign exchange rate risk exposure in the normal course of pursuing its investment objective. The Portfolio may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Forward foreign currency contracts are marked-to-market daily, with the change in value recorded as an unrealized gain or loss and is shown in Unrealized appreciation (depreciation) on forward foreign currency contracts within the Consolidated Statement of Assets and Liabilities. When the contracts are settled, a realized gain or loss is incurred and is shown in Net realized gain (loss) on forward foreign currency contracts within the Consolidated Statement of Operations. Risks may arise from changes in market value of the underlying currencies and from the possible inability of counterparties to meet the terms of their contracts. Forward foreign currency contracts are traded in the OTC inter-bank currency dealer market.

Open forward foreign currency contracts at June 30, 2023, if any, are listed within the Consolidated Schedule of Investments.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Consolidated Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Interest rate swaps:	
Average notional value — pays fixed rate	$ 5,430,686
Average notional value — receives fixed rate	144,280,286
Total return swaps:	
Average notional value — long	478,076,073
Average notional value — short	(112,175,834)
Futures contracts:	
Average notional value of contracts — long	91,381,690
Average notional value of contracts — short	(257,633,335)
Forward foreign currency exchange contracts:	
Average contract amounts purchased — in USD	224,462,120
Average contract amounts sold — in USD	247,835,196

The Portfolio typically enters into International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") or similar master agreements (collectively, "Master Agreements") with its contract counterparties for certain OTC derivatives in order to, among other things, reduce credit risk to counterparties.

ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Portfolio typically may offset with the counterparty certain OTC derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default, termination and/or potential deterioration in the credit quality of the counterparty.

Various Master Agreements govern the terms of certain transactions with counterparties and typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Portfolio and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party and may be a feature in certain Master Agreements. In the event the Portfolio exercises its right to terminate a Master Agreement after a counterparty experiences a termination event as defined in the Master Agreement, the return of collateral with market value in excess of the Portfolio's net liability may be delayed or denied.

7. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Consolidated Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Consolidated Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Consolidated Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

The following is a summary of the Portfolio OTC derivative assets and liabilities by counterparty net of amounts available for offset under a master netting agreement and net of the related collateral received/pledged by the Portfolio as of June 30, 2023. For financial reporting purposes, the Portfolio does not offset assets and liabilities that are subject to a master netting agreement or similar arrangement on the Consolidated Statement of Assets and Liabilities. See the Repurchase agreement section within the notes for offsetting and collateral information pertaining to repurchase agreements that are subject to master netting agreements.

Counterparty	Gross Amounts of Assets Presented within Consolidated Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Consolidated Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Consolidated Statement of Assets and Liabilities: Collateral Received (B)	Net Receivable	Gross Amounts of Liabilities Presented within Consolidated Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Consolidated Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Consolidated Statement of Assets and Liabilities: Collateral Pledged (B)	Net Payable

(A) *Absent an event of default or early termination, OTC derivative assets and liabilities are presented gross and not offset within the Consolidated Statement of Assets and Liabilities.*
(B) *In some instances, the actual collateral received and/or pledged may be more than the amount shown due to overcollateralization.*
(C) *Other Derivatives, which includes future contracts, exchange-traded options, exchange-traded swap agreements and occasionally forward positions, that are not subject to a master netting arrangement or another similar arrangement. The amount presented is intended to permit reconciliation to the amount presented within the Consolidated Schedule of Investments.*

8. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or

8. RISK FACTORS (continued)

interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset class allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset class allocation and reallocation from time to time. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class is incorrect.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

9. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

9. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transamerica Fund Services, Inc. (“TFS”) is the Portfolio’s transfer agent. Transamerica Capital, Inc. (“TCI”) is the Portfolio’s distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Consolidated Statement of Operations.

Investment management fees: TAM serves as the Portfolio’s investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Consolidated Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.66%
Over $500 million up to $750 million	0.65
Over $750 million up to $1 billion	0.64
Over $1 billion up to $3 billion	0.63
Over $3 billion	0.59

The Subsidiary entered into a separate contract with TAM for the management of the Subsidiary pursuant to which the Subsidiary pays TAM a fee that is the same, as a percentage of net assets, as the management fee of the Portfolio. TAM has contractually agreed to waive a portion of the Portfolio’s management fee in an amount equal to the management fee paid to TAM by the Subsidiary. This management fee waiver, which is reflected in Expense waiver and/or reimbursement within the Consolidated Statement of Operations, may not be discontinued by TAM as long as its contract with the Subsidiary is in place.

For the period ended June 30, 2023, the amount waived is $450,135 for the Subsidiary and is not subject to recapture.

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio’s business, exceed the following stated annual operating expense limits to the Portfolio’s daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Consolidated Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.81%	May 1, 2024
Service Class	1.06	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class’s total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Consolidated Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust’s officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

9. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan (“Distribution Plan”) pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio’s distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio’s shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Consolidated Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc (“SS&C”). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Consolidated Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Consolidated Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

10. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 301,603,568	$ 72,220,181	$ 321,770,186	$ 59,248,672

11. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Consolidated Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

11. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 1,052,777,931	$ 83,748,046	$ (104,951,716)	$ (21,203,670)

12. NEW ACCOUNTING PRONOUNCEMENTS

In June 2022, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

In December 2022, FASB issued Accounting Standards Update No. 2022-06 ("ASU 2022-06"), "Reference Rate Reform (Topic 848)". ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Morgan Stanley Global Allocation VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Morgan Stanley Investment Management Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe and above its composite benchmark, each for the past 3-year period, and below the median for the peer universe and below its composite benchmark, each for the past 1-, 5- and 10-year periods. The Trustees observed that the performance of the Portfolio had improved during the first quarter of 2023. The Board noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on May 1, 2020 pursuant to its current investment objective, investment strategies and benchmark.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica MSCI EAFE Index VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,117.50	$ 0.95	$ 1,023.90	$ 0.90	0.18%
Service Class	1,000.00	1,115.30	2.26	1,022.70	2.16	0.43

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica MSCI EAFE Index VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

3. INVESTMENT VALUATION (continued)

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ —	$ —	$ 13,951	$ —	$ —	$ 13,951
Total	**$ —**	**$ —**	**$ 13,951**	**$ —**	**$ —**	**$ 13,951**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ 39,315	$ —	$ —	$ 39,315
Total	**$ —**	**$ —**	**$ 39,315**	**$ —**	**$ —**	**$ 39,315**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ 22,488	$ —	$ —	$ 22,488
Total	**$ —**	**$ —**	**$ 22,488**	**$ —**	**$ —**	**$ 22,488**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts – long	$ 1,191,688

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

7. RISK FACTORS (continued)

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Index fund risk: While the Portfolio seeks to track the performance of the MSCI EAFE Index (i.e., achieve a high degree of correlation with the index), the Portfolio's return may not match the return of the index. The Portfolio incurs a number of operating expenses not applicable to the index, and incurs costs in buying and selling securities. In addition, the Portfolio may not be fully invested at times, generally as a result of cash flows into or out of the Portfolio or reserves of cash held by the Portfolio to meet redemptions. The Portfolio may attempt to replicate the index return by investing in fewer than all of the securities in the index, or in some securities not included in the index, potentially increasing the risk of divergence between the Portfolio's return and that of the index.

Passive strategy/index risk: The Portfolio is managed with a passive investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the index or of the actual securities comprising the index. This differs from an actively-managed fund, which typically seeks to outperform a benchmark index. As a result, the Portfolio's performance may be less favorable than that of a portfolio managed using an active investment strategy. The structure and composition of the index will affect the performance, volatility, and risk of the index and, consequently, the performance, volatility, and risk of the Portfolio.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM at an annual rate of 0.11% of daily average net assets.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.18%	May 1, 2024
Service Class	0.43	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

For the 36-month period ended June 30, 2023, the balances available for recapture by TAM for the Portfolio are as follows:

	Amounts Available				
	2020 [(A)]	2021	2022	2023	Total
Initial Class	$ 6,575	$ 12,023	$ 24,890	$ 13,445	$ 56,933
Service Class	61,174	105,815	202,553	104,255	473,797

(A) *For the six-month period of July 1, 2020 through December 31, 2020.*

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	**U.S. Government**	**Long-Term**	**U.S. Government**
$ 3,544,570	$ —	$ 2,655,856	$ —

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 66,849,051	$ 12,206,291	$ (5,442,177)	$ 6,764,114

11. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica MSCI EAFE Index VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and SSGA Funds Management, Inc. (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Trustees noted that the objective of the Portfolio, as an index fund, is to track, and not necessarily exceed, its benchmark index, and that unlike the Portfolio, the index is not subject to any expenses or transaction costs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1- and 3-year periods and in line with the median for the past 5-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was below its benchmark for the past 1-, 3- and 5-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Trustees noted that the Portfolio's management fee schedule does not contain breakpoints and determined that, based on all of the information provided, breakpoints were not warranted at this time. The Board also considered the Sub-Adviser's sub-advisory fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica Multi-Managed Balanced VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,115.40	$ 3.36	$ 1,021.60	$ 3.21	0.64%
Service Class	1,000.00	1,113.60	4.66	1,020.40	4.46	0.89

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Non-income producing securities.*
(B) *Percentage rounds to less than 0.1% or (0.1)%.*
(C) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*
(D) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $120,320,084, representing 7.8% of the Portfolio's net assets.*
(E) *Perpetual maturity. The date displayed is the next call date.*
(F) *All or a portion of the securities are on loan. The total value of all securities on loan is $2,035,199, collateralized by cash collateral of $2,077,608. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*
(G) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*
(H) *Rates disclosed reflect the yields at June 30, 2023.*
(I) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*
(J) *Derivative instruments are valued at unrealized appreciation (depreciation).*

PORTFOLIO ABBREVIATIONS:

LIBOR	*London Interbank Offered Rate*
REIT	*Real Estate Investment Trust*
STRIPS	*Separate Trading of Registered Interest and Principal of Securities*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Multi-Managed Balanced VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Cash overdraft: The Portfolio may have cash overdraft balances. A fee is incurred on these overdrafts, calculated by multiplying the overdraft by a rate based on the Federal Funds Rate.

Payables, if any, are reflected as Due to custodian within the Statement of Assets and Liabilities. Expenses, if any, from U.S. cash overdrafts are reflected in Custody fees within the Statement of Operations. Expenses, if any, from foreign cash overdrafts are reflected in Other expenses within the Statement of Operations.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $5,216.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads,

3. INVESTMENT VALUATION (continued)

fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

Municipal government obligations: The fair value of municipal government obligations and variable rate notes is estimated based on models that consider, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the liquidity of the bond, state of issuance, benchmark yield curves, and bond or note insurance. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Commercial paper: Commercial paper is valued using amortized cost, which approximates fair value. The values are generally categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Short-term notes: The Portfolio normally values short-term government and U.S. government agency securities using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued by principally using dealer quotations. Short-term government and U.S. government agency securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

Treasury inflation-protected securities ("TIPS"): The Portfolio may invest in TIPS, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds and notes. For bonds and notes that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2023, if any, are included within the Schedule of Investments. The adjustments, if any, to principal due to inflation/deflation are reflected as increases/decreases to Interest income within the Statement of Operations, with a corresponding adjustment to Investments, at cost within the Statement of Assets and Liabilities.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Corporate Debt Securities	$ 1,589,733	$ —	$ —	$ —	$ 1,589,733
Foreign Government Obligations	487,875	—	—	—	487,875
Total Securities Lending Transactions	$ 2,077,608	$ —	$ —	$ —	$ 2,077,608
Total Borrowings	**$ 2,077,608**	**$ —**	**$ —**	**$ —**	**$ 2,077,608**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A) (B)]	$ —	$ —	$ 206,503	$ —	$ —	$ 206,503
Total	**$ —**	**$ —**	**$ 206,503**	**$ —**	**$ —**	**$ 206,503**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ 928,820	$ —	$ —	$ 928,820
Total	**$ —**	**$ —**	**$ 928,820**	**$ —**	**$ —**	**$ 928,820**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ 269,698	$ —	$ —	$ 269,698
Total	**$ —**	**$ —**	**$ 269,698**	**$ —**	**$ —**	**$ 269,698**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts — long	$ 9,545,900

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset class allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset class allocation and reallocation from time to time. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the Investment Manager's judgment about the attractiveness, value or market trends affecting a particular asset class is incorrect. The Portfolio's balance between equity and debt securities limits its potential for capital appreciation relative to an all-stock fund and contributes to greater volatility relative to an all-bond fund.

Equity securities risk: Equity securities generally have greater risk of loss than debt securities. Stock markets are volatile and the value of equity securities may go up or down, sometimes rapidly and unpredictably. The value of equity securities fluctuates based on real or perceived changes in a company's financial condition, factors affecting a particular industry or industries, and overall market, economic and political conditions. If the market prices of the equity securities owned by the Portfolio fall, the value of your investment in the Portfolio will decline. The Portfolio may lose its entire investment in the equity securities of an issuer. A change in financial condition or other event affecting a single issuer may adversely impact securities markets as a whole.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or

7. RISK FACTORS (continued)

erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

TAM has entered into a sub-advisory agreement with Aegon USA Investment Management, LLC ("AUIM"), an affiliate of TAM. AUIM provides day-to-day portfolio management services to the Portfolio, subject to the supervision of TAM. TAM is responsible for compensating the sub-adviser for its services.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, AUIM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.61%
Over $500 million up to $1 billion	0.59
Over $1 billion up to $1.5 billion	0.56
Over $1.5 billion up to $2 billion	0.55
Over $2 billion up to $5 billion	0.52
Over $5 billion	0.50

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.75%	May 1, 2024
Service Class	1.00	May 1, 2024

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 181,573,762	$ 72,692,289	$ 259,695,623	$ 63,567,517

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 1,412,655,130	$ 284,627,832	$ (65,816,801)	$ 218,811,031

11. NEW ACCOUNTING PRONOUNCEMENTS

In June 2022, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

In December 2022, FASB issued Accounting Standards Update No. 2022-06 (“ASU 2022-06”), “Reference Rate Reform (Topic 848)”. ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica Multi-Managed Balanced VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreements (each a "Sub-Advisory Agreement," collectively the "Sub-Advisory Agreements" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and each of Aegon USA Investment Management, LLC ("AUIM") and J.P. Morgan Investment Management, Inc. ("J.P. Morgan") (each a "Sub-Adviser" and collectively the "Sub-Advisers").

Following its review and consideration, the Board determined that the terms of the Management Agreement and each Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and each Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and each Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and each Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by each Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or any Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and each Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and each Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of each Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for each Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and each Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 3-, 5- and 10-year periods and below the median for the past 1-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was above its primary benchmark for the past 1-year period and below its primary benchmark for the past 3-, 5- and 10-year periods. The Board noted that J.P. Morgan had commenced sub-advising the equity sleeve of the Portfolio on March 21, 2011 pursuant to its current equity investment strategies. The Board noted that AUIM had commenced sub-advising the fixed-income sleeve of the Portfolio on May 1, 2014 pursuant to its current fixed-income investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Advisers for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fees and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was above the median for its peer group and in line with the median for its peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the median for its peer group and in line with the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Advisers under the Management Agreement and each Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AND SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to J.P. Morgan, the Board noted that the sub-advisory fee is the product of arm’s-length negotiation between TAM and J.P. Morgan, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, for J.P. Morgan, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio. With respect to AUIM, the Board noted that information about AUIM’s revenues and expenses was incorporated into the profitability analysis for TAM and its affiliates with respect to the Portfolio. As a result, the Board focused on profitability information for TAM and its affiliates and AUIM in the aggregate.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio’s assets increase, any economies of scale realized by TAM or a Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio’s management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered each Sub-Adviser’s sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio’s management fee schedule. The Board considered that each Sub-Adviser’s sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio’s fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fees paid to the Sub-Advisers in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Advisers from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Advisers from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as “soft dollars”) as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by J.P. Morgan is generally appropriate and in the best interests of the Portfolio. The Board also noted that J.P. Morgan participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements J.P. Morgan may engage in with respect to the Portfolio’s brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Advisers. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and each Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses [(A)]		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period [(B)]**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period [(B)]**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,064.00	$ 4.45	$ 1,020.50	$ 4.36	0.87%
Service Class	1,000.00	1,061.90	5.73	1,019.20	5.61	1.12

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

(B) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $48,011,846, representing 12.8% of the Portfolio's net assets.*

(C) *Securities are exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Securities may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At June 30, 2023, the total value of Regulation S securities is $1,694,497, representing 0.5% of the Portfolio's net assets.*

(D) *Step bonds. Coupon rates change in increments to maturity. The rates disclosed are as of June 30, 2023; the maturity dates disclosed are the ultimate maturity dates.*

(E) *Perpetual maturity. The date displayed is the next call date.*

(F) *All or a portion of the securities are on loan. The total value of all securities on loan is $608,533, collateralized by cash collateral of $621,191. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(G) *Percentage rounds to less than 0.1% or (0.1)%.*

(H) *Fixed rate loan commitment at June 30, 2023.*

(I) *Fair valued as determined in good faith in accordance with procedures established by the Board. At June 30, 2023, the total value of securities is $1,246,394, representing 0.3% of the Portfolio's net assets.*

(J) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*

(K) *Securities are subject to sale-buyback transactions. The average amount of sale-buybacks outstanding during the period ended June 30, 2023 was $0 at a weighted average interest rate of 0.00%.*

(L) *All or a portion of the security has been segregated by the custodian as collateral to cover margin requirements for open futures contracts. The value of the security is $304,582.*

(M) *Rates disclosed reflect the yields at June 30, 2023.*

(N) *If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (a) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced obligation or (b) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap agreement less the recovery value of the referenced obligation or underlying securities comprising the referenced obligation.*

(O) *The maximum potential amount the Portfolio could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.*

(P) *The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative had the notional amount of the swap agreement been closed/sold as of the period ended. Increasing market values, in absolute terms when compared to the notional amount of the swap agreement, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.*

(Q) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

(R) *Derivative instruments are valued at unrealized appreciation (depreciation).*

Transamerica PIMCO Tactical – Balanced VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica PIMCO Tactical - Balanced VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Cash overdraft: The Portfolio may have cash overdraft balances. A fee is incurred on these overdrafts, calculated by multiplying the overdraft by a rate based on the Federal Funds Rate.

Payables, if any, are reflected as Due to custodian within the Statement of Assets and Liabilities. Expenses, if any, from U.S. cash overdrafts are reflected in Custody fees within the Statement of Operations. Expenses, if any, from foreign cash overdrafts are reflected in Other expenses within the Statement of Operations.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Loan assignments: Loan assignments are normally valued using an income approach, which projects future cash flows and converts those future cash flows to a present value using a discount rate. The resulting present value reflects the likely fair value of the loan. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise are categorized in Level 3.

3. INVESTMENT VALUATION (continued)

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

Municipal government obligations: The fair value of municipal government obligations and variable rate notes is estimated based on models that consider, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the liquidity of the bond, state of issuance, benchmark yield curves, and bond or note insurance. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Loan participations and assignments: The Portfolio may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers, either in the form of participations at the time the loan is originated ("Participations") or buying an interest in the loan in the secondary market from a financial institution or institutional investor ("Assignments"). Participations and Assignments in commercial loans may be secured or unsecured. These investments may include standby financing commitments, including revolving credit facilities that obligate the Portfolio to supply additional cash to the borrowers on demand. Loan Participations and Assignments involve risks of insolvency of the lending banks or other financial intermediaries. As such, the Portfolio assumes the credit risks associated with the corporate borrowers and may assume the credit risks associated with the interposed banks or other financial intermediaries.

The Portfolio, based on its ability to invest in Loan Participations and Assignments, may be contractually obligated to receive approval from the agent banks and/or borrowers prior to the sale of these investments. The Portfolio that participates in such syndications, or that can buy a portion of the loans, become part lenders. Loans are often administered by agent banks acting as agents for all holders.

The agent banks administer the terms of the loans, as specified in the loan agreements. In addition, the agent banks are normally responsible for the collection of principal and interest payments from the corporate borrowers and the apportionment of these payments

4. SECURITIES AND OTHER INVESTMENTS (continued)

to the credit of all institutions that are parties to the loan agreements. Unless the Portfolio has direct recourse against the corporate borrowers under the terms of the loans or other indebtedness, the Portfolio may have to rely on the agent banks or other financial intermediaries to apply appropriate credit remedies against corporate borrowers.

The Portfolio held no unfunded loan participations at June 30, 2023. Open funded loan participations and assignments at June 30, 2023, if any, are included within the Schedule of Investments.

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

Treasury inflation-protected securities ("TIPS"): The Portfolio may invest in TIPS, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds and notes. For bonds and notes that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2023, if any, are included within the Schedule of Investments. The adjustments, if any, to principal due to inflation/deflation are reflected as increases/decreases to Interest income within the Statement of Operations, with a corresponding adjustment to Investments, at cost within the Statement of Assets and Liabilities.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received

4. SECURITIES AND OTHER INVESTMENTS (continued)

from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Sale-buyback: The Portfolio may enter into sale-buyback financing transactions. The Portfolio accounts for sale-buyback financing transactions as borrowing transactions and realize gains and losses on these transactions at the end of the roll period. Sale-buyback financing transactions involve sales by the Portfolio of securities and simultaneously contracts to repurchase the same or substantially similar securities at an agreed upon price and date.

The Portfolio forgoes principal and interest paid during the roll period on the securities sold in a sale-buyback financing transaction. The Portfolio is compensated by the difference between the current sales price and the price for the future purchase (often referred to as the “price drop”), as well as by any interest earned on the proceeds of the securities sold. Sale-buyback financing transactions may be renewed with a new sale and a repurchase price and a cash settlement made at each renewal without physical delivery of the securities subject to the contract. Sale-buyback financing transactions expose the Portfolio to risks such as, the buyer under the agreement may file for bankruptcy, become insolvent, or otherwise default on its obligations to the Portfolio, the market value of the securities the

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Portfolio is obligated to repurchase under the agreement may decline below the repurchase price. The Portfolio's obligations under a sale-buyback typically would be offset by liquid assets equal in value to the amount of the Portfolio's forward commitment to repurchase the subject security. Sale-buyback financing transactions accounted for as borrowing transactions are excluded from the Portfolio's portfolio turnover rates. The Portfolio recognizes price drop fee income on a straight line basis over the period of the roll. For the period ended June 30, 2023, the Portfolio earned price drop fee income of $0. The price drop fee income is included in Interest income within the Statement of Operations.

The outstanding payable for securities to be repurchased, if any, is included in Payable for sale-buyback financing transactions within the Statement of Assets and Liabilities. The interest expense is included within Interest income on the Statement of Operations. In periods of increased demand of the security, the Portfolio may receive a fee for use of the security by the counterparty, which may result in interest income to the Portfolio, and is included in Interest income on the Statement of Operations.

Open sale-buyback financing transactions at June 30, 2023, if any, are identified within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust - Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Corporate Debt Securities	$ 621,191	$ —	$ —	$ —	$621,191
Total Borrowings	**$ 621,191**	**$ —**	**$ —**	**$ —**	**$621,191**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Option contracts: The Portfolio is subject to equity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio may enter into option contracts to manage exposure to various market fluctuations. The Portfolio may purchase or write call and put options on securities and derivative instruments in which the Portfolio owns or may invest. Options are valued at the average of the bid and ask price established each day at the close of the board of trade or exchange on which they are traded. Options are marked-to-market daily to reflect the current value of the option. The primary risks associated with options are an imperfect correlation between the change in value of the securities held and the prices of the option contracts, the possibility of an illiquid market, and an inability of the counterparty to meet the contract terms. Options can be traded through an exchange or through privately negotiated arrangements with a dealer in an OTC transaction. Options traded on an exchange are generally cleared through a clearinghouse such as the Options Clearing Corp.

Options on exchange-traded funds and/or securities: The Portfolio may purchase or write options on ETFs and/or securities. Purchasing or writing options on ETFs and/or securities gives the Portfolio the right, but not the obligation to buy or sell a specified ETF and/or security as an underlying instrument for the option contract.

Options on indices: The Portfolio may purchase or write options on indices. Purchasing or writing an option on indices gives the Portfolio the right, but not the obligation to buy or sell the cash from the underlying index. The exercise of the option will result in a cash transfer and gain or loss depends on the change in the underlying index.

Options on futures: The Portfolio may purchase or write options on futures. Purchasing or writing options on futures gives the Portfolio the right, but not obligation to buy or sell a position on a futures contract at the specified option exercise price at any time during the period of the option.

Interest rate-capped options: The Portfolio may purchase or write interest rate-capped options. Purchasing or writing interest rate-capped options gives the Portfolio the right, but not the obligation to buy or sell an option which applies a cap to protect the Portfolio from floating rate risk above a certain rate on a given notional exposure. A floor can be used to give downside protection to investments in interest rate-linked products.

Interest rate swaptions: The Portfolio may purchase or write interest rate swaption agreements which are options to enter into a pre-defined swap agreement by some specific date in the future. The writer of the swaption becomes the counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed-rate receiver or a fixed-rate payer upon exercise.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Purchased options: Purchasing call options tends to increase exposure to the underlying instrument. Purchasing put options tends to decrease exposure to the underlying instrument. The Portfolio pays premiums, which are included within the Statement of Assets and Liabilities as an investment and subsequently marked-to-market to reflect the current value of the option. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid from options which expire are treated as realized losses. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying instrument to determine the realized gain or loss.

Written options: Writing call options tends to decrease exposure to the underlying instrument. Writing put options tends to increase exposure to the underlying instrument. When the Portfolio writes a covered call or put option, the premium received is recorded as a liability within the Statement of Assets and Liabilities and is subsequently marked-to-market to reflect the current market value of the option written. Premiums received from written options which expire unexercised are treated as realized gains. Premiums received from writing options which are exercised or closed are added to the proceeds or offset against amounts paid on the underlying instrument to determine the realized gain or loss. In writing an option, the Portfolio bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Portfolio could result in the Portfolio selling or buying a security or currency at a price different from the current market value.

Open option contracts at June 30, 2023, if any, are included within the Schedule of Investments. The value of purchased option contracts, as applicable, is shown in Investments, at value within the Statement of Assets and Liabilities. The value of written option contracts, as applicable, is shown in Written options and swaptions, at value within the Statement of Assets and Liabilities.

Swap agreements: Swap agreements are bilaterally negotiated agreements between the Portfolio and a counterparty to exchange or swap investments, cash flows, assets, foreign currencies, or market-linked returns at specified, future intervals. Swap agreements can be executed in a bilateral privately negotiated arrangement with a dealer in an OTC transaction or executed on a regular market. Certain swaps regardless of the venue of execution are required to be cleared through a clearinghouse (“centrally cleared swap agreements”). Centrally cleared swap agreements listed or traded on a multilateral platform, are valued at the daily settlement price determined by the corresponding exchange. For centrally cleared credit default swap agreements the clearing exchange requires all members to provide applicable levels across complete term levels. Centrally cleared interest rate swap agreements are valued using a pricing model that references the underlying rates including but not limited to the overnight index swap rate and London Interbank Offered Rate (“LIBOR”) forward rate to calculate the daily settlement price. The Portfolio may enter into credit default, cross-currency, interest rate, total return, including contracts for difference (“CFD”), and other forms of swap agreements to manage exposure to credit, currency, interest rate, and commodity risks. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Centrally cleared swap agreements are marked-to-market daily based upon values from third party vendors, which may include a registered exchange, or quotations from market makers to the extent available and the change in value, if any, is recorded as Variation margin receivable (payable) on centrally cleared swap agreements within the Statement of Assets and Liabilities.

For OTC swap agreements, payments received or made at the beginning of the measurement period are reflected in OTC swap agreements, at value within the Statement of Assets and Liabilities and represent payments made or received upon entering into the swap agreements to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Additionally, these upfront payments as well as any periodic payments received or paid by the Portfolio, including any liquidation payment received or made at the termination of the swap are recorded as part of Net realized gain (loss) on swap agreements within the Statement of Operations.

Credit default swap agreements: The Portfolio is subject to credit risk in the normal course of pursuing its investment objective. The Portfolio enters into credit default swap agreements to manage its exposure to the market or certain sectors of the market to reduce its risk exposure to defaults of corporate and sovereign issuers, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. Credit default swap agreements involve the exchange of a fixed rate premium for protection against the loss in value of an underlying security in the event of a defined credit event, such as payment default or bankruptcy (buy protection).

Under a credit default swap agreement, one party acts as a guarantor by receiving the fixed periodic payment in exchange for the commitment to purchase the underlying security at par if the defined credit event occurs (sell protection). The Portfolio’s maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the notional amount of the contract. This risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty, and by the posting of collateral.

The Portfolio sells credit default swap agreements, which exposes it to risk of loss from credit risk related events specified in the contracts. Although contract-specific, credit events are generally defined as bankruptcy, failure to pay, restructuring, obligation

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

acceleration, obligation default, or repudiation/moratorium. If a defined credit event had occurred during the period, the swap agreements' credit-risk-related contingent features would have been triggered, and the Portfolio would have been required to pay the notional amounts for the credit default swap agreements with a sell protection less the value of the contracts' related reference obligations.

Interest rate swap agreements: The Portfolio is subject to interest rate risk exposure in the normal course of pursuing its investment objective. Because the Portfolio holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk, the Portfolio enters into interest rate swap agreements. Under an interest rate swap agreement, two parties will exchange cash flows based on a notional principal amount. A Portfolio with interest rate agreements can elect to pay a fixed rate and receive a floating rate, or receive a fixed rate and pay a floating rate, on a notional principal amount. The risks of interest rate swap agreements include changes in market conditions which will affect the value of the contract or the cash flows, and the possible inability of the counterparty to fulfill its obligations under the agreement. The Portfolio's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparties over the contracts' remaining lives, to the extent that amount is positive. This risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty, and by the posting of collateral.

Open centrally cleared swap agreements and open OTC swap agreements at June 30, 2023, if any, are listed within the Schedule of Investments.

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

Forward foreign currency contracts: The Portfolio is subject to foreign exchange rate risk exposure in the normal course of pursuing its investment objective. The Portfolio may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Forward foreign currency contracts are marked-to-market daily, with the change in value recorded as an unrealized gain or loss and is shown in Unrealized appreciation (depreciation) on forward foreign currency contracts within the Statement of Assets and Liabilities. When the contracts are settled, a realized gain or loss is incurred and is shown in Net realized gain (loss) on forward foreign currency contracts within the Statement of Operations. Risks may arise from changes in market value of the underlying currencies and from the possible inability of counterparties to meet the terms of their contracts. Forward foreign currency contracts are traded in the OTC inter-bank currency dealer market.

Open forward foreign currency contracts at June 30, 2023, if any, are listed within the Schedule of Investments.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Purchased options and swaptions:						
Investments, at value [A]	$ —	$ —	$ 3,174,600	$ —	$ —	$ 3,174,600
Centrally cleared swaps:						
Total distributable earnings (accumulated losses) [A] [B]	1,939,196	—	—	—	—	1,939,196
Futures contracts:						
Total distributable earnings (accumulated losses) [A] [C]	348,157	—	4,862,130	—	—	5,210,287
Forward foreign currency contracts:						
Unrealized appreciation on forward foreign currency contracts	—	15,621	—	—	—	15,621
Total	**$ 2,287,353**	**$ 15,621**	**$ 8,036,730**	**$ —**	**$ —**	**$ 10,339,704**

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Written options and swaptions:						
Written options and swaptions, at value [A]	$ (5,353)	$ —	$ —	$ —	$ —	$ (5,353)
Centrally cleared swaps:						
Total distributable earnings (accumulated losses) [A] [B]	(240,084)	—	—	(25,342)	—	(265,426)
Futures contracts:						
Total distributable earnings (accumulated losses) [A] [C]	(381,313)	—	—	—	—	(381,313)
Forward foreign currency contracts:						
Unrealized depreciation on forward foreign currency contracts	—	(232,847)	—	—	—	(232,847)

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within Value of centrally cleared swap agreements as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*
(C) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Purchased options and swaptions (A)	$ —	$ —	$(3,980,846)	$ —	$ —	$ (3,980,846)
Written options and swaptions	66,517	—	—	—	—	66,517
Swap agreements	186,510	—	—	(410,507)	—	(223,997)
Futures contracts	(101,796)	—	8,696,714	—	—	8,594,918
Forward foreign currency contracts	—	(231,661)	—	—	—	(231,661)
Total	**$ 151,231**	**$ (231,661)**	**$ 4,715,868**	**$ (410,507)**	**$ —**	**$ 4,224,931**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Purchased options and swaptions (B)	$ —	$ —	$ (40,838)	$ —	$ —	$ (40,838)
Written options and swaptions	(4,651)	—	—	—	—	(4,651)
Swap agreements	(151,676)	—	—	271,046	—	119,370
Futures contracts	104,798	—	10,535,921	—	—	10,640,719
Forward foreign currency contracts	—	(128,284)	—	—	—	(128,284)
Total	**$ (51,529)**	**$ (128,284)**	**$ 10,495,083**	**$ 271,046**	**$ —**	**$ 10,586,316**

(A) *Included within Net realized gain (loss) on Investments in the Statement of Operations.*
(B) *Included within Net change in unrealized appreciation (depreciation) on Investments in the Statement of Operations.*

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Options:	
Average value of option contracts purchased	$ 2,372,962
Average value of option contracts written	(2,693)
Average notional value of swaption contracts written	(3,070,589)
Credit default swaps:	
Average notional value – buy protection	7,771,429
Average notional value – sell protection	844,000
Interest rate swaps:	
Average notional value – pays fixed rate	11,428,571
Average notional value – receives fixed rate	5,279,358
Futures contracts:	
Average notional value of contracts – long	223,183,021
Average notional value of contracts – short	(34,207,186)
Forward foreign currency exchange contracts:	
Average contract amounts purchased – in USD	6,421,056
Average contract amounts sold – in USD	9,401,239

The Portfolio typically enters into International Swaps and Derivatives Association, Inc. Master Agreements (“ISDA Master Agreements”) or similar master agreements (collectively, “Master Agreements”) with its contract counterparties for certain OTC derivatives in order to, among other things, reduce credit risk to counterparties.

ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Portfolio typically may offset with the counterparty certain OTC derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default, termination and/or potential deterioration in the credit quality of the counterparty.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Various Master Agreements govern the terms of certain transactions with counterparties and typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Portfolio and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party and may be a feature in certain Master Agreements. In the event the Portfolio exercises its right to terminate a Master Agreement after a counterparty experiences a termination event as defined in the Master Agreement, the return of collateral with market value in excess of the Portfolio's net liability may be delayed or denied.

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

The following is a summary of the Portfolio OTC derivative assets and liabilities by counterparty net of amounts available for offset under a master netting agreement and net of the related collateral received/pledged by the Portfolio as of June 30, 2023. For financial reporting purposes, the Portfolio does not offset assets and liabilities that are subject to a master netting agreement or similar arrangement on the Statement of Assets and Liabilities. See the Repurchase agreement section within the notes for offsetting and collateral information pertaining to repurchase agreements that are subject to master netting agreements.

	Assets				Liabilities			
Counterparty	Gross Amounts of Assets Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Received (B)	Net Receivable	Gross Amounts of Liabilities Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Pledged (B)	Net Payable
Bank of America, N.A.	$ 179	$ (179)	$ —	$ —	$ 2,895	$ (179)	$ —	$ 2,716
BNP Paribas	8,471	(8,471)	—	—	42,046	(8,471)	—	33,575
Citibank, N.A.	—	—	—	—	50	—	—	50
Goldman Sachs Bank	—	—	—	—	1,926	—	—	1,926
HSBC Bank USA	—	—	—	—	43,603	—	—	43,603
JPMorgan Chase Bank, N.A.	6,971	(6,971)	—	—	145,127	(6,971)	—	138,156
Morgan Stanley & Co.	3,174,600	(2,553)	—	3,172,047	2,553	(2,553)	—	—
Other Derivatives (C)	7,149,483	—	—	7,149,483	646,739	—	—	646,739
Total	**$ 10,339,704**	**$ (18,174)**	**$ —**	**$ 10,321,530**	**$ 884,939**	**$ (18,174)**	**$ —**	**$ 866,765**

(A) *Absent an event of default or early termination, OTC derivative assets and liabilities are presented gross and not offset within the Statement of Assets and Liabilities.*

(B) *In some instances, the actual collateral received and/or pledged may be more than the amount shown due to overcollateralization.*

(C) *Other Derivatives, which includes future contracts, exchange-traded options, exchange-traded swap agreements and occasionally forward positions, that are not subject to a master netting arrangement or another similar arrangement. The amount presented is intended to permit reconciliation to the amount presented within the Schedule of Investments.*

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset class allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset class allocation and reallocation from time to time. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy or other issuer is incorrect.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

Model and data risk: If quantitative models, algorithms or calculations (whether proprietary and developed by the sub-adviser or supplied by third parties) ("Models") or information or data supplied by third parties ("Data") prove to be incorrect or incomplete, any decisions made, in whole or part, in reliance thereon expose the Portfolio to additional risks. Models can be predictive in nature. The use of predictive Models has inherent risks. The success of relying on or otherwise using Models depends on a number of factors, including the validity, accuracy and completeness of the Model's development, implementation and maintenance, the Model's assumptions, factors, algorithms and methodologies, and the accuracy and reliability of the supplied historical or other Data. Models rely on, among other things, correct and complete Data inputs. If incorrect Data is entered into even a well-founded Model, the resulting information will be incorrect. However, even if Data is input correctly, Model prices may differ substantially from market prices, especially for securities with complex characteristics. Investments selected with the use of Models may perform differently than expected as a result of the design of the Model, inputs into the Model or other factors. There also can be no assurance that the use of Models will result in effective investment decisions for the Portfolio.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company (“TLIC”), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio’s investment manager, is directly owned by TLIC and AUSA Holding, LLC (“AUSA”), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation (“Commonwealth”). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. (“TFS”) is the Portfolio’s transfer agent. Transamerica Capital, Inc. (“TCI”) is the Portfolio’s distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio’s investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $250 million	0.81%
Over $250 million up to $750 million	0.80
Over $750 million up to $1.5 billion	0.79
Over $1.5 billion	0.76

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio’s business, exceed the following stated annual operating expense limits to the Portfolio’s daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.91%	May 1, 2024
Service Class	1.16	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class’s total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust’s officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 24,484,386	$ 12,758,360	$ 25,569,021	$ 5,514,940

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 558,170,299	$ 8,393,978	$ (25,647,658)	$ (17,253,680)

11. NEW ACCOUNTING PRONOUNCEMENT

In December 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-06 (“ASU 2022-06”), “Reference Rate Reform (Topic 848)”. ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica PIMCO Tactical – Balanced VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Pacific Investment Management Company LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its composite benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Trustees discussed the reasons for the underperformance with TAM and TAM agreed to continue to closely monitor and report to the Board on the performance of the Portfolio.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio). The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,042.90	$ 4.46	$ 1,020.40	$ 4.41	0.88%
Service Class	1,000.00	1,041.20	5.72	1,019.20	5.66	1.13

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

FOOTNOTES TO SCHEDULE OF INVESTMENTS (continued):

(B) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $31,664,590, representing 16.5% of the Portfolio's net assets.*

(C) *Securities are exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Securities may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At June 30, 2023, the total value of Regulation S securities is $722,813, representing 0.4% of the Portfolio's net assets.*

(D) *Step bonds. Coupon rates change in increments to maturity. The rates disclosed are as of June 30, 2023; the maturity dates disclosed are the ultimate maturity dates.*

(E) *Perpetual maturity. The date displayed is the next call date.*

(F) *All or a portion of the securities are on loan. The total value of all securities on loan is $891,458, collateralized by cash collateral of $909,862. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(G) *Restricted security. At June 30, 2023, the value of such security held by the Portfolio is as follows:*

Investments	Description	Acquisition Date	Acquisition Cost	Value	Value as Percentage of Net Assets
Corporate Debt Securities	Deutsche Bank AG 2.13%, 11/24/2026	11/17/2020	$ 200,000	$ 177,906	0.1%

(H) *Percentage rounds to less than 0.1% or (0.1)%.*

(I) *Fixed rate loan commitment at June 30, 2023.*

(J) *Fair valued as determined in good faith in accordance with procedures established by the Board. At June 30, 2023, the total value of securities is $703,613, representing 0.4% of the Portfolio's net assets.*

(K) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*

(L) *Securities are subject to sale-buyback transactions. The average amount of sale-buybacks outstanding during the period ended June 30, 2023 was $0 at a weighted average interest rate of 0.00%.*

(M) *Rates disclosed reflect the yields at June 30, 2023.*

(N) *All or a portion of the security has been segregated by the custodian as collateral for open TBA commitment transactions. The value of the security is $262,024.*

(O) *If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (a) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced obligation or (b) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap agreement less the recovery value of the referenced obligation or underlying securities comprising the referenced obligation.*

(P) *Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate issues or sovereign issues of an emerging country as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood of risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as "Defaulted" indicates a credit event has occurred for the referenced entity or obligation.*

(Q) *The maximum potential amount the Portfolio could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.*

(R) *The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative had the notional amount of the swap agreement been closed/sold as of the period ended. Increasing market values, in absolute terms when compared to the notional amount of the swap agreement, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.*

(S) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*

(T) *Derivative instruments are valued at unrealized appreciation (depreciation).*

(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica PIMCO Tactical – Conservative VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

NOTES TO FINANCIAL STATEMENTS (continued)

(unaudited)

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Loan assignments: Loan assignments are normally valued using an income approach, which projects future cash flows and converts those future cash flows to a present value using a discount rate. The resulting present value reflects the likely fair value of the loan. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise are categorized in Level 3.

3. INVESTMENT VALUATION (continued)

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

Municipal government obligations: The fair value of municipal government obligations and variable rate notes is estimated based on models that consider, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the liquidity of the bond, state of issuance, benchmark yield curves, and bond or note insurance. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Short-term notes: The Portfolio normally values short-term government and U.S. government agency securities using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued by principally using dealer quotations. Short-term government and U.S. government agency securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Restricted securities: Restricted securities for which quotations are not readily available are valued at fair value. Restricted securities issued by publicly traded companies are generally valued at a discount to similar publicly traded securities. Restricted securities issued by nonpublic entities may be valued by reference to comparable public entities and/or fundamental data relating to the issuer. Depending on the relative significance of observable valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Loan participations and assignments: The Portfolio may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers, either in the form of participations at the time the loan is originated ("Participations") or buying an interest in the loan in the secondary market from a financial institution or institutional investor ("Assignments"). Participations and Assignments in commercial loans may be secured or unsecured. These investments may include

4. SECURITIES AND OTHER INVESTMENTS (continued)

standby financing commitments, including revolving credit facilities that obligate the Portfolio to supply additional cash to the borrowers on demand. Loan Participations and Assignments involve risks of insolvency of the lending banks or other financial intermediaries. As such, the Portfolio assumes the credit risks associated with the corporate borrowers and may assume the credit risks associated with the interposed banks or other financial intermediaries.

The Portfolio, based on its ability to invest in Loan Participations and Assignments, may be contractually obligated to receive approval from the agent banks and/or borrowers prior to the sale of these investments. The Portfolio that participates in such syndications, or that can buy a portion of the loans, become part lenders. Loans are often administered by agent banks acting as agents for all holders.

The agent banks administer the terms of the loans, as specified in the loan agreements. In addition, the agent banks are normally responsible for the collection of principal and interest payments from the corporate borrowers and the apportionment of these payments to the credit of all institutions that are parties to the loan agreements. Unless the Portfolio has direct recourse against the corporate borrowers under the terms of the loans or other indebtedness, the Portfolio may have to rely on the agent banks or other financial intermediaries to apply appropriate credit remedies against corporate borrowers.

The Portfolio held no unfunded loan participations at June 30, 2023. Open funded loan participations and assignments at June 30, 2023, if any, are included within the Schedule of Investments.

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

Restricted securities: The Portfolio may invest in unregulated restricted securities. Restricted securities are subject to legal or contractual restrictions on resale. Restricted securities generally may be resold in transactions exempt from registration under the Securities Act of 1933.

Restricted securities held at June 30, 2023, if any, are identified within the Schedule of Investments.

Treasury inflation-protected securities ("TIPS"): The Portfolio may invest in TIPS, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds and notes. For bonds and notes that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2023, if any, are included within the Schedule of Investments. The adjustments, if any, to principal due to inflation/deflation are reflected as increases/decreases to Interest income within the Statement of Operations, with a corresponding adjustment to Investments, at cost within the Statement of Assets and Liabilities.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

4. SECURITIES AND OTHER INVESTMENTS (continued)

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio’s other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the

Transamerica PIMCO Tactical – Conservative VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Sale-buyback: The Portfolio may enter into sale-buyback financing transactions. The Portfolio accounts for sale-buyback financing transactions as borrowing transactions and realize gains and losses on these transactions at the end of the roll period. Sale-buyback financing transactions involve sales by the Portfolio of securities and simultaneously contracts to repurchase the same or substantially similar securities at an agreed upon price and date.

The Portfolio forgoes principal and interest paid during the roll period on the securities sold in a sale-buyback financing transaction. The Portfolio is compensated by the difference between the current sales price and the price for the future purchase (often referred to as the "price drop"), as well as by any interest earned on the proceeds of the securities sold. Sale-buyback financing transactions may be renewed with a new sale and a repurchase price and a cash settlement made at each renewal without physical delivery of the securities subject to the contract. Sale-buyback financing transactions expose the Portfolio to risks such as, the buyer under the agreement may file for bankruptcy, become insolvent, or otherwise default on its obligations to the Portfolio, the market value of the securities the Portfolio is obligated to repurchase under the agreement may decline below the repurchase price. The Portfolio's obligations under a sale-buyback typically would be offset by liquid assets equal in value to the amount of the Portfolio's forward commitment to repurchase the subject security. Sale-buyback financing transactions accounted for as borrowing transactions are excluded from the Portfolio's portfolio turnover rates. The Portfolio recognizes price drop fee income on a straight line basis over the period of the roll. For the period ended June 30, 2023, the Portfolio earned price drop fee income of $0. The price drop fee income is included in Interest income within the Statement of Operations.

The outstanding payable for securities to be repurchased, if any, is included in Payable for sale-buyback financing transactions within the Statement of Assets and Liabilities. The interest expense is included within Interest income on the Statement of Operations. In periods of increased demand of the security, the Portfolio may receive a fee for use of the security by the counterparty, which may result in interest income to the Portfolio, and is included in Interest income on the Statement of Operations.

Open sale-buyback financing transactions at June 30, 2023, if any, are identified within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Corporate Debt Securities	$ 909,862	$ —	$ —	$ —	$ 909,862
Total Borrowings	**$ 909,862**	**$ —**	**$ —**	**$ —**	**$ 909,862**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Option contracts: The Portfolio is subject to equity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio may enter into option contracts to manage exposure to various market fluctuations. The Portfolio may purchase or write call and put options on securities and derivative instruments in which the Portfolio owns or may invest. Options are valued at the average of the bid and ask price established each day at the close of the board of trade or exchange on which they are traded. Options are marked-to-market daily to reflect the current value of the option. The primary risks associated with options are an imperfect correlation between the change in value of the securities held and the prices of the option contracts, the possibility of an illiquid market, and an inability of the counterparty to meet the contract terms. Options can be traded through an exchange or through privately negotiated arrangements with a dealer in an OTC transaction. Options traded on an exchange are generally cleared through a clearinghouse such as the Options Clearing Corp.

Options on exchange-traded funds and/or securities: The Portfolio may purchase or write options on ETFs and/or securities. Purchasing or writing options on ETFs and/or securities gives the Portfolio the right, but not the obligation to buy or sell a specified ETF and/or security as an underlying instrument for the option contract.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Options on indices: The Portfolio may purchase or write options on indices. Purchasing or writing an option on indices gives the Portfolio the right, but not the obligation to buy or sell the cash from the underlying index. The exercise of the option will result in a cash transfer and gain or loss depends on the change in the underlying index.

Options on futures: The Portfolio may purchase or write options on futures. Purchasing or writing options on futures gives the Portfolio the right, but not obligation to buy or sell a position on a futures contract at the specified option exercise price at any time during the period of the option.

Interest rate-capped options: The Portfolio may purchase or write interest rate-capped options. Purchasing or writing interest rate-capped options gives the Portfolio the right, but not the obligation to buy or sell an option which applies a cap to protect the Portfolio from floating rate risk above a certain rate on a given notional exposure. A floor can be used to give downside protection to investments in interest rate-linked products.

Credit default swaptions: The Portfolio may purchase or write credit default swaption agreements which are options to enter into a pre-defined swap agreement by some specific date in the future. Purchasing or writing credit default swaptions gives the Portfolio the right, but not the obligation to buy or sell credit protection on a specific reference with a specific maturity.

Interest rate swaptions: The Portfolio may purchase or write interest rate swaption agreements which are options to enter into a pre-defined swap agreement by some specific date in the future. The writer of the swaption becomes the counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed-rate receiver or a fixed-rate payer upon exercise.

Purchased options: Purchasing call options tends to increase exposure to the underlying instrument. Purchasing put options tends to decrease exposure to the underlying instrument. The Portfolio pays premiums, which are included within the Statement of Assets and Liabilities as an investment and subsequently marked-to-market to reflect the current value of the option. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid from options which expire are treated as realized losses. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying instrument to determine the realized gain or loss.

Written options: Writing call options tends to decrease exposure to the underlying instrument. Writing put options tends to increase exposure to the underlying instrument. When the Portfolio writes a covered call or put option, the premium received is recorded as a liability within the Statement of Assets and Liabilities and is subsequently marked-to-market to reflect the current market value of the option written. Premiums received from written options which expire unexercised are treated as realized gains. Premiums received from writing options which are exercised or closed are added to the proceeds or offset against amounts paid on the underlying instrument to determine the realized gain or loss. In writing an option, the Portfolio bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Portfolio could result in the Portfolio selling or buying a security or currency at a price different from the current market value.

Open option contracts at June 30, 2023, if any, are included within the Schedule of Investments. The value of purchased option contracts, as applicable, is shown in Investments, at value within the Statement of Assets and Liabilities. The value of written option contracts, as applicable, is shown in Written options and swaptions, at value within the Statement of Assets and Liabilities.

Swap agreements: Swap agreements are bilaterally negotiated agreements between the Portfolio and a counterparty to exchange or swap investments, cash flows, assets, foreign currencies, or market-linked returns at specified, future intervals. Swap agreements can be executed in a bilateral privately negotiated arrangement with a dealer in an OTC transaction or executed on a regular market. Certain swaps regardless of the venue of execution are required to be cleared through a clearinghouse (“centrally cleared swap agreements”). Centrally cleared swap agreements listed or traded on a multilateral platform, are valued at the daily settlement price determined by the corresponding exchange. For centrally cleared credit default swap agreements the clearing exchange requires all members to provide applicable levels across complete term levels. Centrally cleared interest rate swap agreements are valued using a pricing model that references the underlying rates including but not limited to the overnight index swap rate and London Interbank Offered Rate (“LIBOR”) forward rate to calculate the daily settlement price. The Portfolio may enter into credit default, cross-currency, interest rate, total return, including contracts for difference (“CFD”), and other forms of swap agreements to manage exposure to credit, currency, interest rate, and commodity risks. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Centrally cleared swap agreements are marked-to-market daily based upon values from third party vendors, which may include a registered exchange, or quotations from market makers to the extent available and the change in value, if any, is recorded as Variation margin receivable (payable) on centrally cleared swap agreements within the Statement of Assets and Liabilities.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

For OTC swap agreements, payments received or made at the beginning of the measurement period are reflected in OTC swap agreements, at value within the Statement of Assets and Liabilities and represent payments made or received upon entering into the swap agreements to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Additionally, these upfront payments as well as any periodic payments received or paid by the Portfolio, including any liquidation payment received or made at the termination of the swap are recorded as part of Net realized gain (loss) on swap agreements within the Statement of Operations.

Credit default swap agreements: The Portfolio is subject to credit risk in the normal course of pursuing its investment objective. The Portfolio enters into credit default swap agreements to manage its exposure to the market or certain sectors of the market to reduce its risk exposure to defaults of corporate and sovereign issuers, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. Credit default swap agreements involve the exchange of a fixed rate premium for protection against the loss in value of an underlying security in the event of a defined credit event, such as payment default or bankruptcy (buy protection).

Under a credit default swap agreement, one party acts as a guarantor by receiving the fixed periodic payment in exchange for the commitment to purchase the underlying security at par if the defined credit event occurs (sell protection). The Portfolio's maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the notional amount of the contract. This risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty, and by the posting of collateral.

The Portfolio sells credit default swap agreements, which exposes it to risk of loss from credit risk related events specified in the contracts. Although contract-specific, credit events are generally defined as bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. If a defined credit event had occurred during the period, the swap agreements' credit-risk-related contingent features would have been triggered, and the Portfolio would have been required to pay the notional amounts for the credit default swap agreements with a sell protection less the value of the contracts' related reference obligations.

Interest rate swap agreements: The Portfolio is subject to interest rate risk exposure in the normal course of pursuing its investment objective. Because the Portfolio holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk, the Portfolio enters into interest rate swap agreements. Under an interest rate swap agreement, two parties will exchange cash flows based on a notional principal amount. A Portfolio with interest rate agreements can elect to pay a fixed rate and receive a floating rate, or receive a fixed rate and pay a floating rate, on a notional principal amount. The risks of interest rate swap agreements include changes in market conditions which will affect the value of the contract or the cash flows, and the possible inability of the counterparty to fulfill its obligations under the agreement. The Portfolio's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparties over the contracts' remaining lives, to the extent that amount is positive. This risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty, and by the posting of collateral.

Open centrally cleared swap agreements and open OTC swap agreements at June 30, 2023, if any, are listed within the Schedule of Investments.

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Forward foreign currency contracts: The Portfolio is subject to foreign exchange rate risk exposure in the normal course of pursuing its investment objective. The Portfolio may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Forward foreign currency contracts are marked-to-market daily, with the change in value recorded as an unrealized gain or loss and is shown in Unrealized appreciation (depreciation) on forward foreign currency contracts within the Statement of Assets and Liabilities. When the contracts are settled, a realized gain or loss is incurred and is shown in Net realized gain (loss) on forward foreign currency contracts within the Statement of Operations. Risks may arise from changes in market value of the underlying currencies and from the possible inability of counterparties to meet the terms of their contracts. Forward foreign currency contracts are traded in the OTC inter-bank currency dealer market.

Open forward foreign currency contracts at June 30, 2023, if any, are listed within the Schedule of Investments.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Purchased options and swaptions:

[(A)] *Included within Net realized gain (loss) on Investments in the Statement of Operations.*
[(B)] *Included within Net change in unrealized appreciation (depreciation) on Investments in the Statement of Operations.*

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Options:	
Average value of option contracts purchased	$ 603,537
Average value of option contracts written	(2,334)
Average notional value of swaption contracts written	(2,112,606)
Credit default swaps:	
Average notional value — buy protection	3,600,000
Average notional value — sell protection	414,286
Interest rate swaps:	
Average notional value — pays fixed rate	7,628,571
Average notional value — receives fixed rate	3,197,774
Futures contracts:	
Average notional value of contracts — long	75,379,295
Average notional value of contracts — short	(18,679,780)
Forward foreign currency exchange contracts:	
Average contract amounts purchased — in USD	2,898,803
Average contract amounts sold — in USD	4,260,542

The Portfolio typically enters into International Swaps and Derivatives Association, Inc. Master Agreements (“ISDA Master Agreements”) or similar master agreements (collectively, “Master Agreements”) with its contract counterparties for certain OTC derivatives in order to, among other things, reduce credit risk to counterparties.

ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Portfolio typically may offset with the counterparty certain OTC derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default, termination and/or potential deterioration in the credit quality of the counterparty.

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Various Master Agreements govern the terms of certain transactions with counterparties and typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Portfolio and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party and may be a feature in certain Master Agreements. In the event the Portfolio exercises its right to terminate a Master Agreement after a counterparty experiences a termination event as defined in the Master Agreement, the return of collateral with market value in excess of the Portfolio's net liability may be delayed or denied.

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

The following is a summary of the Portfolio OTC derivative assets and liabilities by counterparty net of amounts available for offset under a master netting agreement and net of the related collateral received/pledged by the Portfolio as of June 30, 2023. For financial reporting purposes, the Portfolio does not offset assets and liabilities that are subject to a master netting agreement or similar arrangement on the Statement of Assets and Liabilities. See the Repurchase agreement section within the notes for offsetting and collateral information pertaining to repurchase agreements that are subject to master netting agreements.

Counterparty	Gross Amounts of Assets Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Collateral Received (B)	Net Receivable	Gross Amounts of Liabilities Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Collateral Pledged (B)	Net Payable
	Assets				Liabilities

(A) *Absent an event of default or early termination, OTC derivative assets and liabilities are presented gross and not offset within the Statement of Assets and Liabilities.*
(B) *In some instances, the actual collateral received and/or pledged may be more than the amount shown due to overcollateralization.*
(C) *Other Derivatives, which includes future contracts, exchange-traded options, exchange-traded swap agreements and occasionally forward positions, that are not subject to a master netting arrangement or another similar arrangement. The amount presented is intended to permit reconciliation to the amount presented within the Schedule of Investments.*

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio’s securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio’s securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio’s investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio’s investments, impair the Portfolio’s ability to satisfy redemption requests, and negatively impact the Portfolio’s performance.

Asset class allocation risk: The Portfolio’s investment performance is significantly impacted by the Portfolio’s asset class allocation and reallocation from time to time. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser’s judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy or other issuer is incorrect.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate (“LIBOR”). The UK Financial Conduct Authority and LIBOR’s administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a “synthetic” basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio’s investments cannot yet be determined.

Model and data risk: If quantitative models, algorithms or calculations (whether proprietary and developed by the sub-adviser or supplied by third parties) (“Models”) or information or data supplied by third parties (“Data”) prove to be incorrect or incomplete, any decisions made, in whole or part, in reliance thereon expose the Portfolio to additional risks. Models can be predictive in nature. The use of predictive Models has inherent risks. The success of relying on or otherwise using Models depends on a number of factors, including the validity, accuracy and completeness of the Model’s development, implementation and maintenance, the Model’s assumptions, factors, algorithms and methodologies, and the accuracy and reliability of the supplied historical or other Data. Models rely on, among other things, correct and complete Data inputs. If incorrect Data is entered into even a well-founded Model, the resulting information will be incorrect. However, even if Data is input correctly, Model prices may differ substantially from market prices, especially for securities with complex characteristics. Investments selected with the use of Models may perform differently than expected as a result of the design of the Model, inputs into the Model or other factors. There also can be no assurance that the use of Models will result in effective investment decisions for the Portfolio.

Real estate investment trusts (“REITs”) risk: Investing in real estate investment trusts (“REITs”) involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT’s performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT’s failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $750 million	0.79%
Over $750 million up to $1.5 billion	0.78
Over $1.5 billion	0.75

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.92%	May 1, 2024
Service Class	1.17	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 14,656,034	$ 10,716,546	$ 16,700,843	$ 3,256,375

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 215,955,724	$ 3,777,195	$ (16,067,437)	$ (12,290,242)

11. NEW ACCOUNTING PRONOUNCEMENT

In December 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-06 (“ASU 2022-06”), “Reference Rate Reform (Topic 848)”. ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica PIMCO Tactical – Conservative VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Pacific Investment Management Company LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was in line with the median for its peer universe for the past 10-year period and below the median for the past 1-, 3- and 5- year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was below its composite benchmark for the past 1-, 3-, 5- and 10-year periods. The Trustees discussed the reasons for the underperformance with TAM and TAM agreed to continue to closely monitor and report to the Board on the performance of the Portfolio. The Trustees observed that the performance of the Portfolio had improved during the first quarter of 2023.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm’s-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio’s assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio’s management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser’s sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio’s management fee schedule. The Board considered that the Sub-Adviser’s sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio’s fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as “soft dollars”) as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica PIMCO Tactical – Growth VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,085.30	$ 4.65	$ 1,020.30	$ 4.51	0.90%
Service Class	1,000.00	1,083.50	5.94	1,019.10	5.76	1.15

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*

(B) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $18,760,790, representing 7.1% of the Portfolio's net assets.*

(C) *Securities are exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Securities may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At June 30, 2023, the total value of Regulation S securities is $693,934, representing 0.3% of the Portfolio's net assets.*

(D) *Perpetual maturity. The date displayed is the next call date.*

(E) *All or a portion of the securities are on loan. The total value of all securities on loan is $466,025, collateralized by cash collateral of $475,564. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*

(F) *Step bonds. Coupon rates change in increments to maturity. The rates disclosed are as of June 30, 2023; the maturity dates disclosed are the ultimate maturity dates.*

FOOTNOTES TO SCHEDULE OF INVESTMENTS (continued):

(G) *Security in default; partial receipt of interest payments and/or dividends declared at last payment date. At June 30, 2023, the value of this security is $140,000, representing 0.1% of the Portfolio's net assets.*
(H) *Percentage rounds to less than 0.1% or (0.1)%.*
(I) *Fixed rate loan commitment at June 30, 2023.*
(J) *Fair valued as determined in good faith in accordance with procedures established by the Board. At June 30, 2023, the total value of securities is $396,320, representing 0.2% of the Portfolio's net assets.*
(K) *When-issued, delayed-delivery and/or forward commitment (including TBAs) securities. Securities to be settled and delivered after June 30, 2023. Securities may display a coupon rate of 0.00%, as the rate is to be determined at time of settlement.*
(L) *Securities are subject to sale-buyback transactions. The average amount of sale-buybacks outstanding during the period ended June 30, 2023 was $0 at a weighted average interest rate of 0.00%.*
(M) *Rates disclosed reflect the yields at June 30, 2023.*
(N) *All or a portion of the security has been segregated by the custodian as collateral for open TBA commitment transactions. The value of the security is $262,024.*
(O) *If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (a) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced obligation or (b) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap agreement less the recovery value of the referenced obligation or underlying securities comprising the referenced obligation.*
(P) *Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate issues or sovereign issues of an emerging country as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood of risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as "Defaulted" indicates a credit event has occurred for the referenced entity or obligation.*
(Q) *The maximum potential amount the Portfolio could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.*
(R) *The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative had the notional amount of the swap agreement been closed/sold as of the period ended. Increasing market values, in absolute terms when compared to the notional amount of the swap agreement, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.*
(S) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*
(T) *Derivative instruments are valued at unrealized appreciation (depreciation).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica PIMCO Tactical—Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

3. INVESTMENT VALUATION (continued)

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels (“Levels”) of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM’s own assumptions used in determining the fair value of the Portfolio’s investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Loan assignments: Loan assignments are normally valued using an income approach, which projects future cash flows and converts those future cash flows to a present value using a discount rate. The resulting present value reflects the likely fair value of the loan. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise are categorized in Level 3.

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

3. INVESTMENT VALUATION (continued)

Municipal government obligations: The fair value of municipal government obligations and variable rate notes is estimated based on models that consider, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the liquidity of the bond, state of issuance, benchmark yield curves, and bond or note insurance. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

U.S. government agency obligations: U.S. government agency obligations are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government obligations. Mortgage pass-throughs include to be announced ("TBA") securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Short-term notes: The Portfolio normally values short-term government and U.S. government agency securities using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued by principally using dealer quotations. Short-term government and U.S. government agency securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Loan participations and assignments: The Portfolio may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers, either in the form of participations at the time the loan is originated ("Participations") or buying an interest in the loan in the secondary market from a financial institution or institutional investor ("Assignments"). Participations and Assignments in commercial loans may be secured or unsecured. These investments may include standby financing commitments, including revolving credit facilities that obligate the Portfolio to supply additional cash to the borrowers on demand. Loan Participations and Assignments involve risks of insolvency of the lending banks or other financial intermediaries. As such, the Portfolio assumes the credit risks associated with the corporate borrowers and may assume the credit risks associated with the interposed banks or other financial intermediaries.

The Portfolio, based on its ability to invest in Loan Participations and Assignments, may be contractually obligated to receive approval from the agent banks and/or borrowers prior to the sale of these investments. The Portfolio that participates in such syndications, or that can buy a portion of the loans, become part lenders. Loans are often administered by agent banks acting as agents for all holders.

The agent banks administer the terms of the loans, as specified in the loan agreements. In addition, the agent banks are normally responsible for the collection of principal and interest payments from the corporate borrowers and the apportionment of these payments to the credit of all institutions that are parties to the loan agreements. Unless the Portfolio has direct recourse against the corporate

4. SECURITIES AND OTHER INVESTMENTS (continued)

borrowers under the terms of the loans or other indebtedness, the Portfolio may have to rely on the agent banks or other financial intermediaries to apply appropriate credit remedies against corporate borrowers.

The Portfolio held no unfunded loan participations at June 30, 2023. Open funded loan participations and assignments at June 30, 2023, if any, are included within the Schedule of Investments.

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

Treasury inflation-protected securities ("TIPS"): The Portfolio may invest in TIPS, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds and notes. For bonds and notes that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2023, if any, are included within the Schedule of Investments. The adjustments, if any, to principal due to inflation/deflation are reflected as increases/decreases to Interest income within the Statement of Operations, with a corresponding adjustment to Investments, at cost within the Statement of Assets and Liabilities.

When-issued, delayed-delivery, forward, and to be announced ("TBA") commitment transactions: The Portfolio may purchase or sell securities on a when-issued, delayed-delivery, forward and TBA commitment basis. When-issued and forward commitment transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Portfolio engages in when-issued and forward commitment transactions to obtain an advantageous price and yield at the time of the transaction. The Portfolio engages in when-issued and forward commitment transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Portfolio may be required to pay more at settlement than the security is worth. In addition, the Portfolio is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Portfolio to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Portfolio will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed-delivery basis, the Portfolio assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Portfolio if the other party to the transaction defaults on its obligation to make payment or delivery, and the Portfolio is delayed or prevented from completing the transaction. The Portfolio may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Portfolio sells a security on a delayed-delivery basis, the Portfolio does not participate in future gains and losses on the security.

TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. TBAs are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of a Portfolio's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities. TBA collateral requirements are typically calculated by netting the mark-to-market amount for each transaction and comparing that amount to the value of the collateral currently pledged by a Portfolio and the counterparty. Cash collateral that has been pledged to cover the obligations of a Portfolio and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as Cash collateral pledged at broker for TBA commitments or Cash collateral at broker for TBA commitments, respectively. Non-cash collateral pledged by a Portfolio, if any, is

Transamerica PIMCO Tactical – Growth VP

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

4. SECURITIES AND OTHER INVESTMENTS (continued)

disclosed within the Schedule of Investments. Typically, a Portfolio is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted. To the extent amounts due to a Portfolio are not fully collateralized, contractually or otherwise, a Portfolio bears the risk of loss from counterparty non-performance.

When-issued, delayed-delivery, forward and TBA commitment transactions held at June 30, 2023, if any, are identified within the Schedule of Investments. Open trades, if any, are reflected as When-issued, delayed-delivery, forward and TBA commitments purchased or sold within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio’s assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio’s custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Sale-buyback: The Portfolio may enter into sale-buyback financing transactions. The Portfolio accounts for sale-buyback financing transactions as borrowing transactions and realize gains and losses on these transactions at the end of the roll period. Sale-buyback financing transactions involve sales by the Portfolio of securities and simultaneously contracts to repurchase the same or substantially similar securities at an agreed upon price and date.

The Portfolio forgoes principal and interest paid during the roll period on the securities sold in a sale-buyback financing transaction. The Portfolio is compensated by the difference between the current sales price and the price for the future purchase (often referred to as the “price drop”), as well as by any interest earned on the proceeds of the securities sold. Sale-buyback financing transactions may be renewed with a new sale and a repurchase price and a cash settlement made at each renewal without physical delivery of the securities subject to the contract. Sale-buyback financing transactions expose the Portfolio to risks such as, the buyer under the agreement may file for bankruptcy, become insolvent, or otherwise default on its obligations to the Portfolio, the market value of the securities the Portfolio is obligated to repurchase under the agreement may decline below the repurchase price. The Portfolio’s obligations under a sale-buyback typically would be offset by liquid assets equal in value to the amount of the Portfolio’s forward commitment to repurchase the subject security. Sale-buyback financing transactions accounted for as borrowing transactions are excluded from the Portfolio’s

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

portfolio turnover rates. The Portfolio recognizes price drop fee income on a straight line basis over the period of the roll. For the period ended June 30, 2023, the Portfolio earned price drop fee income of $0. The price drop fee income is included in Interest income within the Statement of Operations.

The outstanding payable for securities to be repurchased, if any, is included in Payable for sale-buyback financing transactions within the Statement of Assets and Liabilities. The interest expense is included within Interest income on the Statement of Operations. In periods of increased demand of the security, the Portfolio may receive a fee for use of the security by the counterparty, which may result in interest income to the Portfolio, and is included in Interest income on the Statement of Operations.

Open sale-buyback financing transactions at June 30, 2023, if any, are identified within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Corporate Debt Securities	$ 475,564	$ —	$ —	$ —	$ 475,564
Total Borrowings	**$ 475,564**	**$ —**	**$ —**	**$ —**	**$ 475,564**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio’s investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio’s investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Option contracts: The Portfolio is subject to equity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio may enter into option contracts to manage exposure to various market fluctuations. The Portfolio may purchase or write call and put options on securities and derivative instruments in which the Portfolio owns or may invest. Options are valued at the average of the bid and ask price established each day at the close of the board of trade or exchange on which they are traded. Options are marked-to-market daily to reflect the current value of the option. The primary risks associated with options are an imperfect correlation between the change in value of the securities held and the prices of the option contracts, the possibility of an illiquid market, and an inability of the counterparty to meet the contract terms. Options can be traded through an exchange or through privately negotiated arrangements with a dealer in an OTC transaction. Options traded on an exchange are generally cleared through a clearinghouse such as the Options Clearing Corp.

Options on exchange-traded funds and/or securities: The Portfolio may purchase or write options on ETFs and/or securities. Purchasing or writing options on ETFs and/or securities gives the Portfolio the right, but not the obligation to buy or sell a specified ETF and/or security as an underlying instrument for the option contract.

Options on indices: The Portfolio may purchase or write options on indices. Purchasing or writing an option on indices gives the Portfolio the right, but not the obligation to buy or sell the cash from the underlying index. The exercise of the option will result in a cash transfer and gain or loss depends on the change in the underlying index.

Options on futures: The Portfolio may purchase or write options on futures. Purchasing or writing options on futures gives the Portfolio the right, but not obligation to buy or sell a position on a futures contract at the specified option exercise price at any time during the period of the option.

Interest rate-capped options: The Portfolio may purchase or write interest rate-capped options. Purchasing or writing interest rate-capped options gives the Portfolio the right, but not the obligation to buy or sell an option which applies a cap to protect the Portfolio from floating rate risk above a certain rate on a given notional exposure. A floor can be used to give downside protection to investments in interest rate-linked products.

Interest rate swaptions: The Portfolio may purchase or write interest rate swaption agreements which are options to enter into a pre-defined swap agreement by some specific date in the future. The writer of the swaption becomes the counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed-rate receiver or a fixed-rate payer upon exercise.

Purchased options: Purchasing call options tends to increase exposure to the underlying instrument. Purchasing put options tends to decrease exposure to the underlying instrument. The Portfolio pays premiums, which are included within the Statement of Assets and Liabilities as an investment and subsequently marked-to-market to reflect the current value of the option. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid from options which expire are treated as realized losses. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying instrument to determine the realized gain or loss.

Written options: Writing call options tends to decrease exposure to the underlying instrument. Writing put options tends to increase exposure to the underlying instrument. When the Portfolio writes a covered call or put option, the premium received is recorded as a

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

liability within the Statement of Assets and Liabilities and is subsequently marked-to-market to reflect the current market value of the option written. Premiums received from written options which expire unexercised are treated as realized gains. Premiums received from writing options which are exercised or closed are added to the proceeds or offset against amounts paid on the underlying instrument to determine the realized gain or loss. In writing an option, the Portfolio bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Portfolio could result in the Portfolio selling or buying a security or currency at a price different from the current market value.

Open option contracts at June 30, 2023, if any, are included within the Schedule of Investments. The value of purchased option contracts, as applicable, is shown in Investments, at value within the Statement of Assets and Liabilities. The value of written option contracts, as applicable, is shown in Written options and swaptions, at value within the Statement of Assets and Liabilities.

Swap agreements: Swap agreements are bilaterally negotiated agreements between the Portfolio and a counterparty to exchange or swap investments, cash flows, assets, foreign currencies, or market-linked returns at specified, future intervals. Swap agreements can be executed in a bilateral privately negotiated arrangement with a dealer in an OTC transaction or executed on a regular market. Certain swaps regardless of the venue of execution are required to be cleared through a clearinghouse (“centrally cleared swap agreements”). Centrally cleared swap agreements listed or traded on a multilateral platform, are valued at the daily settlement price determined by the corresponding exchange. For centrally cleared credit default swap agreements the clearing exchange requires all members to provide applicable levels across complete term levels. Centrally cleared interest rate swap agreements are valued using a pricing model that references the underlying rates including but not limited to the overnight index swap rate and London Interbank Offered Rate (“LIBOR”) forward rate to calculate the daily settlement price. The Portfolio may enter into credit default, cross-currency, interest rate, total return, including contracts for difference (“CFD”), and other forms of swap agreements to manage exposure to credit, currency, interest rate, and commodity risks. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Centrally cleared swap agreements are marked-to-market daily based upon values from third party vendors, which may include a registered exchange, or quotations from market makers to the extent available and the change in value, if any, is recorded as Variation margin receivable (payable) on centrally cleared swap agreements within the Statement of Assets and Liabilities.

For OTC swap agreements, payments received or made at the beginning of the measurement period are reflected in OTC swap agreements, at value within the Statement of Assets and Liabilities and represent payments made or received upon entering into the swap agreements to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Additionally, these upfront payments as well as any periodic payments received or paid by the Portfolio, including any liquidation payment received or made at the termination of the swap are recorded as part of Net realized gain (loss) on swap agreements within the Statement of Operations.

Credit default swap agreements: The Portfolio is subject to credit risk in the normal course of pursuing its investment objective. The Portfolio enters into credit default swap agreements to manage its exposure to the market or certain sectors of the market to reduce its risk exposure to defaults of corporate and sovereign issuers, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. Credit default swap agreements involve the exchange of a fixed rate premium for protection against the loss in value of an underlying security in the event of a defined credit event, such as payment default or bankruptcy (buy protection).

Under a credit default swap agreement, one party acts as a guarantor by receiving the fixed periodic payment in exchange for the commitment to purchase the underlying security at par if the defined credit event occurs (sell protection). The Portfolio’s maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the notional amount of the contract. This risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty, and by the posting of collateral.

The Portfolio sells credit default swap agreements, which exposes it to risk of loss from credit risk related events specified in the contracts. Although contract-specific, credit events are generally defined as bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. If a defined credit event had occurred during the period, the swap agreements’ credit-risk-related contingent features would have been triggered, and the Portfolio would have been required to pay the notional amounts for the credit default swap agreements with a sell protection less the value of the contracts’ related reference obligations.

Interest rate swap agreements: The Portfolio is subject to interest rate risk exposure in the normal course of pursuing its investment objective. Because the Portfolio holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk, the Portfolio enters into interest rate swap agreements. Under an interest rate swap agreement, two parties will exchange cash flows based on a notional principal amount. A Portfolio with interest rate agreements can elect to pay a fixed rate and receive a floating rate, or receive a fixed rate and pay a floating rate, on a notional principal amount. The risks of interest rate swap

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

agreements include changes in market conditions which will affect the value of the contract or the cash flows, and the possible inability of the counterparty to fulfill its obligations under the agreement. The Portfolio's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparties over the contracts' remaining lives, to the extent that amount is positive. This risk is mitigated by having a master netting arrangement between the Portfolio and the counterparty, and by the posting of collateral.

Open centrally cleared swap agreements and open OTC swap agreements at June 30, 2023, if any, are listed within the Schedule of Investments.

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

Forward foreign currency contracts: The Portfolio is subject to foreign exchange rate risk exposure in the normal course of pursuing its investment objective. The Portfolio may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Forward foreign currency contracts are marked-to-market daily, with the change in value recorded as an unrealized gain or loss and is shown in Unrealized appreciation (depreciation) on forward foreign currency contracts within the Statement of Assets and Liabilities. When the contracts are settled, a realized gain or loss is incurred and is shown in Net realized gain (loss) on forward foreign currency contracts within the Statement of Operations. Risks may arise from changes in market value of the underlying currencies and from the possible inability of counterparties to meet the terms of their contracts. Forward foreign currency contracts are traded in the OTC inter-bank currency dealer market.

Open forward foreign currency contracts at June 30, 2023, if any, are listed within the Schedule of Investments.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Options:	
Average value of option contracts purchased	$ 2,473,137
Average value of option contracts written	(1,513)
Average notional value of swaption contracts written	(1,714,286)
Credit default swaps:	
Average notional value — sell protection	3,428,571
Interest rate swaps:	
Average notional value — pays fixed rate	4,414,286
Average notional value — receives fixed rate	2,091,652
Futures contracts:	
Average notional value of contracts — long	202,212,917
Average notional value of contracts — short	(15,962,891)
Forward foreign currency exchange contracts:	
Average contract amounts purchased — in USD	2,041,181
Average contract amounts sold — in USD	3,001,421

The Portfolio typically enters into International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") or similar master agreements (collectively, "Master Agreements") with its contract counterparties for certain OTC derivatives in order to, among other things, reduce credit risk to counterparties.

ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Portfolio typically may offset with the counterparty certain OTC derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default, termination and/or potential deterioration in the credit quality of the counterparty.

Various Master Agreements govern the terms of certain transactions with counterparties and typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Portfolio and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party and may be a feature in certain Master Agreements. In the event the Portfolio exercises its right to terminate a Master Agreement after a counterparty experiences a termination event as defined in the Master Agreement, the return of collateral with market value in excess of the Portfolio's net liability may be delayed or denied.

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the Portfolio OTC derivative assets and liabilities by counterparty net of amounts available for offset under a master netting agreement and net of the related collateral received/pledged by the Portfolio as of June 30, 2023. For financial reporting purposes, the Portfolio does not offset assets and liabilities that are subject to a master netting agreement or similar arrangement on the Statement of Assets and Liabilities. See the Repurchase agreement section within the notes for offsetting and collateral information pertaining to repurchase agreements that are subject to master netting agreements.

Counterparty	Gross Amounts of Assets Presented within Statement of Assets and Liabilities [A]	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Received [B]	Net Receivable	Gross Amounts of Liabilities Presented within Statement of Assets and Liabilities [A]	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Pledged [B]	Net Payable
	Assets				Liabilities			
Bank of America, N.A.	$ 142	$ (142)	$ —	$ —	$ 1,595	$ (142)	$ —	$ 1,453

Total	**$ 8,372,198**	**$ (6,275)**	**$ —**	**$ 8,365,923**	**$ 560,750**	**$ (6,275)**	**$ —**	**$ 554,475**

[A] *Absent an event of default or early termination, OTC derivative assets and liabilities are presented gross and not offset within the Statements of Assets and Liabilities.*
[B] *In some instances, the actual collateral received and/or pledged may be more than the amount shown due to overcollateralization.*
[C] *Other Derivatives, which includes future contracts, exchange-traded options, exchange-traded swap agreements and occasionally forward positions, that are not subject to a master netting arrangement or another similar arrangement. The amount presented is intended to permit reconciliation to the amount presented within the Schedule of Investments.*

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Asset class allocation risk: The Portfolio's investment performance is significantly impacted by the Portfolio's asset class allocation and reallocation from time to time. These actions may be unsuccessful in maximizing return and/or avoiding investment losses. The value of your investment may decrease if the sub-adviser's judgment about the attractiveness, value or market trends affecting a particular asset class, investment style, technique or strategy or other issuer is incorrect.

7. RISK FACTORS (continued)

Model and data risk: If quantitative models, algorithms or calculations (whether proprietary and developed by the sub-adviser or supplied by third parties) (“Models”) or information or data supplied by third parties (“Data”) prove to be incorrect or incomplete, any decisions made, in whole or part, in reliance thereon expose the Portfolio to additional risks. Models can be predictive in nature. The use of predictive Models has inherent risks. The success of relying on or otherwise using Models depends on a number of factors, including the validity, accuracy and completeness of the Model’s development, implementation and maintenance, the Model’s assumptions, factors, algorithms and methodologies, and the accuracy and reliability of the supplied historical or other Data. Models rely on, among other things, correct and complete Data inputs. If incorrect Data is entered into even a well-founded Model, the resulting information will be incorrect. However, even if Data is input correctly, Model prices may differ substantially from market prices, especially for securities with complex characteristics. Investments selected with the use of Models may perform differently than expected as a result of the design of the Model, inputs into the Model or other factors. There also can be no assurance that the use of Models will result in effective investment decisions for the Portfolio.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate (“LIBOR”). The UK Financial Conduct Authority and LIBOR’s administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a “synthetic” basis, but any such publications would be considered non-representative of the underlying market. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio’s investments cannot yet be determined.

Real estate investment trusts (“REITs”) risk: Investing in real estate investment trusts (“REITs”) involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT’s performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT’s failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company (“TLIC”), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio’s investment manager, is directly owned by TLIC and AUSA Holding, LLC (“AUSA”), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation (“Commonwealth”). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. (“TFS”) is the Portfolio’s transfer agent. Transamerica Capital, Inc. (“TCI”) is the Portfolio’s distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio’s investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $250 million	0.82%
Over $250 million up to $750 million	0.81
Over $750 million up to $1.5 billion	0.79
Over $1.5 billion	0.76

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.94%	May 1, 2024
Service Class	1.19	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	**U.S. Government**	**Long-Term**	**U.S. Government**
$ 10,822,543	$ 4,098,736	$ 8,719,107	$ 2,005,959

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 424,939,576	$ 5,675,051	$ (11,839,132)	$ (6,164,081)

11. NEW ACCOUNTING PRONOUNCEMENT

In December 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-06 ("ASU 2022-06"), "Reference Rate Reform (Topic 848)". ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio's financial statements.

Transamerica PIMCO Tactical – Growth VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica PIMCO Tactical – Growth VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and Pacific Investment Management Company LLC (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its composite benchmark, each for the past 1-, 3-, 5- and 10-year periods. The Trustees discussed the reasons for the underperformance with TAM and TAM agreed to continue to closely monitor and report to the Board on the performance of the Portfolio. The Trustees observed that the performance of the Portfolio had improved during the first quarter of 2023.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Initial Class	$ 1,000.00	$ 1,025.50	$ 2.86	$ 1,022.00	$ 2.86	0.57%
Service Class	1,000.00	1,025.20	4.17	1,020.70	4.16	0.83

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) *Floating or variable rate securities. The rates disclosed are as of June 30, 2023. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.*
(B) *Perpetual maturity. The date displayed is the next call date.*
(C) *Securities are exempt from registration pursuant to Rule 144A of the Securities Act of 1933. Securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2023, the total value of 144A securities is $7,632,978, representing 5.7% of the Portfolio's net assets.*
(D) *All or a portion of the securities are on loan. The total value of all securities on loan is $474,191, collateralized by cash collateral of $484,600. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*
(E) *Securities are exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Securities may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At June 30, 2023, the total value of Regulation S securities is $29,156,444, representing 21.7% of the Portfolio's net assets.*
(F) *Rates disclosed reflect the yields at June 30, 2023.*
(G) *There were no transfers in or out of Level 3 during the six-month period ended June 30, 2023. Please reference the Investment Valuation section of the Notes to Financial Statements for more information regarding investment valuation and pricing inputs.*
(H) *Derivative instruments are valued at unrealized appreciation (depreciation).*

Transamerica PineBridge Inflation Opportunities VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica PineBridge Inflation Opportunities VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Corporate debt securities: The fair value of corporate debt securities is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate debt securities are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Foreign government obligations: Foreign government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Foreign government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

U.S. government obligations: U.S. government obligations are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. U.S. government obligations generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

3. INVESTMENT VALUATION (continued)

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Treasury inflation-protected securities ("TIPS"): The Portfolio may invest in TIPS, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds and notes. For bonds and notes that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2023, if any, are included within the Schedule of Investments. The adjustments, if any, to principal due to inflation/deflation are reflected as increases/decreases to Interest income within the Statement of Operations, with a corresponding adjustment to Investments, at cost within the Statement of Assets and Liabilities.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust – Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Corporate Debt Securities	$ 484,600	$ —	$ —	$ —	$ 484,600
Total Borrowings	**$ 484,600**	**$ —**	**$ —**	**$ —**	**$ 484,600**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Forward foreign currency contracts: The Portfolio is subject to foreign exchange rate risk exposure in the normal course of pursuing its investment objective. The Portfolio may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Forward foreign currency contracts are marked-to-market daily, with the change in value recorded as an unrealized gain or loss and is shown in Unrealized appreciation (depreciation) on forward foreign currency contracts within the Statement of Assets and Liabilities. When the contracts are settled, a realized gain or loss is incurred and is shown in Net realized gain (loss) on forward foreign currency contracts within the Statement of Operations. Risks may arise from changes in market value of the underlying currencies and from the possible inability of counterparties to meet the terms of their contracts. Forward foreign currency contracts are traded in the OTC inter-bank currency dealer market.

Open forward foreign currency contracts at June 30, 2023, if any, are listed within the Schedule of Investments.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Total	**$ —**	**$ 2,345,229**	**$ —**	**$ —**	**$ —**	**$ 2,345,229**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Forward foreign currency exchange contracts:	
Average contract amounts purchased — in USD	$ 463,175
Average contract amounts sold — in USD	38,528,107

The Portfolio typically enters into International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") or similar master agreements (collectively, "Master Agreements") with its contract counterparties for certain OTC derivatives in order to, among other things, reduce credit risk to counterparties.

ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Portfolio typically may offset with the counterparty certain OTC derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default, termination and/or potential deterioration in the credit quality of the counterparty.

Various Master Agreements govern the terms of certain transactions with counterparties and typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Portfolio and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party and may be a feature in certain Master Agreements. In the event the Portfolio exercises its right to terminate a Master Agreement after a counterparty experiences a termination event as defined in the Master Agreement, the return of collateral with market value in excess of the Portfolio's net liability may be delayed or denied.

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

The following is a summary of the Portfolio OTC derivative assets and liabilities by counterparty net of amounts available for offset under a master netting agreement and net of the related collateral received/pledged by the Portfolio as of June 30, 2023. For financial reporting purposes, the Portfolio does not offset assets and liabilities that are subject to a master netting agreement or similar

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

arrangement on the Statement of Assets and Liabilities. See the Repurchase agreement section within the notes for offsetting and collateral information pertaining to repurchase agreements that are subject to master netting agreements.

Counterparty	Gross Amounts of Assets Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Received (B)	Net Receivable	Gross Amounts of Liabilities Presented within Statement of Assets and Liabilities (A)	Gross Amounts Not Offset within Statement of Assets and Liabilities: Financial Instruments	Gross Amounts Not Offset within Statement of Assets and Liabilities: Collateral Pledged (B)	Net Payable
	Assets				Liabilities			
JPMorgan Securities LLC	$ 616,941	$ (225,880)	$ —	$ 391,061	$ 225,880	$ (225,880)	$ —	$ —
Total	**$ 616,941**	**$ (225,880)**	**$ —**	**$ 391,061**	**$ 225,880**	**$ (225,880)**	**$ —**	**$ —**

(A) *Absent an event of default or early termination, OTC derivative assets and liabilities are presented gross and not offset within the Statement of Assets and Liabilities.*

(B) *In some instances, the actual collateral received and/or pledged may be more than the amount shown due to overcollateralization.*

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Inflation-protected securities risk: Inflation-protected debt securities may react differently from other types of debt securities and tend to react to changes in "real" interest rates, which represent nominal (stated) interest rates reduced by the expected impact of inflation. In general, the price of an inflation-protected debt security can fall when real interest rates rise, and can rise when real interest rates fall. Interest payments on inflation-protected debt securities can be unpredictable and will vary as the principal and/or interest is adjusted for inflation.

Interest rate risk: The value of fixed-income securities generally goes down when interest rates rise. A rise in rates tends to have a greater impact on the prices of longer term or duration securities. Changes in interest rates also may affect the liquidity of the Portfolio's investments. A general rise in interest rates may cause investors to sell fixed-income securities on a large scale, which could adversely affect the price and liquidity of fixed-income securities generally and could also result in increased redemptions from the Portfolio. Increased redemptions could cause the Portfolio to sell securities at inopportune times or depressed prices and result in further losses.

LIBOR risk: Many financial instruments, financings or other transactions to which the Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). The UK Financial Conduct Authority and LIBOR's administrator announced that the use of LIBOR will be phased out; most LIBOR rates are no longer published as of the end of 2021 and a majority of U.S. dollar LIBOR rates will no longer be published after June 30, 2023. It is possible that a subset of LIBOR rates may be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market.

7. RISK FACTORS (continued)

There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Portfolio, issuers of instruments in which the Portfolio invests, and financial markets generally. As such, the potential effect of a transition away from LIBOR on the Portfolio or the Portfolio's investments cannot yet be determined.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $250 million	0.49%
Over $250 million up to $1 billion	0.43%
Over $1 billion	0.38%

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.63%	May 1, 2024
Service Class	0.88	May 1, 2024
Prior to May 1, 2023		
Initial Class	0.70	
Service Class	0.95	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 7,905,734	$ 6,291,627	$ 12,649,170	$ 12,222,164

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 145,796,237	$ 1,670,643	$ (12,848,097)	$ (11,177,454)

11. NEW ACCOUNTING PRONOUNCEMENTS

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

In December 2022, FASB issued Accounting Standards Update No. 2022-06 (“ASU 2022-06”), “Reference Rate Reform (Topic 848)”. ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024 for all entities. Management does not expect ASU 2022-06 to have a material impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica PineBridge Inflation Opportunities VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and PineBridge Investments LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmarks, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1year period and below the median for the past 3-, 5- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its primary benchmark for the past 1-year period and below its primary benchmark for the past 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on November 10, 2014 pursuant to its current investment objective and investment strategies and used a different benchmark.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the median for its peer group and above the median for its peer universe. The Trustees and TAM agreed upon a reduction to the Portfolio's management fee schedule. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica ProFund UltraBear VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio (C)
Service Class	$ 1,000.00	$ 752.20	$ 5.34	$ 1,018.70	$ 6.16	1.23%

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

(C) *Net annualized expense ratios, as disclosed in the table, do not include the expenses of the underlying investments in which the Portfolio invests. The net annualized expense ratios, as stated in the fee table of the Portfolio’s Prospectus, may differ from the expense ratios disclosed in this report.*

Transamerica ProFund UltraBear VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica ProFund UltraBear VP (the "Portfolio") is a series of TST and is classified as non-diversified under the 1940 Act. The Portfolio currently offers one class of shares, Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative

1. ORGANIZATION (continued)

services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Interest income, if any, is accrued as earned. Dividend income and capital gain distributions from underlying investments, if any, are recorded on the ex-dividend date. Income or short-term capital gain distributions received from underlying investments, if any, are recorded as Dividend income from investments within the Statement of Operations. Long-term capital gain distributions received from underlying investments, if any, are recorded as Net realized gain (loss) on Capital gain distributions received from investments within the Statement of Operations.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in

3. INVESTMENT VALUATION (continued)

determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Investment companies: Certain investment companies are valued at the NAV as the practical expedient. These investment companies are not included within the fair value hierarchy. Certain other investment companies are valued at the actively traded NAV and no valuation adjustments are applied. These investment companies are categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter ("OTC") derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Liability Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A) (B)]	$ —	$ —	$ (1,554,113)	$ —	$ —	$ (1,554,113)
Total	**$ —**	**$ —**	**$ (1,554,113)**	**$ —**	**$ —**	**$ (1,554,113)**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ (5,064,138)	$ —	$ —	$ (5,064,138)
Total	**$ —**	**$ —**	**$ (5,064,138)**	**$ —**	**$ —**	**$ (5,064,138)**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Futures contracts	$ —	$ —	$ (2,925,624)	$ —	$ —	$ (2,925,624)
Total	**$ —**	**$ —**	**$ (2,925,624)**	**$ —**	**$ —**	**$ (2,925,624)**

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts - short	$ (52,815,038)

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a

5. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Equity and market risk: Equity markets are volatile, and the value of securities, swaps, futures and other instruments related to equity markets may fluctuate dramatically from day-to-day. Equity markets are subject to corporate, political, regulatory, market and economic developments, as well as developments that impact specific economic sectors, industries or segments of the market. Further, stocks in the Index may underperform other equity investments. Volatility in the markets and/or market developments may cause the value of an investment in the Portfolio to decrease over short or long periods of time. As a portfolio seeking daily investment results, before fees and expenses, that correspond to two times the inverse (-2x) of the daily return of the Index, the value of an investment in the Portfolio is expected to decline when market conditions cause the level of the Index to rise.

Inverse correlation risk: Investors will lose money when the Index rises – a result that is the opposite from traditional funds.

Non-diversification risk: As a "non-diversified" Portfolio, the Portfolio may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund. Investing in a smaller number of issuers will make the Portfolio more susceptible to negative events affecting those issuers.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $250 million	0.88%
Over $250 million up to $750 million	0.83
Over $750 million	0.78

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Service Class	1.23%	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

For the 36-month period ended June 30, 2023, the balances available for recapture by TAM for the Portfolio are as follows:

	Amounts Available				
	2020 [A]	2021	2022	2023	Total
	$ 12,508	$ 32,956	$ 12,473	$ 7,695	$ 65,632

[A] *For the six-month period of July 1, 2020 through December 31, 2020.*

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets up to an annual fee of 0.25% of Service Class shares.

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc (“SS&C”). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

During the period ended June 30, 2023, there were no proceeds from securities purchased or securities sold (excluding short-term securities).

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 21,076,336	$ —	$ (1,554,113)	$ (1,554,113)

10. STOCK SPLIT

Effective as of the close of business on the date listed in the subsequent table, the Portfolio’s shares underwent a stock split. There was no impact to the aggregate market value of shares outstanding. The historical per share data presented within the Financial Highlights has been retroactively adjusted to reflect the stock split. The stock split ratios, net effect on the NAV per share, and the number of shares outstanding as of the date indicated were as follows:

Date	Share Split Ratio	Shares Prior to Stock Split	Shares After Stock Split	Increase (Decrease) Net Asset Value per Share	Increase (Decrease) Net Shares Outstanding
January 21, 2022	125 for 1	98,591,154	788,729	Increase	Decrease

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica ProFund UltraBear VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and ProFund Advisors LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe and above its benchmark, each for the past 1-year period, and below the median and below its benchmark, each for the past 3-, 5- and 10-year periods. The Board considered that the Portfolio's investment objective is to seek returns that are twice the inverse of the Portfolio's benchmark and that the Portfolio's underperformance relative to its peer universe and benchmark (the S&P 500 Index) for certain periods was consistent with its investment approach given the leveraged nature of the Portfolio and the positive market environment during the relevant periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm’s-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio’s assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio’s management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser’s sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio’s management fee schedule. The Trustees concluded that the Portfolio’s fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as “soft dollars”) as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica S&P 500 Index VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading "Hypothetical Expenses" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,168.00	$ 0.70	$ 1,024.10	$ 0.65	0.13%
Service Class	1,000.00	1,166.60	2.10	1,022.90	1.96	0.39

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio's net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica S&P 500 Index VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

3. INVESTMENT VALUATION (continued)

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels (“Levels”) of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM’s own assumptions used in determining the fair value of the Portfolio’s investments and derivative instruments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the “practical expedient” have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio’s investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio’s significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Derivative instruments: Centrally cleared or listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Over-the-counter (“OTC”) derivative contracts include forward, swap, swaption, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties’ creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case of interest rate swap and option contracts. The majority of OTC derivative products valued by the Portfolio using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy or Level 3 if inputs are unobservable.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS

The Portfolio's investment strategies allow the Portfolio to use various types of derivative contracts, including option contracts, swap agreements, futures contracts, and forward foreign currency contracts. Derivatives are investments whose value is primarily derived from underlying assets, indices or reference rates and may be transacted on an exchange or OTC.

Market Risk Factors: In pursuit of the Portfolio's investment strategies, the Portfolio may seek to use derivatives to increase or decrease its exposure to certain market risks, including:

Interest rate risk: Interest rate risk relates to the fluctuations in the value of fixed income securities due to changes in the prevailing levels of market interest rates.

Foreign exchange rate risk: Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in the currency exchange rates.

Equity risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Credit risk: Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Commodity risk: Commodity risk relates to the change in value of commodities or commodity indices as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

The Portfolio is also exposed to additional risks from investing in derivatives, such as liquidity and counterparty credit risk. Liquidity risk is the risk that the Portfolio will be unable to sell or close out the derivative in the open market in a timely manner. Counterparty credit

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

risk is the risk that the counterparty will not be able to fulfill its obligations to the Portfolio. Investing in derivatives may also involve greater risks than investing directly in the underlying assets, such as losses in excess of any initial investment and collateral received. In addition, there may be the risk that the change in value of the derivative contract does not correspond to the change in value of the underlying instrument.

The Portfolio's exposure to market risk factors and certain other associated risks are summarized by derivative type as follows:

Futures contracts: The Portfolio is subject to equity and commodity risk, interest rate risk, and foreign exchange rate risk in the normal course of pursuing its investment objective. The Portfolio uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into such contracts, the Portfolio is required to deposit with the broker, either in cash or in securities, an initial margin in an amount equal to a certain percentage of the contract amount. Subsequent payments (variation margin) are paid or received by the Portfolio, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the Portfolio. Upon entering into such contracts, the Portfolio bears the risk of equity and commodity prices, interest rates, or exchange rates moving unexpectedly, in which case, the Portfolio may not achieve the anticipated benefits of the futures contracts and may realize losses. With futures, there is minimal counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange.

Open futures contracts at June 30, 2023, if any, are listed within the Schedule of Investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

The following is a summary of the location and the Portfolio's fair values of derivative investments disclosed, if any, within the Statement of Assets and Liabilities, categorized by primary market risk exposure as of June 30, 2023.

Asset Derivatives

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts:						
Total distributable earnings (accumulated losses) [(A)] [(B)]	$ —	$ —	$ 62,667	$ —	$ —	$ 62,667
Total	**$ —**	**$ —**	**$ 62,667**	**$ —**	**$ —**	**$ 62,667**

(A) *May include exchange-traded derivatives which are not subject to a master netting arrangement, or another similar arrangement.*
(B) *Included within unrealized appreciation (depreciation) on futures contracts as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.*

The following is a summary of the location and the effect of derivative investments, if any, within the Statement of Operations, categorized by primary market risk exposure as of June 30, 2023.

Realized Gain (Loss) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ 355,752	$ —	$ —	$ 355,752
Total	**$ —**	**$ —**	**$ 355,752**	**$ —**	**$ —**	**$ 355,752**

Net Change in Unrealized Appreciation (Depreciation) on Derivative Instruments

Location	Interest Rate Contracts	Foreign Exchange Contracts	Equity Contracts	Credit Contracts	Commodity Contracts	Total
Futures contracts	$ —	$ —	$ 166,575	$ —	$ —	$ 166,575
Total	**$ —**	**$ —**	**$ 166,575**	**$ —**	**$ —**	**$ 166,575**

6. RISK EXPOSURES AND THE USE OF DERIVATIVE INSTRUMENTS (continued)

The following is a summary of the ending monthly average volume on derivative activity during the period ended June 30, 2023.

Futures contracts:	
Average notional value of contracts — long	$ 3,744,396

Collateral requirements: Collateral or margin requirements are set by the broker or exchange clearing house for exchange-traded derivatives (futures contracts, exchange-traded options, and exchange-traded swap agreements) while collateral terms are contract specific for OTC derivatives (forward foreign currency exchange contracts, OTC options, and OTC swap agreements). For OTC derivatives, under standard derivatives agreements, the Portfolio may be required to pledge collateral on derivatives to a counterparty if the Portfolio is in a net liability position, and receive collateral if in a net positive position. For financial reporting purposes, cash collateral that has been pledged by the Portfolio to cover obligations, if any, is reported in Cash collateral at broker within the Statement of Assets and Liabilities. Cash collateral that has been received by the Portfolio from a counterparty, if any, is reported separately in Cash collateral pledged at custodian and/or broker within the Statement of Assets and Liabilities. Non-cash collateral pledged to the Portfolio, if any, is disclosed within the Schedule of Investments.

Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has been made. Typically a counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Portfolio generally does not use non-cash collateral that it receives but may, absent default or certain other circumstances, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty.

To the extent amounts due to the Portfolio from its counterparties are not fully collateralized, contractually or otherwise, the Portfolio bears the risk of loss from counterparty non-performance. Additionally, to the extent the Portfolio has delivered collateral to a counterparty, the Portfolio bears the risk of loss from a counterparty in the event the counterparty fails to return such collateral. Counterparties may immediately terminate derivatives contracts if the Portfolio fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages. Collateral may not be required for all derivative contracts.

7. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio’s trading activity. Please reference the Portfolio’s prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio’s securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio’s securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio’s investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio’s investments, impair the Portfolio’s ability to satisfy redemption requests, and negatively impact the Portfolio’s performance.

Index fund risk: While the Portfolio seeks to track the performance of the S&P 500® Index (i.e., achieve a high degree of correlation with the index), the Portfolio’s return may not match the return of the index. The Portfolio incurs a number of operating expenses not applicable to the index, and incurs costs in buying and selling securities. In addition, the Portfolio may not be fully invested at times, generally as a result of cash flows into or out of the Portfolio or reserves of cash held by the Portfolio to meet redemptions. The Portfolio may attempt to replicate the index return by investing in fewer than all of the securities in the index, or in some securities not included in the index, potentially increasing the risk of divergence between the Portfolio’s return and that of the index.

7. RISK FACTORS (continued)

Passive strategy/index risk: The Portfolio is managed with a passive investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the index or of the actual securities comprising the index. This differs from an actively-managed fund, which typically seeks to outperform a benchmark index. As a result, the Portfolio's performance may be less favorable than that of a portfolio managed using an active investment strategy.The structure and composition of the index will affect the performance, volatility, and risk of the index and, consequently, the performance, volatility, and risk of the Portfolio.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

8. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM at an annual rate of 0.08% of daily average net assets.

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.14%	May 1, 2024
Service Class	0.39	May 1, 2024

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

8. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

For the 36-month period ended June 30, 2023, the balances available for recapture by TAM for the Portfolio are as follows:

	Amounts Available				
Class	**2020** [A]	**2021**	**2022**	**2023**	**Total**
Service Class	$ 15,491	$ 18,473	$ 15,224	$ 8,046	$ 57,234

[A] *For the six-month period of July 1, 2020 through December 31, 2020.*

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	**Rate**
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

9. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	**U.S. Government**	**Long-Term**	**U.S. Government**
$ 70,115,564	$ —	$ 17,806,786	$ —

10. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 468,616,304	$ 154,271,278	$ (18,785,158)	$ 135,486,120

11. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica S&P 500 Index VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and SSGA Funds Management, Inc. (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Trustees noted that the objective of the Portfolio, as an index fund, is to track, and not necessarily exceed, its benchmark index, and that unlike the Portfolio, the index is not subject to any expenses or transaction costs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe and below its benchmark, each for the past 1-, 3- and 5-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were below the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Trustees noted that the Portfolio's management fee schedule does not contain breakpoints and determined that, based on all of the information provided, breakpoints were not warranted at this time. The Board also considered the Sub-Adviser's sub-advisory fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,044.60	$ 4.21	$ 1,020.70	$ 4.16	0.83%
Service Class	1,000.00	1,043.60	5.47	1,019.40	5.41	1.08

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica Small/Mid Cap Value VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $6,993.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

Foreign equity securities: Securities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

3. INVESTMENT VALUATION (continued)

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Common Stocks	$ 35,600	$ —	$ —	$ —	$ 35,600
Total Borrowings	**$ 35,600**	**$ —**	**$ —**	**$ —**	**$ 35,600**

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Value investing risk: The prices of securities the sub-adviser believes are undervalued may not appreciate as anticipated or may go down. The value approach to investing involves the risk that stocks may remain undervalued, undervaluation may become more severe, or perceived undervaluation may actually represent intrinsic value. Value stocks as a group may be out of favor and underperform the overall equity market for a long period of time, for example, while the market favors "growth" stocks.

Small capitalization companies risk: The Portfolio will be exposed to additional risks as a result of its investments in the securities of small capitalization companies. Small capitalization companies may be more at risk than larger capitalization companies because,

6. RISK FACTORS (continued)

among other things, they may have limited product lines, operating history, market or financial resources, or because they may depend on limited management groups. Securities of small capitalization companies are generally more volatile than and may underperform larger capitalization companies, may be harder to sell at times and at prices the Portfolio managers believe appropriate and may offer greater potential for losses.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $100 million	0.790%
Over $100 million up to $350 million	0.780
Over $350 million up to $500 million	0.770
Over $500 million up to $750 million	0.750
Over $750 million up to $1 billion	0.745
Over $1 billion up to $1.5 billion	0.690
Over $1.5 billion up to $2 billion	0.680
Over $2 billion	0.670

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Effective May 1, 2023		
Initial Class	0.88%	May 1, 2024
Service Class	1.13	May 1, 2024
Prior to May 1, 2023		
Initial Class	0.89	
Service Class	1.14	

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 82,072,148	$ —	$ 97,913,588	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 455,633,590	$ 99,534,950	$ (31,537,828)	$ 67,997,122

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica Small/Mid Cap Value VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreements (each a “Sub-Advisory Agreement,” collectively the “Sub-Advisory Agreements” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and each of Systematic Financial Management, L.P. (“Systematic”) and Thompson, Siegel & Walmsley LLC (“TS&W”) (each a “Sub-Adviser” and collectively the “Sub-Advisers”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and each Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and each Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and each Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and each Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by each Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or any Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and each Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and each Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of each Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for each Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

MANAGEMENT AND SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL (continued)

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and (ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and each Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was below the median for its peer universe but above its benchmark, in each case for the past 1-, 3-, 5- and 10-year periods. The Board also noted that TS&W had commenced sub-advising the Portfolio's mid-cap sleeve and Systematic had continued sub-advising the Portfolio's small-cap sleeve pursuant to the Portfolio's current investment strategies on December 4, 2016.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Advisers for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fees and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the median for its peer group and in line with the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Advisers under the Management Agreement and each Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

MANAGEMENT AND SUB-ADVISORY AGREEMENTS — CONTRACT RENEWAL (continued)

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Advisers, the Board noted that the sub-advisory fees are the product of arm's-length negotiation between TAM and the applicable Sub-Adviser, which is not affiliated with TAM, and are paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or a Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered each Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that each Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fees paid to the Sub-Advisers in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Advisers from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Advisers from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Advisers is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Advisers participate in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Advisers may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Advisers. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and each Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica T. Rowe Price Small Cap VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	**Beginning Account Value January 1, 2023**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Ending Account Value June 30, 2023**	**Expenses Paid During Period (B)**	**Net Annualized Expense Ratio**
Initial Class	$ 1,000.00	$ 1,140.10	$ 4.35	$ 1,020.70	$ 4.11	0.82%
Service Class	1,000.00	1,139.00	5.67	1,019.50	5.36	1.07

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica T. Rowe Price Small Cap VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

There were no commissions recaptured during the period ended June 30, 2023 by the Portfolio.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

3. INVESTMENT VALUATION (continued)

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities and Master limited partnerships: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

Foreign equity securities: Securities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	**Less Than 30 Days**	**Between 30 & 90 Days**	**Greater Than 90 Days**	**Total**
Securities Lending Transactions					
Common Stocks	$ 3,422,940	$ —	$ —	$ —	$ 3,422,940
Total Borrowings	**$ 3,422,940**	**$ —**	**$ —**	**$ —**	**$ 3,422,940**

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Model and data risk: If quantitative models, algorithms or calculations (whether proprietary and developed by the sub-adviser or supplied by third parties) ("Models") or information or data supplied by third parties ("Data") prove to be incorrect or incomplete, any decisions made, in whole or part, in reliance thereon expose the Portfolio to additional risks. Models can be predictive in nature. The use of predictive Models has inherent risks. The success of relying on or otherwise using Models depends on a number of factors, including the validity, accuracy and completeness of the Model's development, implementation and maintenance, the Model's assumptions, factors, algorithms and methodologies, and the accuracy and reliability of the supplied historical or other Data. Models rely on, among other things, correct and complete Data inputs. If incorrect Data is entered into even a well-founded Model, the resulting information will be incorrect. However, even if Data is input correctly, Model prices may differ substantially from market prices, especially for securities with complex characteristics. Investments selected with the use of Models may perform differently than expected as a result of the design of the Model, inputs into the Model or other factors. There also can be no assurance that the use of Models will result in effective investment decisions for the Portfolio.

Growth stocks risk: Returns on growth stocks may not move in tandem with returns on other categories of stocks or the market as a whole. Growth stocks typically are particularly sensitive to market movements and may involve larger price swings because their market prices tend to reflect future expectations. When it appears those expectations may not be met, the prices of growth stocks typically fall. Growth stocks may also be more volatile because they often do not pay dividends. The values of growth stocks tend to go down when interest rates rise because the rise in interest rates reduces the current value of future cash flows. Growth stocks as a group may be out of favor and underperform the overall equity market for a long period of time, for example, while the market favors "value" stocks.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial

6. RISK FACTORS (continued)

resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $1 billion	0.78%
Over $1 billion up to $1.5 billion	0.77
Over $1.5 billion	0.76

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.93%	May 1, 2024
Service Class	1.18	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 161,753,351	$ —	$ 141,075,966	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS (continued)

purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 588,615,900	$ 164,130,511	$ (44,653,985)	$ 119,476,526

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the “Trustees” or the “Board”) held on June 14-15, 2023, the Board considered the renewal of the management agreement (the “Management Agreement”) between Transamerica Asset Management, Inc. (“TAM”) and Transamerica Series Trust, on behalf of Transamerica T. Rowe Price Small Cap VP (the “Portfolio”). The Board also considered the renewal of the investment sub-advisory agreement (the “Sub-Advisory Agreement” and together with the Management Agreement, the “Agreements”) for the Portfolio between TAM and T. Rowe Price Associates, Inc. (the “Sub-Adviser”).

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the “Independent Trustees”), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio’s expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio’s performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM’s senior management; the financial resources of TAM; TAM’s management oversight process; TAM’s and the Sub-Adviser’s responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio’s prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM’s investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds’ custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 1- and 10-year periods and below the median for the past 3- and 5-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was above its benchmark for the past 1- and 10-year periods and below its benchmark for the past 3- and 5-year periods.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee and the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were in line with the medians for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica TS&W International Equity VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratios and assumed rates of return of 5% per year before expenses, which are not the Portfolio’s actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,101.20	$ 4.48	$ 1,020.50	$ 4.31	0.86%
Service Class	1,000.00	1,099.80	5.78	1,019.30	5.56	1.11

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

Transamerica TS&W International Equity VP

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica TS&W International Equity VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Foreign currency denominated investments: The accounting records of the Portfolio are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are translated at the prevailing exchange rates in effect on the date of the respective transaction. The Portfolio combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include, foreign currency fluctuations between trade date and settlement date of investment security transactions, gains and losses on forward foreign currency contracts, and the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $459.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the actively traded NAV and no valuation adjustments are applied. Securities lending collateral is categorized in Level 1 of the fair value hierarchy.

3. INVESTMENT VALUATION (continued)

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

Securities lending: The Portfolio may lend securities to qualified financial institutions, brokers and dealers. State Street serves as securities lending agent to the Portfolio pursuant to a Securities Lending Agreement. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions. The lending of securities exposes the Portfolio to risks such as: the borrowers may fail to return the loaned securities or may not be able to provide additional collateral, the Portfolio may experience delays in recovery of the loaned securities or delays in access to collateral, or the Portfolio may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash, securities issued or guaranteed by the U.S. Government and irrevocable letters of credit issued by banks as collateral. The initial collateral received by the Portfolio is required to have a value of at least 102% of the current value of the loaned securities traded on U.S. exchanges, and a value of at least 105% for all other securities. Typically the lending agent is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. The lending agent has agreed to indemnify the Portfolio in the case of default of any securities borrower.

The Portfolio receives compensation for lending securities from interest or dividends earned on the cash, U.S. Government securities and irrevocable letters of credit held as collateral, less associated fees and expenses. Such income is reflected in Net income from securities lending within the Statement of Operations. Cash collateral received is invested in the State Street Navigator Securities Lending Trust—Government Money Market Portfolio.

The value of loaned securities and related cash and non-cash collateral outstanding at June 30, 2023, if any, are shown on a gross basis within the Schedule of Investments.

4. BORROWINGS AND OTHER FINANCING TRANSACTIONS (continued)

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type, and the remaining contractual maturity of those transactions as of June 30, 2023.

	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Less Than 30 Days	Between 30 & 90 Days	Greater Than 90 Days	Total
Securities Lending Transactions					
Common Stocks	$ 626,456	$ —	$ —	$ —	$ 626,456
Total Borrowings	**$ 626,456**	**$ —**	**$ —**	**$ —**	**$ 626,456**

5. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

Foreign investments risk: Investing in securities of foreign issuers or issuers with significant exposure to foreign markets involves additional risks. Foreign markets can be less liquid, less regulated, less transparent and more volatile than U.S. markets. The value of the Portfolio's foreign investments may decline, sometimes rapidly or unpredictably, because of factors affecting the particular issuer as well as foreign markets and issuers generally, such as unfavorable government actions, including nationalization, expropriation or confiscatory taxation, reduction of government or central bank support, tariffs and trade disruptions, sanctions, political or financial instability, social unrest or other adverse economic or political developments. Foreign investments may also be subject to different accounting practices and different regulatory, legal, auditing, financial reporting and recordkeeping standards and practices, and may be more difficult to value than investments in U.S. issuers. Certain foreign clearance and settlement procedures may result in an inability to execute transactions or delays in settlement.

Value investing risk: The prices of securities the sub-adviser believes are undervalued may not appreciate as anticipated or may go down. The value approach to investing involves the risk that stocks may remain undervalued, undervaluation may become more severe, or perceived undervaluation may actually represent intrinsic value. Value stocks as a group may be out of favor and underperform the overall equity market for a long period of time, for example, while the market favors "growth" stocks.

6. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/ principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $250 million	0.77%
Over $250 million up to $1 billion	0.74
Over $1 billion up to $2 billion	0.72
Over $2 billion up to $6 billion	0.69
Over $6 billion up to $8 billion	0.68
Over $8 billion	0.66

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.92%	May 1, 2024
Service Class	1.17	May 1, 2024

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

6. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

7. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 23,013,936	$ —	$ 13,693,918	$ —

8. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Portfolio's tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio's tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio's financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 173,676,469	$ 28,047,033	$ (12,639,293)	$ 15,407,740

9. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 ("ASU 2022-03"), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" ("Topic 820"). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio's financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica TS&W International Equity VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Thompson, Siegel & Walmsley LLC (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. In addition, TAM provided the Board with additional supplemental comparative fee, expense and performance information. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 3-, 5- and 10-year periods and below the median for the past 1-year period. The Board also noted that the performance of Service Class Shares of the Portfolio was below its benchmark for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Sub-Adviser had commenced sub-advising the Portfolio on May 1, 2013 pursuant to its current investment objective and investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was below the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the median for its peer group and peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Transamerica TS&W International Equity VP

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

Transamerica WMC US Growth VP

DISCLOSURE OF EXPENSES
(unaudited)

SHAREHOLDER EXPENSES

Portfolio shareholders may incur two types of costs: (i) transaction costs, including brokerage commissions on purchases and sales of portfolio shares; and (ii) ongoing costs, including management fees, and other portfolio expenses.

The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other portfolios.

The example is based on an investment of $1,000 invested at January 1, 2023, and held for the entire six-month period until June 30, 2023.

ACTUAL EXPENSES

The information in the table below provides information about actual account values and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $1,000 (for example, an $8,600 account value divided by $1,000 = $8.60), then multiply the result by the number in the appropriate column for your share class titled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The information in the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Portfolio versus other portfolios. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other portfolios.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Portfolio shares. Therefore, the information under the heading “Hypothetical Expenses” is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different portfolios. If any of these transaction costs were included, your costs would be higher. The expenses shown in the table do not reflect any fees that may be charged to you by brokers, financial intermediaries, or other financial institutions.

		Actual Expenses		Hypothetical Expenses (A)		
Class	Beginning Account Value January 1, 2023	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Ending Account Value June 30, 2023	Expenses Paid During Period (B)	Net Annualized Expense Ratio
Initial Class	$ 1,000.00	$ 1,296.50	$ 3.76	$ 1,021.50	$ 3.31	0.66%
Service Class	1,000.00	1,294.90	5.18	1,020.30	4.56	0.91

(A) *5% return per year before expenses.*

(B) *Expenses are calculated using the Portfolio’s net annualized expense ratio, as disclosed in the table, multiplied by the average account value for the period, multiplied by the number of days in the period (181 days), and divided by the number of days in the year (365 days).*

NOTES TO FINANCIAL STATEMENTS
At June 30, 2023
(unaudited)

1. ORGANIZATION

Transamerica Series Trust ("TST") is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). TST applies investment company accounting and reporting guidance. TST serves as a funding vehicle for variable life insurance, variable annuity, and group annuity products. Transamerica WMC US Growth VP (the "Portfolio") is a series of TST and is classified as diversified under the 1940 Act. The Portfolio currently offers two classes of shares, Initial Class and Service Class.

The only shareholders of the Portfolio are affiliated insurance company separate accounts and affiliated asset allocation portfolios. Contract holders of the variable life and annuity contracts are not shareholders of the Portfolio. For ease of reference, shareholders and contract holders are collectively referred to in this report as "shareholders."

This report must be accompanied or preceded by the Portfolio's current prospectus, which contains additional information about the Portfolio, including risks, as well as investment objectives and strategies.

Transamerica Asset Management, Inc. ("TAM") serves as investment manager for the Portfolio pursuant to an investment management agreement. TAM provides continuous and regular investment management services to the Portfolio. TAM supervises the Portfolio's investments, conducts its investment program and provides supervisory, compliance and administrative services to the Portfolio.

TAM currently acts as a "manager of managers" and has hired sub-advisers to furnish day-to-day investment advice and recommendations. TAM may, in the future, determine to provide all aspects of the day-to-day management of a Portfolio without the use of a sub-adviser. When acting as a manager of managers, TAM provides investment management services that include, without limitation, the design and development of the Portfolio and its investment strategies and the ongoing review and evaluation of those investment strategies including recommending changes in strategy where it believes appropriate or advisable; the selection of one or more sub-advisers for the Portfolio employing a combination of quantitative and qualitative screens, research, analysis and due diligence; negotiation of sub-advisory agreements and fees; oversight and monitoring of sub-advisers and recommending changes to sub-advisers where it believes appropriate or advisable; recommending portfolio combinations and liquidations where it believes appropriate or advisable; selection and oversight of transition managers, as needed; regular supervision of the Portfolio's investments; regular review and evaluation of sub-adviser performance; daily monitoring of the sub-advisers' buying and selling of securities for the Portfolio; regular review of holdings; ongoing trade oversight and analysis; regular monitoring to ensure adherence to investment process; regular calls and periodic on-site visits with sub-advisers; portfolio construction and asset allocation when using multiple sub-advisers for a Portfolio; risk management oversight and analysis; oversight of negotiation of investment documentation and agreements; design, development, implementation and regular monitoring of the valuation process; periodic due diligence reviews of pricing vendors and vendor methodology; design, development, implementation and regular monitoring of the compliance process; respond to regulatory inquiries and determine appropriate litigation strategy, as needed; review of proxies voted by sub-advisers; oversight of preparation and review of materials for meetings of the Portfolio's Board of Trustees (the "Board"), participation in these meetings and preparation of regular communications with the Board; oversight of preparation and review of prospectuses, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; oversight of other service providers to the Portfolio, such as the custodian, the transfer agent, the Portfolio's independent accounting firm and legal counsel; supervision of the performance of recordkeeping and shareholder relations functions for the Portfolio; and oversight of cash management services. TAM uses a variety of quantitative and qualitative tools to carry out its investment management services. TAM, not the Portfolio, is responsible for paying the sub-adviser(s) for their services, and sub-advisory fees are TAM's expense.

TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. These services include performing certain administrative services for the Portfolio and supervising and overseeing the administrative, clerical, recordkeeping and bookkeeping services provided to the Portfolio by State Street Bank and Trust Company ("State Street"), to whom TAM has outsourced the provision of certain sub-administration services. To the extent agreed upon by TAM and the Portfolio from time to time, TAM's supervisory and administrative services include, but are not limited to: monitoring and verifying the custodian's daily calculation of the Net Asset Values ("NAV"); shareholder relations functions; compliance services; valuation services; assisting in due diligence and in the oversight and monitoring of certain activities of sub-advisers and certain aspects of Portfolio investments; assisting with Portfolio combinations and liquidations; oversight of the preparation and filing, and review, of all returns and reports, in connection with federal, state and local taxes; oversight and review of regulatory reporting; supervising and coordinating the Portfolio's custodian and dividend disbursing agent and monitoring their services to the Portfolio; assisting the Portfolio in preparing reports to shareholders; acting as liaison with the Portfolio's independent public accountants and providing, upon request, analyses, fiscal year summaries and other audit related services; assisting in the preparation of agendas and supporting documents for and minutes of meetings of trustees and committees of trustees; assisting in the preparation of regular communications with the trustees; and providing personnel and office space, telephones and other office equipment as necessary in order for TAM to perform supervisory and administrative services to the

1. ORGANIZATION (continued)

Portfolio. The Portfolio pays certain fees and expenses to State Street for sub-administration services which are not administrative services covered by the management agreement with TAM or paid for through the management fees payable thereunder. For the period ended June 30, 2023, (i) the expenses paid to State Street for sub-administration services by the Portfolio are shown as a part of Other expenses within the Statement of Operations and (ii) the expenses payable to State Street for sub-administration services from the Portfolio are shown as part of Other accrued expenses within the Statement of Assets and Liabilities.

2. SIGNIFICANT ACCOUNTING POLICIES

In preparing the Portfolio's financial statements in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Portfolio.

Security transactions and investment income: Security transactions are accounted for on the trade date. Security gains and losses are calculated on a first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Portfolio is informed of the ex-dividend dates, net of foreign taxes. Non-cash dividends, if any, are recorded on the ex-dividend date at fair value. Interest income, if any, is recorded on the accrual basis from settlement date, net of foreign taxes. Fixed income premiums and discounts are amortized and/or accreted over the lives of the respective securities.

Multiple class operations, income, and expenses: Income, non-class specific expenses, and realized and unrealized gains and losses are allocated to each class daily based upon net assets. Each class bears its own specific expenses in addition to the allocated non-class specific expenses.

Distributions to shareholders: Distributions are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

Foreign taxes: The Portfolio may be subject to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Portfolio may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Portfolio accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Portfolio invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

Commission recapture: The sub-adviser(s), to the extent consistent with the best execution and usual commission rate policies and practices, may elect to place security transactions of the Portfolio with broker/dealers with which TST has established a commission recapture program. A commission recapture program is any arrangement under which a broker/dealer applies a portion of the commissions received by such broker/dealer on the security transactions to the Portfolio. In no event will commissions, paid by the Portfolio, be used to pay expenses that would otherwise be borne by any other portfolios within TST, or by any other party.

Commissions recaptured are included within Net realized gain (loss) within the Statement of Operations. For the period ended June 30, 2023, commissions recaptured are $7,321.

Indemnification: In the normal course of business, the Portfolio enters into contracts that contain a variety of representations that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio and/or its affiliates that have not yet occurred. However, based on experience, the Portfolio expects the risk of loss to be remote.

3. INVESTMENT VALUATION

TAM has been designated as the Portfolio's valuation designee pursuant to Rule 2a-5 under the 1940 Act with responsibility for fair valuation subject to oversight by the Portfolio's Board of Trustees. The net asset value of the Portfolio is computed as of the official close of the New York Stock Exchange ("NYSE") each day the NYSE is open for business.

TAM utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels ("Levels") of inputs of the fair value hierarchy are defined as follows:

Level 1—Unadjusted quoted prices in active markets for identical securities.

3. INVESTMENT VALUATION (continued)

Level 2—Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3—Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include TAM's own assumptions used in determining the fair value of the Portfolio's investments.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. Certain investments that are measured at fair value using NAV per share, or its equivalent, using the "practical expedient" have not been classified in the fair value Levels. The hierarchy classification of inputs used to value the Portfolio's investments at June 30, 2023, is disclosed within the Investment Valuation section of the Schedule of Investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material.

Fair value measurements: Descriptions of the valuation techniques applied to the Portfolio's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities: Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or Level 3 if inputs are unobservable.

*Foreign equity securities: S*ecurities in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, or ETFs and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Repurchase agreements: Repurchase agreements are valued at cost, which approximates fair value. To the extent the inputs are observable and timely, the values are generally categorized in Level 2 of the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Real estate investment trusts ("REITs"): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. Distributions received by REITs are classified at management's estimate of the dividend income, return of capital and capital gains. Estimates are based on information available at year-end, which includes the previous fiscal year's classification. The actual amounts of dividend income, return of capital, and capital gains are only determined by each REIT after the fiscal year end and may differ from the estimated amounts. Upon notification from the REITs, some of the distributions received may be re-classified and recorded as a return of capital or capital gains. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2023, if any, are identified within the Schedule of Investments.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Portfolio may engage in borrowing transactions as a means of raising cash to satisfy redemption requests, for other temporary or emergency purposes or, to the extent permitted by its investment policies, to raise additional cash to be invested in other securities or instruments. When the Portfolio invests borrowing proceeds in other securities, the Portfolio will bear the risk that the market value of the securities in which such proceeds are invested goes down and is insufficient to repay the borrowed proceeds. The Portfolio may borrow on a secured or on an unsecured basis. If the Portfolio enters into a secured borrowing arrangement, a portion of the Portfolio's assets will be used as collateral. The 1940 Act requires the Portfolio to maintain asset coverage of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Portfolio's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Although complying with this requirement has the effect of limiting the amount that the Portfolio may borrow, it does not otherwise mitigate the risks of entering into borrowing transactions.

Interfund lending: The Portfolio, along with other funds and portfolios advised by TAM, may participate in an interfund lending program pursuant to exemptive relief granted by the Securities and Exchange Commission on January 18, 2017. This program allows the Portfolio to lend to and borrow from other funds and portfolios advised by TAM. Interfund lending transactions are subject to the conditions of the exemptive relief which places limits on the amount of lending or borrowing a Portfolio may participate in under the program. Interest earned or paid on an interfund lending transaction will be based on the average of certain current market rates. For the period ended June 30, 2023, the Portfolio has not utilized the program.

Repurchase agreements: In a repurchase agreement, the Portfolio purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Portfolio's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Portfolio will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Portfolio and its counterparties that provide for the net settlement of all transactions and collateral with the Portfolio, through a single payment, in the event of default or termination. Amounts presented within the Schedule of Investments, and as part of Repurchase agreements, at value within the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected within the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2023.

Repurchase agreements at June 30, 2023, if any, are included within the Schedule of Investments and Statement of Assets and Liabilities.

6. RISK FACTORS

Investing in the Portfolio involves certain key risks related to the Portfolio's trading activity. Please reference the Portfolio's prospectus for a more complete discussion of the following risk(s), as well as other risks of investing in the Portfolio.

Market risk: The market prices of the Portfolio's securities or other assets may go up or down, sometimes rapidly or unpredictably, due to general market conditions, overall economic trends or events, inflation, changes in interest rates, governmental actions or interventions, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by tariffs, trade disputes or other factors, political developments, armed conflicts, economic sanctions, cybersecurity events, investor sentiment, public health events such as the spread of infectious disease, and other factors that may or may not be related to the issuer of the security or other asset. If the market prices of the Portfolio's securities and assets fall, the value of your investment in the Portfolio could go down.

Economies and financial markets throughout the world are increasingly interconnected. Events or circumstances in one or more countries or regions could be highly disruptive to, and have profound impacts on, global economies or markets. As a result, whether or not the Portfolio invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the Portfolio's investments may go down.

In recent years, the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, the Russian invasion of Ukraine and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These events could be prolonged and could continue to adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance.

6. RISK FACTORS (continued)

Growth stocks risk: Returns on growth stocks may not move in tandem with returns on other categories of stocks or the market as a whole. Growth stocks typically are particularly sensitive to market movements and may involve larger price swings because their market prices tend to reflect future expectations. When it appears those expectations may not be met, the prices of growth stocks typically fall. Growth stocks may also be more volatile because they often do not pay dividends. The values of growth stocks tend to go down when interest rates rise because the rise in interest rates reduces the current value of future cash flows. Growth stocks as a group may be out of favor and underperform the overall equity market for a long period of time, for example, while the market favors "value" stocks.

Large capitalization companies risk: The Portfolio's investments in larger, more established companies may underperform other segments of the market because they may be less responsive to competitive challenges and opportunities and unable to attain high growth rates during periods of economic expansion.

Real estate investment trusts ("REITs") risk: Investing in real estate investment trusts ("REITs") involves unique risks. When the Portfolio invests in REITs, it is subject to risks generally associated with investing in real estate. A REIT's performance depends on the types and locations of the properties it owns, how well it manages those properties and cash flow. REITs may have limited financial resources, may trade less frequently and in limited volume, may engage in dilutive offerings, and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the Portfolio will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. U.S. REITs are subject to a number of highly technical tax-related rules and requirements; and a U.S. REIT's failure to qualify for the favorable U.S. federal income tax treatment generally available to U.S. REITs could result in corporate-level taxation, significantly reducing the return on an investment to the Portfolio.

7. FEES AND OTHER AFFILIATED TRANSACTIONS

TST serves as a funding vehicle for certain affiliated asset allocation portfolios and certain affiliated separate accounts of Transamerica Life Insurance Company ("TLIC"), and Transamerica Financial Life Insurance Company.

TAM, the Portfolio's investment manager, is directly owned by TLIC and AUSA Holding, LLC ("AUSA"), both of which are indirect, wholly owned subsidiaries of Aegon NV. TLIC is owned by Commonwealth General Corporation ("Commonwealth"). Commonwealth and AUSA are wholly owned by Transamerica Corporation (DE). Transamerica Corporation (DE) is wholly owned by Aegon International B.V., which is wholly owned by Aegon NV, a Netherlands corporation, and a publicly traded international insurance group.

Transamerica Fund Services, Inc. ("TFS") is the Portfolio's transfer agent. Transamerica Capital, Inc. ("TCI") is the Portfolio's distributor/principal underwriter. TAM, TFS, and TCI are affiliates of Aegon NV.

Certain officers and trustees of the Portfolio are also officers and/or trustees of TAM, TFS and TCI. No interested trustee who is deemed an interested person due to current or former service with TAM or an affiliate of TAM receives compensation from the Portfolio. The Portfolio does pay non-interested persons (independent trustees), as disclosed in Trustee and CCO fees within the Statement of Operations.

Investment management fees: TAM serves as the Portfolio's investment manager, performing administration as well as investment advisory services. TAM renders investment advisory, supervisory, and administration services under an investment management agreement and the Portfolio pays a single management fee, which is reflected in Investment management fees within the Statement of Operations.

The Portfolio pays a management fee to TAM based on daily average net assets at the following rates:

Breakpoints	Rate
First $500 million	0.6800%
Over $500 million up to $800 million	0.6700
Over $800 million up to $1 billion	0.6575
Over $1 billion up to $2 billion	0.6130
Over $2 billion up to $3 billion	0.6050
Over $3 billion up to $4 billion	0.5900
Over $4 billion up to $5 billion	0.5750
Over $5 billion up to $7 billion	0.5700
Over $7 billion	0.5500

NOTES TO FINANCIAL STATEMENTS (continued)
At June 30, 2023
(unaudited)

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

TAM has contractually agreed to waive fees and/or reimburse Portfolio expenses to the extent that the total operating expenses excluding, as applicable, acquired fund fees and expenses, interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, extraordinary expenses, reorganization expenses and other expenses not incurred in the ordinary course of the Portfolio's business, exceed the following stated annual operating expense limits to the Portfolio's daily average net assets. To the extent an expense limit changed during the period, the prior limit is also listed below. The expenses waived and/or reimbursed, if any, are included in Expenses waived and/or reimbursed within the Statement of Operations.

	Operating Expense Limit	Operating Expense Limit Effective Through
Initial Class	0.74%	May 1, 2025
Service Class	0.99	May 1, 2025

TAM is permitted to recapture amounts contractually waived and/or reimbursed to a class during any of the 36 months from the date on which TAM waived fees and/or reimbursed expenses for the class. A class may recapture and reimburse TAM only if such amount does not cause, on any particular business day of the Portfolio, the class's total annual operating expenses (after the recapture is taken into account) to exceed the Operating Expense Limits or any other lower limit then in effect. Amounts recaptured, if any, by TAM for the period ended June 30, 2023 are disclosed in Recapture of previously waived and/or reimbursed fees within the Statement of Operations.

TAM, on a voluntary basis and in addition to the contractual operating expense limits in effect, from time to time may waive and/or reimburse expenses of the Portfolio, or any classes thereof, to such level(s) as the Trust's officers have determined or may reasonably determine from time to time. Any such voluntary waiver or expense reimbursement may be discontinued by TAM at any time. These amounts are not subject to recapture by TAM.

As of June 30, 2023, there are no amounts available for recapture by TAM.

Distribution and service fees: TST has a distribution plan ("Distribution Plan") pursuant to Rule 12b-1 under the 1940 Act. Pursuant to the Distribution Plan, TST entered into a distribution agreement with TCI as the Portfolio's distributor.

The Distribution Plan requires the Portfolio to pay distribution fees to TCI as compensation for various distribution activities, not as reimbursement for specific expenses. Under the Distribution Plan and distribution agreement, TCI, on behalf of the Portfolio, is authorized to pay various service providers, as direct payment for expenses incurred in connection with distribution of the Portfolio's shares.

The fee on the Service Class shares is paid to the insurance companies for providing services and account maintenance for the policyholders who invest in the variable insurance products which invest in the Service Class shares. TCI has determined that it will not seek payment for the distribution expenses incurred by the Portfolio with respect to the Initial Class shares before May 1, 2024. Prior to TCI seeking distribution expenses on Initial Class shares, policy and contract owners will be notified in advance. The Portfolio will pay fees relating to Service Class shares. The distribution and service fees are included in Distribution and service fees within the Statement of Operations.

The Portfolio is authorized under the Distribution Plan to pay fees to TCI based on daily average net assets of each class up to the following annual rates:

Class	Rate
Initial Class	0.15%
Service Class	0.25

Transfer agent costs: TFS provides transfer agency services under an intercompany agreement with TAM. TFS has outsourced the provision of certain sub-transfer agency services to SS&C Technology Holdings, Inc ("SS&C"). The Portfolio does not pay a separate transfer agent fee to TAM or TFS but does pay certain expenses to SS&C related to applicable sub-transfer agency services. For the period ended June 30, 2023, (i) the expenses paid to SS&C by the Portfolio are referred to as Transfer agent costs and are included within the Statement of Operations and (ii) the expenses payable to SS&C by the Portfolio are referred to as Transfer agent costs within the Statement of Assets and Liabilities.

7. FEES AND OTHER AFFILIATED TRANSACTIONS (continued)

Brokerage commissions: The Portfolio incurred no brokerage commissions on security transactions placed with affiliates of the investment manager or sub-adviser(s) for the period ended June 30, 2023.

8. PURCHASES AND SALES OF SECURITIES

For the period ended June 30, 2023, the cost of securities purchased and proceeds from securities sold (excluding short-term securities) are as follows:

Purchases of Securities		Sales/Maturities of Securities	
Long-Term	U.S. Government	Long-Term	U.S. Government
$ 1,678,889,546	$ —	$ 977,066,362	$ —

9. FEDERAL INCOME TAXES AND DISTRIBUTIONS TO SHAREHOLDERS

The Portfolio has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The Portfolio recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The Portfolio’s tax returns remain subject to examination by the Internal Revenue Service and state tax authorities three years from the date of filing for federal purposes and four years from the date of filing for state purposes. Management has evaluated the Portfolio’s tax provisions taken for all open tax years, and has concluded that no provision for income tax is required in the Portfolio’s financial statements. If applicable, the Portfolio recognizes interest accrued related to unrecognized tax benefits in relation to interest and penalties expense in Other within the Statement of Operations. The Portfolio identifies its major tax jurisdictions as U.S. Federal, the state of Colorado, and foreign jurisdictions where the Portfolio makes significant investments; however, the Portfolio is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. Distributions are determined in accordance with income tax regulations, which may differ from GAAP.

As of June 30, 2023, the approximate cost for U.S. federal income tax purposes, and the aggregate gross/net unrealized appreciation (depreciation) in the value of investments (including securities sold short and derivatives, if any) are as follows:

Cost	Gross Appreciation	Gross (Depreciation)	Net Appreciation (Depreciation)
$ 3,675,489,841	$ 1,294,819,574	$ (73,782,030)	$ 1,221,037,544

10. NEW ACCOUNTING PRONOUNCEMENT

In June 2022, the Financial Accounting Standards Board issued Accounting Standards Update No. 2022-03 (“ASU 2022-03”), “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (“Topic 820”). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. Management is currently evaluating the implications, if any, of the additional requirements and their impact on the Portfolio’s financial statements.

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL

At a meeting of the Board of Trustees of Transamerica Series Trust (the "Trustees" or the "Board") held on June 14-15, 2023, the Board considered the renewal of the management agreement (the "Management Agreement") between Transamerica Asset Management, Inc. ("TAM") and Transamerica Series Trust, on behalf of Transamerica WMC US Growth VP (the "Portfolio"). The Board also considered the renewal of the investment sub-advisory agreement (the "Sub-Advisory Agreement" and together with the Management Agreement, the "Agreements") for the Portfolio between TAM and Wellington Management Company LLP (the "Sub-Adviser").

Following its review and consideration, the Board determined that the terms of the Management Agreement and Sub-Advisory Agreement were reasonable and that the renewal of each of the Agreements was in the best interests of the Portfolio and the contract holders invested in the Portfolio. The Board, including the independent members of the Board (the "Independent Trustees"), unanimously approved the renewal of each of the Agreements through June 30, 2024.

Prior to reaching their decision, the Trustees requested and received from TAM and the Sub-Adviser certain information. They then reviewed such information as they deemed reasonably necessary to evaluate the Agreements, including information they had previously received from TAM and the Sub-Adviser as part of their regular oversight of the Portfolio, and knowledge they gained over time through meeting with TAM and the Sub-Adviser. Among other materials, the Trustees considered comparative fee, expense and performance information prepared by Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of mutual fund performance information, as well as fee, expense and profitability information prepared by TAM. To the extent applicable, the Trustees considered information about fees and performance of comparable funds and/or accounts managed by the Sub-Adviser. The Board also considered reductions to the Portfolio's expense limits, if any, that took effect after the last renewal of the Agreements. In their review, the Trustees also sought to identify instances in which the Portfolio's performance, fees, total expenses and/or profitability appeared to be outliers within its respective peer group or other comparative metrics, and sought to understand the reasons for such comparative positions.

In their deliberations, the Independent Trustees met privately without representatives of TAM or the Sub-Adviser present and were represented throughout the process by their independent legal counsel. In considering the proposed continuation of each of the Agreements, the Trustees evaluated and weighed a number of considerations that they believed to be relevant in light of the legal advice furnished to them by counsel, including independent legal counsel, and made a decision in the exercise of their own business judgment. They based their decisions on the considerations discussed below, among others, although they did not identify any particular consideration or item of information that was controlling of their decisions, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of the Services Provided

The Board considered the nature, extent and quality of the services provided by TAM and the Sub-Adviser to the Portfolio in the past and the services anticipated to be provided in the future. The Board also considered the investment approach for the Portfolio; the experience, capability and integrity of TAM's senior management; the financial resources of TAM; TAM's management oversight process; TAM's and the Sub-Adviser's responsiveness to any questions by the Trustees; and the professional qualifications and compensation program of the portfolio management team of the Sub-Adviser. The Trustees noted that they receive, on a quarterly basis, an execution analysis from Capital Institutional Services, Inc. (CAPIS), an independent provider of trade analyses, for the Sub-Adviser and a comparison of trading results against a peer universe of managers.

The Board also considered the continuous and regular investment management and other services provided by TAM, when acting as a manager of managers, for the portion of the management fee it retains from the Portfolio after payment of the sub-advisory fees. The Board noted that the investment management and other services provided by TAM include the design, development and ongoing review and evaluation of the Portfolio and its investment strategy; the selection, oversight and monitoring of one or more investment sub-advisers to perform certain duties with respect to the Portfolio; ongoing portfolio trading oversight and analysis; risk management oversight and analysis; design, development, implementation and ongoing review and evaluation of a process for the valuation of Portfolio investments; design, development, implementation and ongoing review and evaluation of a compliance program for the Portfolio; design, development, implementation and ongoing review and evaluation of a process for the voting of proxies and exercise of rights to consent to corporate action for Portfolio investments; participation in Board meetings and oversight of preparation of materials for the Board, including materials for Board meetings and regular communications with the Board; oversight of preparation of the Portfolio's prospectus, statement of additional information, shareholder reports and other disclosure materials and regulatory filings for the Portfolio; and ongoing cash management services for the Portfolio. The Board considered that TAM's investment management services also include the provision of supervisory and administrative services to the Portfolio. The Board also noted that TAM, as part of the services it provides to all Transamerica mutual funds, including the Portfolio, oversees the services provided by the funds' custodian, transfer agent, independent accountant and legal counsel and supervises the performance of the recordkeeping and contract holder service functions of the funds.

Investment Performance

In addition, the Board considered the short- and longer-term performance of the Portfolio in light of its investment objective, policies and strategies, including relative performance against (i) a peer universe of comparable mutual funds, as prepared by Broadridge, and

MANAGEMENT AND SUB-ADVISORY AGREEMENT — CONTRACT RENEWAL (continued)

(ii) the Portfolio's benchmark, in each case for various trailing periods ended December 31, 2022. Based on these considerations, the Board determined that TAM and the Sub-Adviser can provide investment and related services that are appropriate in scope and extent in light of the Portfolio's investment objectives, policies and strategies and operations, the competitive landscape of the investment company business and investor needs. The Board's conclusions as to the Portfolio's performance are summarized below. For purposes of its review, the Board generally used the performance of Service Class Shares. In describing the Portfolio's performance relative to its peer universe, the summary conclusions characterize performance for the relevant periods in relation to whether it was "above," "below" or "in line with" the peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, performance is described as "above" the median if the Portfolio's performance ranked anywhere in the first or second quintiles, as "below" the median if it ranked anywhere in the fourth or fifth quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise return was somewhat above or somewhat below the precise median return).

When considering the Portfolio's performance, the Trustees considered any representations made by TAM regarding the appropriateness of certain peer groups and benchmarks. They recognized that performance reflects a snapshot of a period as of a specific date, and that consideration of performance data for a different period could generate significantly different performance results. The Trustees also recognized that even longer-term performance can be negatively affected by performance over a short-term period when that short-term performance is significantly below the performance of the comparable benchmark or universe of peer funds.

The Board noted that the performance of Service Class Shares of the Portfolio was above the median for its peer universe for the past 5-year period and in line with the median for the past 1-, 3- and 10-year periods. The Board also noted that the performance of Service Class Shares of the Portfolio was below its benchmark for the past 1-, 3-, 5- and 10-year periods. The Board noted that the Portfolio's sub-adviser had commenced sub-advising the Portfolio on July 1, 2014 pursuant to its current investment strategies.

Management and Sub-Advisory Fees and Total Expense Ratio

The Board considered the management fee and total expense ratio of the Portfolio, including information provided by Broadridge comparing the management fee and total expense ratio of the Portfolio to the management fees and total expense ratios of comparable investment companies in both a peer group and broader peer universe compiled by Broadridge. The Board's conclusions as to the Portfolio's management fee and total expense ratio are summarized below. For purposes of its review, the Board generally used the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares. In describing the Portfolio's management fee and total expense ratio relative to its peer group and peer universe, the summary conclusions characterize management fees and total expense ratios for the relevant periods in relation to whether they were "above," "below" or "in line with" the peer group or peer universe median and do so using quintile rankings prepared by Broadridge. For simplicity, management fees and total expense ratios are described as "above" the median if the Portfolio's management fee or total expense ratio ranked anywhere in the fourth or fifth quintiles, as "below" the median if it ranked anywhere in the first or second quintiles, or "in line with" the median if it ranked anywhere in the third quintile (*i.e.*, even if its precise management fee or total expense ratio was somewhat above or somewhat below the precise median management fee or total expense ratio).

The Board also considered the fees charged by the Sub-Adviser for sub-advisory services, as well as the portion of the Portfolio's management fee retained by TAM following payment of the sub-advisory fee and how the portion of the contractual management fee retained by TAM at a specified asset level compared to the portions retained by other investment advisers managing mutual funds with similar investment strategies as calculated by an independent provider of information.

The Board noted that the Portfolio's contractual management fee was in line with the medians for its peer group and peer universe and that the actual total expenses (*i.e.*, expenses reflecting any waivers and/or reimbursements) of Service Class Shares of the Portfolio were above the median for its peer group and below the median for its peer universe. The Trustees also considered that TAM has entered into an expense limitation arrangement with the Portfolio, which may result in TAM waiving fees for the benefit of contract holders.

On the basis of these considerations, together with the other information it considered, the Board determined that the management and sub-advisory fees to be received by TAM and the Sub-Adviser under the Management Agreement and Sub-Advisory Agreement are reasonable in light of the services provided.

Cost of Services Provided and Level of Profitability

The Board reviewed information provided by TAM about the cost of providing and procuring fund management services, as well as the costs of the provision of administration, transfer agency and other services, to the Portfolio and to Transamerica Series Trust as a whole by TAM and its affiliates. The Board considered the profitability of TAM and its affiliates in providing these services for the Portfolio and Transamerica Series Trust as a whole. The Trustees recognized the competitiveness of the mutual fund industry and the importance of an investment adviser's long-term profitability, including for maintaining company and management stability and accountability.

The Board also considered the allocation methodology used for calculating the profitability of TAM and its affiliates. The Board noted that the revenue and expense allocation methodology used by TAM to estimate its profitability with respect to its relationship with the

Portfolio had been reviewed previously by an independent consultant. The Trustees considered that TAM reported that it had not made material changes to this methodology, and that the methodology had been applied consistently for the Portfolio.

With respect to the Sub-Adviser, the Board noted that the sub-advisory fee is the product of arm's-length negotiation between TAM and the Sub-Adviser, which is not affiliated with TAM, and is paid by TAM and not the Portfolio. As a result, the Board focused on the profitability of TAM and its affiliates with respect to the Portfolio.

Based on this information, the Board determined that the profitability of TAM and its affiliates from their relationships with the Portfolio was not excessive.

Economies of Scale

The Board considered economies of scale with respect to the management of the Portfolio, whether the Portfolio had appropriately benefited from any economies of scale and whether there was the potential for realization of any future economies of scale. The Board also considered the existence of economies of scale with respect to management of the Transamerica mutual funds overall and the extent to which the Portfolio benefited from any economies of scale. The Board recognized that, as the Portfolio's assets increase, any economies of scale realized by TAM or the Sub-Adviser may not directly correlate with each other or with any economies of scale that might be realized by the Portfolio. The Board considered the Portfolio's management fee schedule and the existence of breakpoints and also considered the extent to which TAM shared economies of scale, if any, with the Portfolio through undertakings to limit or reimburse Portfolio expenses and to invest in maintaining and developing its capabilities and services. The Board also considered the Sub-Adviser's sub-advisory fee schedule and the existence of breakpoints, if any, and how such breakpoints relate to any breakpoints in the Portfolio's management fee schedule. The Board considered that the Sub-Adviser's sub-advisory fees would be based on the combined assets of multiple funds. The Trustees concluded that the Portfolio's fee structure reflected an appropriate sharing of any efficiencies or economies of scale to date and noted that they will have the opportunity to periodically reexamine the appropriateness of the management fee payable to TAM and the fee paid to the Sub-Adviser in light of any economies of scale experienced in the future.

Benefits to TAM, its Affiliates and/or the Sub-Adviser from their Relationships with the Portfolio

The Board considered other benefits derived by TAM, its affiliates, and/or the Sub-Adviser from their relationships with the Portfolio. The Board noted that TAM does not receive benefits from research obtained with commissions paid to broker-dealers for portfolio transactions (commonly referred to as "soft dollars") as a result of its relationship with the Portfolio and that TAM believes the use of soft dollars by the Sub-Adviser is generally appropriate and in the best interests of the Portfolio. The Board also noted that the Sub-Adviser participates in a brokerage program pursuant to which a portion of brokerage commissions paid by the Portfolio is recaptured for the benefit of the Portfolio and the contract holders, thus limiting the amount of soft dollar arrangements the Sub-Adviser may engage in with respect to the Portfolio's brokerage transactions.

Other Considerations

The Board noted that TAM has made a substantial commitment to the recruitment and retention of high quality personnel and maintains the financial, compliance and operational resources reasonably necessary to manage the Portfolio in a professional manner that is consistent with the best interests of the Portfolio and the contract holders. In this regard, the Board favorably considered the procedures and policies TAM has in place to enforce compliance with applicable laws and regulations and oversee the portfolio management activities of the Sub-Adviser. The Board also noted that TAM has made an entrepreneurial commitment and undertaken certain business risks with respect to the management and success of the Portfolio.

Conclusion

After consideration of the factors described above, as well as other factors, the Trustees, including the Independent Trustees, concluded that the renewal of the Management Agreement and the Sub-Advisory Agreement was in the best interests of the Portfolio and the contract holders and voted to approve the renewal of the Agreements.

LIQUIDITY RISK MANAGEMENT PROGRAM

(unaudited)

The Securities and Exchange Commission adopted Rule 22e-4 under the Investment Company Act of 1940, as amended (the “Liquidity Rule”) to promote effective liquidity risk management throughout the open-end investment company industry, thereby reducing the risk that funds will be unable to meet their redemption obligations and mitigating dilution of the interests of fund shareholders. The series of Transamerica Series Trust (the “Trust”), excluding Transamerica BlackRock Government Money Market VP (for purposes of this section only, the “Portfolios”), have adopted and implemented a liquidity risk management program pursuant to the Liquidity Rule (the “Program”). The Board of Trustees of the Trust (the “Board”) has appointed Transamerica Asset Management, Inc. (“TAM”), the investment manager to the Portfolios, as the Program administrator for the Portfolios. TAM has established a Liquidity Risk Management Committee (the “Committee”) to manage the Program for the Portfolios, including oversight of the liquidity risk management process, reporting to the Board, and reviewing the Program’s effectiveness.

The Board met on March 8-9, 2023 (the “Meeting”) to review the Program with respect to the Portfolios, pursuant to the Liquidity Rule. At the Meeting, the Committee provided the Board with a written report that addressed the operation of the Program during the 2022 reporting period, and assessed the Program’s adequacy and effectiveness, including material changes to the Program (the “Report”). The Report covered the period from January 1, 2022 through December 31, 2022 (the “Program Reporting Period”). The Report described the Program’s liquidity classification methodology. The Report noted that the Portfolios utilize analysis from a third-party liquidity metrics service, which takes into account a variety of factors including market, trading and other investment specific considerations. The Report also described the Committee’s methodology in determining whether a Highly Liquid Investment Minimum (a “HLIM”) is necessary and noted that, given the composition of the Portfolios’ holdings, a HLIM was not currently required for the Portfolios in the Trust. The Report noted there were no material changes to the classification methodology during the Program Reporting Period. The Report also noted that the Program includes provisions reasonably designed to comply with the 15% limit on illiquid investments.

The Report noted that the Program (a) complied with the key factors for consideration under the Liquidity Rule for monitoring the adequacy and effectiveness of the Program and (b) on a periodic basis assesses each Portfolio’s liquidity risk based on a variety of factors including: (1) the Portfolio’s investment strategy and portfolio liquidity during normal and reasonably foreseeable stressed conditions, (2) cash flow projections during normal and reasonably foreseeable stressed conditions and (3) holdings of cash and cash equivalents, borrowings and other funding sources. The Report concluded that the Program is operating effectively and is reasonably designed to assess and manage the Portfolios’ liquidity risk pursuant to the requirements of the Liquidity Rule.

PROXY VOTING POLICIES AND PROCEDURES AND QUARTERLY PORTFOLIO HOLDINGS

(unaudited)

A description of Transamerica Series Trust's (the "Trust") proxy voting policies and procedures is available in the Statement of Additional Information of the Portfolios, available without charge upon request by calling 1-800-851-9777 (toll free) or on the Securities and Exchange Commission's ("SEC") website at http://www.sec.gov.

In addition, the Portfolios are required to file Form N-PX, with their complete proxy voting records for the most recent 12 months ended June 30th, no later than August 31st of each year. The Form is available without charge: (1) on the Transamerica Funds website at https://www.transamerica.com/sites/default/files/files/e070d/TST%20N-PX%202021.pdf; and (2) on the SEC's website at http://www.sec.gov.

Each fiscal quarter, the Portfolios, except Transamerica BlackRock Government Money Market VP, will file with the SEC a complete schedule of their monthly portfolio holdings on Form N-PORT. The Portfolios' holdings as of the end of the third month of every fiscal quarter, as reported on Form N-PORT, will be publicly available on the SEC's website at http://www.sec.gov within 60 days of the end of the fiscal quarter.

On a monthly basis, Transamerica BlackRock Government Money Market VP will file with the SEC portfolio holdings information on Form N-MFP2. A complete schedule of portfolio holdings is also available at www.tranasmercia.com.

You may also visit the Trust's website at www.transamericaseriestrust.com for this and other information about the Portfolios and the Trust.

Important Notice Regarding Delivery of Shareholder Documents

Every year we provide shareholders informative materials such as the Transamerica Series Trust Annual Report, the Transamerica Series Trust Prospectus, and other required documents that keep you informed regarding your Portfolios. To the extent provided by mail, Transamerica Series Trust will only send one piece per mailing address, a method that saves your Portfolios money by reducing mailing and printing costs. ***We will continue to do this unless you tell us not to.*** To elect to receive individual mailings, simply call a Transamerica Customer Service Representative toll free at 1-888-233-4339, 8 a.m. to 7 p.m. Eastern Time, Monday-Friday. Your request will take effect within 30 days.

NOTICE OF PRIVACY POLICY

(unaudited)

Your privacy is very important to us. We want you to understand what information we collect and how we use it. We collect and use "nonpublic personal information" in connection with providing our customers with a broad range of financial products and services as effectively and conveniently as possible. We treat nonpublic personal information in accordance with our Privacy Policy.

What Information We Collect and From Whom We Collect It

We may collect nonpublic personal information about you from the following sources:

- Information we receive from you on applications or other forms, such as your name, address, and account number;
- Information about your transactions with us, our affiliates, or others, such as your account balance and purchase/redemption history; and
- Information we receive from non-affiliated third parties, including consumer reporting agencies.

What Information We Disclose and To Whom We Disclose It

We do not disclose any nonpublic personal information about current or former customers to anyone without their express consent, except as permitted by law. We may disclose the nonpublic personal information we collect, as described above, to persons or companies that perform services on our behalf and to other financial institutions with which we have joint marketing agreements. We will require these companies to protect the confidentiality of your nonpublic personal information and to use it only to perform the services for which we have hired them.

Our Security Procedures

We restrict access to your nonpublic personal information and only allow disclosures to persons and companies as permitted by law to assist in providing products or services to you. We maintain physical, electronic, and procedural safeguards to protect your nonpublic personal information and to safeguard the disposal of certain consumer information.

If you have any questions about our Privacy Policy, please call 1-888-233-4339 on any business day between 8 a.m. and 7 p.m. Eastern Time.

Note: This Privacy Policy applies only to customers that have a direct relationship with us or our affiliates. If you own shares of our funds in the name of a third party such as a bank or broker-dealer, its privacy policy may apply to you instead of ours.
